KLEMME HIGH SCHOOL BASKET BALL TEAMS PLAY TWO GAMES

First Games School Has Ever Played Lost By Small Scores

The Klemme High School can boast of a boy's and girl's basket ball team that are going good, considering the fact that this is the first year the school has ever had a basket ball team.

Both the teams have good material to make a good strong team and all they need is experience and coaching to make them equal to any in this part of the state. Each year the teams will grow stronger as it always takes time to develop a strong team of any kind.

On Friday evening, December 24th both the teams went to Rowan where they played their first game which resulted in a defeat for both the home teams. The boys team were beat by 22 to 10 and the girl's 26 to 11. At this game the Klemme boys played a foul-less game which is considered excellent playing for the first time and on a strange court. Prof. H. T. Wilson and Chas. Gibbs accompanied the teams.

On Friday night, December 30th both the basket ball teams went to Crystal Lake where they played and lost their second game. The Crystal Lake boys beat our team 22 to 14. The first half ended in the score of 7 to 8 in favor of the Crystal Lake five. If our boys could have held them during the second half the score might have been more in favor of the Klemme five. The girls also played an excellent game and were defeated by 3 to 6. The referee for the girls understood a certain method of making baskets, and for every basket made by Crystal Lake two points were counted which in reality only one should have been counted this mistake was not discovered until the close of the game. and if this new rule would have been followed the score would have been 6 to 6 in favor of Crystal Lake. But both teams will learn by experience and although they were defeated in both games they were not beaten bad and they shhow a lot of pep and have the material for good teams.

Following we give the line up in both the teams as they have played thus far:

Boy's Team

C. Adolph Lauritzen
R. F. George Bergman
S. F. Milvern Ell
R. G. Gerald Koerner
S. G. Howard Wiles
Subs.—Donald Stille, Fred Schlichting.

Girl's Team

J. C. Marie Blank
R. C. Maybelle Johnson
Fd's. Glenna Gruetzmacher
Pearl Johnson
G'ds Neota Ridder
Leona Lau
Subs. Faith Axe, Adalla Schroeder

K. H. S. Now In Association

The Klemme High School now belong to the State Athletic Association and are eligible to play any of the teams in the association, which is a strong point in their favor as the school is not now limited to accept games from small schools but can make a schedule with any of them.

Schedule of Games

Game at Goodell Jan. 20th
Goodell at Klemme Feb. 17th
Crystal Lake at Klemme Feb. 24th

All the above games are double headers. that is both the boys and girls will play. The boys will have a practice game with Garner here on either the 16th or 17th of this month. Watch for other dates when the schedule is filled.

Come out to the games and BOOST for the Klemme High School teams.

If you are easily insulted you ought to be.

INSTALLS NEW POSTING MACHINE

State Savings Have Latest Book Keeping Machine

The State Savings Bank hvae installed a Burrough's Posting Machine the past week and a man was here from the factory demonstrating and getting the officers acpuainted with the workings of the new system. The installation of this machine will enable the bank to do the posting and other book work much faster and will eliminate the pile up of book work at the end of the month.

CROSS YOUR FAN BELTS IN COLD WEATHTR

Fertile—A discovery of timely interest to owners and drivers of automobiles was recently made by Paul Humphrey, proprieter of a garage at this place. During the zero weather of last week, a great many cars with frozen radiators were brought to this place for repairs. While at work on one of these machines, the thought struck the young man that if the warm air of the engine could be thrown through the meshes of the radiator, the later would not freeze. After a little experimenting he discovered that this could be accomplished by simply crossing the fan belt, thus reversing the motion of the fan. The novel idea has already been tried out by a great many drivers at this place, and pronounced a big success.

Cross your fan belt the next time you are on the road when the temperature is such that there is danger of the radiator freezing. With the fan reversed, the warm air from the motor will be thrown against the radiator, instead of drawing cold air in through the meshes. Try it out and you'll be pleased with results. Patents are not pending and there will be no danger of infrigement suits, at least so far as Mr. Humphrey the originator of the idea is concerned.

PAVING CONTRACT LET TUESDAY MORNING

Board Gives The Job To Empire Construction Company of Des Moines at $27,000 per Mile

The Board of Supervisors of Kosuth county let the contract to pave the Algona Wesley road. a distance of fifteen miles from Algona to the Hancocck County line yesterday morning to the Empire Construction Co., of Des Moines at $27,000.00 per mile. The Board also let the Contract for graveling the Burt-Bancroft road to the cocunty line for about $1,000 per mile. The topic did not get full particulars in reference to the letting but the price for both paving and graveling is let at a much less igure than any contract has been for several months.

PREPARE CATTLE FOR KILLING

Do Not Feed Before Slaughtering For Best Results

Cattle which are to be slaughtered will be in a better condition if feed is kept from them at least a day according to the animal husbandry department at Iowa State College.

Nothing but pure water should be given to the beef animal selected for at least 24 hours before slaughtering. It is very difficult to bleed thoroly an animal just off full feed. Tissues from which the blood has not been thoroughly drained will spoil much more quickly than otherwise. Keep the animal as near normal temperature as possible. Excitement of any kind will raise the temperature above normal and if it goes high enough it will ccause the meat to turn dark in color and sour in a few hours time. Animals dying from an overheated condition are never fit for food as the meat spoils immediately.

Bruises of any kind will cause the blood to settle in the effected parts and spoil the keeping qualities of the particular cut bruised.

To and Fro

"BUD" ERWIN ANNOUNCES FOR CLERK

First Candidate in County o Announce For an Office

This week we begin to run the announcement of B. E. (Bud) Erwin for Clerk of the District Court subject to the decision of the voters of the county at the June Primaries, 1922

Mr. Erwin has been in the Clerks office for several months now, or since the death of August Baumgartner, who he succeeded.

"Bud" is a "real guy" and has faithfully and effiently performed the duties of clerk since he took charge. We can see no reason why he should not be permitted to take the wheel for the coming term and we believe he appeals to voters of the county as the logical man for the office. "Bud" is a young man who served his country during the World War and has a clean record. He is a man with a family.

APPLY LIME IN WINTER

Many Farmers Are Planning To Put Lime On Farms

Applications of lime can be placed on the soils any time between now and spring and the result will be good, say the soils experts at Iowa State College. Where clover is to be planted i nthe spring it is a good plan to test the soil and ascertain the acidity.

In a series of tests conducted in Linn county recently by H. W. Warner of the soils department of Ia. State College, 500 samples were tested and 85 per cent were found to be acid enough to need lime before clover would grow at its best.

Many farms were cropped heavily during the war and the fertility reduced, say the experts so that on returning to the crops that will replenish the soil it is a good plan to add lime.

Recent examinations of soils in Johnson county show that there is a need of lime at the rate of three to five tons per acre. This will be applied to clover fields already planted and to land that it is to be sown to clover.

Where alfalfa is planted the increase in the crop by the application of lime will more than pay the bill. Where lime is ti be purchased it will be a good plan to consult the county agent and by getting the lime in carload lots it can be purchased considerably cheaper.

For Clerk District Court

I hereby announce my candidacy for clerk of the district Court of Hancock County, Iowa subject to decision of the voters at the republican primary election to be held June 5th, 1922. J-5tf

B. C. Erwin

There will be a play entitled Deacon Dubbs Given by the young people of District No. 4 Twin Lake Township, nine and a half miles south west of Klemme Tuesday evening January 10th, 1922. In connection with the play there will be a basket social. Girls please bring baskets.

1-w-pd Myra Mabie, Teacher

SHOOTS FOX

A week ago last Sunday Ben Grieman bagged a fine fox southwest of Garner. Leave it to the Grieman boys to get the game if there is any in the country. They get their share of foxes and wolves if anybody does.

MRS. HENRY KRAUS DIED CHRISTMAS DAY

Mrs. Henry Kraus died Sunday, December 25th at the home of her daughter, Mrs. Schwichtenberg, near Klemme, at the age of 86 years. She also has a son Wm. Kraus at Garner.

Mrs. Kraus has been ailing for a number of months previous to her death and the end came as a relief to her suffering.

Funeral services were conducted from the First Methodist Church in Klemme last Tuesday and was officiated by Rev. Bergman of this place and Rev. Gauger of Garner. She was Laid at Rest in the Klemme Cemetary.

KEEP UP POULTRY WORK

Many Loafers Being Removed From Iowa Flocks

Poultrymen are still working at culling, according to reports from county agents received at Iowa State College. Altho mast flocks are supposed to be culled by this time, there are still a chance to rid the flocks of hens that do not pay their board.

C. C. Scot, County agent of Calhoun county, reports that in November he handled 1,445 birds and eliminated 303 non-producers. In Clarke county 13 flocks were inspected. 1.615 hens were culled by county agent Bisig and 699 hens were found unprofitable to keep.

In order to get the best results from poultry they should be inspected carefully at all times and whenever a falling off in production takes place a carefull culling will save money for the farmer, say the poultrymen.

MINOR MUSINGS

No man is a hero to his wife, of course, but unless he's a hero to his very young son there's something wrong with the man.

You can't alter the color of a drab life by painting it with red liquor.

The girl who refusesto go to the dance because she has nothing to wear is foolish. Supposing she hasn't, she will look just like all the others.

A balky mule can be started by building a fire under him, but you can't start a balky automobile that way.

The other man's business is all profit.

When a young man who never before has done it suddenly begins to economize, the answer is that some girl has "hooked" him.

If nobody judged lest he should not be judged there would be a lot of policemen, courts and jurymen out of a job.

Many a man who fumes and swears if he has to wait five minutes for his wife to get ready for the theatre, will coax and pet his balky automobile for an hour when it refuses to start without getting out of patience.

The reward of faithful service too often is, "He was a good man in his day."

A fool whho knows he is one has some sense.

Only those who think more of their work than they do of their pay get more pay.

Nearly everybody forgets a favor but hardly anybody forgets a wrong.

If you must have spies in your business, you'd better get out of busines.

The crab at home is often a fish in society.

News Gathered From All Over The State of Iowa

WOULD CHANGE THE BIG TENTH DISTRICT

A plan has ben proposed for redistricting Iowa, shhould Congress pass the pending bill to change the basis of representation. It places Osceola, Dickinson, Emmet, Clay, Polo Alto, Kossuth, Winnebago, Hancock, Cerro Gordo, Pocahontas Humbold, Calhoun and Webster counties in the ninth district. The population of them is 233.153. The tenth district would consist of Lyon, Sioux, O'Brien, Plymouth, Cherokee ,Buena Vista, Woodbury Ida Grove and Sac, having a population of 243,220. These counties are now in the eleventh district. At present Cerro Gordo is in the fourth district and Osceola, Dickinson and Clay in the eleventh. The new plan would put Hamilton and Boone in the fourth, Carrol and Greene in the sixth and Crawford in the Eighth. At present te 10th district has fourteen counties. They are Emmet. Winnebago, Hancock, Pocahontas, Humbolt, Webster, Calhoun, Crawford, Carroll, Greene, Boone and Hamilton. There has not been any change in the Iowa districts for perhaps thirty years.

Alteration in District boundaries are from time to time necessary. Iowa does not seem to like to lose a Congressman but, with the new arrangement, several states that have grown in population must have increased membership, if the districts in this and several other states are ta remain as they have during the past quarter of a century or more. In case the bill providing the other rearrangements of districts should be adopted, there will be a scramble to determine what Cangressman is to pass its official oblivian. One district would as a result of the alterations contemplated, be erased from the map of our state and the boundaries of several other districts would be changed. Those who have for years devoted special attention to congressional and legislative affairs should be posting up and preparing for the conflict which is bound to come soon. The outcome will have considerable effect on the prestige of vertain cities and towns as well as on theprospectus of those who are aspirants of official distinction.

EDITOR RAMSEY, BELMOND POSTMASTER

Dispatches from Washington last week announced the appointment of Wallace Ramsey, editor of the Belmond Herald-Press, as postmaster of Belmond. He will take possession within a few weeks. The salary is $2300, a sum most editors could make use of at this time. Mr. Ramsey will make a competent and obliging official and his many friends congratulate him on his appiontment.

EDITORS TAKE VACATIONS

Editors Roberts of the Britt News Tribune, L. W. Miller of the Renwick Times and R. A. Jorgenson of the Klemme Times announced two weeks ago that they would not publish a paper the following week but would take a real vacation and enjoy the Chhristmas time with their families relatives and friends.

Everyone is entitled to a reacreation and a rest and we hope that our brother publishers enjoyed every minute of their vacation.

Kanawha Reporter

BASKET SOCIAL

There will be a Basket Social five and one-half miles straight west of Klemme. Liberty Twp. No 9 on Friday evening Jan 13th. All girls bring baskets.

Cora Fisher, Teacher

Manure is especially valuable on heavp soils where it helps to open up the physical texture, while in the lighter soils the manure serves to hold the particles together and retain moisture in a better manner.

Protect The Berry Bushes

Rasberry busches will be in better shape if they are covered over with old straw and protected from the winter storms. Bend the cans over, all in the same direction and apply the litter. Leave it on until the weather warms up and then uncover.

IOWA NEWS BRIEFS

Poultry prices have not tumbled in price as has many other farm products in the past year. For the 1st ten months of 1921 poultry was 75 per cent higher and eggs 65 per cent higher than the pre-war level. The one compelling thing about the poultry situation during the last year, is the way the market was held up. This will of course focus attention on neglected farm flocks as a source of income. and stimulate backyard poultry keeping. In a year or so this increased interest in poultry will tend to lower prices of poultry and eggs.

James Davis, a murderer and Ralph Lawshe, a forger, have escaped from the state prison at Ft. Madison.

One and a half fare has been offered by the railroads for the farmer's meeting at Ames Jan. 30 to Feb. 4.

The state Bank of Otto with a capital stock of $25,000, was thrown into receivership recently in District court on petition of the Iowa banking superintendent.

Illness preventing John Bryan a farmer near Pisgah. from gathering his corn, a company of his neighbors gathered 1,000 bushels of the crop and cribbed it for him meanwhile the women members of the families prepared a big dinner and the event was made a day of jollification.

The Iowa cigaret tax is a big revenue producer. J. E. Thomas, deputy auditor stated that from July 1 to Nov. 30 the state realized the revenue of $269,621.02 in addition to expenses. The expense for this period wede $8575.58. The auditor's office has supplied the state treasurer with $300,000 worth of revenue stamps since June 10th and has recently obtained a new supply sufficient to last until next July

Thirty eight county and district fairs in Iowa lost money in 1921. Secretary of the state department of agriculture said in his annual report before the Iowa Fair Maagers Association in convention recently in Des Moines. While only 54 of the 92 county and district fairs operated at a profit, Mr. Corey said that the total profits exceeded total losses. The state paid to defunct fairs this year $157,690.90, an excess of $44,667.66 over 1920.

NOTICE OF SPECIAL SCHOOL ELECTION

BOND PROPOSITION MESERVEY, IOWA.

Public Notice is Hereby Given, That a special election of the Consolidated Independent School District of Meservey, in the counties of Cerro Gordo, Hancock, Franklin and Wright. State of Iowa, will be held on the 12th day of January, 1922, at the City Hall, Meservey, Iowa, from one o'clock P. M. until six o'clock P. M. and that at said election there will be submitted to the voters of said Consolidated Independent School District to be by them voted upon, the following proposition:

Shall the Consolidated Independent School District of Meservey, in the counties of Cerro Gordo, Hancock, Franklin and Wright, State of Iowa, issue bonds in the sum of Sixty Thousand Dollars ($60,000) for the purpose of constructing and equipping a new school house?

At which time and place all of the voters of said Consolidated Independent School District are hereby notified to appear.

This notice is Given by Order of the Board of Directors of said Consolidated Independent School District. pursuant to a sufficient petition with the requisite signatures in accordance with Section 2820-a1 et seq. of the supplement to the Code of Iowa, 1913.

Dated at Meservey, Iowa, this 7th day of December, 1921.

D-15-22 29 J 6 K. Clarence Reich, Secretary, Board of Directors

What he did with his spare time in a strange city before there were "movies?"

A soft snap is hard to find.

May Take New Census in 1925

Considerable Dissatisfaction Expressed Over Count Made Year Ago.

REPRESENTATION IS AFFECTED

Census Taking in January Is Disapproved on Ground That Weather in That Month Is Serious Handicap.

Washington.—Because of "considerable dissatisfaction" with the result of the count in the census taken last January, the house census committee is considering legislation providing for another enumeration of the population of the United States in 1925, or some other year prior to the next decennial census, Secretary Hoover says in that portion of his annual report dealing with the activities of the census bureau.

"This proposed legislation has my approval," Mr. Hoover says, adding that "it has frequently been contended that the distribution of the population as shown by the reports of the fourteenth census is abnormal," and that prior to that enumeration there was a great movement from rural to urban districts which, since the enumeration, has been neutralized in large measure by a reverse movement.

Affects Congress Representation.

"Further, it is said, that this shifting of the population affected the totals for certain states, thus influencing the apportionment of representatives in congress."

Census taking in January is disapproved on the ground that the weather in that month is a serious handicap to the enumerator, delaying the work and making it necessary "to take unusual precautions to insure a complete canvass."

The report says that the time for taking the next census should be in April, as was the case before the last census. The change for the last census was made, it says, at the request of various interests making use of agricultural statistics, the idea being that more accurate statistics could be obtained concerning the activities of the farms if the canvass was made shortly after the end of the year to which it related.

Mr. Hoover also says that the new director of the census, William M. Steuart, is of the opinion that, in order to advance the work of subsequent censuses, it will be necessary that changes be made in methods of procedure, if not in the scope, of some of the inquiries.

"It would hasten the publication of the figures for the total population," the report says, "if the supervisors in the various districts made the preliminary count and announced the population, subject to correction, for the political subdivisions of their districts."

To avoid duplication of effort and eliminate annoyance to manufacturers and others, the commerce secretary has asked the director of the census to negotiate with other statistical bureaus of the federal government looking to a consolidation of effort in this direction.

Receive Many Complaints.

"Many complaints have been received from manufacturers and others concerning the numerous requests made by the federal bureaus for statistical and other information," Mr. Hoover says. "I feel confident that in many instances the periodic investigations of the bureau of census are all that is necessary to make, and that the investigation of the other bureaus could, with advantage, be discontinued."

Calling attention to the fact that some census records were destroyed in a recent fire in the department of commerce building, Mr. Hoover declares that a hall of records in which these documents can be stored and conveniently examined is urgently needed.

Punishment for Gluttons.

Berlin.—To punish gluttons with fines as high as 100,000 marks for the first offense and five years for the second is the purpose of a bill introduced in the diet. Foreigners are not exempted.

Charged With Keeping Little Girl Like a Dog

Charged with literally having treated her eight-year-old granddaughter like a dog, Mrs. Lillie Gross of New York city is being held without bail pending investigation.

The complaint alleges that the woman tied the child under the house all day, made her sleep on an old coat beside a real dog, kept her in the coal bin during rainy weather, beat and underfed her, and sent her into the streets to beg.

RACE ON ISLAND FAST DYING

Disease Reduces Population of Marquesas From 100,000 to 1,800 in 50 Years.

Honolulu, T. H.—Tremendous decreases in the native population of the Marquesas islands, 2,000 miles south by east of the Hawaiian archipelago, have resulted from the ravages of disease and the adoption of many modern customs, recently, according to Dr. G. S. Handy, ethnologist of the Bishop museum here, who spent nine months on the islands gathering data on the origin of the Polynesian race, habits and customs of the natives, and their ethnology and anthropology.

"Fifty years ago the Marquesas islanders probably numbered between 50,000 and 100,000," Doctor Handy said. "Today there are only about 1,800 natives. Smallpox and pokoko, a particularly swift and virulent form of tuberculosis, played havoc among them."

Bridge to Have Longest Span

Structure to Connect Detroit and Windsor Will Break All Records.

WILL MEASURE 1,802 FEET

Upper Deck Expected to Be Ready for Service Within Four Years—Two Years More Will See Bridge Completed.

Detroit, Mich.—Plans for the new international suspension bridge to connect Detroit and Windsor, just announced, show that it will have the longest single span in the world, measuring 1,802 feet, or 24 inches longer than the great cantilever at Quebec. Of double-deck construction, the new link between Canada and the United States will accommodate street car, automobile and pedestrian traffic on the upper deck and passenger and freight train service on the lower deck.

Barring unforeseen delays, actual construction work will commence next spring, and within four years the upper deck should be ready for service. Without interfering with traffic on the highway deck, it is planned then to begin construction of the lower deck, which should be finished in two years more.

Weighs 107,000 Tons.

The bridge and its approaches will have a total weight of 107,000 tons, with eight cables carrying the huge span. Six of these cables will be 21 inches in diameter, and two will be 18 inches thick; together they will support a pull of 146,000,000 pounds.

Suspended from two towers, each rising 380 feet above the water, the span will have a width of 97 feet for the highway deck with two trolley tracks, two sidewalks and two roadways, while the lower deck will have four railway tracks and a 20-foot space for public utilities equipment. Electric locomotives would be used for traffic across the lower deck.

Completion of the bridge will mean the end of the train ferries, which for years have carried freight and passenger traffic across the Detroit river, even after the opening of the Michigan Central tunnel.

The bridge, which will be built by the Canadian Transit company and the American Transit company, with the approval of the Canadian and United States governments, will span the river almost from the center to the shore line of the two cities. Construction is expected to begin from the American side.

Bonds for $30,000,000.

The promoting companies have been authorized to issue $30,000,000 in securities for the project. It is estimated that completion of the highway or upper deck will cost approximately $15,000,000. Purchase of shore space for the approaches is under way.

Plans for the bridge were drawn chiefly by Charles E. Fowler of New York. Associated with him in the erection of the structure will be George H. Pegram, chief engineer of the Interborough Rapid Transit company, New York; Prof. William H. Burr of New York, Col. C. M. Monserrat, Montreal; Prof. C. R. Young of the University of Toronto, and Prof. H. E. Riggs of the University of Michigan.

Trying to Save Vollendam's Ducks

A government veterinary is shown inoculating one of the 100,000 ducks in the picturesque little Dutch village of Vollendam, on the Zuyder Zee, against the duck plague which threatens to wipe out the town's principal industry. The ducks are fed on tiny fish, too small for human consumption, which abound in the Zee. Recently the waters about the village have become stagnant and filthy, resulting in the epizootic.

HE WANTED TO FIGHT GERMANY

Arctic Adventurer Travels Three Years to Enlist.

Arrives in Nome and, Not Knowing the War Was Over, Tries to Enlist in American Army So He Could Fight in France.

Nome, Alaska.—An arctic adventurer, B. D. Seaman, sailed into Nome from the frozen north recently, and, not knowing that the war was over, tried to enlist in the American army so he could fight in France.

Seaman said he had been three years getting to Nome from the Coronation gulf country, which lies far east on Canada's Arctic coast, and during his journey had received no news from the outside world. He left the gulf, he declared, in October, 1918, when he first heard the United States had entered the war. Seaman was formerly a member of the then Royal Northwest Mounted police.

Soon after Seaman started for Nome the small schooner on which he was journeying was wrecked in the ice, he said, and he and his companions were forced to walk 27 days before they came to an Eskimo village. On their way they lived on roots.

Seaman gave an interesting description of the life of the Eskimos of Coronation gulf. The natives, he said, still use the bow and arrow, but are gradually getting accustomed to the use of firearms, which were introduced recently. The natives live on caribou and seal.

A rifle in the Coronation country sells for $160, cartridges for 30 cents each, sugar is $1 a pound, butter $3.80 a pound and milk $1 a can, Seaman said. The cost of clothing, however, is lower, a "parka" cape being sold for $4, muckluks, or native shoes, for 50 cents a pair and fine fur mittens for three boxes of 1-cent matches.

Mounted police in the Coronation country get mail sometimes three years old. Once, before he left, a constable got quick service on a letter, it being delivered from England in thirteen months.

Seaman said he probably would go back to Coronation gulf, "where a big pot of trouble like a World war doesn't reach us until it is all over."

JOHN D. JR. BORROWS COAT

Rockefeller Tells of Attending Imperial Garden Party in Tokio in Borrowed Raiment.

New York.—John D. Rockefeller, Jr., told how he borrowed a frock coat from the American ambassador to attend an imperial garden party in Tokio.

Royalty were required to go in European dress, citizens in native dress, and foreigners in frock coats.

Mr. Rockefeller said he was about to forego attending because there was no frock coat in his baggage, when the American ambassador said he had two and Mr. Rockefeller could wear one of them.

Washington

As a result of ratification of the Colombia treaty, under which this government agreed to pay that republic $25,000,000, a new commercial treaty will be negotiated with Colombia at Washington.

* * *

President Harding at Washington has commuted the sentence of J. Herman Bierks, a banker of Cincinnati, convicted under the espionage act during the war, to expire on News Year's day.

* * *

The United States government will take part in an international economic conference called by some other government, but will avoid the initiative in such a plan, Secretary Hoover said at Washington.

* * *

Although regretting the deadlock existing in the Shantung negotiations in Washington with China, Japan will not reopen them. This attitude was made plain by foreign office officials at Tokyo.

* * *

Despite the refusal of the armament conference to take up the quest of land armament, the whole subject will be opened up in congress after it reconvenes in Washington on January 3.

* * *

The entire Hughes program for limitation of naval armament at Washington went on the rocks with a smash that leaves hope of saving intact only the capital ship ratio agreement, if that much.

* * *

The government at Washington values important crops of the nation at $5,675,877,000, or $3,399,423,000 less than last year.

* * *

The four-party treaty will destroy the Monroe doctrine, Senator Borah said at Washington, in discussing the agreement which proposes to make the United States an ally of Japan, Great Britain and France.

* * *

Approval of 142 advances to banks for agricultural and live stock loans was announced by the War Finance corporation at Washington. The advances aggregate $5,089,000, and include Illinois, $25,000.

* * *

Senator La Follette in formal statement at Washington charges railroads, coal, steel and lumber interests with secret attempt to "exploit the American people through the freight rate agreement."

* * *

The French delegates at Washington received instructions from Paris to reject the latest American proposals on submarines.

* * *

Domestic

By a majority of 5,500 St. Paul, Minn., voters decided to retain the commission form of government. A new charter providing return to the mayor and council plan was defeated.

* * *

F. Price Murphy, a manufacturing jeweler, committed suicide at Des Moines, Ia., by drinking poison.

* * *

Damage estimated at $400,000 resulted from a fire that destroyed the establishment of Davidson Brothers, wholesale fruit dealers at Des Moines, Ia.

* * *

Four robbers shot and killed the assistant cashier and a clerk of the First National bank at Pearl River, N. Y., and escaped in an automobile after wounding a railroad guard.

* * *

Theft of more than $1,000,000 in supplies from the army base in Brooklyn was believed to be cleared up by the arrest of three men for stealing $10,000 worth of shirts. Among the missing items are 3,000,000 safety razor blades.

* * *

An anticipated layoff at the Burlington railroad shops at Aurora was announced as effective with the new year, but the cut in working forces—9 per cent—is not as large as was expected.

* * *

Lewis Morris Iddings of Warren, O., long-time secretary of the American embassy in Rome, and prominent in war relief work in Italy during the war, died suddenly in Rome. He was seventy-one years old.

* * *

The American-built JL-6 monoplane, piloted by Eddie Stinson and Lloyd Bartaud, landed at Roosevelt flying field at Mineola, N. Y., at 11:17:50 a. m., establishing a new world's record for an endurance flight. The unofficial flying time was 27 hours, 2 minutes and 50 seconds.

* * *

Earl Throst, confessed slayer of Miss Irma Magunson, twenty years old, a school teacher of Dorchester, was sentenced to be hanged on March 9, 1922, by Judge Taylor in District court at Waukon, Ia.

Rare wines and liquors to the amount of $100,000 were stolen from the $1,000,000 Chicago home of Charles A. Stonehill, multi-millionaire wholesale milliner.

The SANDMAN STORY

MR. MOUSE'S GOOD LUCK

IT HAD been cold and Mr. Mouse had almost starved, for in the house where he made his home in the wall there was little to eat, the family having gone away for the winter.

At first Mr. Mouse did not care. He was the only mouse in the house, and there were plenty of crumbs and bits of food left by the careless cook. Then when those were gone he found shoes and many other things that he could eat, even though he would not have chosen to eat them if there had been plenty of other things.

But at last there came a day when there was not one thing he could eat in that whole house. He was sure, for he looked before he started out in the cold world. The ground was covered with snow, but he knew that he had some cousins that lived near by and he decided to call on them.

There was the very Madam Puss

Mr. Mouse was hurrying along, for the snow was not so comfortable as the floors of the house where he lived, when all at once who should he see right in front of him but Madam Puss.

There was not a minute to think, for she had seen him. Mr. Mouse knew by the switching of her tail, as well as by her big eyes. There was no place to run for shelter. It was all open around him, so he dashed off without knowing where he was going.

But luck was with Mr. Mouse that day, as you will see. He was on a pond that was frozen over—that is, almost frozen over, for right in the middle of that pond was one very thin place.

Mr. Mouse did not know about this thin ice, of course, but it was his lucky day, you see, so right across the pond he ran, with Madam Puss after him. Mr. Mouse was very light and Madam Puss was plump, for she had been well fed.

When they came to the thin ice, over went Mr. Mouse safely. But, alas! poor Madam Puss! It was hard enough anyway trying to chase a mouse over the ice, but when she came to the thin place it cracked and in went her front paws, and for a minute it looked very bad for poor Madam Puss.

Mr. Mouse found it hard to run over the ice, but he did not stop when he heard the cracking. He kept right on and reached the bank on the other side and up he went.

He was pretty cold, as well as scared, and when he came to a place where he could run in he did not wait to look it over, and as it was his lucky day he found he was in a house where there was plenty of food.

Mr. Mouse was soon nibbling away in the pantry and thinking himself very fortunate to have found such a nice place for his new home when a great disturbance in the kitchen made him stop and peek through a crack in the door.

There was the very Madam Puss who had chased him and the cook making a great fuss over her because she was so cold and wet.

"Poor Puss," cook was saying. "How did you get so wet and cold? You shall have some nice, warm milk and I will fix a place for you under the stove."

"All that fuss over a Puss," said Mr. Mouse, "and she will scratch and drink up the cream, while I never harm anyone and only eat the crumbs I find lying about.

"But I guess I will stay here until my family comes back. A well-fed cat is not dangerous, and if I am careful not to eat anything but crumbs I am sure they will never know I am here and not set a trap for me."

So there he lived, and when the sun was shining one day away he ran to his old home, where he found plenty to eat and his hole in the wall still vacant.

It was a long trip around the pond, for the ice had melted, but Mr. Mouse on the way said he did not mind that, for the longest way round is the shortest way home sometimes.

"If I had tried to cross that pond now," said he, "I might have drowned or some animal might have caught me, and though crossing the pond was the shortest in distance, if I had never reached my old home, it would have been the longest way for me, and I think I am a very wise mouse to reason it out."

Anita Stewart

It's a big Jump from a career as an artist's model to the top-notch place held by one of screendom's most popular stars, but charming Anita Stewart made it. She was born in Brooklyn in 1896. At the age of fourteen she was attracted to the motion picture studios. Finishing school, her rise to stardom was rapid. This is one of her latest pictures.

JACK FROST AIDS

By RUTH W. BAKER

©, 1922, by McClure Newspaper Syndicate.

Pauline rose impatiently from the great davenport. Why should it be so difficult to make a decision? Surely she could not love two men equally well? She could be happy with one, of that she was sure, but, alas, Jim's voice had great power to thrill her!

The sound of his step on the stair could cause her heart to beat suffocatingly. Last night, at the country club dance, both men had asked the right to place on the third finger of her left hand the shining circlet which means but one thing. She thought whimsically that it was unfortunate that she could marry but one.

The girl was no coquette. She instinctively shrank from the thought of bringing unhappiness to anyone. But, which one should she marry? Channing was coming this afternoon for his answer, and she was no nearer to knowing what that answer was to be than she had been the night before. Restlessly she wandered from room to room, readjusting a chair here, a curtain there. She moved across the room to the window. There she stood watching the children who were sliding on the icy walk. Their hearty laughter rang through the clear, frosty air, and Pauline smiled in ready sympathy. She would have liked to have joined in their sport.

A familiar figure rounded the corner and she caught her breath. It was Jim! Oh, surely he wasn't coming to see her now! Surely he must remember that he was not to come until evening! He must not be there when Channing arrived! Hastily she rang for her maid.

"Hester," she said, "I am at home to no one but Mr. Channing."

"Very well, Miss Pauline."

The girl turned again to the window. The man was rapidly approaching the house and she noted with a sense of pleasure the air of distinction about him. She remembered how proud she had been of her handsome escort last night. Channing was a dear, but he lacked the assurance, the clever wit that made the other man stand out from his fellows. A wave of pity swept over her, and instantly she knew that she had made a decision. She was sorry for Channing because she must hurt him by marrying Jim!

As the hurrying man reached the stone steps one of the children, with a squeal of pure joy, slid along the sidewalk and lost her balance directly before Jim. Pauline, watching from the window, could not suppress her laughter. The dignified James, of all people, to be sitting, crimson with embarrassment, on an icy sidewalk directly before her house! A moment later her mirth changed to consternation, then quickly to anger, for, having struggled to his feet, Jim had seized the innocent cause of his ignominous tumble and was energetically shaking her.

"Now run home, every one of you," he cried furiously, and like frightened rabbits the children scurried around the corner.

Pauline held her breath as she watched him straighten his hat, glance furtively and somewhat sheepishly at the windows, then stride up the steps. "Oh, I hope Hester remembers," she whispered, as she drew back still further from the curtained window. "I never want to see him again! That poor little girl."

She heard the door open, then close, and Jim went slowly down the steps again. She felt no thrill now as she watched him. In a half panic-stricken way she was thinking, "And I might have married a man who didn't like children!"

As the minutes went slowly by she began to fear that Channing, too, might fail her. At last he came, but not exactly as she had expected him, for he almost—no, actually—rushed into the room, holding in his arms a child whose grubby fists were making strange marks on a tear-wet face.

"I knew you wouldn't mind if I brought the little shaver in, Pauline," was Channing's greeting. "You see," he burst into a hearty laugh, "we had a little mix-up on the ice, and when we got untangled this chap seemed to be on the casualty list. I thought some witchhazel might fix him up all right."

With shining eyes, Pauline ran upstairs for the bottle, and together they bathed the bruises. Soon the child slipped off Channing's knee. "I gotta go home now," he announced. A moment later, with a slice of cake in each hand, he was ushered ceremoniously out the front door.

Pauline turned to Channing. "I think you are the nicest man I ever knew," she exclaimed.

"Why, Pauline," stammered the surprised Channing, "Do you—will you—that is, may I——"

"Yes," interrupted the girl, with a happy laugh, "I do, and I will, and you may!"

Case in Point.

"Don't you think," said the philosopher, "it's a great mistake for a man to wear himself out in an effort to get ahead of the other fellow?"

"A very great mistake," replied Mr. Chuggins. "I once tried that with a motor cycle cop."

At the Faculty Tea.

She (sweetly, as they sip their tea together)—Isn't this delicious?

He (absent-mindedly)—Yes, I love to take tea with a little lemon.

POULTRY

PRACTICAL FATTENING WAYS

Where Crates Are Used Little Space Is Necessary—Exercise Is Not Desirable.

(Prepared by the United States Department of Agriculture.)

Three methods of fattening poultry are used in this country—pen fattening, crate fattening and machine cramming. The first two are the most common; the third is used only where but a few birds are to be fattened.

Pen fattening is practiced by many persons who do not have the time and inclination to use other methods. The essentials of pen fattening are quiet, darkness, except at feeding time, and plenty of soft feed given at regular intervals, usually three times a day. Birds may be kept in flocks of 15 or 20, but the sexes should be separated.

In crate fattening a few chickens are kept in crates and fed from a trough. A crate 6 feet long, 18 inches high, and 18 or 20 inches wide, is suitable and is large enough for a dozen birds. Sometimes the crate is divided into two or three compartments, four to six birds being kept in each compartment. Little room is desirable, for the less exercise the birds have the more readily will they fatten. If the crate is to be left outdoors the top should be covered. The sides should be made of slats about two inches apart, so the birds can eat from the trough which is hung just outside the crate. The bottom of the crate should be of slats about an inch apart, to permit the droppings to fall through, or dropping pans may be used and the crates arranged in tiers. In indoor feeding the crates should be put in a well-ventilated room. Usually the birds are fed three times a day and are allowed to eat for half an hour at a time, when the uneaten feed is removed.

Crate and machine cramming are described in Farmers' Bulletin 287, issued by the United States Department of Agriculture, and it would be advisable to procure a copy.

Crate-fattening birds should always have soft feed. As they have no exercise they require a feed that can be digested easily and quickly. This mixture is used in a New York poultry farm: 100 pounds finely ground barley, 100 pounds finely ground corn and 100 pounds finely ground oats (with hulls sifted out). Buttermilk or skim milk is used for mixing to the consistency of thick cream, the buttermilk being preferred. A little salt sometimes is added. In this instance the birds are fed twice a day at intervals of 12 hours and are fattened for about three weeks. It is important that the intervals between the feedings should be as nearly equal as possible.

Crate Fattening Is One of the Most Common Methods.

Another ration is: 100 pounds ground oats, 100 pounds ground corn, 50 pounds low-grade flour and 4 pounds tallow.

MILK EXCELLENT FOR FOWLS

Productive of Good Money-Making Results and May Be Fed Alone or to Moisten Mashes.

One class of feeds that is excellent for poultry and that can be used advantageously on dairy farms, includes milk, skim milk, buttermilk, sour milk, cottage cheese, etc. These are all productive of good money-making results and, where they are available, it is wise practice to feed them. They may be fed either alone or used to moisten the mashes.

The mash, however, should not be moistened one day and then fed dry the next. Follow one or the other of the two plans constantly. Fowls will convert what many times would otherwise waste, into meat and eggs if fed the milk and its by-products that are often obtainable on the farm.

DUST BATH FOR FOWLS

Fowls will keep themselves free from vermin during the winter months if given a convenient place to dust. A box 30 inches square and 12 inches deep may be built in one corner of the house or pen, or such a box may be made with legs so as to raise it above the floor. Almost any fine dry powder will make good dusting material.

CRAMPS, PAINS AND BACKACHE

St. Louis Woman Relieved by Lydia E. Pinkham's Vegetable Compound

St. Louis, Mo.—"I was bothered with cramps and pains every month and had backache and had to go to bed as I could not work. My mother and my whole family always took Lydia E. Pinkham's Vegetable Compound for such troubles and they induced me to try it and it has helped me very much. I don't have cramps any more, and I can do my housework all through the month. I recommend your Vegetable Compound to my friends for female troubles."—Mrs. DELLA SCHOLZ, 1412 Salisbury Street, St. Louis, Mo.

Just think for a moment. Lydia E. Pinkham's Vegetable Compound has been in use for nearly fifty years. It is prepared from medicinal plants, by the utmost pharmaceutical skill, and superior methods. The ingredients thus combined in the Compound correct the conditions which cause such annoying symptoms as had been troubling Mrs. Scholz. The Vegetable Compound exercises a restorative influence of the most desirable character, correcting the trouble in a gentle but efficient manner. This is noted, by the disappearance, one after another, of the disagreeable symptoms.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcels Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores. Advertisement

Far From It!

"Was that your wife I saw you with last night?" "I should say not! That was a friend of mine."

GOOD LOOKS FOLLOW GOOD HEALTH

If You're a Young Woman This Advice is For You

Aurora, Nebr.—"My mother was always a great believer in all of Dr. Pierce's medicines and when I was a girl she gave me the 'Favorite Prescription' when I was in a rundown, nervous condition and it soon built me up in health and strength. I am glad to endorse Dr. Pierce's Favorite Prescription as being a splendid tonic for girls or women who suffer."—Mrs. Walter Guard, 608 Tenth St.

How can delicate, sickly girls hope to become healthy women? A healthy state of the system comes with Dr. Pierce's Favorite Prescription. It's a medicine prepared for women's ailments. Get it now in either tablets or liquid from your neighborhood druggist, and write Dr. Pierce, Invalids' Hotel, Buffalo N. Y., for free medical advice.

Use MURINE Night and Morning and Keep Your Eyes Clean—Clear and Healthy

Write For Free Eye Care Book Murine Co., Chicago

TWO, tree mont ago everybody maka plenta keek bouta hot weather. Nobody feela good and only way can keepa cool ees go een da swim or taka da clothes off. For longa time I losa da ambish every day.

But now da weather changa da deesposish and I gotta more trouble as een da summertime. Somaday ees too cold now and I no feela good yet.

Two, tree mont ago I buy da summer suit and he no costa mooch. When I no wear ver moocha clothes he no costa moocha expense. Een da summer you no feela so good from da heat, but da purse he gotta more health as righta now.

One day lasa week da weend was preety cold and da rain feel lika da shower bath. Dat weend he blow da clothes and maka me sheever lika da sheemmie dance. One time ees too cold, other time ees too hot and alla time ees expense.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

WITH THE KNIFE

Since trifles make the sum of human things.—Hannah More.

DON'T hold your knife at table as if you contemplated cutting your way through a barbed-wire entanglement with it. Take it no further down toward the blade than is necessary to hold it securely. In fact it is a mistake to let your fingers rest anywhere but on the handle, save that the index finger may be placed on the edge of the dull side.

When you have finished with a course in which a knife is used place the knife across the side of the plate with the sharp side of the blade toward the center. If you are dining with your family and send your plate to the carver for a second helping the knife and fork should be placed in this way, not removed and laid on the butter plate, much less held in mid-air.

Never hold the knife in the hand save when using it. Some persons you know forget that they have it in their hand and raise it in an awkward fashion with the point of the blade ceilingward. We have all seen humorous pictures of the uncouth man who sits waiting for his plate with his knife in his right hand and his fork in his left, points upward. See that you don't let yourself look as ridiculous.

Never use a knife in eating salad.

Do not use a steel knife in eating fish. Some persons would say, never use any knife at all with fish, but it is quite all right to use a silver knife and small silver knives are especially designed for the fish course. In the ordinary household where fish is served as a substitute for the meat course it is served with the usual knife and fork, but this knife should not be of steel.

Do not use a knife when eating desserts, although in some provincial hotels the waiter will give you a knife and fork with pie. A small knife may be served and used with cheese. When this is done cut off a bit of cheese and place it by means of the knife on the wafer with which it is served and then convey the wafer to your mouth by means of the left hand.

Never, never use your knife as an implement with which to assist food on your fork or to scout about your plate for last morsels. In fact the knife should not be used at all for potatoes or other vegetables these being broken entirely by means of the fork.

If no butter knives are used it is quite all right to use the dinner knife for buttering bread. Remember, however, never to spread more than a small morsel at a time, and never wipe off gravy or other food on a slice of bread by way of polishing your knife before using it on the butter.

(Copyright.)

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel.

JANE

THE quaint old-fashioned name of Jane has two equivalents—Joan and Jenny. It is one of the numerous names, both masculine and feminine, that come from John and its derivatives, and signifies "grace of the Lord." John was originally Johannes or Joanna.

The first feminine form to be used many years after all derivatives of John had come into favor was Joanna, the name of a holy woman of the Gospel, who was never canonized, but received her title of sanctity in honor of one of the St. Johns. In the Twelfth century, the feminine form sprang to real prominence in the south of France and north of Spain. Jehanne and Jeanne were the popular French forms and Juana was the favorite in Spain. Many Jeannes and Juanas married into royal families and gave vogue to their names. A daughter of Edward II was so called, and Joan Beaufort, beloved of James I, was another famous woman of that name.

It was not until the Tudor period that Jane came into vogue, but straightway it was made famous by Jane Seymour and became a courtly title. On the other hand, Jane was accorded such popular usage that it is said to have named jean as an article of dress.

Jenny seems to have appeared as a diminutive, or perhaps an endearment, of Jane. It suggests something much gentler and more alluringly feminine than uncompromising Jane. Jane today summons up a vision of a well-tailored, efficient young person with feministic tendencies, but Jenny represents the unmistakably domestic type. It is she who named the spinning-jenny and Jenny Wren of nursery tales. The most famous woman to bear the name was the golden-voiced Jenny Lind.

Jane's talismanic gem is the turquoise. If set in gold it promises her good fortune and long life, with freedom from dangers and anxieties. Wednesday is her lucky day and 3 her lucky number.

Mrs. Henry Stromer of Portland Oregon, who has been visiting relatives and friends in this and other localities for the past couple of months, called on the H. Paul home at Christmas time. On Christmas day a feast was prepared by relatives at the H. L. Suckow home in her honor before her departure for home on the following Tuesday.

BEWARE OF MOLDY CORN

Moldy corn is causing trouble to Iowa farmers who have corn stored in open cribs, according to reports received by the plant pathlogy department at Iowa State College.

This mold is a fungus which grows when moisture is present and generally enough water accumulates in the cribs to maintain growth. One moldy ear in a crib will ruin many bushels of corn.

Considerably moldy corn has been found in the feilds of Iowa during the past season. Where the mold is bad, the corn should not be picked and placed with other corn. Do not feed moldy corn to livestock or trouble is likely to result from poisoning.

Notice to Dog Owners

Something to Think About

By F. A. WALKER

'TEENS AND TWENTIES

BY EXPERIENCE the child soon finds that food satisfies hunger, that water quenches thirst, that a hard blow gives him pain.

As he grows older he learns that his own actions produce certain results which to him are pleasant or unpleasant.

As a child he avoids doing things that cause him bodily pain.

If he burns his hand or cuts his finger, he dreads fire and sharp-edged tools. He knows that if he takes undue liberties with them he is sure to suffer physically and mentally.

* * *

Deductive reasoning in children at the age of three or four years is as keen as the edge of a razor, but through some trick of time when they merge into their teens, their childish caution flits away and leaves them imprudent and venturesome.

They flash a red light to warn the old folks to beware of the wisdom and superior cunning of youth.

'Teens and twenties are the formative, red-light ages in which both sexes, consciously or unconsciously, shape their destinies.

If in these dangerous ages indulgent parents permit their offspring to have unrestricted freedom, allow them to have their own way at the turning point of the right or the wrong road, the chances are that they will waste their time and substance and drift through life without forming even a nodding acquaintance with success.

* * *

To you who are in these perilous periods, running along madly in pursuit of elusive nymphs of pleasure, "stop, look and listen!"

Stop to consider what you are doing. Look about you at those who are climbing the hills. See how cautiously they step. Listen to the words of wisdom, and especially to the advice of your elders.

They have trod the worldly way and know how treacherous it is; how pitfalls are hidden by alluring glamours, intended to deceive youth; how pride, wantonness and vicissitude take at last to sorrow, eleventh-hour abnegation and finally to broken health and poverty.

You have the power within you to rise to success and distinction.

It is for you, for you alone, to make use of this power, to overcome, to press forward and to make your mark.

Keep on the right path. Hold fast to faith, and at some turn in the road the vista will brighten and you will find yourself at the hilltop, thrilled with unspeakable delight.

—O—

YOUR HAND

How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm.

THE HAND OF AN ARTIST

FOR a person of either sex to win success in any of the various fields of music, literature, etc.—the hand should be supple, and the fingers should be long. Short fingers denote want of attention to details, and this is, of course, in the majority of cases, fatal to the hopes of success in art. "Genius is an infinite capacity for taking pains" is true in art.

Other favorable signs are the following:

A small upper phalanx of the thumb. If, in addition, the thumb is very flat, the fortunate possessor has an exceptionally favorable thumb for an artist.

If the middle phalanx of the second finger, the Finger of Saturn, is well formed and well developed, and long, it is a sign of great love of the beautiful in nature.

The top phalanx of the third finger, the Finger of Apollo, should be strong, to indicate color perception.

—O—

WHY—

DO OUR FACES KEEP WARM IN COLD WEATHER?

OUR faces do get cold, as may be proven by the application of what is known as a "surface thermometer," but we do not feel the cold because the nerves by which we are conscious of a change in temperature are accustomed to this state of things and take no notice of it. If we were accustomed to go out barefoot, but with our faces covered, the present condition would be reversed, and we would not "feel" the cold in our feet, but our face would be very uncomfortable the moment we removed the covering.

The same principle is apparent in a number of other things—in the temperature of water which is too cold to bathe in but hardly cool enough to drink; in country persons who find difficulty in sleeping in the city on account of the noise and city people who can't sleep in the country because "it is too quiet"; in those who are accustomed to work in the glare of a blinding light and those who labor in comparative darkness. In other words, it's merely a matter of habit.

LYRICS OF LIFE

By DOUGLAS MALLOCH

THE LAST CHAPTER

THE hunter's joy is in the tale,
More great than in the kill;
The sailor rides the wintry gale
Not for the wintry thrill
But that at night-time he may sit
Before the fire recounting it.

For this men climb the steepest mount
And walk the widest plain,
And bring to firesides an account
Of all the toil and pain—
The toil and pain made pleasure when
They tell the tale to other men.

For Memory is a healing nurse
Who makes our minds forget
The rocks and rivers that we curse—
No, we remember yet,
And yet remember rather glad
For every hurt we ever had.

Life's an Adventure, like the trail,
The cruise across the seas;
It has its hill, it has its gale,
It has its memories;
And we shall sit in quiet age
Made glad by every blotted page.

Yes, Time shall soften every fall
And leave the story dear.
Life shall be lovely, after all,
The hurts shall disappear;
Without occasional defeat
Life's story had not been complete.

Justice.

Our law says well, "To delay justice is injustice."—William Penn.

HOME TOWN HELPS

BACK TO "OLD HOME TOWN"

To the Returning Man of Affairs, How Many Tender Memories Cluster About It!

For a number of years fall homecomings have been popular in many counties and smaller cities over the country. They are for the most part family reunions, given a wider interest because they attract to the home town or county many friends of yore who might otherwise never meet again. Social occasions are arranged, there are public addresses, special church services, historical reminiscences and various forms of entertainment for the guests from other localities, who left their old home, farms and towns, to meet, let us hope, a larger and more enduring success abroad than they could have done at the old home.

The old town looks small, no doubt, to those who went to the city for their life work; the old farm cramped, to those who now inhabit the wide reaches of the West. But to all the home-comers there are dear places, hallowed by tender memories, to visit—the brook, the ancient sycamore, the beloved hills in the country places; and in the small towns the old home with its multitude of reminiscences.

Homes pass away—into other hands. There is no continuance on earth. Change never ceases its work. Trees die, familiar prospects are marred. Only the skies are unchangeable. So there is a touch of melancholy for all home-comers except the young, because of the ravages of death among relatives and friends. Yet where the old homes are peopled by strangers and their contents distributed among the children, there is one great consolation. It is not the place or the house that is sacred. That is the mere shell set up to protect the family from the weather. The things that were in the house are the objects that the heart is really interested in—the chair that gave comfort to mother; the desk that was father's, the books the gentle and lost sister loved; the intimate possessions of the brother called West; these things touched by vanished hands are the true treasures of the old home, not the building which sheltered them.

Altogether it is well to get back to the old home town or the old home farm. It is an experience in life which does not fade. It stirs something in our souls that too seldom finds expression, and it gives play to a really admirable curiosity to learn of the lives of associates in former years. The city man, particularly, loses something worth while when he turns a deaf ear to the invitation of his home town to come back and be a boy again for a few days.—Utica Globe.

CLEANUP SHOULD BE ANNUAL

Public Health as Well as Civic Neatness Is Promoted by Such an Institution.

An annual week for clearing away accumulated rubbish and trash of material origin should be permanent and the customary adjurations to the populace issued by the health department, and the fire department, the two branches of administrative activity which are particularly concerned with civic neatness.

The fire department [illegible] easier [illegible] this [illegible] particularly [illegible] to insist [illegible] even the [illegible] as to the fire hazard created by accumulations of inflammable rubbish. Every one knows how easily fires originate in trash heaps and the reminder from the fire department is sufficient to start the cleaning-up process.

Not so many people realize the danger to health which arises from permitting waste material to accumulate and gather dirt. The hazard is fully as great as the fire hazard.

Small Town Best.

We rarely hear of a person going hungry or without occupation in a country town. Sleep, which is the great restorer of vigor, is profound and undisturbed during the hours of darkness in the small town, whereas the thunder of traffic and the eternal movements of fellow lodgers in crowded city districts make night hideous and sleep a nightmare.

From a physical and spiritual standpoint humanity in the small town is exempt from many of the misery producing elements of the large city.

When You Build.

Build your house in a plain, simple manner. Don't worry about style, eliminate all superfluous ornament. If your pocketbook compels you to build a small house, don't try to make it a pocket edition of a larger house. Have a good-sized living room instead of a small parlor and a small library. Build it to fit the site, need, purpose and environment.

Worth Knowing.

If you buy about twenty pounds of coarse salt, place it in your cellar and, this winter when the walks and steps are icy and you can't remove it, just strew or sprinkle a little about and on them, you will see the ice crack and it can be removed at once.

Genuine

ASPIRIN

WARNING! Say "Bayer" when you buy Aspirin.

Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians over 22 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Accept only "Bayer" package which contains proper directions.

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

CATS FOLLOW FISH DEALER

Animals of Sheepshead Bay Regularly Take the Trail of the Peddler of Sea Food.

Like the pied piper, the Sheepshead Bay fish dealer has a following of cats as he pushes his cart through the residence section on Friday morning, says the New York Sun. The cats for blocks away hear his shrill cry of "Fresh fish!" or perhaps smell his cargo and come slyly through the streets for a chance at a delectable bit of sea food.

When the fishman gets a customer he cleans and scales the fish on the ground. This is the chance for the neighborhood cats. Their part of the feast consists of the discarded heads and tails of fluke and sea bass.

Obtaining a prized portion, most of the cats break for home to enjoy the repast, while others not so fortunate hang on the peddler's heels and follow him about until he finally makes a sale and permits them to profit on his loss.

Life's Tragic Moments.

When you work in a small office,
AS WE DO,
And think the boss has left the office,
AS WE DID,
And begin talking about the "night before."
AS WE WERE,
And then find the boss is standing in a corner listening to the conversation
AS HE WAS,
DO TELL US.
—Detroit News.

Sure—If They Last That Long.

"When you've been married 50 years, you call it your golden wedding, don't you?"

"Yes, my son."

"And 75 years is called a diamond wedding, isn't it?"

"Correct, my son."

"Then, when you've been married a hundred years, you'd call it your radium wedding, wouldn't you?"

"Mother, put this boy to bed!"—Science and Invention.

Another Viewpoint.

Beginner (after repeated failures)—"Funny game, golf." Caddie—"'Tain't meant to be."—Punch.

The Gallery.

Lord Blessus—Yes, we've been fo hunting. Do you like the sport?

Mr. Eaglebird—It looked to be like the hounds were doing all the hunting while you fellows were just following to look on.

Don't Forget Cuticura Talcum

When adding to your toilet requisites An exquisite face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum) 25c each everywhere.—Advertisement

HIS GOOD BUSINESS SENS

Easy to See That This Restaurant Proprietor Will Succeed in His Line of Trade.

First Guest—Hi, waiter, open that window, please. I can't stand the heat.

Waiter—D'rectly, sir. (Opens the window.)

Second Guest (a little later)—Waiter, there's draught enough to give one a death of cold. Do shut the window.

Waiter—Yes, sir. (Shuts the window.)

First Guest—Waiter, are you mad? Why have you closed the window? Open it again at once.

Waiter—Very good, sir. (Goes to proprietor.) Sir, one of the gentlemen wants the window open and the other wants me to shut it. What am I to do?

Proprietor—Do what the gentleman says who hasn't dined yet.—Peterson's Weekly.

He Was Only Sparring.

Judge—A few minutes ago you swore that you were only sparring with the plaintiff and that was what injured him. Now we have proved that you struck him over the head with a blunt instrument. Why did you lie?

Prisoner—I was telling the exact truth, your honor; it was a piece of spar I hit him with.

When a young man tells a girl a lot of yarns she isn't to be blamed for giving him the mitten.

Uncommon Sense

By JOHN BLAKE

MR. TAFT'S AMBITION

FROM the day he left law school it was the ambition of William H. Taft to be chief justice of the Supreme Court of the United States.

Through the years, Mr. Taft bent his energies to the achievement of that ambition. He became a judge early in life, and made good record.

He left the bench for service under President Roosevelt, believing that through work for the nation he would be better able to reach his goal.

When he was offered the post of secretary of war, Mr. Taft made it known to Mr. Roosevelt that he would prefer a place on the Supreme bench.

No place was open at that time and he accepted the secretaryship with the understanding that his ambition might be gratified later.

Then the exigencies of politics made him a candidate for the presidency, an honor no American of ability is likely to refuse.

Mr. Taft became President, yet his real ambition had not been achieved.

Now he has been given the post he so long wanted, and will, most people believe, fill it with great credit.

Of course, few men can single out a particular high post as the object of a life ambition with any hope of attaining it.

Yet it was because Mr. Taft wanted to be chief justice that he developed the ability that made him first governor of the Philippines, then a sort of roving commissioner for Mr. Roosevelt, and later secretary of war.

If he had not wanted, with all his heart, to be chief justice, he would never have been President. Contentment with a federal judgeship would have kept him always in Ohio.

The golfer who plays a strong, steady game, sometimes achieves the well-nigh impossible and makes a hole in one. The careless, half-interested golfer never does.

Honest ambition may not get a man what he wants, but it is sure to make him abler and better qualified for high position, and brings him some important reward.

SCHOOL DAYS

Mother's Cook Book

A man is never astonished or shamed that he does not know what another does, but he is always surprised at the gross ignorance of the other one not knowing what he does.

TASTY GOOD THINGS

TONGUE is considered a great delicacy. It should always be cooked slowly on the back of the range or over the simmering burner. When the tongue is tender take it from the fire and let it cool in the kettle. When cool take from the kettle, remove the skin. Tongue should not be salted while cooking but different flavors may be added, with herbs, carrot, onion, olives and turnip.

Banana Toast.

Take one pint of boiling water, one tablespoonful of cornstarch mixed in a little cold water, one tablespoonful of butter, four tablespoonfuls of sugar and a salt spoon of salt. Boil until clear, stirring constantly; add five bananas rubbed through a sieve, stir and boil a minute longer, then pour over thin buttered toast. This makes a fine Sunday night supper dish.

Barley Fudge.

Brown one cupful of barley in the oven, being careful not to burn it; put it through the meat grinder. Boil two cupfuls of sugar, one-half cupful of corn sirup, one-half cupful of milk to the soft ball stage. Add the barley, one teaspoonful of vanilla and cool. Stir until thick, then pour into a buttered pan and mark off into squares.

"Those Who Dance Must Pay The Fiddler"

There's a settlement in profit or loss, for nearly every indulgence.

Sometimes the pay day is long deferred, and in that case the settlement may bear compound interest.

Often a payment in ill health is required for the dance had with tea or coffee during earlier years. Sometimes the collection comes in sleeplessness, sometimes in headaches, sometimes in high blood pressure, or in nervous indigestion—sometimes in all these penalties.

Nerves won't always stand the whipping of tea and coffee's drug, caffeine.

If you've been dancing to tea or coffee's fiddling, why keep on till payment time comes? If you're beginning to pay, now, why not cancel the contract?

There's an easy and pleasant way to avoid tea and coffee's penalties, as thousands have found who have changed to Postum. It is a delight with any meal—rich, comforting and satisfying—and it never harms. Even the little children can have a breakfast cup of Postum, with no fear for what may happen to sensitive nerves.

Instead of paying penalties for your meal-time drink, let it pay benefits to you, by giving natural health a full chance—and begin the new arrangement today. Any grocer will sell you, or any good restaurant will serve you Postum.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

LIVE STOCK

SNEEZE WEED KILLS SHEEP

Plant Seems Impracticable of Eradication and Stockmen Are Warned to Avoid It.

(Prepared by the United States Department of Agriculture.)

A plant poisonous to sheep on the ranges, and for which no practical method has been discovered either for eradication or for cure of the resulting disease, is described in a recent bulletin of the United States Department of Agriculture. The weed is most troublesome in Utah, Colorado, Arizona and New Mexico and in the eastern half of southern California, as well as in scattered areas in eastern and western Nevada, southeastern Oregon, southeastern Idaho and northwestern Wyoming.

It was first reported to the department in 1903 that a mysterious disease, characterized by vomiting, wasting away, and death, was attacking sheep in Utah. The disease was at first attributed to Zygadenus (death camas), but several years later department botanists observed that sneeze weed was usually found on ranges occupied by the affected sheep. Subsequent experiments covering five years fastened responsibility upon the sneeze weed. No effective remedy has been found, and sheep which do not die retain symptoms as long as two or three years.

The weed is a strong perennial, growing to a height of one to three feet, with one or several stems. The plant, when young, is often hairy or woolly, particularly the stems. There may be one or several flower heads, which are two to three inches broad with ray flowers of an orange color. The seeds are numerous and hairy. The plant occurs at elevations of 5,200 to 12,000 feet. Its best habitat is on sunny slopes of the southern spruce belt in moist and in well-drained soil. From the color of the flowers it is sometimes called "yellow weed," and

Sneeze Weed.

some stockmen call it sunflower, but in Utah it is most commonly known as sneeze weed.

The weed seems impracticable of eradication. Digging out costs about $40 an acre and cutting with a scythe only stimulates growth. Department scientists, therefore, see the only relief in acquainting stockmen with the appearance and character of the plant and warning them to keep their sheep away from infested areas.

COST OF PORK PRODUCTION

Records Easily Kept Will Show Breeder If His Profit Is a Fair One, or the Reverse.

Before it is possible to determine profit or loss, it is necessary to know the cost of production. Investigations of farm costs of pork, made by the University of Minnesota, gave the following results for 100 pounds of salable hog:

Feed, 564 pounds: labor, man, 6.2 hours; labor, horse, .9 hour; cash expense, 7.4 cents; general expense, 12.6 cents; interest, .66 cent.

The only items of cost that are not accounted for are shelter and equipment. For hogs fattened in the fall and sold in the early winter, this would be a small item.

It is a simple matter to determine the cost of pork production by supplying local values to the amounts of feed and labor required. General expense covers general labor not directly connected with hog feeding.

WINTER SHELTER FOR COLTS

Open Shed Is Not Desirable as Feed Is Utilized Mostly to Combat Cold Weather.

An open shed is not desirable for winter shelter for the colts. If they have to use feed mainly to combat cold weather and other conditions which could be overcome by better quarters, they will be stunted and handicapped, to say nothing of much of the profits being taken up in feeding.

PLAN INCREASED SOIL FERTILITY

Certain Quantity of Different Elements Is Necessary to Promote Plant Growth.

GREEN CROPS SUPPLY HUMUS

Much of Enriching Properties of Stable Manure Is Wasted by Unwise Methods—Wheat and Corn Need Potash.

(Prepared by the United States Department of Agriculture.)

Richness and fertility are often supposed to mean the same thing when applied to soil, but there may be a wide difference, says the United States Department of Agriculture. The difference is one that may mean success or failure in crop production.

By fertility is meant the ability of the soil to produce a good crop. A soil is rich if it contains a considerable quantity of each of the elements required by the plant in the progess of growth. Unless, however, these elements are available to the plant and the physical conditions of the soil are such as to promote plant growth, the soil cannot be said to be fertile. Certain elements are always available to the plant; others must be acted upon by certain substances under suitable conditions to become available or soluble.

Soils may be rendered infertile through natural causes, such as leaching, and through artificial causes, such as single cropping, improper rotation, and the improper proportion of live stock to crop production. One of the principal methods of increasing soil fertility is through addition of humus in the soil, either by stable manure or green crops plowed under.

Leaching May Waste Manure.

Too much of the fertilizing properties of stable manure is wasted either by leaching in the barnyard or by evaporation when spread on the land and left on the surface. If the manure is spread and cannot be plowed under quickly, it should be disked, unless the ground is frozen. If manure must be left on the surface of the field, it is much better left in piles and spread just before it is plowed under. The effect of stable manure on the land is cumulative, and frequently is more marked with the second crop than with the first.

Green crops plowed under provide another source of soil improvement. Such crops as peas, beans, clover and alfalfa are among the best for supplying humus to the soil. These crops should be plowed under in the soil so as to have abundant opportunity to decay before the growing season begins the following spring. If a leguminous crop cannot be grown for green manure, other crops, such as oats, rye, barley, or even sorghum, may be used.

If the required elements are not in the soil or are not readily available, the need should be supplied by commercial fertilizers. The composition

Stable Manure Increases Fertility by Adding Humus to the Soil.

of fertilizer used will depend upon the requirements of the crop to be grown and upon the condition of the soil which is used for crop production. A sugar beet crop, for instance, should have abundant potash, while for a wheat or corn crop attention should be given to the nitrogen supply.

Fit Fertilizer to Soil Needs.

A complete fertilizer consists of nitrogen, phosphoric acid and potash. Materials containing these elements are mixed in different proportions for different crops and for different soil requirements. It frequently appears that a complete fertilizer is not required. For example, there may be present in the soil an abundant supply of available potash, but the supply of nitrogen and phosphoric acid may be deficient.

Under certain conditions commercial fertilizers do not seem effective. This may be due to the fact that the fertilizing elements are not used in proper proportions, or it may be due to the physical conditions of the soil. The greater benefits are obtained from commercial fertilizers when the soil is well supplied with humus. There should, of course, be a sufficient supply of moisture in the soil to dissolve and hold in solution the plant foods that are already present or that may be supplied in the form of commercial fertilizer.

ENORMOUS DAMAGE BY RATS TO FOODSTUFFS

Loss of $200,000,000 Annually in United States.

To Effect Complete Extermination of Rodent Pests United Efforts of Every Home Owner and Tenant Are Needed.

(Prepared by the United States Department of Agriculture.)

Damage totaling $200,000,000 in stored foodstuffs, grain, field crops, and other injurable materials is done by rats in the United States annually. Only the united efforts of every home owner and tenant can effect the abolition of these rodent pests. The Biological Survey, United States Department of Agriculture, is starting a big campaign against rodents throughout the eastern United States. Much already has been accomplished in the matter of control in the Western and Middle Western states, where effective cooperation was secured. On the other hand, residents of the Eastern and Southern states, as a rule, have been exposed to widespread ravages and attacks from rodents for such long periods that they have become so accustomed to the nuisances as to accept them as a matter of course. Uncle Sam is doing his utmost to awaken these sections to the need for eradicating rats.

To illustrate the enormous damages which rats annually accomplish in grain and corn fields, the experience of the state penitentiary farm, cover-

Rats Menace Food Supplies With Disease and Cause Much Loss and Waste.

ing 2,500 acres, at Baton Rouge, La., is of interest. Last year a 200-acre field of corn was planted on this farm. The rats worked their way through the field, stealing all the seed before the kernels could germinate. The field was planted a second time, and again the rats overran the prospective cornfield, leaving in their wake paths of destruction. Undeterred, the farm manager planted the field to corn a third time, and ultimately secured a poor stand, which resulted in the production of about one-third of a normal corn crop.

SUNFLOWER SEED IS COSTLY

Ordinarily It Does Not Pay to Use Product for Feed Except In Case of Chickens.

It ordinarily costs considerably more to produce 100 pounds of sunflower seed than 100 pounds of corn or oats, and for that reason sunflower seed is ordinarily so high in price that it does not pay to use it as a feed, except perhaps in the case of chickens. Sunflower seed contains in every 100 pounds 11 or 12 pounds of digestible protein and 92 units of energy, whereas corn contains in each 100 pounds about six or seven pounds of digestible protein and 80 units of energy. Theoretically, 100 pounds of sunflower seed should be worth around $1.60 a hundred when corn is worth 70 cents a bushel.

PREVENT INJURY IN ORCHARD

Clear Away All Litter, Such as Weeds and Grass From the Base of Fruit Trees.

Guard against mice and rabbits by first clearing away all litter, such as mulch weeds and grass from the base of fruit trees. They form ideal places for mice to spend the winter. Little damage occurs in the cultivated orchard except from the rabbits. Soil can be mounded about the base of the trees before the soil freezes. If this is done and the grass and weeds removed, little damage can be expected from mice. Such mounding is not a protection against rabbits, however.

There are many methods of tree protection that give good results.

SALT ESSENTIAL FOR STOCK

Dairy Cow Requires Ounce or More Daily—Best Plan to Let Animals Help Themselves.

Salt is required by all animals. The United States Department of Agriculture says that the dairy cow requires an ounce or more a day and, while she should be given all she needs, she should not be forced to take more than she wants. It is best, therefore, to give only a small quantity on the feed, and to place rock salt in the boxes in the yard, where the stock can lick it at will.

DAIRY FACTS

BETTER COWS HELP PROFITS

High-Producing Dairy Animals Make Best Market for Different Home-Grown Feeds.

Hundreds of millions of dollars' worth of feed is consumed annually by our dairy cows. The net income is large or small, according to the way that feed is used. When production is increased through feeding and breeding, the income rapidly expands, yet a few real scrubs on any dairy farm will deflate the net income.

Farmers of the United States furnish feed and care for 23,000,000 dairy cows. Because of low-producing cows a large part of that feed is wasted. Weighing out expensive feeds to a low-producing cow is like shoveling costly coal into the fire box under a leaky

Like a Factory, the Dairy Cow Transforms Raw Materials Into the Finished Product—Milk.

boiler; and the farmer who keeps such cows seldom has to pay any income tax.

Like a factory, the dairy cow transforms raw materials—silage, hay, and concentrates—into the finished product, milk. In this way she furnishes a market for the feeds. Whether that market will be good or bad depends in part upon the way the cow is fed, and in part upon the cow herself. There is no better way to market the feeds grown on the farm than to feed them to a herd of high-producing dairy cows. The cow takes corn silage, grain, and hay and converts them into a product for which there is always a ready sale.

It is much easier to send the milk or cream to the creamery than to haul the hay to town. In the long run it is generally much more profitable, because it keeps the soil fertility at home.

In selling feeds to dairy cows the farmer has a wide choice of markets—bad, good, and very good. Few men discriminate closely enough between these markets. If a wheat buyer offers 1 or 2 cents a bushel more than other buyers he gets the wheat; if a wool buyer offers half a cent a pound more he gets the wool. But if one cow returns $3 from a dollar's worth of feed and another only $2, it is scarcely noticed. There is a difference of a dollar in the income every time each of these two cows eats a dollar's worth of feed.

According to estimates of the United States Department of Agriculture, the average dairy cow in the United States produces annually about 4,000 pounds of milk and 160 pounds of butter fat. According to 40,000 yearly individual-cow records recently tabulated by the department, the average cow testing association cow produces 5,980 pounds of milk and 246 pounds of butter fat a year. The world's records are 37,381.4 pounds of milk and 1,205.09 pounds of butter fat in a year. There is plenty of room for improvement, it would seem, in the average production.

The keeping of individual cow records is easy. To test a half dozen samples of milk for butter fat requires about half an hour. Weighing the milk, estimating the weight of roughage, and weighing the concentrates requires but little time. The testing of a composite sample of each cow's milk from two consecutive milkings once a month furnishes the figures from which the yearly production records can be computed. Any man competent to care for a dairy herd can easily learn to make the butter fat test and to keep feed and production records.

WINTER FEEDS FOR HEIFERS

Young Animals Should Not Be Compelled to "Rough It" During Cold Weather Period.

Young heifers should not be expected to "rough it" during the winter, but should have feed and shelter. The feeds should of course include bulky feeds, such as silage, stover, hay, fodder, etc., and concentrates. The young animals should have enough such concentrates as cottonseed meal, wheat bran, shorts, rice flour, alfalfa, pea hay, peanut hay to develop body.

Practice of Testing Cows.

The practice of testing cows to determine their milk and butter fat production and feed consumption by means of cow-testing associations has become widespread. There are now 452 associations of this kind in the United States.

Cracking Velvet Beans.

Velvet beans, as a dairy feed, are improved by cracking, soaking and grinding. Cracking alone does not pay for the work of doing it, but grinding did, in a feeding test in Texas.

Ballroom Dancing.

The earliest form of ballroom dancing was the quadrille, started about 1815. This was followed by the lancers, invented in 1836. The polka was adopted in 1835. The waltz, which came from Germany, in 1795, did not become popular as a ballroom dance till later. The two-step is an American invention.

MOTHER! CLEAN CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, give a teaspoonful to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste out of the bowels, and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

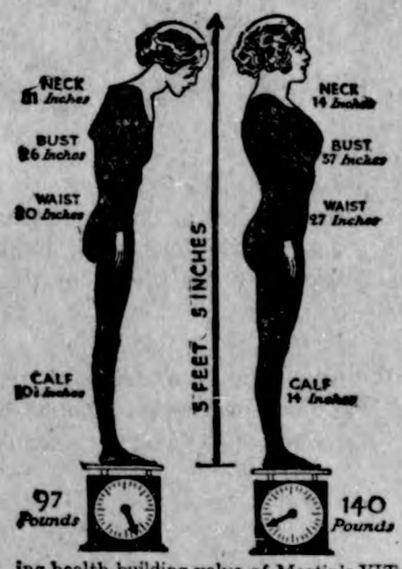
How Yeast Vitamon Tablets Put On Firm Flesh



Quickly Increase Your Energy and Beautify the Complexion—Easy and Economical to Take.

Thin or run-down folks! Take Mastin's VITAMON—two tablets with every meal. Then weigh and measure yourself each week and continue taking Mastin's VITAMON regularly until you are satisfied with your gain in weight and energy. Mastin's VITAMON contains highly concentrated yeast-vitamines as well as the two other still more important vitamines (Fat Soluble A and Water Soluble C). It is now being used by thousands who appreciate its convenience, economy and quick results. By increasing the nourishing power of what you eat Mastin's VITAMON supplies just what your body needs to feed the shrunken tissues, strengthen internal organs, clear the skin and renew shattered nerve force without upsetting the stomach or causing gas. Pimples, boils and skin eruptions seem to vanish as if by magic and the complexion becomes radiantly clear and beautiful.

IMPORTANT! While the amazing health-building value of Mastin's VITAMON has been clearly and positively demonstrated in cases of lack of energy, nervous troubles, anemia, indigestion, constipation, skin eruptions, poor complexion and a generally weakened physical and mental condition, it should not be used by anyone who OBJECTS to having their weight increased to normal. You can get Mastin's VITAMON tablets at all good druggists.

MRS. HENRY KRAUS

Mrs. Elizabeth (nee Stemmer) Kraus was born in Kinnsbach, Baden Germany, Dec. 21, 1836 In 1857 she was united in marriage to Henry Kraus, who preceded her to the eternal home in Sept. 1912. To this union nine children were born, five sons and four daughters. One daughter died in infancy. and two daughters, Miss Lizze and Mrs. Edward Holthaus residng near Colesberg, in Delaware county, passed away some few years ago. In the year 1859 the family came to America, settling near Elkport, Clayton county, Iowa, where the deceased soon afterwards was converted to God, during a series of meetings held in a school house by the pastor, Rev. Wm. Koerner; she joined the Methodist church and was an active and loyal member until the last. Some nineteen years ago Mr. and Mrs. Kraus moved to Klemme, where they lived until the father's death, after which te mohter went to live with her daughter, Mrs. John Schwichtenberg. She loved the church of her choice and to mingle with the Christian people. To her. God was real, and God was hehr Father. To serve Him and to talk to Him in prayer was her delight.

After months of patient waiting, longing for the Father's summons to the home above, she said to her daugter on Christmas morning, "This is my last day with you here. I am going Home today." She asked to see her children and grandchildren who lived near enough, and her pastor to come and pray with her once more. Thus she patiently waited un til the Heavenly summons came and her spirit took wings to be with Him who had said: "Fatehr, I will that they also whom Tou as given me, be wit me where I am, that they may behold My Glory which Tou Hast Given Me."

Moter Kraus leaves to mourn her departure, 5 sons, Charles of Klemme, William of Garner, Henry. John and Jacob of Clayton county, one daughter, Mrs. John Schwichtenberg one brother Jacob Stemmer of Elkader, Iowa, 3 sisters. Mrs. Katherine Moll of Belle Plaine, Iowa, Mrs. Caro line Becker and Mrs. Julia Wertel of Elkader, twenty-two grandchildren and twelve great grandchildren, besides many more distant relatives and friends.

Mr. and Mrs. John Bachman entertained a few friends at a watch party Saturday nite. They watched the old year out and the new year in.

Tanlac has been an unfailing sourse of comfort to millions thruout the lenght and breath of this continent. Have you tried it for your troubles? E. S. D. Kahrs, Druggist.

Mr. and Mrs. Sylvan Johnson and baby and Mr. and Mrs. Charles Fritzel, Mr. and Mrs. Wm. Bell and family. Mr. and Mrs. Ranke Buss and family and Harry Buss of Garner spent New Year's Day at the home of Mr. and Mrs. Elko Buss and family.

Ye Editor and family returned Monday afternoon from our week's vacation visiting Mrs. Jorgenson's folks and other relatives at Lincoln Nebraska. We enjoyed our vacation very much but we weer real glad to get back to Klemme again as we consider it the best town on the map.

MAN THE MORE EMOTIONAL

Mrs. Carrie Chapman Catt Contradicts Opinion Long Held as to Qualities of Sexes.

Mrs. Carrie Chapman Catt, president of the International Equal Suffrage association, has a theory that men are more emotional than women, in illustration of which she tells the following story, according to the New York Sun:

"I once visited a small village in New England which was bordered by a small river, so that farmers coming into the village from either way had to ford the stream.

"Year after year the town meeting debated laying a bridge over the stream, but it was always decided that local finances would not stand the additional strain of the necessary tax, and that the farmers would just have to wait until the stream got low in the spring and then ford, as usual.

"One year, shortly after this annual decision, an elderly village pauper died. He was a veteran of the Civil war, but the village folk had never paid any attention to him in his life. They had never tried to find out what they could do to help him to a better way of life nor contributed in any way to his well-being. However, as soon as he died, the town began to have a tender conscience about the manner of his burial. They were unwilling that the man they had neglected all his life should have a pauper burial. So they tried to hire a hearse from a nearby town to give him what they call a christian burial. Not being able to hire a hearse, they decided they ought to have a hearse of their own, and consequently they bought one costing several hundred dollars.

"Then they said: 'What good is a hearse without horses?' And so they bought horses. And then they said, 'Now, that we've a hearse and horses, we must have a place to keep them,' and so built a stable and carriage house for the horses and the hearse. Altogether the expenditure was very much greater than would have been necessary for the bridge, and all because they had emotionally decided that they must give what they regarded as a fine burial for a man whom they had never helped to happiness while he was living."

If there are any men present when Mrs. Catt relates this instance of the emotional qualities of men she always smiles agreeably and adds:

"Although I am quite convinced that men as a whole are more emotional than women, of course, there are exceptions."

Bottled Fireflies Lure Fish.

Anyone would have supposed that fish were immune to demoralization of modern scientific progress, but even fishing is coming under the sway of advanced and entirely original ideas of bait and fish hooks.

Izaak Walton would have shuddered at the thought of using the storage battery in the tail of a firefly to lure wily bass at night, yet the contrivance has been used to good advantage by William P. Osborne of the New York State College of Forestry.

By imprisoning fireflies in a small glass vial and rigging the container with an ingenious arrangement of hooks, black bass have been found to succumb to the scintillations of the insects and to swallow with great rapidity hook, line and sinker.

An ordinary tubular pill bottle is fitted with a harness to which are fastened three pronged hooks, two on the sides and one on the end. The bottle is then equipped with a swivel similar to that used on a wooden minnow. Four or five good-sized fireflies are placed in the bottle and the bottle sealed.—Milwaukee Journal.

Vienna Still a Music Center.

About the only thing that may be said to flourish in the Austrian capital these days is music. Despite the hard times and the almost worthlessness of Austrian money, the concerts are largely patronized. The capacity of the concert halls is taxed to the utmost. Music-making starts early in the day and lasts till night, one hall frequently having as many as five concerts in one day. And most of the halls are sold out, although where the money comes from is somewhat of a mystery.

John Zook did some repairing on H. W. Shoper's house this week.

Dolph Fuller and wife were Garner visitors Monday.

Mr. and Mrs.C. G. Bracher left Tuesday for their new home in Bancroft, where Charley will have charge of the Queal Lumber Yeard.

Markets

Wheat 60c
Oats 40c to 42c
Corn, 50c to 53c
Barley. 40c to 45c
Flax, $1.30
Hogs, $5.50 to $6.00

TEN YEARS AGO
Jan. 11, 1912
Allen C. Flint, Publisher

Aug. Lau Jr. returned Saturday from his trip to Chicago.

Mrs. F. H. Ridder was a Garner visitor, Friday afternoon.

Lee Ell and wife, of Mason City have been visiting relatives this wk.

Miss Caroline Wille came down from Garner, Tuesday evening, to visit a few days at the parential home.

Vic Carison has ben on the sick list the past week and Louis Sampson was helping in the elevator during his absence.

W. R. Blom shipped a car of hogs yesterday.

BASKET SOCIAL

There will be a Basket Social five and one-half miles straight west of Klemme. Liberty Twp. No 9 on Friday evening Jan 13th. All girls bring baskets.

Cora Fisher, Teacher

STOCK SHIPMENTS START IN HEAVY FOR THE SEASON

Fifteen Car Loads Shipped Saturday Night, Eleven Car Loads Week Before

STOCK SHIPPED WILL BRING $21,000.000

Klemme Best Stock Center On Line In This Part Of The State

Live stock shipments are going off with a bang this year and have been excedingly lively the past two weeks Stock is being brought to Klemme from the nearby towns as the price here is much higher.

Last Saturday fifteen carloads of hogs and cattle were shipped out of the Klemme yards. This is the largest shipment for several months and indications point to large shipments equal to those of last year or even better. The shipments as we received them for Saturday were divided as follows.

Ed Schoenwetter 1 car cattle.
Tim Waddingham 1 car cattle.
Sugar and Post 2 cars cattle.
Herman Priebe 1 car cattle
Wm. Schiawein 1 car cattle.
Shipping Association 1 car hogs.
Joe E. Johnson 4 cars hogs.
A. C. Lau 4 cars hogs

The following en accompanied the shipment to Chicago; Ed. Schoenwetter, Albert Schmidt, Walter Johnson, Tim Waddingham.

A. C. Lau told us he paid out to the farmers for the hogs purchased $4,400.00. August also estimated that the entire shipment was worth in the neighborhood of $21,000.00. Tis is a nice sum and no doubt our farmer friends can make good use of it.

FORMER DEPOT AGENT AT GOODELL BURIED TUESDAY

Was Agent There For Nineteen years

The remains of H. Kepner arrived at Goodell Tuesday afternoon from Rock Island, Illinois for burial in the Goodell cemetary. Mr. Wellemeyer of this city took charge of the funeral services but was unable to use his auto hearse on account of the deep snow in places.

Kepner was agent for the C.R.I. & P. Road at Goodell for nineteen years and was succeeded by Anton Ahrenkeil, who has been agent there for several yearrs.

He died at Rock Island. Illinois at the age of 67 years.

GREENE MAN KILLTD

Shot When Found Coming Out Of Neighbor's Cellar

Greene, Ia., Jan 12.—Leo Curtis twenty-four years old, was killed instantly when shot New Year's eve during a prank played by five young men.

He, with four young men went to the E. W. Barth home four miles north of Greene, to get some wine that was though to be in Mr. Barth's cellar.

Mr. Barth hearing the young men in the cellar, got his shot gun and as Curtiss came out of the cellar door ahead of the rest. he shot. The charge it him behind the ear. Curtis died instantly.

The rest of the young men came to town, but were later taken to Charles City by the Floyd County Sherriff. The members of the party besides Curtiss were: Royal Hardman, Harry Beguelin, Burr Shafer, and John Barth, Jr.

Curtis's body was taken to Charles City by the coroner. All of these young men are members of the American Legion, of Greene, and stood well in the community.

Curtis served eight months at Fort Worth Texas during the World War, but never saw actual service. He has been working in his father's store.

The deceased is servived by his parents, three sisters, four brothers and his grandparents, Mr. and Mrs. E. A. Curtis.

HAVE NEW CONCRETE BLOCK

Experient Station Constructs "L" Shaped Concrete Block for Building Purposes

A new type of concrete block "L" shaped has been designed by the agricultural engineers of the Iowa State College which promises to revolutionize the old style block. The new block, which resembles only a half a block of old and common design is much smaller, more compacct easier to make, tests show it to be as serviceable as the one in the present usage. The "L" block is made 8 in. by 16 in. by one and one- fourth in. and contains 240 cubic inches and covers a wall surface of 128 square inches as compared to 768 to 1024 cubic inches in the common concrete block.

In compression tests to try out the stability of the new ype block i withstood all the tests applied to the larger and common block and boh withstood presure of 2100 pounds per square inch. Due to the less amount of presure in ordinarg buildings the engineers found that the common block wastes considerably material. The "L" block uses only one third as much materials in construction as the old type.

The machine for manufacturing the new block is simple and can be made cheaply. It consists of a series of "L" shaped steel forms and the materials used making the new blocks forms are one half cheaper than ones used in making of the other blocks.

Tests have shown that these blocks can be made more easily than the others, utilizing unskilled labor, they can be stored in less space and they will speed up the building work. Where they are used less material is wasted and as good a quality of work is accomplished.

Due to the thinness of the blocks they must be made of the best mixtures and he concrete must be properly mixed, say the makers. However this can be easily accomplished. Buildings made in Ames with the new blocks have been very satisfactory.

AND AGAIN, WHY?

An exchange says that if a man went out with his head dolled up in a three cornered dingus with kinks and curlicues and a cat's tail and a chicken head pinned on one side, and a young onion on the other and two strips of red flannel hanging down the rear, he would be arrested and slammed in the booby catch. But a woman can do it and and get away with it.? Why

To which another exchange replies thusly.

Well, we don't know if a woman went out with a big wad of tobacco in her mouth and stood around on the corner and told stories and squirted tobacco juice all over everything and swore every other breath, used foul language and swaggered around she would soon be arrested. But a man can do it and get away with it. Why?

And in answer to both queries we might give a reply by stating that the offspring of both the above people are allowed to do all that that is quoted above plus the evils of hooch, cigarets. night riding, fast auto driving; all night orgies and several other exciting experiences. But the boys and girls can and do get away with it—and why?

HAPPENINGS AT THE LIBERTY TOWNSHIP CHURCH

—Special to the Times.

The Sunday school classes have been busy organizing. Each class elects a president, secretary and a treasurer. The adult classes also elect their own teacher.

As the Sunday school election was not completed last Tuesday, we will give the result later.

About a dozen were out to League Sunday night. He can not help but say that there wasn't much interest shown for the lesson. Not until the attendents learn that the church is a place of worship rather than amusement, will they get anything out of it.

Quite a number attended services Sunday morning and not a few however, complained of empty stomachs before it was over.

IOWA STOCK TO MEXICO

Cattle and Hogs Go To Agricultural Schools in Capital City

Twelve milking Shorthorns from Cerro Gordo County and 42 head of Poland China hogs from Clinton county have been shipped to Mexico City for use at the school of agriculture in that city.

All the animals brought the sellers a good price, the 12 cattle bringing $3,050. These cattle will be used as a start to get some good herds established in the Republic of Mexico.

ORGANIZE BULL ASSOCIATION

Farmers Club in Buying Purebred Bulls for Farms

A new organization for the purpose of getting more purebred bulls has been started at Emmetsburg. As a result of the work among the farmers by H. R. Searles, dairy extension expert at Iowa State College. five groups have pledged themselves to buy bulls that come from dams that have a yearly record of at least 500 pounds of butterfat. A permanent constitution and by-laws have been adopted by this unique society.

DEVIL VISITS IMMORAL LAKE RESORT IN MINNESOTA

We found the following interesting item in the Titonka Topic of last week which was clipped from some other paper. It's a regular "Hair breath Harry" story.

Ray Tegelberg of Willmar, Minnesota, sends the Herald a newspaper clipping which should cause dancers to pause and consider their ways:

Theh clipping reads as follows:—

Lake Marion, nine miles from here is a pretty resort and a pavilion has been built there by the hotel for dancing. On Sunday for some time back dances have been held there and a class of people for many miles around who attend Sunday affairs have attended. It has been said that these dances are rough and that some of the dancers of bith sexes get drunk; that the rooms of the hotel are all engaged in advance and that the cottages are broken into and the rooms occupied by the revellers.

On Sunday night. October 30, last a dance was in progress there and it is generally agreed that there were 100 dancers on the floor when the devil came and was in the midst. Some claim that he came up through the floor, others that he came down from the roof. He was the regular fellow, they say, horns, hoofs and tail. The lights flared, the musical instruments flew from the hands of the players and were splintered. Lurid lights filled the place and the devil danced among them. Women and girls screamed and some fainted. One or more are still confined in bed with hysteria. They all fled in terror from the place. Some hid in the woods all night, others found shelter in farm houses, 26 cars were left standing by the pavilon until the daylight came and the party rallied and kept their courage up by keeping close together got the cars away.

Many and varied stories are told about the details. but the above is generally told by all. If it was a hoax, it was cleverly done and the perpetrators are keeping still. The proprieter has offered $1,000 for an explanation of it. His place hotel and all, is deserted and abandoned. He nor his family dare remain there.

If it was the real evil he has hurt his own business for dancing among that class has ceased. It has been a real sensation and has been widely advertised. The hardest people to convince that it was a hoax are those who were there.—Herald"

A leading farm paper says: "If you happen to have an obstinate calf that won't mind it's mother, don't swear. If the calf will not mind its own dam. how can you expect it to mind yours."

Rastus: "Why is it dat a black cow gibs white milk what makes yellow butter?"

Sambo: "Dat's easy; foh de same reason dat blackberries am red when dey is green."

You're as young as your taylor will allow you to be.

Farmers' Annual Short Course To Be Held At Ames Soon

STATE NEWS ITEMS

The number of hunting licenses issued annually has increased in three years from 82.000 to 110,000, according to W. E. Albert, fish and game warden.

A diamond engagement ring which Mrs. C. C. Overman of Atlissa lost last August while peeling apples was found in the craw of a chicken on the farm recently.

Chalmer Downs, 40 years old, was asphyxiated by smoke in his rom in Independence. He was smoking his pipe in bed and fell asleep. The bed clothing caught fire from sparks He was unmarried.

Pupils in the "fresh air room" at the Jackson school, Dubuque, are gaining i nweight and health. The board of education co-operates with the visiting nurses association in financing the school.

Two men traveling in a Ford car entered five business houses in Hamburg in the night recently securing at each place various sums of money and quantities of merchandise. The robbers were seen by residents just before the robberies are supposed to have occured. After completing their work they left taking a road to the east.

Adolph Anderson is in a Council Bluffs hospital suffering with several broken bones, the result of being attacked by a mad bull. Henry Kessler was nearly killed by a stampede of the cattle in an effort to rescue Anderson.

J. B. Kent, of Hampton says he has tried to burn corn and found it an absolute failure. The corn smoulders a while and then goes out. He says by burning coal and corn, 50-50, a saving of about 50 cents a ton of coal can be made.

The Hubbard elevator at Hawley, a mile north of Hayfield was destroyed by fire recently. The loss is estimated at $25.000. Tramps sleeping in the elevator are blamed for the blaze.

Effort is being made to remove the federal headquarters for northern Iowa to Sioux City from Dubuque United States Marshall Davis already plans to take the marshals office there and George Scott is a candidate for the United States district judge.

The Iowa cigaret tax is a big revenue producer. J. E. Thomas deputy auditor, stated that from July 1st to Nov. 30th the state realized a revenue of $269,621.02 in addition to expenses. The expenses for this period wede $8,575.58. The auditor's office has supplied the state treasurer with $300,000 wirth of revenue stamps since June 10th and has recently obtained a new supply sufficient to last until next July.

Nearly a score of people were taken in a raid by the police recently at Cedar Rapids. Most of them were negroes and all were arraigned for disorderly conduct. In two of the places raided a large and varied collection of dope was found. Government narcotic agents have been notified and a number will be held by the police pending investigations into dope activities.

Business men of Mason City have worked out a plan to give a reward of $500 for a dead holdup man and $250 for a live one taken in Mason City. Holdups have been so numerous in the past month that the police have been unable to cope with the situation.

The state penal institutions have broken all records for the number of inmates, according to A. C. McColl member of the board of control. There are 870 men in Anamosa reformatory, which is far more than have ever been confined there, even when women prisoners were inmates of that institution. At one time the number of men at Anamosa had been reduced to 132. On Dec. 1st, there were 619 men prisoners at Fort Madison and 90 women at the Rockwell City institution, a total prison population of 1,583.

For Clerk District Court

I hereby announce my candidacy for clerk of the district Court of Hancock County, Iowa subject to decision of the voters at the republican primary election to be held June 5th, 1922. J-5tf

B. C. Erwin

BIG SHORT COURSE FITS THE TIMES

Annual Farmers' Week at Ames Will Deal With Live Questions In Farming

There will be dollars of gain in the great winter short course at Iowa State College, January 30 to February 4, for every farmer who can attend. The invitation is to all, and the program is free.

The Short Course has been planned to fit the times. It will deal with the live questions the farmer is thinking about. Its emphasis will not be on production, merely, but on the problem of getting a fair profit in production. It will take up such questions as whether the corrn acreage should be cut down, how to handle cattle and hogs economically, how to get more out of orchard, garden and poultry yard, how to put the dairy herd on a better basis. how to fight plant and livestock diseases, how to plan farm grounds and buildings for greater convenience and labor saving.

Besides, special attention is going to be given to the business side of farming. Scores have suggested that the short course should deal with farm bookkeeping. with cooperative marketing, with costs of production. with taxation, with farm finance, with transportation and the like. So the program is taking up every one of these questions and each will be discussed thoroly.

Prominent agricultural leaders will speak, including such men as Dean Eugene Davenport of Illinois Agricultural College, Dean Farrell of Kansas Agricultural College, Dean M. F. Miller of Missouri Agricultural College, Clifford Thorne of the American Farm Bureau Federation, Secretary E. G. Cunningham of the Iowa Farm Bureau, and others.

For boys and girls a special program has been arranged. The women's short course will not be held at this time, but at a later date. A rural life conference will be held daily. The great Iowa Corn show will be in progress at Ames in connection with the short course, as will various meetings and conventions of farmers.

This year the railroads have granted a one and a half fare for the round trip on the certificate plan.

A complete program will be sent on request Address the Short Course Headquarters, Ames, Iowa.

A NEW PEACE DOLLAR OUT

Distribution of the new silver dollars bearing the "peace designs" was begun two weeks ago. The first dollar of the new series struck off has been presented to President Harding.

The new dollar has the head of liberty one one side and on the other a dove upon a mountain top clutching an olive branch, struck by the rays of the sun, with the word "peace beneath it. This is the first change in the design of the dollar since 1878 officials said, and according to law will remain as the design of the dollar for 25 years unless changed by legislation.

About 800 of the new dollars have been coined with the date 1921. The balance of 500,000 now ready for distribution are dated 1922. There will be 150,000,000 silver dollars issued in all.

GIRL AT GOODELL INJURED WHEN CUTTER TIPS OVER

Monday evening as Agnes Fuller was returning home from school her horse became frightened and ran away with her in the cutter in which she was riding, and throwing her out on the hard frozen ground when it tipped over. She was considerably bruised and her shoulder was broken in the fall. She is not seriously hurt.

"Top of World" 50 Miles Away

Writer Gives Some Interesting Facts in Connection With Recent Aviation Feats.

OF LITTLE SCIENTIFIC VALUE

Attempts to Go Higher Than MacReady's Record-Breaking Flight Would Not Be Productive of Worthwhile Results.

Washington.—The "top of the world" still waits to be reached. Lieutenant MacReady's record-breaking fly to a height of nearly eight miles left the "ceiling of the earth" still at least forty miles away.

How near the aviator may come to what is practically the upper limit of the atmospheric layer surrounding the earth we may not know in this generation. But the meteorologist and the astronomer tell us that both Major Schroeder after his flight of 38,180 feet and Lieutenant MacReady after his 40,800 were speaking only figuratively when they spoke of having attained the "top of the earth."

Layer Fifty Miles Thick.

The layer of atmosphere, many say, is at least fifty miles thick.

Aviators now have the means of taking sufficient oxygen along with them for their engines and for themselves, and the heat that keeps their bodies from freezing. They lack only denser air to fly upon at great heights. But this, of course, they will never have.

Yet there is another solution: The faster plane capable of rising still higher on an ever-thinning ocean of air.

It will be a problem forever increasingly difficult. The higher man rises, the thinner will he find the air upon which he must depend for buoyancy.

Indeed the air gets thinner even in greater proportion than the increased height of the flight. For though MacReady had risen through but one-sixth of the air cushion that cloaks the earth, he had left behind him four-fifths of the air.

From the surface of the earth, where the total pressure upon his body was fifteen tons, he had risen to a height where the pressure was but three tons. And had he gone three times as high he would have reduced the pressure to 80 pounds.

No Interest at Poles.

Any higher airplane flights than those that have been taken by these two men will have little scientific value. Their observations will give scarcely more information than that to be had from a balloon sent up with various pieces of recording apparatus.

But neither did the poles of the earth have great scientific interest. Yet men sought and attained them. And so long as the astronomer and the meteorologist make known the existence of an ocean of air beyond any sailed thus far, there will be a struggle to fathom its depth.

But for the present that fathoming will be done only from observation and deduction to be made upon terra firma. Among the best of the methods that are used to determine the upper limit of the blanket of air about the earth is called the "twilight method."

Twilight has been defined as the time after sunset when day seems to be continued into the night because of the sunlight that still shines upon the upper air.

It has been determined that twilight lasts until the sun is about eighteen degrees below the horizon, and with this as a known value and the radius of the earth given as 4,000 miles, it is not difficult to solve, by the methods of trigonometry, a right triangle that gives 48 miles as the height of the air still dense enough to reflect the twilight rays of the sun after it has set.

On the other hand, another method gives a different result. The presence of "shooting stars" in these fall nights, calculated often to be at a height of 200 miles, would seem to indicate that there must be air even at that height, for it is the friction of the air that heats the meteor as it rushes toward the earth.—Chester E. Tucker, in Chicago Post.

There are two vipers in India, one about 20 inches long and the other about four feet long.

Woman Justice to Kiss Bridegrooms

Atlantic City, N. J.—Mrs. Cecelia Champion of Somers Point, newly elected a justice of the peace, announces she will go the marrying parsons one better. Where the parsons have made it a point to kiss the bride, Mrs. Champion says she will kiss the bridegroom. Mrs. Champion is considered handsome and is almost thirty years old.

Stewart's Life Romance Bared

Speedometer Man Really Was Terence O'Brien, One-Time Clipper of Horses.

ALSO WAS MINING PROSPECTOR

Litigation Over $5,257,343 Estate Left by Manufacturer Leads to Baring of "Family Skeleton"—Eccentric About Money.

Chicago.—Litigation over the $5,257,343 estate left by the late John K. Stewart, founder and president of the Stewart Manufacturing company and the Stewart-Warner Speedometer company, bared a "family skeleton."

Search of records of the Surrogate court in Riverhead, L. I., in which one of the two wills made by the Chicago millionaire was filed, revealed that his name was really Terence O'Brien. Under this name he had been a mining prospector in the West, always without much success.

From prospecting O'Brien turned his hand to clipping horses, following county fairs. In Seattle he met Arthur and Michael Conlon. Together they invented a horse clipping machine. This contained a flexible shaft, which served as the basis of future automobile accessory appliances.

Soon Brings In Big Profits.

This shaft was patented for O'Brien by a lawyer named Stewart and soon it began to pay large profits. It was placed on the market as the John K. Stewart speedometer, the name of the lawyer furnishing part of the title and that of a race horse, "John K," furnishing the remainder.

O'Brien later decided to adopt as his own the name of the device he had placed on the market, and from that time on was known as John K. Stewart.

With the acquisition of his fair fortune O'Brien, now known as Stewart, left the West and moved to Chicago, introduced the speedometer and soon his wealth grew to great proportions. He purchased a residence at 3217 Sheridan road and bought a mansion at Center Point, L. I., to which he later moved with his wife and two daughters, Marion and Jean.

He was in his early forties when he died, leaving an estate of five to seven millions.

Both Stewart and his widow, who died nine months after him were eccentric in handling money. First a clerk in the office of the Speedometer company discovered some deposit slips on Chicago banks calling for $1,800,000 which it was not known that Mr. Stewart possessed. This money was found in six banks and turned into the estate. Shortly afterwards Leanred H. La Chance, now chairman of the board of directors of the Stewart-Warner Speedometer company, and trustee of the Stewart estate, received a bill for $7.50 for the rent of a safety deposit vault of which he knew nothing.

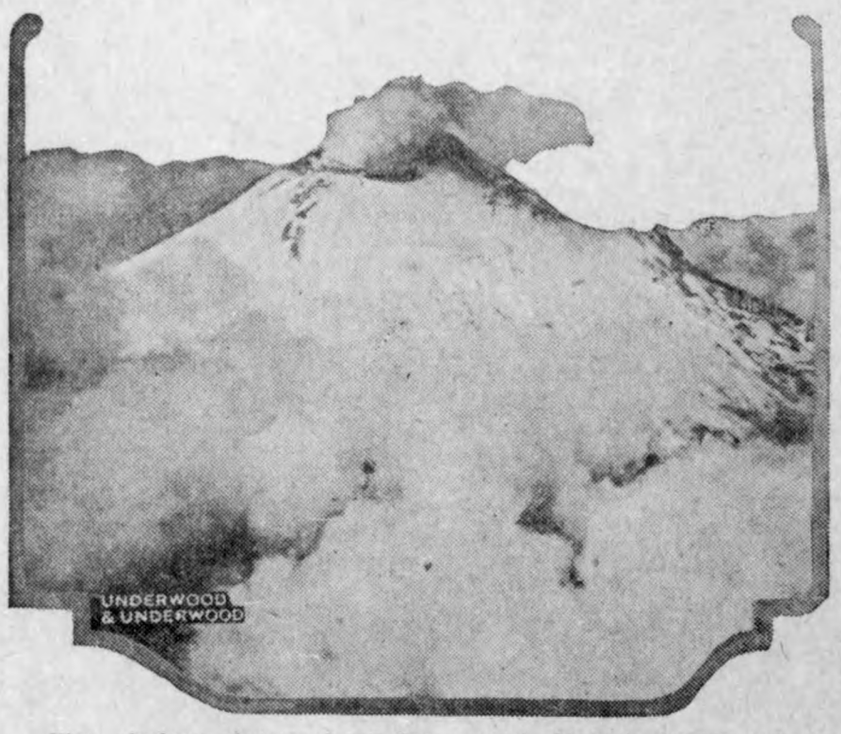
Daughters Get Estate.

In the safety deposit vault $250,000 more was discovered. At another time a suitcase which Mrs. Stewart, who died in Aiken, S. C., had left in a hotel there was opened and $690,000 in currency, in $5,000 and $10,000 gold certificates rolled out. This suitcase also contained $296,000 in certified checks. The suitcase had been carried around the country without more than the usual care.

The fortune left by Stewart was originally divided between his two daughters, but Jean died October 10 last, while still a child. Marion married Robert B. Honeyman Jr., of New York City, and inherited the entire estate.

It was her action in filing, through her father-in-law Robert B. Honeyman, a New York lawyer, a suit charging incompetence and general mismanagement of the estate, that led to the discovery of the romance of her father's career.

Popocatepetl Is Becoming Dangerous



First airplane photograph of Popocatapetl, Mexico's famous volcano, which is just now becoming so vigorously active that the inhabitants of the villages at its base have left their homes. The mountain, composed chiefly of porphyritic obsidian, rises in a cone 17,720 feet above sea level, about ten miles southwest of Mexico City.

Virginia Boy, 7 Years Old, Arrested as Horse Thief

Roanoke, Va.—Russell Smith, seven years old, was arrested recently on a charge of stealing a horse. The boy was turned over to I. E. Watson, probation officer. This is the youngest offender of the law who has been arrested here in 20 years, it was said.

Gems Kicked About Street.

Pittsburgh, Pa.—Diamond rings worth $5,000, tied in a linen handkerchief, were kicked about the streets and trampled by residents of Tarentum two days before Joseph DeNanze of Tarentum picked up the bundle in Center street. The diamonds were lost by Mrs. Joseph Klein of Tarentum one Monday morning, when she was shopping. The jewelry was turned over to the owner by DeNanze. Mrs. Klein had offered $300 reward.

WILL STUDY SLEEPING SICKNESS

First Organized Investigation of Disease to Be Made.

Expedition Conducted by Four Physicians and Two Veterinary Scientists Will Study Sickness in Tropical Africa.

London.—An expedition formed by the Tropical Diseases Prevention association soon will leave to make the first organized attempt to investigate on the spot the treatment of sleeping sickness, as distinct from the question of the mere transmission of the disease.

The expedition will be conducted by four physicians and two veterinary scientists, and it is expected the work will occupy two and a half years. It is sought to carry out the work in different centers with the sanction and support of the governments interested, and it is hoped that it will result in a general system of vaccination whereby all individuals arriving in a danger zone will be inoculated and so gradually rendered immune.

The expedition will first work in Uganda. It will probably proceed later to the Belgian Congo, and it is hoped to extend the work to Rhodesia and the Sudan, where there is a big epidemic of the disease.

The sleeping sickness has been prevalent among the natives of West Africa for 100 years. It is generally attributed to a parasite carried by a species of the tsetse fly which infects cattle. The disease has caused heavy mortality among the natives of the Congo and Uganda for many years, and is greatly dreaded by Europeans in the parts of Africa where it exists. Its origin has been the subject of much medical research.

Sulphite turpentine gas given off when wood is boiled in paper making is used in making TNT.

FOR MOTHERS!

THIS ADVICE IS VITAL TO YOU

Council Bluffs, Iowa—"Dr. Pierce's Favorite Prescription was a wonderful help to me during expectancy. At these times I have always relied on it to keep me healthy and strong. I am the mother of eleven healthy children and I took 'Favorite Prescription' with all of them (with perhaps one exception) and in addition to their being healthy, my suffering was very slight, due I am sure to the use of the 'Prescription'. Women who take it during this time will find it a very helpful medicine in every way." —Mrs. W. M. Statts, 2111 Ave. D.

Get this Prescription now in tablets or liquid from your druggist. Also write in all confidence to Dr. Pierce, President of the Invalids' Hotel in Buffalo, N. Y., and get FREE MEDICAL ADVICE in return. Send him 10c if you wish a trial pkg. of the Prescription tablets.

HE'LL STAY AWAKE NOW

Awful Possibility Contained in Barber's Warning Must Have Stirred Up Mr. Brown.

As John Brown sat in the barber's chair sleep overtook him, and while the knight of the lather prepared the creamy stuff, John Brown dozed off.

"I beg your pardon, sir," said the barber five minutes later. "You'll have to wake up. I can't shave you!"

Nervousness sounded in the barber's voice. He hated to disturb customers.

"What! Can't you shave me whilst I am asleep?" roared John Brown. "And why, pray?"

"Because," answered the barber apologetically, "when you sleep your mouth is open so wide I can't find your face. And I wouldn't like to drop the razor into your mouth!"

With a frightened look John Brown held open his eyes with both thumbs to keep awake while he was shaved.—London Tit-Bits.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease.

Dr. Kilmer's Swamp Root is on sale at all drug stores in bottles of two sizes, medium and large. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper. Advertisement.

Matters Were Even.

An elaborately dressed woman got into a smoking compartment just as the train was moving. A few minutes later she informed a man who was smoking a pipe that she would be obliged if he did not smoke.

"Do you object to the smell of tobacco, ma'am?" he asked politely.

"Yes," she said emphatically.

"Well," he replied, with a laugh, "I'm sorry, but, as it happens, I object to the smell of scent—so we are quits."

MOTHER! CLEAN CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, give a teaspoonful to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste out of the bowels, and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

The Leather Medal Winner.

"Was there any excitement at the shore last summer?" asked Esther.

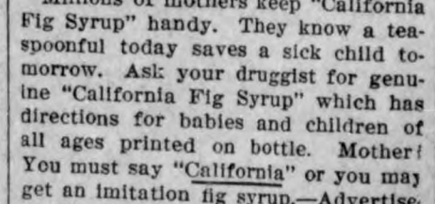
"Yes," replied Dolly. "One day as I was sitting on the pier a man who couldn't swim fell off. I ran to where there was a coil of rope for just such purposes, and threw it to him."

"Perfectly great! And pulled him out?"

"No, I didn't have anything to pull on. I threw him the whole coil."—American Legion Weekly.

Japan Has Widow's Headdress.

Japanese widows designate themselves by the arrangement of their hair, and also signify whether they desire to marry again.



SUCCESS OF BIG THREE IN DANGER

An Attempt to Solve Two Issues Brings Trouble to Parley Leaders.

RATIO MATTER IS PUT AHEAD

China to Negotiate on Two Demands Only, Vested Interests and That Japanese Troops Must Get Out—Deadlock On.

Washington, Dec. 8.—In an attempt to solve two issues which have now become so acute as to endanger the success of the Big Three, Secretary Hughes, Mr. Balfour and Admiral Baron Kato met to discuss the ratio of 5-5-3. At another hour Secretary Hughes and Mr. Balfour met with the Japanese and Chinese delegates at the first of the Chino-Japanese special meetings to discuss outside the conference the Shantung settlement.

It was decided by the Big Three that it would be better to get the ratio matter definitely and absolutely settled between the three naval powers before taking up at all the naval ideas of France and Italy.

Further information from England confirms the belief that Lloyd George will not come over here to take part in the discussions now going on. That would be an anti-climax. If he comes at all it will be on some question to be raised at the end of the present agenda, presumably the economic question.

Indeed, a hint in that general direction was given when a member of the Italian delegation expressed the belief that the United States is the only country in the world that can give a lead to Europe on the way out of her economic chaos.

The Chinese arms conference delegation in the direct negotiations on the Shantung question, will, according to Chinese spokesmen, proceed on the basis that there are only two points on which China is prepared to negotiate and that these are Japan's demand that Tsing-Tao be declared an open port and Japan's demand that vested interest be respected. The latter would be only partially susceptible to negotiation.

"China, it was stated, cannot negotiate control of the Tsing-Tao-Tsinaufu railroad and has not receded from her position taken at Versailles that Shantung be unconditionally returned by Japan.

One of the first acts necessary for a successful outcome of the present negotiations, according to the Chinese, would be the withdrawal of troops by the Japanese. The presence of Japanese troops on whatever basis it was contended, strikes at the heart of China's ability to exercise sovereign control over the Shantung province.

The Chinese people, it was said, are adamant in their demand for unconditional return to China of the Kaichau leasehold. Certainly, it was contended, the Chinese delegation could not barter control of the so-called Shantung railway, which is, after all, considered the crux of the entire controversy.

While the Chinese, it was said, would be willing to afford the utmost protection to Japanese or other foreign capital in the railroad, even to the extent of placing the actual operation and management in the hands of foreign experts, China could not divide with another nation authority which would involve its control over the physical property in time of emergency or otherwise.

Request that the American armament conference delegation take no action involving the Philippine islands without calling into its council the Philippine commissioner in Washington is contained in a joint resolution of the legislature of the islands cabled to the War department.

The resolution was sent to the War department by Governor General Wood, acting upon the request of the legislature.

The situation resulting from Japan's formal proposal that the 60 per cent naval ratio alloted her under the American limitation plan be increased to 70 per cent, was regarded by Amerlem officials as a delicate one, but not without hope that her spokesmen ultimately would accept the original plan.

Entirely removed from the stage of technical discussion as to the basis of calculating the naval ratios on present fleet strength, the question through the formal request of Baron Admiral Kato, senior Japanese delegate, that the increased ratio be recognized as necessary to Japan's security, had become a matter of policy for settlement by the plenary delegates of the powers and not by their technical advisers.

The proposal on this ground, it is known, has been presented personally by Baron Kato to Secretary Hughes and Arthur J. Balfour.

American Killed in Bolivia.

Washington, Dec. 3.—The killing of an American citizen named Hartmix at Santa Cruz, Bolivia, November 29, was reported to the State department from La Pas. The message stated nothing was known concerning him.

Reds Riot in Vienna.

Vienna, Dec. 3.—Rioting broke out in Vienna, following a great demonstration before the parliament building, where red flags were raised on improvised masts. The crowds then looted fashionable shops and hotels.

SHERIFF'S SALE

H. A. CULVER
vs.
D. J. or DAVID J. McMAHON, and C. H. or CLEM H. McMAHON.

Notice is Hereby Given, That by virtue of a Special Execution issued out of the office of the Clerk of the District Court, in Hancock County, on a judgement rendered December 15th, 1921 Term of said Court, A. D. 1921, for the sum of Thirty Three Hundred Forty Four & 03-100 DOLLARS debt, and One Hundred Fifteen & 95-100 Dollars costs, in favor of H. A. Culver and against D. J. or David J. McMahon, and C. H. or Clem H. McMahon, and to the Sheriff of Hancock County directed. I have levied upon the following described property, to-witt: Northwest Quarter of Section 16. Township 97, North Range 24, In Hancock County, Iowa.

NOW, THEREFORE, Public Notice is hereby given that I shall, on the 21st day of January 1922, at 10 o'clock A. M., at the front door of the Court House, in Garner, in Hancock County, offer and sell at public outcry. to the highest bidder for cash, all the right, title and interest that the above named D. J. or David J. McMahon, and C. H. or Clem H. McMahon had on the 15th day of December A. D. 1921, or now has in and to the above described property, or so much thereof as is necessary to satisfy said execution, together with costs and all accruing costs, unless the same shall be sooner satisfied.

Dated at the Sheriff's office in Garner, this 19th day of December 1921, A. D.

E. P. HANSON,

2w Sheriff of Hancock County

Austrian Confusion.

One of the stories told to illustrate the confused diplomatic situation in central Europe is attributed to Prince Furstenburg. He was appointed as a diplomatic representative of the old Austrian government to the Ukraine, which then was ruled by Hetman Skorpadsky. Describing his diplomatic status to friends in Kiev, the prince said: "I am the representative of a goverinment that has ceased to exist and accredited to one that never existed. The most extraordinary part of it is that I am paid for performing the duties of this position that I do not hold."

Just a Little Too Much.

Mr. Featherly weighs over two hundred pounds and is sensitive about it. He was calling on a friend the other evening when she said, naively: "Oh, Mr. Featherly, would you just as soon sit in this easy chair as in that rocker?"

"Certainly," replied Featherly, as he changed from one chair to the other.

"Oh, thanks," she murmured; "you are very kind. I have a book full of fern leaves under the cushion of that easy chair, and you—"

"Good-night," said Featherly, stiffly, as he walked away, never to return.

CARE COULD NOT SAVE TREE

Gigantic Banyan in the Botanic Garden at Calcutta Is Reported to Be Dying.

No tree in the world has had greater care bestowed upon it than the great banyan tree in the Botanic garden at Calcutta, which is reported to be dying, says the "Way of the World" columnist of the London Morning Post.

Every tender succulent young root, as it begins to fall like a stalactite from the branch overhead, is encased and protected from harm in a bamboo. It is not improbable that the original trunks will vanish altogether and leave the still expanding outer growths as a ring of vegetation round an empty circle. The mother trunk is an almost shapeless mass by this time and contributes very little to the sustenance of the multitudinous progeny. This Calcutta specimen is supposed to have fifteen aerial roots, a number from which, it is probable, that a cipher has been accidentally omitted.

LENIN NOT RUSSIAN CHIEF

Bolshevik Exponent Is Premier, Michael Kalinin Being President of Central Executive Committee.

Most Americans believe that Nikolai Lenin is president of Russia, whereas he holds an office which corresponds to that of the British premier. Michael Kalinin, a peasant, for more than two years has been president of the All-Russian Central Executive committee. His position is only about as politically powerful as that of the French president, and, whereas the French executive's position is mostly social, the Russian president is mediator, champion and political adviser of the peasant masses of Russia.

Kalinin's office in Moscow is not in the Kremlin, but in an ordinary office building in the heart of the city. It is the one place in Russia where no "papers" are demanded when one enters and no guards stand about the doors.

Rare Archeological Find.

Not long since, while visiting a gravel pit at Swarling, near Canterbury, England, in search of palaeolithic implements, Mr. Reginald Smith, of the British museum, and Dr. Ince, of Sturry, learned that the laborers there had unearthed vases of the late Celtic period, and their report induced the Society of Antiquaries to pursue investigations on the site. A fortnight's trial digging brought to light, within a confined area, no fewer than thirteen urn-burials, among them one rich tomb containing six complete pottery vessels, two bronze fibulae and an iron-bound bucket. The style of the objects, which show characteristic native forms just beginning to be influenced by Roman models, dates the grave approximately to the first half century A. D. Adjoining the cemetery were found the remains of an iron-smelting and enameling works of the same early date.—London Times.

A laugh upsets many an argument Good humor is often more succesful than solemn intelligence.

Doesn't is seem remarkale that America progressed so far before she ever heard of efficiency experts.

What About Building?

Now is the time to act--

Now is the time to think about the building you are going to erect this spring or summer. Draw your ideas on paper and we will do the rest.

We carry a complete line in all common building materials and can get anything else you need on very short order.

If you have any repair work to do now is the time, we will quote a few prices on material from time to time.

American Fence 26" Spec. L. 41c Per Rod.

American Fence 26" Spec. L. 49c Per Rod.

Plaster per sack	85cents
Cement per sack	65 cents
Limate per sack	70 cents

Try a sack of Limate for a hog tonic, mixed with coal screenings and salt. Try it out.

We are willing to quote prices on anything in the building line.

NORTHERN Lumber Company

FRETTING NAUGHT BUT FOLLY

But Many Sermons on the Subject Have Failed to Convince People of Its Uselessness.

In that doleful, delightful book, "The Education of Henry Adams," occurs a phrase, "the folly of fret," which is better than the usual expression, "the uselessness of worry."

Many sermons have been preached, many lectures delivered, many medical opinions pronounced, many household homilies uttered, on that theme.

The trend of applied science in our century is toward the reduction of friction and the elimination of waste.

And a big part of friction and of waste is worry.

We worry about the human machine. We imagine that all sorts of dreadful things are about to happen to us. Our thoughts ought to be on our work—and they are diverted by our worries.

We worry about losing a position in business or our standing in society. There would be less excuse for anxiety if we would spend the energy consumed in trying to do our work still better, trying to serve more satisfactorily the community we live in, striving to discharge the various and delicate offices of friendship with increased tact and perception and sympathetic selflessness.

Worry is quite another matter from a proper carefulness, that weighs a proposition and looks all round its object ere acceptance.

A man who investigates before he buys, who considers alternatives and who asks questions before deciding, who makes no leap in the dark, is not open to the reproach of one whose "folly of fret" merely leads him in frantic circles, like a tethered donkey. All his fuss and clamor issue in nothing but an ecstasy of motion and emotion.

Man power is too precious to be thrown away in these gyrations that are the pantomime of futility.

Give us more of the calm, big men who plan and then proceed.

They seem to have time. They do not operate in a flutter and a fever resembling the hen yard or the stock pen. They make up their minds and preserve their equanimity. Seeing them so cool and controlled, those who do everything in a panic or a paroxysm try their best to excite them by telling them the house is burning down or the world is coming to an end.

But these quiet and capable ones are not deceived. They know that it is not for man to say when his own life or his own work shall end. In trust and peace they continue on their way—avoiding "the folly of fret" that victimizes and weakens other men.—Philadelphia Public Ledger.

Relics of an Extinct Race.

Relics of an extinct Indian race are being uncovered on the Santa Ynez river by a road construction gang under the direction of Ranger R. Forsythe of the Santa Barbara national forest. The discovery is at a point two miles upstream from the foot of the grade of the San Marcos road on the other side of the mountain.

One such relic brought in to Forest Supervisor Thomas B. Sloan's office was a matter of much speculation. It appears to be a piece of black soapstone in the shape of a cylinder about 1½ inches in diameter and four inches long, with a half-inch hole the length of it. The relic is highly polished, and when first excavated was said to be of a softness that permitted scarring its surface. Exposure to the air evidently had hardened it, however, in a few hours.

Forsythe said two other relics similar to this one have been uncovered, and one of the bones of the forearm of a man also has been found.—Santa Barbara Press.

Some Exceptions.

Among the witnesses called in a trial in a southern court was an old darky.

"Do you swear that what you tell shall be the truth, the whole truth and nothing but the truth?" intoned the clerk.

"Well, sah," returned the witness, shifting uneasily, "dis lawyer gemmun kin make it a pow'ful lot easier on hisself an' relieve me of a mighty big strain ef he'll leave out anything about gin an' chickens. 'Cepting fo' dose, Ah guess Ah kin stick to de truth."—The American Legion Weekly.

No Joke.

Ex-Chancellor Day of Syracuse university, bewailing the high price of books, clothes and what-not, said at a dinner:

"Will this thing never end? I heard a story the other day. A charitable lady on a seashore boardwalk dropped a nickel in a beggar's hat. But the beggar returned the nickel to her, saying in not unkindly tones:

"'Excuse me, lady; I don't want to hurt your feelin's, but I'll have to return this here nickel back to you. If we take less than a dime we lose our union card.'"

Mansfield Uses Phonographs.

Appreciation of music is taught in the schools of Mansfield, Ohio, with the help of phonograph records. In the seven schools of the town there are 37 phonographs. The machines were paid for by the pupils' music club, which includes 600 boys and girls. Each school has a complete library of records and the phonographs and records represent an investment of more than $5,000. A special textbook in music appreciation guides the teachers in this work, and the music supervisor of the town schools considers the teaching successful.

PARTED BY WAR

Civil Strife Caused Separation of Noted Churchmen.

Missionary Centennial Recalls Affection Between Bishop McIlvaine and Bishop Polk, on Opposing Sides.

A striking memory of Civil war history is awakened in connection with the centenary of the Episcopal Missionary society, falling this year, which centers about two devout bishops of the church. Bishop McIlvaine of Ohio and Bishop Leonidas Polk of Tennessee, life-long friends, whose consciences made them 'enemies' when the war divided the country.

Bishop McIlvaine was the elder of the two and was chaplain at West Point when young Polk, scion of the family which gave a President to the United States, arrived at the academy bent on a military career. At the end of four years Polk was graduated into the army; but so marked was the influence that McIlvaine had exerted that, a few years later, the chaplain having in the meantime been elevated to the episcopacy, Polk resigned from the army and took clerical orders.

With the passage of the years it fell out that McIlvaine and Polk became identified as leaders in the movement within the church which resulted in the dispatch of missionary bishops into the unsettled areas of the country, and brought about those triumphs which are being acclaimed now in the missionary centennial. Polk was made the first missionary bishop of Arkansas and later first bishop of Louisiana.

Then came the war between the states, which arrayed father against son and brother against brother; and these two devout men of the church did not escape the perplexities of the situation. Bishop McIlvaine answered the call of Lincoln and went to England with Archbishop Hughes, Henry Ward Beecher and Thurlow Weed to exert their influence against British recognition of the Confederacy. Bishop Polk answered the call of Jefferson Davis and became a general in the Confederate army.

Thus actively aligned on opposite sides in the conflict, the stage was set for one of the most dramatic episodes of the war. Back in the West Point days the two men had entered into a solemn compact that when they separated, wherever they might be, they would pray, each for the other by name, every Sunday morning. And now, the one fighting in the field for the South, and the other engaged in a delicate diplomatic mission for the North, enemies as to the political principle which was involved, their solemn compact was sacredly carried out until the end came with the death of Bishop Polk at the battle of Pine mountain.

History tells of the success of the mission to England, of which Bishop McIlvaine was a part.

The kind of soldier Bishop Polk was is related in the general orders issued by Gen. J. E. Johnston, commanding the army of Tennessee on June 14, 1864, the day Polk fell. It read:

"Comrades: You are called to mourn your first captain, your oldest companion-in-arms. Lieut. Gen. Polk fell today at the outpost of his army—the army he raised and commanded, in all of whose trials he shared, to all of whose victories he contributed. In this distinguished leader we have lost the most courteous of gentlemen, the most gallant of soldiers. The Christian, patriot, soldier has neither lived nor died in vain. His example is before you; his mantle rests with you."

There is a striking picture, too, of this warrior-bishop contained in a letter he wrote to his wife less than a month before he fell.

"You will be interested," he wrote, "in hearing that the first night of my arrival with the army I baptized Lieut. Gen. Hood. It was on the eve of an expected battle. The scene was a touching one—he, with one leg, leaning on his crutches, a veteran in the midst of his and my officers and I the officiating minister. His heart was fully in it."

A few nights later he also baptized General Johnston.

Corrosion of Metals.

The committee on corrosion of iron and steel of the American Society for Testing Materials reported that tests which have been in progress for five years in the Pittsburgh district on uncoated metal sheets are nearing completion and have reached the point where the committee definitely concludes that "copper-bearing metal shows marked superiority in rust-resisting properties as compared to non-copper-bearing metal of substantially the same general composition, from which superiority we may truly anticipate a marked increase in the service life of copper-bearing metals under atmospheric exposure of uncoated sheets." Other corrosion tests are being conducted in different parts of the country, and before very long a final report may be expected in which results of importance will be stated.

Nothing Wrong to Him.

Mother was terribly upset by Tommy's appearance, particularly his unwashed face.

"Tommy, Tommy!" she exclaimed in great distress. "Your face needs washing terribly! Did you look at it in the mirror this morning?"

"No, mother," said Tommy, with every indication of surprised concern, "but it seemed all right when I felt it."—Exchange.

TRIBUTE TO DEAD

German Writes of American Cemetery in France.

Spot Where More Than 21,400 of the Bravest of Our Land Are Buried, Is Field of White.

Paul Block, Paris correspondent of the Berliner Tageblatt, was recently a sympathetic observer of the destruction wrought by his countrymen in northern France, and sent to his paper a detailed report of his trip through the devastated region. Of a certain point in his journey he writes:

The guide relates in a matter-of-fact way that of the 131 villages which he covers in his trip some eighty have been utterly destroyed. This part of the journey, from Clermonten-Argonne to Boureuilles, has all been wrecked by the war, but the worst came after we reached Varennes. From there to Verdun it is a desert—over which the horsemen of the Apocalypse have swept.

At only one point is there any evidence of restoration, and this has become one of the sights of the region. I mean the American cemetery at Romagne below Montfaucon. Whenever the Americans take anything up they do it in a wholesale way. Although we had come solely to see ruins, we could not pass this cemetery without a visit. It is the only one of its kind.

On a gently rising hill purchased outright for this purpose are buried the 21,400 Americans, who fell during the fighting around Montfaucon. Some kilometers before we reached this point we noted little white signboards along the road directing us to this gigantic graveyard; for many of the relatives of the fallen cross the sea in order to visit the last resting place of those dear to them.

But when you come within half a mile of the point you need no further guidance. An apparently limitless field of white suddenly greets the vision in the distance. This is the effect of the 21,400 tombstones of equal size shining in the sunlight. There are crosses for protestants and Catholics, and stars for Jews, ranged closely side by side, at the heads of 21,400 uniform, well-kept graves. They all lie there, the officers in the middle. A great star of foliage plants separates the world of the dead from the world of the living. High above the graves flutters the Stars and Stripes. Sad, indeed, as is the thought that a whole army of vigorous young boys here slumber in death, this cemetery has nothing gloomy about it. It is a bright and cheerful burial place.

And the army of the dead has its commander. An American officer and his staff reside in the group of tidy houses opposite the entrance, to guard the resting place of their dead countrymen. One of them came forward and greeted us, a cheerful, young man with a wholesome ruddy countenance. What had induced him to exile himself here in this solitude? High pay? A sense of duty? Love for France? The last suggestion is not very plausible, for he does not know a single word of French. In any case, his nerves must be sound, else he could not live here day after day, hour after hour, guarding these 21,400 graves, without going mad.

Comment Not Needed.

I see that Dr. Schussler, who has had access to documents relating to the quarrel between Bismarck and the ex-kaiser, has published in Germany a new political study entitled "The Fall of Bismarck," writes a correspondent. But surely no addition is needed to Bismarck's own words to Dr. Moritx Busch, on the day of his resignation: "I thought he would be thankful if I were to remain with him for a few years, but I find that on the contrary, he is simply longing with his whole heart to be rid of me, in order that he may govern alone—with his own genius—and be able to cover himself with glory. He does not want the old Mentor any longer, but only docile tools. But I cannot make genuflexions, nor crouch under the table like a dog."

New Anesthetic.

A coal tar chemical for the elimination of all pain in dental surgery is announced. This new chemical is liquid in form, is applied on a pellet of cotton to the gum or mucous membrane surrounding the tooth to be anesthetised or into a cavity prior to excavation where a tooth is to be filled or treated. It produces complete local anesthesia in from two to eight minutes, and eliminates all feeling for from one to six hours. Dr. Klein has extracted teeth and pulps painlessly by the use of this chemical. Its effect is entirely local, so it may be applied with perfect safety, regardless of the patient's age or general physical condition. It leaves no disagreeable after-effect.

China's Air Mail Service.

China, with the reputation of the most backward of nations, is operating a regular airplane mail service between Peking and Shanghai, on which 40 planes are in use large enough to carry passengers and parcels in addition to first-class mail.—Barron's Weekly.

Mill Girl Judge in England.

England has a mill girl magistrate in the person of Miss Mary Anne Dews, a cloth weaver, in the town of Dewbury, and who has recently been appointed a justice of the peace.

MARRIAGE IN BASUTO LAND

Bride Is Bought for So Many Cattle and Has Nothing to Say Concerning Transaction.

A Basuto girl is looked upon by her father as his bank, for when she reaches a marriageable age so many cattle will have to be handed over for her by the bridegroom, says a writer in the London Daily Mail.

There is little of love and romance in a Basuto girl's marriage. This is not to say that she has no feelings or does not hear the call of romance. Like every girl in this world, these things come into her life and she thinks and dreams as we all do.

But there is no wooing or winning and none of the beauty of realized young dreams for her.

The man who wants her does not consult her—he has known her and she probably pleased his eye, and so the dusky Hendriks goes to the father and says that he wishes to marry Maluma.

The matter is then discussed by the heads of the family and their relations, and the girl gets to know of the coming marriage only by a chance word that may be dropped here and there.

Generally the principal point of discussion among the heads of the family is how many cows and sheep are to be handed over to the father by the bridegroom as "lobola" (a marriage dowry) for the girl.

This being arranged—usually a payment of so many cows down and so many to be handed over later—the girl is informed that Hendriks is to be her husband for better or for worse—generally worse—and whether he be quite an old man or a young man Maluma has to sacrifice herself and go as she is told.

The young natives living near civilization have discarded the old custom and marry without "lobola" being paid over.

The marriage takes place in a native church. The wedding party and the guests are all dressed in European clothes and they return from the church by wagon to the hut of the girl's father on his master's farm, where sheep have been slaughtered and much Kaffir beer made, and dancing and singing go on continually for two days.

The music is made by a concertina and guitar, and in all Basuto dances the male and female never dance together.

No Solitude for Him.

Highland Light, on a cliff 90 feet above the sea at the tip end of Cape Cod, is credited with being the scene of a real tragedy.

The profoundly moving story concerns Bill, one of the keepers of the light, and incidentally one of the guides to the hundreds of tourists who flock to the lighthouse. Bill, according to his own version of the affair, formerly worked on a railroad. He used to be a conductor, and he necessarily came in contact with many people. In fact, there never was a time when he did not have people around, and Bill grew weary of his kind.

Looking about for a more desirable occupation he hit upon lighthouse keeping as the perfect job for a man who wanted solitude. And it just happened—such things do happen—that instead of the lonely spot he hoped for, Bill drew Highland, one of the most frequented spots of the greatly frequented cape. Every motor-car going to or from Provincetown stops there, and in addition buses from two or three companies make the trip daily from Provincetown. And Bill's life now is one long business of guiding young women up the narrow stairs of the lighthouse and of explaining to them what it is that makes the wheels go around. Bill is bearing up under it, but he feels that fate has not dealt fairly with him.—Brockton Enterprise.

Ancient Store Destroyed.

The old Ford store, known as the first department store in America, one of the most famous of South Shore historic landmarks, was destroyed by fire, says a Duxbury (Mass.) dispatch. The property was worth about $30,000, but there is no means of estimating the value of the heirlooms and relics that were burned.

The store was a long, wooden building a story and a half high. It was built in 1826, and the business was begun by Nathaniel Ford & Sons. From the plan of this store present department stores were made, according to many famous merchants.

Daniel Webster was a patron of the store for years, and on display there since Webster's death have been his favorite saddle, several of his hats and a coat. The first copper measures used in America were also on display in the store. These and many other priceless relics were lost in the fire.

She Was Willing.

Josephine's job was that of stenographer for her beau's big sister. And he, after the fashion of bright youngsters, came often to the office to call, always pretending that he came to see his big sister about something or other. The other afternoon when he was ready to leave the office accompanied by Josephine, he turned to his sister. "Lend me a five, Nellie," he said. "I asked Josephine to and she wouldn't. I thought we might go down to the county clerk's office to get a license or something of that order."

With a little rush Josephine was across the room. "You know I told you, Bob," she said, "that whenever you wanted money for anything sensible I'd lend it to you. Here's a five."—Indianapolis News.

LATEST IN THRIFT

By ADDIE GRAVES.

©, 1921, by McClure Newspaper Syndicate.

Old Jim's third wife was dead. All three had been cross-eyed. Two of them—the first two—had been sisters. It seemed as though Jim was obsessed over crossed eyes. A wife without crossed eyes would not seem a lawful wife. Crossed eyes had not crossed his business luck, at any rate, for Old Jim was worth at least $100,000.

And he could not write his name or measure a load of the lumber which had brought him his fortune.

But he had a way of managing things so the profit balance came out with large per cent. He was very thrifty—so thrifty that when he had the third casket to buy he sought some way to economize.

In his estimation, funeral expenses were wasted expenditure.

He immediately sought the undertaker. This learned gentleman was unboxing the casket of the third cross-eyed wife. Old Jim approached him with no squeamishness.

"Say, John, how much are the handles on the casket valued at?"

John dropped the claw hammer on his big toe and said things not supposed to be said in the presence of caskets. Then:

"I dunno; they allers come on—the same sort on the same sort of caskets; never hed any special orders."

Old Jim viewed the handles as though with begrudging envy. "Well, John, it's awful foolish to bury them handles. Casket handles should be detachable—should be kept with the stands for holding the casket during the service. You just take them off and return them—after the folks has left the cemetery—before you fill the grave. Send them back and get them discounted from the bill."

John carefully straightened some nails he had drawn from the casket box before he replied:

"All right, Jim; maybe it will save enough to pay the minister next time."

Jim lit his pipe, drew in a whiff of smoke, exuding it from his nostrils, threw the match out the window and departed in seeming blank-mindedness. John slammed the door with: "The d—d—d—d I don't-know-what!" The next winter the undertaker died with influenza. His wife had an auction and Old Jim Fuller bought a large box of small assorted hardware. Among the articles were the casket handles, which he had now paid for twice—both times unknowingly. The village doctor spied the handles and offered Old Jim a dollar for them.

A short time after this, Old Jim brought home wife No. 4. Strange it was, her eyes were straight—straight from a clear brain. She proceeded to make the money—and other things, including Old Jim—fly. First, she bought a load of nice, expensive wallpaper and paint and sent for the village decorator. He came without his papering board, for he knew Old Jim had brought a fine board home from the mill for the cross-eyed wives to do the papering in by-gone days. He knew it was in the attic. The new Mrs. Fuller accompanied the decorator to the garret in search of the board. The man pointed to a long row of old hats and bonnets hanging on some nails under the eaves.

"You see them bunnets? Yours will be hanging on that next empty nail some day, keeping them company."

The straight-eyed wife's eyes almost burned the "bunnets" with lightning flashes. She grabbed them all—her two arms full, some hanging by withered strings, and flung them from the window, when they slowly floated toward the mill-dam.

"Not by a dam-site!" she said, with a grim grin. "Jim's hat will hang there!"

In a moment they had discovered the papering board. The paperhanger continued his free informing: "This board has held all the bodies of Jim's wives. They were all laid out on it. It will hold you some day. Then it followed the "bunnets."

In a box near the board were some paste brushes and a pair of casket handles. The straight black eyes bulged.

"What—what are those?"

The paperhanger pretended not to hear. A female hurricane swept toward him.

"If you must know, they are the handles of the last wife's casket—saved to put on yours." The handles did not follow the "bunnets" and the board. A laugh, as when the lightning hits a granite rock and skids down its sides, split the air. The three cross-eyed wives had wept little April showers, most days in their dreary, drudging lives. The straight-eyed wife went down to the telephone and ordered a new horse—the best in the stable—a harness and a new buggy. Those were the times before cars were invented or the buggy would have been a limousine.

Old Jim, that winter, fell and broke several ribs. Complications set in and his hat hung on the attic nail. He was buried in a cheap coffin—exactly like that of his third wife's. It was delivered without handles. The handles from the attic lowered his casket in the grave. The straight-eyed wife straightway found a new husband, sold the house where three stoop-shouldered, sad and cross-eyed wives had slaved, and departed to another town. The handles were at last beyond resurrection.

Old Jim's thrift was applied to himself.

YOUTHFUL DREAM

By MILDRED WHITE.

Copyright, 1921, Western Newspaper Union.

Barrie, in college days had been an athlete, and fond of the great out of doors. Resting beneath a spreading tree, with arms clasped idly above his head, he had dreamed dreams of an adventurous future with some congenial "nut-brown maid" by his side. Instead, Barrie had fallen early in love, and sacrificed his dream to necessity.

It was his adverse fortune, to love, and marry a white flower of a girl, who, unlike the hardy brown-tanned maid of fancy, exacted tender care and the support due the clinging vine. Barrie tried not to love Lillian; stubbornly he had fought against her charms, all to surrender the more eagerly at last. And Lillian proved a good wife, faithful to the details of his home keeping, sweet natured always, and lenient to his whims.

When Barrie, irritably insistant, grumbled at the confines of city life, Lillian, unmoved, packed his bag and cheerfully bade him good-by, as he hurried woodward on some lonely vacation. Sometimes it seemed he was really hurrying away from Lillian. Her dainty perfections wearied him. But after dogged days of freedom, tramping unfamiliar country or fishing in wild and isolated places, Barrie was sure to come, shamefacedly and humbly, back to Lillian's welcoming hospitality. Her smile would be as sweet when he returned as it had been on his departure. And this satisfied imperturbation of her's brought to him merely impatience. Mallory came back to the office one day with enthusiastic tales of a month spent out West.

"Give me your route, Mallory," he said brusquely, and the next day found Barrie on his way to the lonely places.

The office could manage well at this time, he said, without him. When he was on his way, Lillian called Mallory to ascertain any possibility of danger in Barrie's outing. To her Mallory enthused on life in the open, as he had to her husband. When Lillian turned from the telephone the wondering light in her eyes gave place to understanding. Barre's first weeks on the ranch found him joyously content.

"This is something like it," he told Dan of the ranch, "this morning's ride was like a tonic."

Big Dan smiled.

"You take it alone tomorrow," he said. "I'm going over early to Hastings. At Hastings—" Dan's smile changed to a conscious laugh—"there's a new girl. Not any like her in this part, so we all go over to see her.

"She makes the kind of flap-jacks for the boys your mother used to make—and she lets us crowd into her cabin and eat 'em. Somebody's named her 'Prairie Flower,' out of a book he'd read; but say! that girl can ride! Goes flying on her white horse like a streak. She's as brown and red tanned as an autumn leaf, and she wears a red cap on her head—hair that's crinkly and brown, too, like a leaf, and when Prairie Flower laughs—say, it's like a lot of birds singing in the morning."

Barrie grinned.

"Dan!" he exclaimed, "you are in love."

"We all are," Dan answered.

"Dan," Barrie exclaimed, decidedly, "I am going with you tomorrow morning to Hastings. Not that I've any foolish notion concerning this ranch girl, but I do want—to taste some old-home-week flap-jacks."

Barrie scarcely knew, himself, what impulse moved him, but he was guiltily aware as the two rode out in the morning light together of a longing memory, persistently buried, of the nut-brown maid of youthful dreams.

It was, perhaps, by contrast that Lillian seemed almost wearisome in her perfect sameness. The boys were evidently stopping for their morning call at the picturesque cabin.

"She's got up early, I guess," a disappointed caller explained, "to ride over to Blue Ridge. She does that sometimes, with her big bulldog. Nothing can't hurt her with that beast around."

Satisfaction was in the gruff tone. Barrie realized now how protectingly the Prairie Flower was regarded by her rough companions. Determinedly Barrie cantered toward Blue Ridge.

"If she don't want anyone along, why do you go and disturb her?" Dan complained.

But something hanging in the cabin had caught Barrie's eye. An amazingly familiar something—a blue and gold embroidered apron that Lillian, across their own living room table, had spent many evenings working upon. Surely there could be no other apron so ingeniously original, for he, himself, had whimsically drawn this design on the blue linen. Instinctively and illuminatingly, the truth came to him. Lillian, in her faithful love, had followed to be near, in his isolation, and yet not to trespass. Lillian, growing and molding herself into an understanding of his old, longing dream. He opened his arms as she slipped from her white horse to run to him. Browned, yes, but starry-eyed and radiant.

"We will come here," she whispered after a time of silence, "whenever the longing seizes you, Barrie."

And Barrie's smile was a lover's smile, as he called her his "nut-brown maid."

KLEMME SCHOOL NEWS

By Andrew Wellemeyer and A. E. Lauritzen

LECTURE COURSE MONDAY EVENING JANUARY 16th

The cecond regular number of the Lyceum Course will be held at the Idle Hour, Manday, December, 16th at 8:00 P. M. Mr. Holmer C. Boblitt. Orator, will give the evenings entertainment. Mr. Boblitt visited our school last spring and gave us a short talk. He is a wonderfull speaker and we are sure he will give a good nights entertainment to the people of Klemme. Do not fail to hear Mr. Boblitt at the Idle Hour Manday January 16th. Remember the date and plan to attend.

SCHOOL NOTES

Fred Schlicting was absent Wednesday forenoon.

Marie Blank was absent Wednesday forenoon.

John Baugartner of the Freshman class has been absent since vacation.

The Ninth Science class is now taking up the study olectricity.

A practice game of basket ball was played Tuesday between Klemme High and Garner. This game was played on the Garner floor. The score was 43 to 11 in favor of Garner.

A schedule of games to be played by the Klemme High School teams was published in the last week's Tmies and we there was a mistake in one of the games scheduled. The folowing is the correct schedule of basket ball games so far obtained:
Klemme at Goodell Jan. 20th.
Goodell at Klemme Jan 27th
Rowan at Klemme Feb. 17th.
Crystal Lake at Klemme Feb. 24th.
It is quite probable that the teams will play Ventura two games, at Ventura Jan. 25th and Ventura at Klemme Feb. 3rd. We have not yet accepted the challenge of these two games.

HIS BEST COAT

By JULIA A. ROBINSON.

© 1921, by McClure Newspaper Syndicate.

It was one of May's failings, if you call it a failing, that she wanted to help everyone in need, in fact, to feed every tramp who came to the door begging for food. A very lovable failing it was, and no one could find the heart to blame her.

May had managed her father and mother, and brought them into her way of thinking, but with Harold it might be different.

"If I marry you, Hal," she had told her lover, "you must let me keep on with my charities just the same.

"Agreed," he laughed, with admiring eyes. "I only ask that you do not run me into the poor house."

"You know I would not do that," she pouted. "I'll just give away what is mine, out of the allowance you give me, and the old things we do not want."

"Sure thing!" he returned.

Things went smoothly for May after she was married. Her husband was devotion itself, and life was happy.

"I feel real lonesome," she confided to her husband. "Don't they have any tramps in this part of the town?"

"Well, really, I like that!" he resented, with pretended anger. "Lonesome! when you have me? Ain't I as good as any tramp?"

"There, Hubby, you know I didn't mean that. You're the best husband ever was, but you know I can't give you cold victuals and old clothes."

"Well, I should say not," he chuckled, and the kiss he gave her assured her she was forgiven.

It was not very long, however, before the tramps found her out in her new quarters. It does not take long for them to learn who is ready to help them. One by one they came to her door, and she was happy once more in the thought that she was doing good.

One day a very poor looking man came to the front door. He was old and thin and stooped. His clothes were almost threadbare and it was a cold day. May invited him into the kitchen and gave him food, which he ate with a relish.

"If you had an old overcoat, lady!" he suggested. "The wind sweeps through me in this old coat and my lungs are weak."

He gave a hollow cough that showed he spoke the truth. Her kind heart was touched. She must find a warm coat for the man; there must be one about the house somewhere.

May did not know very much about her husband's wardrobe or what he did with his worn-out clothes, but she would look. No doubt she would find one tucked away in some closet that she could give to this man who needed it so much. Where did her husband put his old clothes, she wondered, for she did not find them lying about in as great profusion as she could have wished.

At last she opened a closet in a back hall. There it hung, the very thing! The old coat she had been looking for. Joyfully she took it from the peg. There was a good deal of wear in it yet, she noted with satisfaction. It would keep the man warm all winter.

The tramp was sincere and profuse in his thanks, and May's heart glowed as she watched him depart, warmly clad in Harold's old coat.

"Let's go to the movies tonight," suggested Harold, after he finished his supper. "Want to go?"

"Oh, yes!" cried May. "I'd love to go! How good you are!"

As they were about to start Harold said: "I think I'll put on my overcoat; it's cold. I haven't worn it this season."

He went out of the room, but soon came back in consternation.

"Been feeding any tramps today?" he asked.

"Yes, one poor old man. He was cold and hungry, and half sick, too."

"Well, he's helped himself to my best winter overcoat for thanks." Harold's voice was stern and May felt a little afraid.

"Your best overcoat! Oh, Hal!" she stammered.

"Yes. I hung it in that back hall closet. He must have slipped in and taken it while you were preparing his dainty food." His voice was bitter.

May trembled. Hal's best overcoat! And he was angry! What would he do to her if she told him? Yet she could not have the tramp blamed unjustly. She covered her face with her hands and burst into tears.

"Oh, Hal!" she sobbed. "It wasn't the tramp. He didn't steal it—I—I—gave it to him. But I thought it was old and that you'd thrown it away."

She shivered, expecting angry words of reproach.

Harold was silent for a moment. Then he burst into a hearty laugh.

"So you thought it looked only fit for a tramp, did you? And my wife was the thief! I shall have to put my clothes under lock and key hereafter to keep them from a robber in my own household!"

May looked up, shyly, half afraid, but there were smiles in Harold's eyes.

"You're not really angry with me?" she ventured. "Oh, Hal! Forgive me and I'll never take your things again!"

"Angry? No, puss. It's worth it to know what a kind little heart you have. Only the next time, please consult me before you give away my clothes or I may have to turn beggar myself."

"I believe you love the tramps just as well as I do, you dear old boy!" May smiled, happy once more.

LURE IS VARIED

Men Have Odd Motives for Seeking Exile in South Seas.

Sometimes It Is More or Less Humorous, Occasionally Deeply Tragic, but Always Interesting.

I have often speculated on the motives actuating the men and women who come to the South seas—most of them of a class neither adventurous nor imaginative. Why have they left home at all, and why have their wanderings led to a place so insignificant and remote?

In some cases, of course, the motives are not complex. I remember a middle-aged Californian, who did not hesitate to be frank. We were sitting on the hotel veranda, wasting an afternoon in idle talk.

"Why did I come to Tahiti?" he said. "That's simple—I wanted to live in a place where I could have a drink without breaking the law. I reckon I'm a good American, but I like to be let alone. The French are great fellows to mind their own business; I found that out during the war. Yes, I was there—over age, but I got into the National Guard at the start. When I got home I took a look around and then made my partner a proposition to buy me out. We had a nice little business; my share of it, turned into bonds, brings in about three thousand a year.

"When the deal was fixed, I got a map and hunted up the nearest French colony—I reckoned it would be quieter there than in France. I guess I'll leave my bones on Tahiti. My house will be finished in another month; it's close to the water and a big shady veranda where you can sit and look out across the lagoon to Morea.

"I don't want any women, or servants, or newspapers, or plantations, or business of any kind—I just want to be let alone; but any man who doesn't talk politics will be welcome to drop in for a drink."

Here was one accounted for. A few moments later, on the same veranda, another man told his story in eight words, pregnant as they were brief.

There was an Englishman with us—a traveler, who was stopping over a steamer in the course of an eastward tour around the world. He had been in India, and was showing us his collection of photographs of that land. While the pictures were passed about, I noticed an elderly American, of morose and corpulent mien, sitting at some distance from the rest of the company and taking no part in the conversation, though he uttered from time to time a series of nasal sounds vaguely suggestive of French and correctly interpreted by the native girl to mean: "One rum punch."

In time we came to the inevitable picture of the Taj Mahal; and while we gazed at it, marveling anew, the tourist spoke of the vast expense of raising such a monument. When he had finished, the man who wanted to be let alone was the first to speak.

"Just think of that guy," he remarked, "spending 10 million dollars to bury his wife!"

Musing on the ancient and costly bit of sentiment, we sat for a moment in silence—a silence broken by a sepulchral voice.

"I'd give more than that to bury mine!"

It was the orderer of rum punches who spoke, addressing the company for the first and last time. He said it without a shadow of humor—so earnestly, so convincingly, that several seconds elapsed before any of us smiled.

He had placed himself. Curiosity regarding him was at an end; if he chose to spend the rest of his days in the South seas, gossip would pass him by, to whisper of others less communicative—the ever-present rumored murderer or defaulting financier. For all we knew, the morose gentleman might have been quite capable of building a second Taj Mahal.—Charles Bernard Nordhoff in the Atlantic Monthly.

Be Vacation-Minded.

It is unfortunate that every individual cannot have a real vacation away from his business. But for those who cannot, to be vacation-minded, and to keep that way as long as they possibly can, is the next best thing.

Few businesses are so active in the summer time that a little let-down in hours and attention will do any great harm. So why not shorten hours and let down a bit, performing only such part of the day's labors as are absolutely necessary to maintain the existence of the undertaking, and letting every other detail go? The time gained should be spent like any vacation time, in the coolest and pleasantest spots possible.

Nothing is surer than that work will be there when we get back. The Lord saw to that when he sent man forth to earn his bread in the sweat of his face.—Concord Monitor.

BOBBIE CHASES A JACK RABBIT

Another hunting party made up of Bobbie Henschen, M. O. Hocum, Cop Lemke, Howard Doyle, Swift Lewis, Walt Schultz, Chris Gram, George Kessler and Emil Kraus went out east of town Monday after rabbits. Bobbie spied a jack rabbit and took a pot shot at him but missed, then his shells stuck adn being unable to shoot he took after the jack rabbit and the last the boys saw of Bobbie he was chasing the jack over te hill. Te jack got away but Bob was handicapped as the jack had two legs to travel on and Bobbie only had two so the rabbit went just twice as fast as the would be hunter. That is not all, Bob bought a couple of rabbits from Martin Jensen so he wouldn't have to set up the treats to the rest of the gang. Swift was also in on it and bough a rabbit from Bob. With this information the gang should be able to collect the treats from Bob and Swift.

"Here comes a friend of mine. He is a human dynamo."

"Really?"

"Yes, everything he has on is charged."

Knicker: "That florist sure keeps in touch with the slogan, 'Say it with &owers.' "

Knocker: "What's his method?"

Knicker: "Sends a bunch of forget-me-nots with each bill."

In this territory you get the Globe Gazette delivered in advance of any other dailp paper. J-13-1wc

MINOR MUSINGS

Perhaps the reason one who is about to commit suicde generallp appears cheerfull just before he does it, is because a condemed man always eats a hearty breakfast just before he is led to the gallows.

Everybody else wishes that "mother's angel child" were one.

Rich men do not really deserve as much sympathy as some poor men think.

More modern matches are made in haste than in heaven.

Now that there are no longer faces on the bar room florr and curfews don't ring tonight, the elocution ist has abandoned his job and may be found playing a sobbing saxaphone.

Nothing sadens an older person like seeing two young people marry. who, he thinks, are bound to made a failure, and few things irritate him so much as to find out later that they haven't.

Dignty is something that a man puts on after he has lost an argument.

The difference between a good and a bad doctor is that the former comethmes knows that he does not understand a case and the later never does.

A woman never is too old or homely not to believe she still has a chance for a life romance, but a man after thirty generally translates his romantic ideas into terms of dollars.

BEFORE AND AFTER CHILDBIRTH

Mrs. Williams Tells How Lydia E. Pinkham's Vegetable Compound Kept Her in Health

Overpeck, O.—"Lydia E. Pinkham's Vegetable Compound helped me both before and after my baby was born. I suffered with backache, headache, was generally run down and weak. I saw Lydia E. Pinkham's Vegetable Compound advertised in the newspapers and decided to try it. Now I feel fine, take care of my two boys and do my own work. I recommend your medicine to anyone who is ailing. You may publish my testimonial if you think it will help others."—Mrs. CARRIE WILLIAMS, Overpeck, Ohio.

For more than forty years Lydia E. Pinkham's Vegetable Compound has been restoring women to health who suffered from irregularities, displacements, backaches, headaches, bearing-down pains, nervousness or "the blues." Today there is hardly a town or hamlet in the United States wherein some woman does not reside who has been made well by it. That is why Lydia E. Pinkham's Vegetable Compound is now recognized as the standard remedy for such ailments.

Habit

Nujol will give you the healthiest habit in the world.

Without forcing or irritating, Nujol softens the food waste. The many tiny muscles in the intestines can then easily remove it regularly. Absolutely harmless —try it.

The Modern Method of Treating an Old Complaint

Records His Mower Mileage.

The latest device whereby the suburbanite can lord it over his neighbors is a small dial attached to his lawn mower which keeps a record of the mileage. Because it is more impressive the total is marked in feet instead of miles.

"I pushed the mower 20,000 feet this summer," said the man who introduced the novelty, "while both the fellers that live near me have only done 10,000. The idea is to see how much you can use the thing without having the knives sharpened."—New York Sun.

Stop the Pain.

The hurt of a burn or a cut stops when Cole's Carbolisalve is applied. It heals quickly without scars. 30c and 60c by all druggists or send 30c to The J. W. Cole Co., Rockford, Ill.—Advertisement.

Use the Fireplace.

A fireplace that is really used to add to the comfort and good cheer of the family on cool evenings is a never-failing source of joy. One that fails to draw—a too common fault in latter-day buildings—can often be enlarged or otherwise changed at small expense, and made useful. The custom of having a house full of fire-places which never have a fire in them is one that is as absurd as it is common.

The first state to declare Memorial day a legal holiday was New York.

SQUEEZED TO DEATH

When the body begins to stiffen and movement becomes painful it is usually an indication that the kidneys are out of order. Keep these organs healthy by taking

GOLD MEDAL HAARLEM OIL CAPSULES

HINDERCORNS Removes Corns, Callouses, etc., stops all pain, ensures comfort to the feet, makes walking easy. 15c. by mail or at Druggists. Hiscox Chemical Works, Patchogue, N. Y.

MISUSING GRADE NOT PROFITABLE

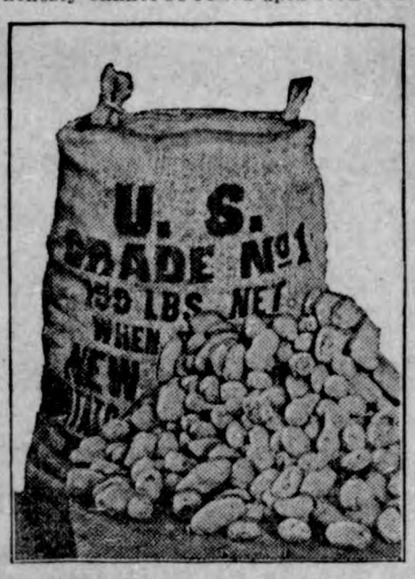
Misbranding Frequently Occurs Through Ignorance, Rather Than Intent to Cheat.

CAUSES OF IMPROPER GRADING

Specialists Point Out That Grower or Shipper Who Ships Inferior Farm Produce Soon Learns Error of His Way.

(Prepared by the United States Department of Agriculture.)

Sixty per cent of the commercial potato crop in the United States is now bought and sold upon the basis of United States potato grades, according to the bureau of markets and crop estimates, United States Department of Agriculture, and every producer contributing to that quality of graded stock is vitally concerned with the elimination of dishonest grading practices. Growers and shippers whose honesty cannot be relied upon soon find



This Sack, Labeled "U. S. Grade No. 1," Contained Run Stock Shown in the Foreground.

it difficult to market their crops anywhere, for the news that they are undependable travels quickly in marketing circles. But in its larger aspect as concerning the whole body of producers and shippers who conduct their business on a basis of co-operation with the dealer, the misuse of a grade is a really serious matter for it tends to jeopardize the mutual feeling of confidence which is the very essence of business dealings.

Flagrant Case of Misbranding.

Several instances of the misuse of United States potato grades have come to the attention of the department. In New Jersey a growers' organization was found placing in sacks labeled "U. S. Grade No. 1" potatoes that were actually field run of poor quality. Fully 25 per cent of the potatoes in each bag were culls and only a small percentage of the remaining 75 per cent would have graded No. 1.

A short time ago a jobber in a southern city ordered a car of U. S. Grade No. 1 Round Whites from a shipper in a northern state. Upon arrival, inspection showed that the two top layers of sacks contained stock that was sound and up to the grade requirements in every respect. But the potatoes in the bottom layers of sacks were badly smeared with dry rot from contact with decayed stock, these layers evidently being of stock that had been reconditioned at shipping points. The potatoes had to be resorted at the receiving point, and the shipper suffered a heavy monetary loss.

Blemished Stock Picked Out.

In a trip through the Minnesota potato district a representative of the department recently reported that in one house where a grading machine of the shaking screen type was used the screen was padded with burlap, leaving only about one and one-half feet of screen at one end uncovered. The manager stated that this was to prevent bruising the stock, and he seemed to be much surprised when it was pointed out that the burlap interfered with the proper sizing of the potatoes.

It was also reported that in some instances shippers were of the opinion that No. 1 stock was procured simply by running the potatoes through a sizing machine. In these cases it was necessary to call attention to the fact that blemished stock must be culled out by hand; also that when there is a heavy run of undersized stock, much of it may be carried over the grade if the potatoes are run through too rapidly.

Specifications of the federal grades can be had upon application to the bureau of markets and crop estimates, United States Department of Agriculture, Washington, D. C. The bureau will also be glad to advise growers and shippers with regard to detailed grading methods.

SOILS NEED STABLE MANURE

Fertilizer Loosens Up Clay and Assists Sand to Retain Moisture Needed by Plants.

The chief virtue of sandy soil is that the roots of plants can pass through it readily; its chief fault is that it dries out too quickly. Clay soil holds water well, but it tends to pack and harden. Both types of soil need stable manure—it loosens up clay and helps sand to hold moisture.

SUGAR BEET CULTURE HAS LARGE GROWTH

Farmers Received $99,000,000 for Crop in 1920.

Any Fertile Soil Capable of Producing Good Yields of Other Crops Will, If Properly Handled, Prove Satisfactory.

(Prepared by the United States Department of Agriculture.)

The sugar-beet industry of the United States produced more than 1,000,000 tons of sugar and the 106 factories, 97 of which were in operation in 15 states, paid American farmers more than $99,000,000 for their beets in 1920.

In a comprehensive new bulletin, No. 995, "The Sugar Beet Industry in the United States," the United States Department of Agriculture says that almost any fertile soil capable of producing good yields of other crops will, if properly handled, produce good sugar beets. This statement, however, is restricted by considerations of climate, moisture, and topography as related to the question of producing enough beets of the requisite sugar content within reasonable hauling distance to maintain a sugar-beet factory.

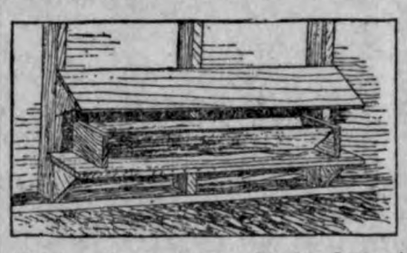
The bulletin reviews the history of the sugar-beet industry from the first mill, built in 1870 at Alvarado, Cal; analyzes soil, climatic and topographic requirements; and deals at length with the necessary equipment, best methods of planting and cultivation; the important relation of the sugar-beet to the live stock industry; the management of parallel and rotating crops; the labor problem; insect and disease enemies of sugar beets; and the business of selling beets to the sugar manufacturers. "The successful production of sugar beets on any farm depends to a great extent upon the temperament of the farmer and upon his attitude toward the production of this crop," says the bulletin, adding that the man who handles cows, especially dairy cows, is more inclined to take up the growing of such an intensive crop as sugar beets and is more apt to succeed in this line than the grain or forage crop man.

A list of more than fifty department publications on different phases of the beet-sugar industry is included in the bulletin, which may be had free upon application to the Department of Agriculture, Washington, D. C.

KEEP DRINKING WATER CLEAN

Overhanging Strip Prevents Fowls From Roosting on Edge or Getting Into Trough.

To keep drinking water clean, provide a low shelf on the inside of the poultry house for the water trough and an overhanging strip, as shown in the sketch. The wood strip is fastened just far enough above the top of the trough to allow the chickens to drink easily, but prevents them from roosting there, or getting into the trough. Pans or basins can be used with the



Wooden Strip Keeps Fowls Out of Water.

same arrangement, although if a trough is made for the purpose, it will fit in better and, during the winter months, the ice will be forced upward and there will be no danger of breaking. This arrangement will be found excellent for feeding the flock hot mashes and other feeds, also.—Dale R. Van Horn of Nebraska, in the Farm Journal.

CLEAN UP ALL GARDEN TRASH

Insects and Disease Spores Live Over Winter in Stalks, Vines and Other Rubbish.

Much of the success of next year's garden depends on cleaning up the trash left from this year's crop, says the United States Department of Agriculture. Insects and disease spores live over the winter in stalks, vines, and stubble. Weeds and vegetable debris should be raked into piles and burned or carried off as soon as it is convenient to do so. Pieces of cabbage, carrots, potatoes, and other vegetables which have been left on the ground in the harvest should be raked up and destroyed to avoid attracting insects and rabbits. The rabbits, tempted by these titbits, may remain to bark the fruit trees and damage bushes. Time given to this work at a period of year when other matters are not pressing will be well repaid in the spring and summer.

SODIUM FLUORID GETS LICE

Mixed With Road Dust It Has Been Found to Be an Excellent Remedy by Experts.

A combination of sodium fluorid and road dust, mixed one part of fluorid to four parts of dust, is an excellent remedy for body lice on fowls, according to investigations by poultry experts at the University of California. Sodium fluorid costs 40 cents a pound and that quantity is sufficient to treat 100 hens.

DAIRY POINTS

PLAN FOR BULL ASSOCIATION

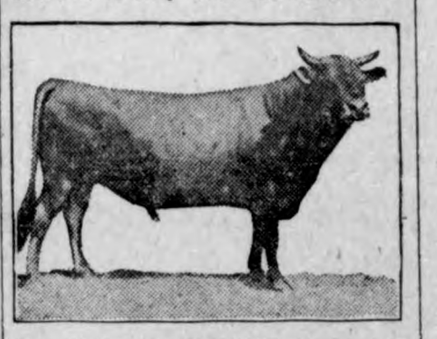
Idea Has Been In Use in Europe for Many Years, But Is Comparatively New Here.

(Prepared by the United States Department of Agriculture.)

Every dairy farmer knows that he would get better returns from his feed and labor if he had high-grade stock; but the idea of establishing a blooded herd immediately suggests "kid glove" farming and bankruptcy. "Two-thousand dollar cows and two-dollar milk," was one farmer's characterization.

Yet the United States Department of Agriculture annually is leading hundreds of farmers toward the possession of herds that will increase the former milk and butter-fat yield with the same outlay for upkeep. One of the most useful agencies is the co-operative bull association.

A high-grade cow will impart her excellent qualities to one calf in a year, and the total of high grade farm cattle is increased by one. On the other hand, a bull whose mother had the same milk and butter qualifications, and whose father is descended from a milk and butter strain, may sire as many as 75 calves, each carrying its share of the racial excellence. This bull can do duty with one lot of cows



Five Bulls Like This Will Improve an Entire Dairy Community.

for two years without danger of inbreeding. If there were five lots of cows and five bulls, and the bulls were rotated from one herd to another every two years, each bull would have a period of usefulness of possibly 10 years, and may easily have added 750 head of young stock, with a due proportion of high milk-producing heifers. As the first generation of heifers became milkers, the breeding value of the bulls would become established and any inferior sires could be weeded out. Five bulls kept for ten years may change the entire dairy industry of a community and possibly give its cattle a distinctiveness that would be a valuable market asset.

Co-operative bull associations have existed in Europe for a long time. In America the system is only twelve or thirteen years old, but records of milk and butter-fat production are in possession of the department, showing tangible benefit far exceeding the cost to the cow owners.

At New Windsor, Md., for instance, seven daughters of one sire averaged 270.5 pounds of butter fat a year, an improvement over the average of 208.3 pounds for their dams. This was only the first generation. The five-block association will permit line breeding with greatly increased possibilities.

To organize a co-operative bull association it is first advisable to arouse as much interest as possible in the plan through meetings, conversation, and the circulation of Department of Agriculture literature. It is possible that the county agent or even some state or federal agricultural representative can be induced to help personally. Advice can always be obtained from the department by mail. Forms can be had from the department for a preliminary agreement, in which, among other things, the number of cows owned by each prospective member is listed. When a sufficient number of cows have been listed, a meeting should be called and arrangements made for incorporation. Each member would contribute in proportion to the number of cows he owns, but would have only one vote.

As early as possible, the temporary or permanent secretary should begin corresponding with breeders having high-grade bulls for sale. One bull should be purchased for about every 75 cows. The cows should be divided into blocks of that number, with regard to geographical convenience, and arrangements made for the keeping of the bull by a responsible member whose farm is conveniently located. The fees should be such as to cover the purchase cost and the cost of keep for a year, and annual assessments provided thereafter.

Valuable information on the formation and conduct of bull associations will be found in Farmers' Bulletin 993, which the department will send free on request. Supplemental information, including plans for a model bull pen, and data on the operation and success of various established bull associations can also be had by correspondence. The department is doing everything in its power to promote the co-operative bull association movements as one of the most valuable advances made in modern dairying.

Gentleness With Cows.

Cows respond to gentle treatment. The dairyman who makes pets of his calves and who continues to fondle the animals even after they have dropped their own calves is almost certain to possess a herd of good milkers.

COULD HARDLY EAT ANYTHING UNTIL HE USED PE-RU-NA

NEIGHBORS FOUND IT A WONDERFUL MEDICINE

"I was weak and tired and could hardly eat anything until I used Pe-ru-na. Soon my appetite was good and my strength returned. I told my neighbors and every one of them found it a wonderful medicine You can always get a dose of Pe-ru-na at my house no matter what the war tax."

MR. T. N. WAGGONER, Box 25, Bragg City, Mo.

Catarrh of the stomach and bowels is among the many forms of catarrhal diseases from which a large number of people needlessly suffer. Fifty years of usefulness is the guarantee behind

ARTISTS IN JAPAN'S CABINET

Writings and Paintings, the Work of Nipponese Statesmen, Have Been Sold at Big Prices.

Japan has a cabinet of artists. Writings and paintings of some of the great men of the Japan of today brought big prices at a recent auction by the Tokyo Fine Arts club. Three pictures painted by Mr. Hara, assassinated a short time ago, sold for the equivalent of $600 and another lot of four brought about $800.

Pince Pamagata's productions brought about $250 to $300, while some pakemono writings with proverbs in the Japanese language by Prince Saionji brought from $200 to $300.

A chrysanthemum painted by Mr. Noda, minister of communications, sold for $60 and an orchid from his brush sold for $70. Mr. Yamamoto, minister of agriculture and commerce, had a picture and Mr. Tokonami, the home minister, a poem.

The painting of kakemono is a favorite pastime of the Japanese.—Philadelphia Inquirer.

Conclusive.

"Algernon, I cannot be engaged to you any longer." "Why not? Some whim, I suppose." "Because yesterday I married Mr. Flubdub." "In that case, I guess I'll have to release you, kid."—Louisville Courier-Journal.

USE DRUGS TO GAIN COURAGE

After Stimulant Subsides, Criminals Are Cringing Cowards Again, Declares a Writer.

Stick-up men, shoplifters, burglars and pickpockets are the largest users of drugs. Most persons think morphine, heroin, cocaine and opium are indulged in by the criminal classes after the commission of a crime as a surcease for their minds.

"Nothing is farther from the facts," said an old detective. "The criminal who works in the open uses drugs to supply him with courage. It is a sort of false courage, for it dies out with the effects of the opiate. Nevertheless without it your holdup man would never have the nerve to carry through a daylight robbery. A census of the drug addicts is a roster of the crooks in nine cases out of ten. Of course after a time the criminals acquire a permanent appetite for drugs, but the seeming super-courage that sends a man with a pointed gun into a jewelry store filled with customers to grab trays of diamonds is only stimulated from the effect of the drug. Half an hour later when the influence of the poison has worn off he is left a cringing, cowering coward."—Philadelphia Ledger.

One secret of success is the early discovery that you can't do everything.

Real Rest Depends Largely Upon the Depth of Your Sleep

A warning to "light" or "poor" sleepers

The deeper and sounder you sleep the better you feel. Five hours sound refreshing sleep does you more actual good than ten hours restless, disturbed sleep.

This is because the final conversion of food into vital tissue and nerve cells goes on more rapidly when the physical and mental forces are at rest.

You can't get sound, refreshing sleep if your nerves are agitated with tea or coffee. Both these drinks contain caffeine, which is sometimes very irritating to the brain and nervous system.

If you want to know the joy, vigor and stamina that comes to the person who gets sound, healthful sleep, why not stop taking tea or coffee for a while, and drink delicious, invigorating Postum instead.

Thousands of people everywhere have found that this was the only thing they needed in order to bring about these very happy results.

Order Postum from your grocer today. Drink this delightful cereal beverage of coffee-like flavor, for a week. Perhaps, like thousands of others, you'll never be willing to go back to tea or coffee.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

Postum *for* Health

Is Starvation Painful, Does Anybody Know?

ABOUT KLEMME PEOPLE

Mrs. Joustin Lynch returned Saturdayfrom her visit out of town.

Mrs. Ben Katter, of Garner, was visiting Klemme friends Tuesday.

M. O. Hocum went to Grinnel on business yesterday.

Mrs. A. R. White was visiting with relatives at Goodell Tuesday.

Tom Hamilton, of Goodell, was a business visitor herer Monday.

Ray Swartz of Titonka, has been here visiting at the home of her brother Cliff and family.

Carl and Ingvard Lauritzen drove to Ringsted Saturday afternoon for a visit with friends.

Mrs. J. Jorgenson, of Garner, was calling in Klemme Tuesday between trains.

Second number of the lyceum will be given Monday night. Jan. 16th. See adv for particulars.

Mr. and Mrs. J. B. Brouwer, of Ventura, were visiting Klemme relatives last Thursday.

Mrs. Ben Nieman and her mother, Mrs. Lambert, returned Thursday from Eldora Iowa. where they have been visiting friends and relatives.

John Swalve and wife are rejoicing over the arrival of a fine baby boy since last Thursday. They now have a girl and a boy in the family.

Mrs. Katter and little daughter, Margaret, of Garner came Friday for a visit at the Chris Blumer home. They returned the following day.

Mrs. Tom Mitchell came down from Swea City last week for a few days visit with her many Klemme relatives and friends.

Miss Effie Johnson returned from the Hampton hospital last Wednesday. She is greatly improved in health.

Henry (Butch) Schroeder came from Chicago Saturday for a few days visit with his mother, and other Klemme relatives and friends.

A number of bays about town enjoyed themselves Sunday ski jumping on the hills south of town. Everyone had their share of spills down hill.

Albert Swanson has enrolled as a student at the Sweeney Auto school at Kansas City, Mo.. He is taking the complete automotive mechanical course.

Mrs. Wm. Trafford and children returned to their home at Belmond after a week's visit at the home of her parents, Mr. and Mrs. Henry Maitland who reside east of Klemme.

Mrs. Ralph Blank came from Estherville last week for a visit at the Tom Klank and Conrad Quandt homes and with other Klemme relatives and friends.

Rev. Figge, of Livermore, preached in the English Methodist church Sunday morning and evening. He was a pastor of that church at one time for a few years.

Rev. and Mrs. A. E. Buriff drove up from Goldfield yesterday to spend a few days with their many Klemme friends. Reverend is pastor of the Methodist church at Goldfield.

Mrs. Fred Wellemeyer returned to her home at Early, Iowa, last Thursday after spending a few days visiting at the A. Wellemeper home here and the Ed. Wellemeyer home at Garner.

If you have a bit of news
Send it ni.
Or a joke that will amuse,
Send it in.
A story that is true,
An incident that is new,
We want to hear from you.
Send it in.

Will your story make us laugh
Send it in.
Never mind about the style
If the story is worth while
And may help or cause a smile,
Send it in.

"Dad" Yahnke shaved off his tea strainer (or mustache) the other day saying that they were not practical in the wintertime anyway.

Henry Church, of Garner, was a business caller in Klemme Tuesday. Henry might just as well move back here again as he is in town most of the time.

Earnest Lewis left for Hayfield Minnesota, last Thursday for a visit with his brother. Verner and also to keep Verner companp during his wife's and baby's absence who are visiting at her home at McGregor.

Mondap was the birthday anniversary of three of our townsmen: John Henschen, Mart Hocum and Frank Terhufen. The boys are a little past the marble playing age so they enjoyed the day hunting rabbits.

Henry Ludeke and family began moving into their new home just west of town Saturday. Henry has a fine place out there on thirty acres. He put up a fine new house, barn, chicken house and other buildings.

Henry Lau is rushing the season a little in horseshoe playing. The other day he shoveled a path through the snow drift by his store and drove down the pegs. Next thing we saw Henry and R. F. Hoffman pitching against Ben Grieman and John Baumgartner.

Monday being Mart's birthday anniversary, Mrs. Hocum prepared a fine six o'clock dinner, without his knowledge, and invited a number of his friends to the celebration. Mart knew there was something "in the air" but he had plumb forgotten all about such a thing as his birthday.

We suspicion that there will be wedding bells ringing here soon as Frank Gruetzmacher is having the rooms over his store re-decorated and we just surmise that a certain young man about town has rented them, and not for a bachelor apartment either.

We regret to report that Mrs. Everett Amey is quite ill at this writing Sunday she underwent an operation for appendicitis but gangrene set in and she is now under the care of a trained nurse and getting along as well as can be expected. Her many friends hope for her speedy recovery.

Ray White spent Sunday with his family at Forest City. He works in the Larsen meat market here. "Pat" rode as far as Miller with John Etchen who was going to Forest City but "Pat" said that John's car went about fifty miles too fast and he would rather take a little exercise walking. He also came back on the train the next day.

Howard Doyle, M. O. Hocum. Al. Emerson, C. F. Keraus, Geo Kessler, Louie Knoke, Henry Keifer and Paul Grange made up a hunting party last Sunday and went out to the west river after rabbits. The gang shot and brought home one hundred and nine rabbits. Bunnies will perhaps be a little scarce out west of town now but the hunters say they will bring home five hundred next time.

January Clearing Sale

Business is good

Looks like times are getting better, for we surely have crowds of people attending our Big Clearing Sale, which is now in progress.

Winter goods must go

We are selling Winter goods, many items are going way below cost, we are determined not to carry over any winter merchandise this year, for we can use this same money to buy Spring goods. Our sale prices average below pre-war levels.

Sale closes January 21st

This sale must close Saturday Night Jan. 21st for after this date we expect to invoice and by the first week in February spring goods wlll begin to arrive, its just Hurry, Hurry, Hurry all the time in this store, and for this reason you will find that whenever we cut a price we cut it awful deep because we don't have time to monkey with little price cuts, yes, when we cut we do cut.

No Catalogue

We don't get out a catalogue like "Sears Sawbuck Co" does, its a "bum" plan, they list a lot of things which they can't ship, fellows tell me that in these times the Mail Order Houses substitute or are out of half the things you order. Now we don't do business that way, we invite you to visit our store, see what you are getting and take it home with you, and nine times out of ten you save money.

Come to the store

I could fill this entire issue of the Times with lists of merchandise at less than mail order prices, the **$4** Cloaks the **$1.50** overcoats, the **75c** sweaters, the **25c** mittens, the **98c** bed blankets, the **55c** lace curtains, the **5c** laces, etc. etc. ETC. But whats the use, at a Sale like this you should come yourself--- don't telephone--- don't send the kiks but its papa and mama who should attend this sale, especially mama for as a rule she is a good judge of merchandise and a close buyer.

Attend this Sale and SAVE MONEY!

Wellemeyer Dept. Store

THE KLEMME TIMES

Twenty-Sixth Year—Number 19. KLEMME, IOWA, THURSDAY, JANUARY 19, 1922. $2.00 In Advance—$2.50 Outside of County

Doings of the Week Reported By the Klemme Schools

KLEMME HIGH TO PLAY GOODELL FRIDAY NIGHT

The Klemme High School basket ball teams will play Goodell at Godell on Friday night January, 20th. This promises to be a good game as both teams are evenly matched. Let's see a good crowd of Klemme people at this game. Remember this is a double header so be present and BOOST Klemme High.

Will Play Ventura on Wednesday Evening, January, 25th

Here's the game you ought to see! It will be worth while to jump into your jitney and drive to Ventura on Wednesday evening, Jan. 25th. Both teams will play the teams at that place and you can't afford to miss this game. Klemme and Ventura are old rivals in athletics and this game will be interesting from start to finish. LET'S GO!

The Semester exams will be held Thursday and Friday of this week

There was no basket ball practice on Monday night on account of the Lecture Course. The Lecture Course was well attended, and Mr. Boblitt delivered an excellent speech. The Third number of the Lecture Course will be held on Feb. 10th, but this date may be changed and if so an exact date will be published later. The next number will be a home talent play and it promises to be very good. so plan to attend the next Number of the Course.

Both basket ball teams of Klemme High practiced basket ball on Tuesday night. The teams got in a good practice.

A letter was reiceived from Rowan the other day asking us to change the date of the basket ball game with them to March 3rd. This arrangement will change the schedule somewhat and therefor we will give the schedule to date:

Schedule of Games to Date

Klemme at Goodell	Jan. 20th
Klemme at Ventura	Jan. 25th
Goodell at Klemme	Jan. 27th
Ventura at Klemme	Feb. 3rd
Crystal Lake at Klemme	Feb 24
Rowan at Klemme	Mar. 3rd

A game with Belmond will be played on the Klemme court, but no exact date has as yet been set.

The Klemme High Basket ball teams played the fast Belmond teams at Belmond last Wednesday. The scores were very reasonable for the boys and the girls. Klemme is coming to the front because both teams were more "peppy" and played harder than in the other games. The score for the boys was 28 to 13 in favor of Belmond and the score for the girls was 20 to 6. The games were very interesting the score for the boys at the end of the first half was 10 to 11 in favor of the opposite team and this close score made the game very good.

Vona Greene returned to schol Monday after being absent about two months. She was kept out on account of sickness.

John Baumgartner returned to school after a two weeks absence on account of sickness.

MESERVEY FAILS TO VOTE FOR NEW SCHOOL BUILDING

The proposition of bonding of $60.000 for the erection of a new school building at Meservey and vted on in a general school election Thursday was defeated by a margin of 10 votes according to word received by R. E. Newcomb, county superintendent of schools. The vote was 120 for, 130 against.

Workers favoring the bonding program have not become disheartened by the defeat of their hopes, but have circulated a new petition calling for another election which will be held on February 17th. In this issue of the Times you will find a new notice to that effect and also a notice to bidders.

AN EX-SERVICE MAN FOR RECORDER

This week we are running an announcement of Oscar H. Wenck who is coming out as a candidatt for the office of County Recorder.

We believe that the young men who served in the recent war and who made a good record should be given an opportunity to serve in a public office. They have it coming to them.

Oscar Wenck is a Garner boy who served in the U. S. Army. After a few months training in this country he was sent to France and went into action where he saw heavy fighting for months. He was twice wounded in a battle so severely that he is now unable to do heavy work. He spent long months in hospitals over there and was later sent to this country where he spent many more months before he was finally sent home.

If anyone deserves a Public office it is just such a man as Oscar Wenck or any other soldier who made such a fine record and saw such active service fighting for our country. We will support the American Legion in helping them to put such fine young men into public office and they have our support. B. E. Erwin another soldier, is also seeking office that of County Clerk. We are for him as he is capable of holding the office.

JOHN'S HAT IN THE RING FOR A SECOND TERM AS COUNTY TREASURER

This week you will find a notice in the Times to the effect that John Suurballe is a candidate for re-election for the office of county treasurer. John is serving his first term in that capacity and is giving good service. He is a fine fellow and a favorite with the voters of the county, who no doubt will se that he gets the office again. As far as we know there will be no opposition and John will probably have clear sailing.

HAPPENINGS AT LIBERTY TOWNSHIP CHURCH

A fairly large crowd was out to the services Sunday morning. Yet it is hoped that larger numbers will turn out especially when the roads are good as they have been.

The result of the Sunday School election is as follows:

E. G. Beir, Superintendent

Teachers—Roy Schaefer, Lawerence Schaefer, Mrs. Laurence Schaefer Lydia Beir, H. J Stille, Mrs. A. J. Lange, Mildred Anderson, J. W. Haefner.

Librarians—Wilbur Haefner, Walter Ridder; Emery Schaefer, Secretary; Mabel Beir, Pianist.

League service was held last Sunday evening by Faith Ax. Herold Ridder is the leader for next Sunday The Topic: Chapter three of John Wesley Jr. Lets see all those who were there and especially all those who were not there out next Sunday evening for a regular old time discussion.

The classes seem to be pretty well organized now and everything running along smoothly. What is needed mostly now is the attendance. Everybody is most cordially invited to all the services.

METHODIST EPISCOPAL CHURCH

There were eighty-six present at Sunday school last Sunday morning. very good considering the weather and other conditions.

Rev. W. O. Tompkins, of Spencer, preached to two fine appreciative audiences.

Prof. H. E. Wilson, and two delegates of the Boys' Conference, held at Waterloo, Iowa, gave excellent reports.

Rev. Tompkins will preach next Sunday, morning and evening, at the usual hours.

Dr. J. J. Bushnell was at the bedside of a sick relative last week who was not expected to live. Dr. Bushnell hopes to have a pastor for Klemme in a short time. W. O. Tompkins, acting pastor.

Whee-eeee!

SMALL CHANGE IN INCOME TAX LAW

All Questions on Paper Must be Answered to Avoid Penalty

In makig an income tax return for 1921 some changes in the requirements should be watched for. One new provision of the revenue act of 1921 is that every person whose gross income for 1921 was $5,000 or over shall file in return regardless of the amount of net income upon which the tax is asessed. Also of every single person whose net income was $1,000 or over and every married person living with husband or wife whose net income was $2.000 or over a return is required. Widows and widowers and persons separated or devorced from husband or wife are regarded as single persons.

Net income, upon which the tax is figured, is the gross income less certain deductions for business expenses, losses, taxes. and so forth. and the gross income includes practically all the income received by the taxpayer during the year.

In making an income tax return for the year of 1921, every taxpayer should present to himself the following questions:

What were your profits from your business, trade profession or vocation?

Did you receive any interest on bank deposits?

Have you any property from which you receive rent?

Did you receive any income in the form of dividend or interest from stocks or from bonds?

Did you receive any bonuses during the year?

Did you make any profit on the sale of stocks, bonds, or other property, real or personal?

Did you act as a broker in any transaction from which you received commissions?

Are you interested in any partnership or other firm from which you received any income?

Have you any income from royalties or patents?

Have you any minor children who are working?

Do you appropriate or have the right to appropriate, the earnings of such children? If so, the amount must be included in the return of income.

Has your wife any income from any source whatsoever? If so it must be included in your return or reported in a separate return of income.

Did you receive any director's fees or trustees fees in the course of the year?

Do you hold any office in a benefit society from which you receive income?

It is important that all these questions be answered to determine whether in income is sufficiently large to require that a return be filed, and they may be the means of avoiding heavy penalties imposed for a failure to do so within the time perscribed.

I want to publish these few words to tell those people who have been so kind to us at the time of our children's sickness. We are so thankful to you and appreciate it so much. words can not tell. Mr. and Mrs. Greene and children.

THREE MARRAIGES THIS WEEK

Popular Young Klemme Couples Wed

We have three maraiges to report this week, all young Klemme people.

On Monday ocured the marraige of Mr. Walter Blumer and Miss Cristina M. Neuberger both young people of this vicinity. They will reside on a farm near Ventura this year.

On Tuesday, a high noon, occured the marraige of Harold Leirzinger and Miss Emma Wille. both of this city. The maraige took place at Garner. The couple will also make their home at Garner.

On Wednesday the marraige of Victor Meyer and Miss Gertrude Radloff took place. Both of these excellent young people live near Klemme and we presume they will go to housekeeping on a farm in this vicinity.

All of the parties above mentioned come from the best of families and all are highly respected young people. The Times joins with their many friends in wishing them the best in life and may they prosper and be happy.

NEW CASHIER IN BANK AT GARNER

GARNER, Jan. 14—At the annual meeting of the stockholders of the Farmers bank they elected the following directors to serve for the year 1922: Issac Sweigard, F. F Blackstone, W. L. Barz, A Kelly. D D. Ross, J. N. Sprole and Charles Wellik.

Reports submitted by officials show the bank to be in a good condition. When the newly elected board of directors met and qualified they re-elected Isaac Sweigard president. C. R. Sweigard, who has been cashier for the past eighteen years was not a candidate for re-election accordingly Charles Wellik, who has served as assistant cashier for the past three and a half years was given the position of cashier. Earl Conway is retained as bookkeeper. C. R. Sweigard's plans for the future are not given out but he will probably remain in Garner.

FATHER OF SENATOR J. E WICHMAN NOW ON HUNDREDTH YEAR

GARNER, Jan. 13.—Fred Wichman, father of Senator J. E. Wichman and Mrs. George Merten has celebrated his ninty-ninth birth anniversary. There were present to assist in the celebration, Mr. and Mrs. J. E. Wichman, Mr. and Mrs. C. A. Mertin, C. A. being a grandson, Mr. and Mrs. G. P. Mertin and their son. Elmer For a number of years Mr. Wichman has made his home with his daugter, Mrs. Merten, and it was at er hoe that the celebration was held.

Ones mind picture of Mr. Wichman would be of a man much bent with age, palsied and physical senses slow of action, but such a picture would be all wrong. On the contrary this grand old gentleman is spry, has a steady nerve, and his sences qnite as keen as one two scores his junior. He loves his smoke, and a comfortable, cozy smoking room has been arranged in the home for his convenience.

Klemme Is Largest Live Stock Market On This Branch

OLD FASHIONED EAGLE ON "PEACE DOLLAR" FAR FROM BEING A DOVE OF PEACE

Washington, Jan 18th.— The brand new silver dollar known as the "Peace Dollar" is now in circulation. The real article varies quite a bit from the advance descriptions of it. There were as many rumors regarding this 'Peace Dollar' as there were on the Russian Austrian battle front during the Carpathian campaign.

The first rumor stated the design would be an eagle clutching a broken sword. The storm of popular protest against such a design upon an American coin, which would have represented impotence, caused this to be abandoned.

It was then stated the design would be that of a peace dove carrying an olive branch. This story appeared to be the authentic one.

The appearance of the dollar itself however clearly proves that the author of the peace dove story was, to say the least, no ornithologist. If the robust life sized American eagle on the new peace dollar is a dove, then a lion is a lamb. It is the same old fashioned American Eagle which has adorned American money for these generations. True, he is clutching what may be, to the vivid emagination, an olive branch, but the big thing is that it is an eagle, and not a dove, which occupies the foreground on the dollar.

Underneath the eagle is the word "Peace." Taken together it is very significant for the pose of the Bird of Freedom clearly carries the impression that he is in a position to command peace and, if necessary fight for it, which probably in this unregenerate day is, after all, the best guarantee of peace. It develops that the author of the story regarding the peace dove not only lacked expert information regarding the bird world, but he also was not familiar with the laws of the United States, which made it mandatory for the American dollar to bear upon it a design of the American eagle and that of no other bird.

GAS FUMES KILL TWO

Two Iowa Falls Men Met Death Last Week

Iowa Falls, Ia., Jan. 18.—Thomas Crosgrove and Charles Borschel both of this city were found asphyxiated in a private garage here last week Sunday.

Crosgrove drove a Dodge coupe, equipped with a heater, which he kept in the private garage at the Leo Clute home on Rocksiyania avenue.

The supposition is that the men drove into the garage and, deciding to tarry a few minutes for a smoke and a visit, closed the garage door and left the car running.

Before they could realize the danger, they were probably overcome by the fumes from the exhaust of the car.

The men were middle aged and unmarried. Borschel was a son of Charles Borschel of this city and was in the employ of the Rock Island road as a car repairer. Crosgrove was the son of a pioneer physician of this county who located at Point Pleasent in an early day and later removed to Hubbard. His parents died there. He inherited cosiderable property and had made his home in this city for several years. He is thought to be the last of the family.

Borschel is servived by his father and several other relatives.

ONLY 3,089 "UNKNOWN DEAD"

Washington. Jan., 18th—According to an announcement of the war department, only 3,980, or a little over two per-cent of all American soldiers killed in France, remain unidentified or classified as "missing" Those who are unindentified are buried in France beneath white crosses upon which no name is written.

The suspicious man is always suspected.

ANOTHER BIG SHIPMENT OF STOCK SATURDAY NIGHT

Thirteen Car Loads Shipped From Klemme Yards

Live stock shipments from Klemme are continuing to hit the high mark in the number of cars to leave the local yards.

Saturday night Klemme shippers loaded thirteen cars for the Chicago markets. The following is the list of shippers and the amount shipped.

Cattle

Victor Schoenwetter	1 car
Sugar and Post Ranch	3 cars

Hogs

Farmers Shipping Association	1 car
Joe E. Johnson (Double Deckers)	2 cars
A. C. Lau	4 cars

The wek before there were fifteen car loads of livestock shipped, the week before that eleven cars. The shipping this year compares favorably with the shipping last year and it looks like Klemme is the leading shipping point along this branch of he Rock Island.

Victor Schoenwetter was the only one to accompany the shipment to Chicago Saturday night.

OBITUARY JOHN HERMAN COOBS

John Herman Coobs was born May 10th, 1886, at Hampton, Iowa, and passed from this life on Wednesday, January 11th, 1922, at 11:30 P. M., at the age of 35 years, 8 months, and one day. He received the Writ of Holy Baptism when a child and grew up to be a Christian man. At the age of four years John moved with his parents and family to a farm near Meservey, Iowa, later coming to Hancock county and then to Forest City, but returned to Hancock county again. John spent practically all of his life in this community. He learned the carpenter trade when a young man and devoted a great part of his life to following that trade and was considered a fine mechanic. In the spring of 1918 he moved with his parents to McGregor. Clayton, county on a farm, where he helped his father and also folowed his trade He resided there until the time of his death.

A few years ago John fell a victim to influenza, whicch was then raging over the country. It left his system in a weak condition and later he suffered from ulcers of the stomach, which disease finally caused his untimely death.

He leaves to mourn his loss, besides his mother and father, four brothers, Ben of Klemme who is a mechanic in a garage, Herman who conducts a blacksmith shop at McGregor, Henry who farms the Frank Kinsley place near McGregor, and William who lives with his father and mother on the farm. Two sisters, Mrs. Wallace Pavey, of Klemme Iowa. and Mrs. Verner Lewis of Hayfield, Minnesota, besides other relatives and many friends.

Before the remains were sent to Klemme a service was held at the home of the parents, conducted by John's pastor, Rev. Crumb of McGregor. Funeral services were conducted in Klemme by Rev. A. A. Depping from the Emanuel Reform Church Saturday afternoon at 1:00, January 14th, 1922 and his last earthly remains were Laid at Rest in the beautiful Klemme Cemetery.

CARD OF THANKS

We wish to thank our many friends in Klemme and vicinity for their kind words of sympathy in our great loss of a beloved son and brother, and also we wish to extend thanks for the beautiful floral offerings contributed in memory of John.

Mr. and Mrs. Herman Coobs and family.

Automobiles have another benefit—they have decreased gossip. It is difficult to talk much and drive a car.

After Thorough Trial a Detroit, Mich., Man Endorses Pe-ru-na

The following letter written from Detroit, Michigan is no snap judgment expressed on the merits of Pe-ru-na, the well-known catarrh remedy, but rather a mature, sober opinion formed after a full year's trial.

This is the way Mr. Michael Fako of 906 East Palmer Avenue, in the Michigan Metropolis, writes: "After using PE-RU-NA for about one year will say I have found it a very good medicine for catarrh. It has helped me a great deal and I am very well satisfied. I have gained in weight, eat and sleep well, my bowels are regular and better color in my face.

"PE-RU-NA has done wonders and to me is worth its weight in gold. I shall continue to use PE-RU-NA as long as I live and recommend to my friends who are troubled with catarrh."

Nothing can be more convincing than an endorsement of this nature from an actual user. There are many people in every community whose experience, in using Pe-ru-na, has been identical with Mr. Fako's. It is the standby for coughs, colds, catarrh, stomach and bowel disorders and all catarrhal conditions.

Put up in both tablet and liquid form. SOLD EVERYWHERE.

Growing Children

are often troubled with Feverishness, Constipation, Headache, Stomach troubles, Teething disorders and Worms. At such times thousands of Mothers use

MOTHER GRAY'S SWEET POWDERS for CHILDREN

and find they give certain relief. They tend to break up colds. Cleanse the stomach, act on the liver and bowels and give healthful sleep. Easy to give and pleasant to take.

Used by Mothers for over 30 years.

Do Not Accept Any Substitute for MOTHER GRAY'S SWEET POWDERS.

BELIEVED IN SAFETY FIRST

Small Ruth Wanted to Be Quite Sure About Her Proprietorship of That Apple Pie.

There was never any haste at Aunt Dorothea's table; consequently Ruth, the youngest of all the nieces and nephews who gathered at Hunting Hill in the summer, had learned what to expect. Everything was served by Aunt Dorothea herself, and age had strict precedence.

There came a day, however, when Ruth, returning to the family dining room after a season spent in her room with a sore throat, found at her place a little delectable apple pie, so small that it seemed as if it must be meant for her alone. Nevertheless, she determined to be cautious.

"Am I—" she looked anxiously toward the head of the table, where sat her awe-inspiring relative—"am I to be aunty for this pie, or is it all mine, Aunt Dorothea?"—Wayside Tales.

The Opportunity.

In this world the one thing supremely worth having is the opportunity to do worthily a piece of work, the doing of which is of vital consequence to the welfare of mankind.—Roosevelt.

Urban Ignorance.

"Ever go chestnuting?"

"No; what do you do, follow a worm?"—Boston Transcript.

TOO VALUABLE TO DISCARD

Why Pretty Young Artist Has Decided to Celebrate Her Birthday for Years to Come.

"I had a birthday recently," said the pretty young Artist to the Business Woman, when they met for luncheon. "And the results were most pleasing."

"Gracious," said the Business Woman, "I thought you told me last year it was positively your last; mine come and go, and I've gotten to that stage where I really am in ignorance of the date."

"I had planned to let November 20 pass and not even think of it. But I suddenly realized I needed so many things, like handkerchiefs, hose, gloves, etc.—things that somehow go with birthdays. I had an inspiration—a lovely, practical one. I'm the youngest of a big family—so I typed on note paper a subtle reminder, my name, November 20, 1897, and my present address—you see, nothing but suggestion! It worked beautifully—every day for a week I've been getting something. I've decided it's silly to give up birthdays—expect to keep mine every year."—New York Sun.

Don't be visionary. It's foolish to plant sunflower seeds to raise rainbows.

After all, the only man really worth helping is the proverbial chap who helps himself.

You are entitled to the benefit of the doubt. Why not take advantage of it?

The law is very careful in protecting the rights of a prisoner charged with a crime.

How about the Law of Common Sense and the man who has committed an error only? Isn't this a good place to use the benefit of the doubt, too?

Take your own case: If you don't know for sure whether tea or coffee is harming you, you do know that many are harmed by the drug element in tea and coffee, and that headaches, nervousness, or high blood pressure are symptoms which often tell that the drug, caffeine, is giving the nervous system too much jolt.

Probably you know, too, that some people can't drink a cup of tea or coffee at bed-time, and sleep well that night.

Where many have been harmed by tea and coffee, and you may be harmed, isn't it well to put the benefit of the doubt on your side before doubt becomes an unpleasant certainty?

There's charm without harm in Postum—a pure cereal beverage, rich in flavor, fully satisfying; the favorite table drink of thousands.

Suppose you try giving yourself this benefit today, and keep up the test for ten days; then judge the results. See if you don't feel better and work better. You can get Postum wherever good food and drink are sold or served.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

Postum *for* Health
"There's a Reason"

THE PHOTOGRAPH

By MOLLIE MATHER

Copyright, 1922, Western Newspaper Union.

Janey sat looking at her adored friend.

"Why," she asked impulsively, "do you never have your picture taken, Mollie? I have not seen one in the house, and you would—" Janey's eyes were caressing, "make such a lovely picture."

Miss Mollie Deming, spinster, smiled. "No one would value my photograph, unless it might be you," she replied. "My relatives would doubtless write polite notes of appreciation when they received them, and relegate them to some unremembered corner."

"You know better than that," Janey jeered.

She jumped to her feet.

"Anyway, I want a picture and I am going to have it. You look especially lovely today, like some sweet shepherdess lady, with your soft crinkly white hair, and your true-blue eyes. Poor Terry will be glad of a job. He really should have been an artist in the city. Sentiment, holding him here, alone prevented."

Mollie Deming laughed, when she and the girl Jane were at home again. "Terry posed me so many times and was altogether painstaking, that his efforts should be rewarded with success," she said.

"You looked—" Janey mused, "so pretty, and, sort of wistful, sitting there—Mollie! Do you know, that is the way your eyes always impress me, by their wistfulness? Tell me, please, did you have an unhappy love affair? I wonder so much about you at times—I suppose, because I love you. I would be your confidante, Mollie."

The older woman gazed tenderly, thoughtfully, into the eager young face upraised to hers.

"People would tell you—your own mother may have told you, Janey—that I was in a careless, unthinking way, noted years ago for my conquests. It was at the time considered clever to flaunt one's captivating power. And I—well, well, there were many young men who came to my uncle's home, and I, uncle's ward and charge, played a merry game of hearts with them all, my own heart ever untouched in the game. Some day, I hoped to find my true love, to marry and settle down to a life of devotion. And when he came, my own love, I knew him; knew him instantly, by the thrill of joy that filled my days. And he loved me. That, I did not doubt. Why doubt the sincerity of this man, when others had been sincere? I think I lived in a dream—" Miss Mollie's eyes were misty, across the years; still her voice trembled its sorrow. "I live on in that dream of the past," she ended, sadly.

Janey's hands went out to her. "He died then?" she questioned—"your lover?"

"I almost wish that I might tell you so," Mollie hesitated.

"No," she added, "for the first time, I will speak the truth. It was thought that John Douglas, like others, had been jilted. But one knew, and after John disappeared this friend of his came and told me the truth. It was I whom John Douglas had jilted, heartlessly, and with a purpose. The friend said that he had been instructed to tell me that John deliberately planned my punishment, as he had deliberately, and oh, so skillfully, acted his part.

"He was charming in manner, you see, and well known for his winning way with women. So, coming to our small town, and hearing of my merry, never-may-care flirtations, John Douglas confidently and successfully planned the retaliation of winning my own heart, to cast it as carelessly away. But this I could not guess, as he held me close in his arms and bade me goodby, until tomorrow.

"'Tomorrow,' he promised gently, 'I will come back to you. Tomorrow, my dearest, watch for me.'

"So, through all the tomorrow I have watched and waited; and have lived how wearily no one may know—my punishment."

When Janey framed her friend's photograph and placed it upon her dresser, she was moved distressfully later to hide that same photograph away. For the sadness of Mollie's pictured eyes had a provoking trick of bringing quick tears to her own.

"That man!" exclaimed Janey contemptously. "Fancy being true to the memory of such a creature."

Then one day, as Janey entered unannounced Miss Mollie's sitting room, she faced a picture. And the two central figures facing the picture continued, happily, oblivious of her presence.

"It was fate!" the distinguished appearing man was saying, and even in her astonishment Janey responded sympathetically to the sincerity of that voice.

"When I thought that I had utterly lost you, Mollie—when the never-ceasing longing brought me back to this old town to view again, if only in secret, your face, I came upon that photograph in Terry's window. You, Mollie, had only forgiveness in the sweetness of your expression—had only grieved appeal in your eyes. So I am here, dearest, for that punishment I would have inflicted upon you has long been my own."

Janey closed the door noiselessly behind her, and when she was again in her own room, she hummed a gay little song as she searched out her friend's picture and replaced it upon the dresser

Help Your Kidneys Fight That Cold!

Winter Colds and Chills Weaken the Kidneys and Are the Direct Cause of Many Serious Kidney Disorders

IS winter-time your backache-time? Does every cold, chill or attack of grip leave you lame, achy and all worn out? Does your back throb and ache until it seems you just can't keep going another day?

Then look to your kidneys! Grip, colds and chills throw a heavy strain on the kidneys. They overload the blood with poisons and impurities that the kidneys have to filter off. The kidneys weaken under this rush of new work; become congested and inflamed.

It's little wonder then, that every cold finds you suffering with torturing backache, rheumatic pains, headaches, dizziness and annoying bladder irregularities.

But don't worry! Simply realize that your kidneys are overworked at such times and need assistance. Get a box of *Doan's Kidney Pills* today and give your weakened kidneys the help they need. Assist them also by drinking pure water freely, eating lightly, and getting plenty of fresh air and rest. *Doan's Kidney Pills* have helped thousands and should help you. *Ask your neighbor!*

"Use Doan's," Say These Good Folks:

SCOTT HOUGH, E. 4th Ave., Albia, Iowa, says: "Whenever I caught cold it settled on my kidneys and weakened my back. My back was so lame I could hardly get up when I bent. The kidney secretions were highly colored and got me up several times at night. Doan's Kidney Pills benefited me in a short time and two or three boxes cleared up the secretions and put me in good shape again. Doan's never failed to relieve me when I used them."

MRS. ANDY ANDERSON, 204 Center Ave., Ames, Iowa, says: "A cold caused my kidneys to trouble me. I had a dull ache through my kidneys and my work was hard for me. I couldn't stoop or sweep without a sharp pain bothering me. I ached all over and felt dull and sluggish, especially mornings. I was all run down and nervous. Whenever I suffered with disordered kidneys caused from a cold I used Doan's Kidney Pills and they gave me relief."

Doan's Kidney Pills

At all dealers, 60c a box. Foster-Milburn Co., Mfg. Chemists, Buffalo, N. Y.

MOTHER! OPEN CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Your little one will love the "fruity" taste of "California Fig Syrup" even if constipated, bilious, irritable, feverish, or full of cold. A teaspoonful never fails to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the sour bile, and undigested food out of the bowels and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup," which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

He—That's all right. I'm married. Shall we sit down?—The Argonaut.

SWAMP-ROOT FOR KIDNEY AILMENTS

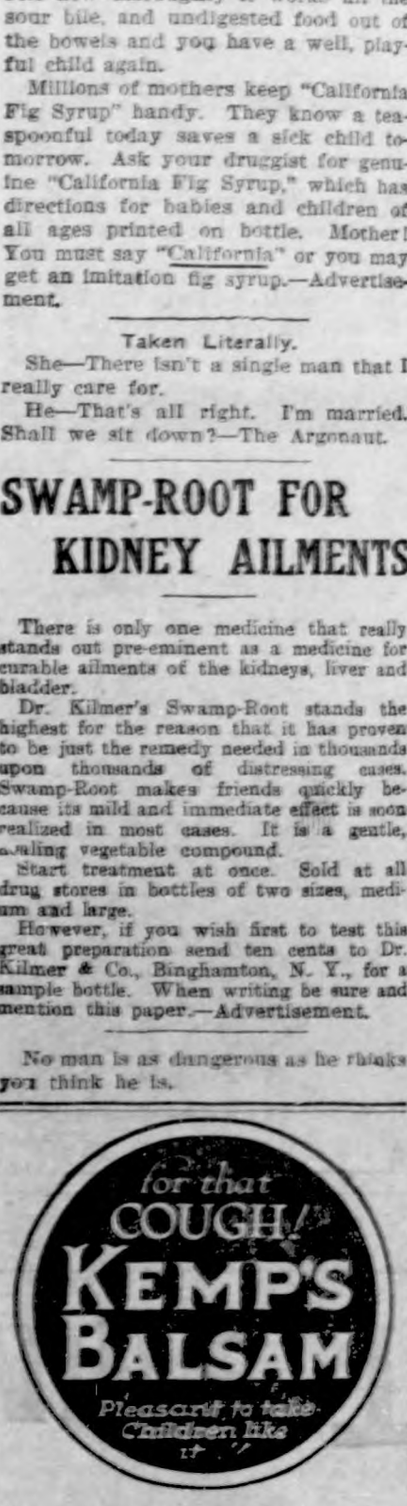
There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

No man is as dangerous as he thinks you think he is.



Connubial Pleasantry.

"Tired of waiting, dearie?" she asked, emerging from her dressing room after exhausting her feminine arts in the attempt to appear beautiful.

"Oh, no," he replied, wearily, "it's all in a wife-time."—Life.

There probably would be more women inventors if they were anxious to discover new wrinkles.

The mold of a man's fortune is his own hands.

Modern Formula.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

Words are the shadows of actions.—Democritus.

HEY, GOBS!

PERHAPS in nothing else are the fashion and custom of the age so distinctly characterized as in the use of words. Any student of the language—any language, in fact—can tell the approximate date of the authorship of any writing by the choice of the words it contains. You know yourself how easy it is to recognize Shakespeare from his word choice—or at least, how differently Shakespeare and his contemporaries wrote from the way Sir Walter Scott and O. Henry, respectively, wrote.

Now, the words we choose to express our thoughts are, to a large extent, chosen because they are the correct words to use. There are styles and fashions in word usage, as there are in the method of writing letters and holding the knife, and we reflect the fashion of our own day.

Our grandmothers and grandfathers used a far more stilted form than we do. Not only does it sound stilted, because it is out of date, but it actually was a more formal and stilted usage. Slang, in those days, was not indulged in by the well bred. Today, say what we will against the use of slang, it is not a sign of bad breeding. And, although we may caution our sweet young daughters against using slang, still we cannot keep them from recognizing it as part and parcel of the present-day English tongue.

Not long ago, some big billboards inviting the sailors anchored in the Hudson river to the various festivals in the way of dances and feasts which New York city had prepared for them, began with the words, "Hey, Gobs!" The posters went on to specify time and place and variety of the entertainments.

Now, can anybody imagine a Civil war bulletin of invitation to the bluejackets of the day beginning with the words, "Hey, Gobs?" No; that was a day of more stilted language, and a slangy address to the sailors would have been quite undignified.

There are times today, of course, when we should avoid slang. Slang does sound cheap from a dignified matron. Too much slang shows a certain lack of imagination on the part of the user, anyway. But a stilted usage of words is quite unnecessary.

Of course, if you are writing to the diplomatic representative of a foreign government, for instance, asking what openings exist in his country for workers in some industry, you should couch your letter of inquiry in dignified language—even formal language. If you are making an address bestowing a gift, you would likewise use formal phraseology that might almost be termed stiff. And you wouldn't think, of course, in sending out invitations for a dinner party, of starting them off: "Hey, friend!" But the day of stilted language for any save the purely formal, almost documentary, communication, is gone. We talk easily and naturally, nowadays, and the fewer verbal flourishes we indule in the better.

LEETLE while ago I feel jusa lika wanta shoota one guy. But I changa da mind so can maka five tousand dolla preety easy. I decida no shoota anybody for dat moocha money.

Da guy wot I no gotta use for was da insurance man. Every day he come veesit my house and wanta sella me somating. He aska me eef I carry da insurance. I tella heem my friend Guissepi carry da hod and I am gonna carry da gun eef he no queeta geeva me trouble.

I no wanta carry somating anyway. I carry too moocha load home one night before da prohibish and I fall down and almosta broka da head.

Dat guy tella me eef I carry da insurance and go dead somatime I gotta plenta money. But eef I go dead I no gotta use for da money. I aska heem eef can getta lettle bit eef I keepa da health and he tella me no. So I say I no wanta insurance.

"Eef you buy ten tousand dolla insurance, Pietro, and you go dead you leava plenta money," he say. But dunno for sure eef can spend eef I go dead. I say I am gonna leeve longa time anyway.

"But you no can tella for sure," he say. "Mebbe somaday you getta shot by surprise and den you getta ten tousand dolla."

Righta queeck I getta greata idee. So I tella heem I taka da insurance. Jusa between you and no for spreada round I no expect to getta shot. But mebbe somaday I getta half shot and maka five tousand dolla. Eef I getta ten tousand I am dead for longa time. And eef I getta five tousand I no gotta work for longa time. I tink I maka preety gooda proposish.

Wot you tink?

Pola Negri

The rise of this bewitching European "movie" star was spectacular and interesting. Born in Posen, Poland, 28 years ago, and formerly a shopgirl in a German department store, she craved the stage. She could dance and play the violin. She joined the Russian Imperial Ballet. Later she was discovered by a film director. Fame and fortune now are hers. Pola Negri is married to a Polish nobleman and bears the title of "Countess."

Lions and tigers kept in captivity require one day a week without food to keep them in good health.

Home Town Helps

GOOD TIME TO PLAN GARDEN

During the Long Evenings Consider These Hints Put Out by the Department of Agriculture.

Some plants do better under certain conditions than do others. Where special conditions obtain, it is well to study the requirements of the flowers while plans are being made to plant them, and see if the location in question is a suitable habitat for them. The following list has been compiled by horticulturists in the United States Department of Agriculture.

Of easiest culture under ordinary garden conditions: Over four feet, sunflower; about three feet, Joseph's coat, love-lies-bleeding, heliopsis and prince's-feather; about thirty inches, cornflower, strawberry, and zinnia; about twenty-four inches, calliopsis summer chrysanthemum, coneflower, gaillardia, marigold, poppy and snow-on-the-mountains; about eighteen inches, mignonette; about twelve inches, Cape marigold, calendula, California poppy, balsam, candy-tuft,

Ideal Garden Spot.

petunia, Drummond phlox, pink, dwarf nasturtium, portulaca and sweet alyssum.

On light fertile soil: Gaillardia, marigold, Drummond phlox and portulaca.

On light soil, not too rich: Cockscomb and feather cockscomb.

On poor soil: Love-lies-bleeding, prince's-feather, Joseph's-coat, Cape marigold, godetia, dwarf nasturtium, portulaca, Scotch pink, sweet alyssum, garden balsam and calliopsis.

On lands near the seacoast: Plants from the three foregoing lists, depending on the fertility of the soil, together with the castor bean, sunflower, heliopsis, spiderflower, cornflower, strawflower, zinnia, calliopsis, snow-on-the-mountain, four-o'clock, stock, calendula, California poppy, petunia and sweet alyssum.

In partial shade: Basketflower, sweet sultan, clarkia, platycodon, godetia, Drummond phlox, pansy, sweet alyssum, lupine and forget-me-not.

Especially responding to rich soil: Castor bean, scarlet sage, balsam and China aster.

Birds Are Friends of All.

The flowering dogwood, mulberry, wild black cherry, bayberry, American elder and highbush blueberry can be counted on in general to attract the bluebird, cardinal, flicker, kingbird, Baltimore oriole, robin and cedar waxwing.

The home owner interested in observing birds himself, or affording an opportunity for his children; the farmer who desires to protect his fruit crops and the person who wishes to assist in the conservation of our city and our forest trees, as well as our native birds, can perform a great public service by planning his planting with the birds in mind."—Exchange.

Reconstruction Problems.

Progressive and growing cities are always called on to face and deal with the problem of reconstruction. The problem is presented in connection with the elevation of railroad tracks, acquiring park lands, laying out boulevards, placing monuments and memorials, straightening and widening streets, etc. The question is always one of handling these matters in a large way and solely with reference to the welfare of the city and its people as a whole, and with an eye to the future.

The Real Booster.

Zeb Jones says that the honest-to-goodness home-town-booster won't need to be solicited to subscribe for the home sheet. "He'll go up, By Heck, hand the editor a check, and boost for his own home town."—Exchange.

Woman Is Belgian Burgomaster.

King Albert has confirmed the appointment of Belgium's first woman burgomaster, Mlle. Keignaerts, who has been chosen to the office in a little village near Ypres.

The Poet's Business.

The duty of the poet is like unto that of the naturalist; it is to pursue and capture those rare specimens of thought that have hitherto escaped the hunter's net; incase in crystal-clear diction these captive beauties of nature; and offer them, 'mid the wildflowers of their native haunts, for the admiration, reverence and love of all mankind.

NAME "BAYER" IS ON GENUINE ASPIRIN

Take Tablets Without Fear, If You See the Safety "Bayer Cross."

If you want the true, world-famous Aspirin, as prescribed by physicians for over twenty-one years, you must ask for "Bayer Tablets of Aspirin."

The "Bayer Cross" is stamped on each tablet and appears on each package for your protection against imitations.—Advertisement.

Honest Paris.

A black satchel containing $55,000 in cash was found on the seat of a Paris omnibus one morning recently, writes a correspondent. It had been forgotten by a bank messenger, who was greatly relieved to find that the conductor of the omnibus had duly delivered it to the lost property office, where it lay among umbrellas and odd gloves awaiting reclamation.

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it

Bears the Signature of *Chas. H. Fletcher*

In Use for Over 30 Years.

Children Cry for Fletcher's Castoria

Easy to see through—the people who make spectacles of themselves.

Cuticura Comforts Baby's Skin

When red, rough and itching, by hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Advertisement.

It's queer how anxious people are to lend you money when you don't need it.

Those who know a great deal can be depended on to tell it.

Now is the time to do things; by and by is the time to do nothing.

GIRL HAD PAINFUL TIMES

Mothers—Read This Letter and Statement Which Follows

Portland, Indiana.—"I was troubled with irregularity and constipation and would often have to lie down because of pains. One Sunday my aunt was visiting us and she said her girls took Lydia E. Pinkham's Vegetable Compound and got well, so mother said she guessed she would let me try it. It is doing me good and I praise it highly. You are welcome to use this letter as a testimonial." —STELLA NEWTON, R. R. 8, Portland, Indiana.

Mothers—You should carefully guard your daughter's health. Advise her of the danger which comes from standing around with cold or wet feet, from lifting heavy articles, or overworking. Do not let her overstudy.

If she complains of headache, pains in back or lower limbs, or if you notice a slowness of thought, nervousness or irritability on the part of your daughter, give her careful attention.

Lydia E. Pinkham's Vegetable Compound is an excellent medicine for your daughter to take, as it is especially adopted to relieve just such symptoms. Remember it contains nothing that can injure and can be taken in safety.

There's no use in running if you're not on the right road.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel.

ANTOINETTE

TO THE average person, Antoinette and Annette are regarded as closely related—the former is thought to be merely an elaboration of the latter. But such is not the case. Annette, which will be discussed later, comes from the Hebrew, while Antoinette is of Roman extraction. It means "inestimable" and is said to have originated with Antius, a son of Hercules.

Several distinguished Roman families bore the name of Antonius and its first famous exponent was Mark Anthony, avenger of Caesar and lover of Cleopatra. It received a reputation for sanctity through St. Anthony, the great hermit of the Fourth century.

The feminine form Antonia made its appearance in Italy, also, and in Spain, where it still is popular. The Germans adopted it as Antonie, but the French are responsible for the charming Antoinette which is forever pityingly recorded in history through the fate of lovely Marie Antoinette, queen of Louis XVI.

The French later contracted Antoinette to Toinette, a popular form throughout the country. Toinon is also sometimes used as a diminutive. Italy has an Antoinetta and an Antonica. Antonia and Antonetta are the favorite equivalents in Sweden.

The garnet is Antoinette's talismanic stone. It possesses many of the powers of the ruby, whose flaming heart it so closely imitates. It promises its wearer courage, a dauntless heart, and success in every ambition. Friday is her lucky day and 5 her lucky number.

The SANDMAN STORY

OLD TABBY'S LESSON

GRANDMA TABBY had had her day at catching mice and rats, and now she was getting old, and as her kind mistress gave her plenty of milk and cream, she did not need to hunt for her food.

Grandma Tabby's eyes were bright and her wits sharp, even if she did not hunt, and she decided she would give good advice to all the young kittens in the neighborhood about hunting mice and rats.

So all the Mother Pussies brought their children to Grandma Tabby to

learn wisdom from her in the art of mice catching and hunting.

"You first of all," said Grandma Tabby, "must not eat too much. When I was young I seldom had any milk or cream. I had to work for my food. There is nothing better for young kittens than exercise. Just look at me at my age, my dears."

All the kittens looked at Grandma's fine, soft coat of fur and hoped some day they would have one like it.

"There is another rule you must follow, too," she said. "Never give up when you see a mouse until you have caught it. You must not expect your mistress to feed you. She gives you a home, and you should pay for this by keeping her house free from mice.

"If it is the barn you have to care for, instead of the house, just keep a sharp eye on the bags of corn and grain, and remember that watchful waiting has its reward."

All the little kittens listened with up-standing ears and wide-open eyes to all that Grandma Tabby was saying, for well they knew that such wisdom as hers was hard to find.

"Now, there are the rats," she said; "all pussies cannot catch rats, but the big ones can if they are brave, and my advice to you is this: When you see a rat look for a trap, there is sure to be one around; then all you have to do is to keep that rat from getting back to his hole.

"Chase him toward the trap, and when he finds he cannot get home he will run into the trap, you may be sure, and there you have him.

"Chasing rats into traps is just as clever as catching them, but never let a mouse go into a trap. Remember that it is a disgrace to any Puss to have a mouse caught in a trap in the house where it lives.

"I have heard the saying, 'Mind your P's and Q's,' but that is not for Pussies; you must mind your M's and R's, and if you do this you will become good mousers and rat hunters, which is the ambition of all well-brought-up kittens."

As all the kittens trotted home behind their mothers they looked so wise that any mouse or rat would have run for its life, I am sure, but he would never have escaped, so well did they learn from Grandma Tabby how to hunt.

Take Yeast Vitamon Tablets To Clear The Skin

Build Firm "Stay-There" Flesh—Increase Energy.

If you want to quickly clean your skin and complexion, put some firm healthy flesh on your bones, increase your nerve force and power and look and feel 100 per cent. better, simply try taking two of Mastin's tiny yeast VITAMON Tablets with each meal and watch the results. Mastin's VITAMON Tablets contain highly concentrated yeast-vitamines as well as the two other still more important vitamines (Fat soluble A and Water soluble C) and are now being used by thousands. They positively will not upset the stomach or cause gas, but, on the contrary, are a great aid to digestion, to overcome constipation and as a general conditioner of the whole system. Pimples, boils and skin eruptions seem to vanish like magic, the complexion becomes fresh and clear, the cheeks glow with ruddy health, the flesh becomes firm, the eyes bright. Mastin's VITAMON Tablets are positively guaranteed to give you new health, energy and ambition and improve your appearance. Do not accept imitations or substitutes. You can get Mastin's VITAMON Tablets from any good druggist.

Of what use are fine features with an ugly, mottled skin, flabby flesh, sunken cheeks, pouches under the eyes or a careworn, sickly-looking face? Let Vitamon correct these conditions.

MASTIN'S VITAMON TABLETS

Farmer Will Benefit a Little This Year Say Experts

Farmers will benefit a little thru the decline of commodity prices in 1922, according to E. G. Nourse, agricultural economist at Iowa State College. However, M. Nourse says that he does not want to place too much faith in this fact. With purchasing power reduced both at home and abroad, no possible marketing system, cooperative or private could perform the miracle of getting prices to a satisfactory level.

"The farmer, to get the best from his labors, will have to follow a program of efficient labor and keep production costs down so that the low priced products will return a profit," says Mr. Nourse. "Study the management of the farm and reduce the unprofitable ventures. Do not experiment in crops at this time, but be sure of a fair return for labors expended.

"In marketing get the support of a local cooperative association and cut all needless and wasteful expenditures in selling."

85,000 TONS OF ARMOR STEEL MAY BE DIVERTED

Washington, Jan. 18., —The disposition of 15,000 tons of steel armor plate, purchased at a cost of $7,500,000. now stacked in the navy yards, is awaiting the final decisions of the armament conference. This steel was purchased from the Bethlehem and Midvale steel plants and the naval ordinance plant at Charleston, West Virginia, for the use in the construction of the dreadnaughts "South Dakota" and "Indiana". It is Harveyized, varies in thickness from five to 12 inches, and each piece weighs from 60 to 75 tons.

In addition to this steel which has already been delivered to the navy yards where these dreadnaughts are under construction, 70,000 tons of similar armor plate is now going through the steel mils under contract. When this order was placed it was intended to use the steel in the construction of five war vessels being erected in different navy yards, as follows: the "West Virginia and "Iowa" at Newport News; "Montana," at Mare Island, California; "North Carolina," at Norrfolk, Virginia. and the "Massachusetts," at Fore River yard, Quincy, Massachusetts.

GROUND CORN IS BEST

Produces Better Results Than When Fed in Whole Ears

Ground corn will produce better results when fed to dairy cows than will whole corn, and the difference between the two will more than pay for the grinding, say the dairymen at Iowa State College. Corn fed to dairy cows is worth sixty cents per bushel when used this way and this value can be increased by grinding.

Recently a series of experiments was run to decide the value of grinding corn. In these tests it was found that corn meal produced 7 per cent more milk and 14 per cent more fat than ear corn. Where corn and cob meal was compared with corn meal it was found that the corn meal was slightly in the lead, having a two per cent better production in butterfat.

Even tho the corn is extra cheap the cows will give a better account of themselves to the tester if they are fed corn that has been ground.

Anyone desiring further data on the grinding of corn for dairy cows can secure it from bulletin 195, issued by the Iowa Agricultural Experiment Station.

MAKE ICE CREAM AT HOME

A Dessert That is Easily Prepared and Healthful

Frozen desserts are easily prepared in the home. acording to Miss Frances Newell of the home economics devision of Iowa State college and they are healthful.

Among these are plain ice cream frozen puddings, parfaits, mousse, milk sherbert and fruit ice.

In making ice cream use good ripe cream about 22 per cent butterfat and mix thorly, as this incorporates air which gives the finished product a smooth texture.

In freezing using salt with finely chopped ice at the rate of one part salt to six of ice. Many people use salt at the rate of one part to three of ice but this wastes salt, say the experts.

Some people are so dissatisfied that they wouldn't want to enter heaven unless they were sure St. Peter would isue rain checks.

Who Remembers

The old-time "dude" whose collars were so high they touched his ears

THE PUNISHMENT

By JANE JORDAN.

Copyright, 1921, Western Newspaper Union.

Coralie looked down into the street, a frown puckering her pretty brows. Bobby was due an hour ago and his present unreliable attitude troubled her. Not two months since Mr. Robert Hempstead, whom she met at her aunt's tea party, had been all promptness and eagerness. Now she realized, in humiliation, it was usually she who suggested their evenings together, and impatiently awaited his arrival.

Coralie was vastly proud of her lover's growing success. Sweetly submissive, apparently, to his profession's call. But there was more than all this in Bobbie's embarrassed evasions. Lily, the old colored woman who had been Coralie's nurse and was still a privileged adviser, came to pat her adored one's hair.

"Honey," she comforted, "don't you go an' fret 'bout Mistah Hempstead. He's boun' to come round all right, though he is kinda mixed up in his 'tentions.

"That's all 'count of that playin' friend of his what everybody's crazy 'bout. Women, you see, honey, sort of turn that musical man's head, till he don't think much of any of 'em. I hear him an' Mistah Robert talking the evening you was out, an' the singin' man came over here after him, an' he says to Mistah Robert to go slow, that gettin' into marriage was easier than gettin' out; and marriage was mostly a mistake anyways to temperamental folks like them, an' Mistah Robert he seemed sorta uncertain, yet believin' like, as the two went away together.

"Reckon he ain't really done surrendered yet, Mis' Coralie, for all his lovin' of you."

The black eyes twinkled.

"An' this yere maneuvering 'round is hurtin' him more than it hurts you, honey lamb."

Coralie went forward to meet the tall young man who came at last, confidently, through the doorway. This time there was no excuse.

"Coralie," Bob Hempstead said abruptly, "I'm going away. Just time to make my train. Signed up with the business office in Chicago for two months. Goodby, dear," the last words grudgingly.

"Why goodby, Bob," answered Coralie, her tone was quite even.

"You see," he burst out, "I may as well be frank. I've been growing almighty fond of you lately—too fond; I'm not in a position to marry. So—" Bob floundered hopelessly—"I thought I'd better go away."

When he had gone Coralie stood considering, then an odd little smile twisted her lips.

"So this is the influence of the 'playing man.'"

"Well, he will have to be punished."

Coralie took down the telephone receiver.

"Please," she asked sweetly of the masculine voice that answered, "may I speak to Mr. Raphael Vernon? This is Mr. Vernon? Coralie Richmond speaking. You may remember my name. Yes, a friend of Bobby Hempstead's. I would like very much to talk with you concerning this new business venture of Bobbie's. You see, I am much interested. Could you spare an hour to me this evening. I know Robert values your advice so highly. I, too, would like your opinion. The twinkles deepened in Lily's black eyes as her nursling turned, dimpling, from the telephone.

"What dress you-all gwine to wear for this ebening, honey?" she asked.

"De one you looks mostest like an angel in is the plain white wid de big blue sash."

Robert Hempstead missed Coralie more than he had believed possible. Chicago, though a big and busy place, seemed strangely lacking in entertainment. Also, away from Raphael Vernon's caustic utterings, marriage appeared to be far from the undesirable thing he had made it. Bob began to figure industriously regarding bungalows. As he plaintively hummed "The Love Nest," and wondered if Coralie's eyes would be as blue in reality as they had been in his dreams. Of her forgiveness because of his silence he was sure. Had Coralie not always awaited his coming? So Robert Hempstead took a trip back home.

Lily admitted him to the pretty apartment rooms which were Coralie's home. She was at the piano, Lily told him, practicing a new song.

Bobby slipped in unannounced and stood pressing his fingers in boyish fashion over the girl's closed eyelids. "Guess who?" he joyously whispered. Coralie's loved laughter rippled forth.

"Why," she answered softly, "it's Raphael of course."

"Raphael?" he sharply repeated the name as she turned to face him. Slowly but eloquently Coralie nodded.

"Raphael and I are engaged to be married, Bobby," she announced. Limply the man sank into a chair. "But Raphael scorned marriage," Robert repeated dully, "said he did not believe in love."

"That," Miss Coralie happily informed him, "was because he knew nothing about it. Since then he has met me, and honestly changed his opinions. You did not lack opportunity for knowing better."

Robert Hempstead, going out the door, met the musician coming in, but his glance of bitter condemnation was lost upon the eager Raphael, whose own eyes were bent upon Coralie's smile of welcome.

BREED COWS IN JANUARY

Will Calve When Prices of Milk are High

Dairy cows if bred during the month of January, will calve in the fall when the prices of milk and butterfat are at their best. According to A. C. McCandlish, dairy husbandry man at the Iowa State College, cows bred at this time will be dry during the later part of the harvest season when all available help isrequired in the fields. By having the cows calve in the fall help is easier to seccure and not as expensive.

The calves can be given better care during the fall and they will be in good shape to ground to be turned out on pasture in the spring.

LOCALS

Miss Esther Jante spent Sunday at Garner with her parents.

Mrs. George Vance, of Goodell, was a Klemme visitor Friday.

The Rebbeca Lodge met at their hall last Tuesday night.

Echard Zeidler is at Wichita, Kan. where he is taking treatments.

Mr. and Mrs. Henry Buseman were at Garner Monday morning.

Mr. and Mrs. Henry Lewis were at Garner Monday.

The Royal Neighbor ladies met at the home of Mrs. Behringer last Friday. They report a good time.

Miss Cashman, and her niece, Mary Sullivan, of Goodell, were visiting in Klemme last Thursday.

Mr. and Mrs. Ben Hogenson, of Belmond were shoppers and visitors in Klemme Saturday.

Olof Twedt, of Doliver, was in Klemme the fore part of the week looking after business matters.

Mrs. Vance and Miss Clara Christie, of Goodell, were callers here Friday.

Mr. Engeseth, one of the merchants, of Goodell, was a business caller in Klemme Friday.

A baby boy arrived at the home of Mr. and Mrs. Will Tiggemann last Friday. They live southeast of this city.

Dave Schwichtenberg was at Garner on business Monday.

Mr. and Mrs. Will Heginger were here from Goodell Tuesday.

The kids are having a great time this winter coasting on the hills near the south edge of town. They are also becoming expert ski jumpers.

Mrs. A. E. Buriff returned to her home at Goldfield the latter part of last week after spending several days visiting with Klemme friends.

Goodell are considering consolidation of schools. They will hold a meeting tonight to talk it over.

Mr. and Mrs. Floyd Thayer and Mrs. Jim Thayer, of Belmond, were visiting in Klemme Monday between trains.

Miss Caroline Smid, who is working at Mason City, came Saturday for an over Sunday visit with Klemme relatives and friends.

There was a dance given at the Idle Hour last Friday evening. All seemed to have a big time, especially some more than others from reports.

Mrs. Metzgar of Ventura, has been visiting with her sister. Mrs. F. W. Kluckhohn the past week.

Oscar Wenck, of Garner, was here on business yesterday afternoon.

When does a woman love most--at seventeen or thirty-seven? See Gladys Walton in "ALL DOLLEDUP' Idle Hour, Saturday night. adv

George A. Price, father of Lee R. Price who lives near Klemme, passed away last Thursday. Funeral services were held Sunday from the home east of Grner.

Mrs. Schultz came down from Garner Saturday for a short visit at the home of her son, Walter, and family. Gloria accompanied her grandmother home for a few days visit Saturday evening.

Ingvard Lauritzen left this morning for Ringsted on business. Carl Lauritzen, who has been visiting in Klemme since the holidays also left today for Yankton, South Dakota, where he works.

Mr. Boblitt, the lecturer, was the second number of the winter lyceum at the theatre Monday evening. His lecture was enjoyed by all and he is perhaps the best speaker who has ever appeared here.

F. H. Ridder returned from Jordon, Minnesota, Monday evening, where he had been taking mud and sulphur baths for his rheumatism and lumbago. He says he was greatly benefited by the treatments.

Mr. and Mrs. Lou Sampson returned last Thursday from a several month's visit with their daughters at Fort Atchinson and Spooner, Wis. Lou is getting back in time to start his job as assessor.

Fred Schlichting and family are now located in the northwest part of town as they moved into the Henry Ludeke place which Fred bought a while back. Henry has moved onto his new place west of town.

Chris Mayne of Goodell was in Klemme Monday looking after business matters. Chris will move to this town the first of March. He bought the former Will Trafford location across from the park.

Rev. Tompkins, of Spencer filled the pulpit at the Methodist Episcopal church last Sunday for both morning and evening services. He will also be here next Sunday. Elsewhere in this issue you will find his church notes.

Mrs. Wylie. of Gilman, Iowa, came Saturday for a few days visit at the M. O. Hocum home. Her mother-in-law, Mrs. J. Wylie r returned to Gilman with her after several months visit here with her daughter, Mrs. Hocum.

The married folks dancing club held a hard time dance at the Idle Hour last Thursday evening. There were some good characters in the lot and Ye Editor almost got a night's free lodging in the hoosegow when the city cop mistook him for a Weary Willie.

The Ladies Aid Society of the Eng. M. E. Church met at the home of Mrs. Clarence Waterman last Thursday afternoon. We bet that "Clancy" wishes his wife had the ladies oftener as the stuffed up toad appearance showed that he had lived high from the "leavings" that the ladies were kind enough to leave for him.

Henry (Butch) Schroeder, after a visit of about a week with relatives and friends in Klemme left for Chicago last Friday evening, accompanied by his mother who will visit in the city for a few weeks. "Butch" plans to make a trip home to Klemme about once a year. He is with a live stock commission firm in the city and while here he also works up business for the firm, of which he is now a member and is prospering.

Mr. and Mrs. H. Coobs and sons, of McGregor came Saturday morning accompaning the body of John Coobs here for burial. Herman returned to McGregor Tuesday afternoon. He is in the blacksmith business there and is doing a good business. The rest of the family remained here for a few days visit at the W. F. Pavey home.

LIBERTY TOWNSHIP NEWS

J. L. Abel's son, Harold is on the sick list.

Mildred Anderson has been assisting Mrs. L. H. Griffin the past week.

Mr. and Mrs. Herman Paul left Monday for Des Moines where the later will seek medical aid. Miss Elizabeth Riemer is taking care of the children and household during the absence. A gentleman whose name we have not learned is attending the stock.

The basket social at school no. 9 was well attended in spite of the weather. A good program was given and much enjoyed the proceds of the baskets. The amount taken in was $40 which will be used to pay for an organ and other articles for the school.

IOWA NEWS

Items of Interest Summarized for Busy Readers

An effort was made by the authorities of Waterloo to stop Sunday dances.

Miss Eva McKillip of Moscow, 21 years old, committed suicide recently by taking carbolic acid. No cause is known.

The live stock Exchange at Sioux City has reduced th charge for handling stock 15 per cent for the benifit of the farmers.

Mrs. V. L. Tennis of Waterloo was killed when she accidently discharged shotgun while arranging some automobile robes.

Patrick Kelm, formerly of Emmetsburg, fell down the steps leading to a barber shop at Sherburne, Minn., recently and was killed. He was a single man. He was 55 years old.

Spantanious combustion in the coal supply of the Maquokta High school caused the loss of a building by fire which was valued at $80,000. Insurance to the extent of $36,000 was carried.

Three men have applied to teach school in Dorchester. Three men have made application to succeed Miss Inga Magnuson, who was slain in the schoolhouse Dec. 12, by Earl Throst.

John Dennish of Northwood was ground to death beneath a train. The coroner judged that Dennish had been blown under the wheels after alighting from the train. A wife & two children survive.

Alfred T. Garner, 78 years old, of Farley, dropped dead on the street after accompanying his granddaughter to a train. He was one of the last Civil War veterans of Farley. He came to Iowa from Indiana with his parents in 1845 via prairie Schooner and ox team.

Superintendent Ross of the county hospital at Glenwood narrowly averted a catastrophy there when a gas explosion endangered the institution and its helpless inmates. He rushed into the rom where the explosion took place and where the fire started and held back the gas supply with his bare hand, preventing the spread of the blaze. The fire department made a run of four miles in four minutes.

Then there is the type of man who will allow you to slander his family and his friends if yau wish, and will not resent if you call him harsh names to his face, but will fight like a wildcat if you say anything against his politics or his automobile.

GIVE HOGS GOOD FLOORS

Clean Dry Spaces Will Keep Them in Good Health

Good floors properly built will pay for themselves in saving hogs from disease attacks, say the animal husbandry department at Iowa State College.

A clean dry floor is the result of proper drainage and floor construction. Many materials are used in flooring, but the more permanent kinds that have low absorbent values are preferred. The hog naturally chooses a clean, warm dry well bedded floor in cold weather.

The dirt floor is much used, but is unsatisfactory in many ways. If dry it is dusty; if wet, it is likely to be muggy, if not muddy. In winter it is very likely to be rough and frozen, or else dusty or damp. The hog is inclined to root out holes. and cause mud wallows. Rats will burrow under and undermine dirt floors.

The cement floor is much used. It has the advantage of being permanent, but is likely to be somewhat cold and damp in winter. Concrete conducts the animal heat rapidly, which makes it feel cold. Moisture from the ground below is conducted to the surface by the concrete and there condenses, due to the coldness of the concrete.

A combination tile and concrete floor gives excellent service and is well adapted for the pens of a hog house. It is warmer and drier than solid concrete and just as permanent. It is easily constructed and has all the advantages of the concrete floor, but is without some of the disadvantages.

Further information on the subject can be had by securing bulletin 194 from the Iowa Agricultural Experiment station at Ames.

GET MACHINERY REPAIRED

Good Way to Reduce Waste in 1922 Farming

Iowa farmers can reduce the cost of operation on the farm if they will utilize machinery that is good except for a few repairs. According to J. B. Davidson of the agricultural engineering department of Iowa State College the use of considerable machinery is lost each year because repairs cannot be gotten at the last minute.

Get the needed parts while there is plenty of time to put them on the machine, and see that the tractor and oher implements are ready for use, so that when the spring season opens everything is in readiness.

MOTHER'S COOK BOOK
by Nellie Maxwell

If ye break faith with us who die,
We shall not sleep, though poppies grow
In Flanders Field.
—John McCrae.

FOOD FOR THE FAMILY

A DISH that is nourishing enough to take the place of a main dish at dinner is:

Hominy With Olives.

Fry one small onion cut fine in a little fat until golden. Add three scant cupfuls of cooked samp or a can of hominy; stir until hot, then add one-fourth of a cupful of milk, the same of water, stirring all the time; add three-fourths of a cupful of grated cheese, and when it is melted remove from the heat before the cheese becomes stringy. Then add one-half cupful of stoned ripe olives, chopped. Season and serve at once.

Scotchies.

Take two cupfuls of rolled oats, put through the meat chopper and brown lightly in the oven. Take two tablespoonfuls of shortening melted, one-fourth of a cupful of molasses, one teaspoonful of salt, one-fourth of a teaspoonful of soda. Mix all the dry ingredients, add the melted shortening and the molasses and milk. Roll thin and cut in strips and bake 20 minutes in a moderate oven. Ice each cake as it comes from the oven with sugar melted with a little water.

Savory Sandwich Filling.

Blanch one-half cupful of almonds and brown them in a tablespoonful of cooking oil. Then chop fine. Season well with salt and paprika, and add four tablespoonfuls of chopped pickles, one tablespoonful of chutney, chopped. Spread buttered bread with cream cheese softened and sprinkled with chopped almond mixture. This is sufficient filling for a loaf of bread if the slices are cut very thin.

Liquid Yeast.

Take four medium sized potatoes, washed, pared and grated, boil about five minutes stirring constantly, using one quart of water. Add one-fourth of a cupful of sugar, one teaspoonful of salt, one dry yeast cake soaked in one-fourth of a cupful of warm water, or one cake of compressed yeast may be used. When luke warm add the yeast and keep at same temperature for twenty-four hours. This yeast should not be kept more than two weeks.

Uncommon Sense
By JOHN BLAKE

MAKE HOURS COUNT

SAVING time is wasted effort unless you utilize the time you save.

Most people are in a hurry. They rush to their offices in the morning. They rush to their homes at night.

When they get to the office, they sit around waiting for dinner.

About three quarters of the average man's time is spent "sitting around." And time spent sitting around is always wasted time.

You are given about eight hours to loaf if you want to and eight hours to work.

Unless you have an unusually easy job, you can save little out of the eight hours' working time.

You can save from one to five hours out of the eight, at least once or twice a week, if you are careful.

But unless you use that time, and use it wisely, there will be no sense in saving it.

Most successful men are very careful to save a little time out of the so-called idle eight hours.

They use this either to add to the efforts they put forth on their regular business, or to take up something related to their business which is inconvenient to do during working hours.

In other words they use their time as intelligently as they do their money. They make it earn dividends. And time set to work in that fashion is always a good investment.

Steamships, railroads, rapid transit lines have together affected an immense saving of time for the human race.

No longer does a man need to spend a month, practically idle all the time, going from London to New York. He can go in less than a week, with three weeks saved.

Those three weeks are worth money. They may mean success. Use them and a considerable share of all the time you save, and your output soon begins to show a gratifying increase.

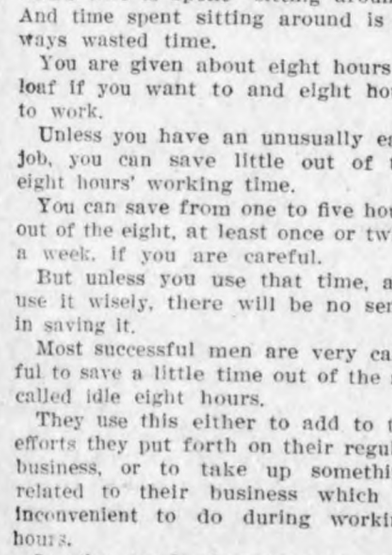
THE CHEERFUL CHERUB



LYRICS OF LIFE
By DOUGLAS MALLOCH

THE USUAL LIFE

I DO NOT wish you riches, friend,
For riches may not stay—
So much we lose, so much we lend,
So much we throw away.
I wish you only smiles through tears
And glad days in the saddest years.

I do not wish you cloudless skies;
They can't be always fair.
But may the sun that sinks arise,
The heart arise from care.
You must have clouds, but may they show
A silver lining somewhere, though.

I do not wish you only ease,
No toil for hand or brain;
They are but parasites, are these
Who live by others' pain.
No, something must your life employ—
But may your labor be a joy.

I do not wish you, friend, too much,
Each day a day of sun;
I wish you only treasurers such
As other men have won.
And better friend am I than they
Who wish for you a cloudless day.

I wish for you a modest part,
And simple joys for you;
And then I hope with all my heart
That simple dream comes true.
I wish you toil, and merriment—
The usual life, with life content.

THE FRIENDLY PATH
By WALTER I. ROBINSON

DON'T count over your burdens. They'll seem greater if you do.

It is always poor policy to go about trying to find all the disconcerting things along the pathway of life. Those which are of sufficient importance to command one's attention are sure to bob up without a search.

Never meet trouble until trouble meets you. If it's going to overtake you, it'll do soon enough. It is always good policy to be prepared for difficulties in order that they may easily be overcome. But to be prepared does not mean that one must constantly go about with strings on his fingers so that he may not forget any of the problems which are likely to bob up.

Nearly all the stumbling blocks along the trail followed by humans in this world are imaginary. But for their willingness to admit that they face serious problems, most of the discontented would hardly know that they are battling against odds when they actually are.

Because one has to face a trying task or great disappointment, does not mean that he is more unfortunate than others, nor that fate has turned against him. No one ever passed down the pathway to the valley of contentment (as they believed it) without working against odds at times and not infrequently being displeased when progress seemed slow. The same is true in the efforts of all who have tried to climb the steep places on the way to success, for neither in arriving at material goals nor in seeking the peace of comforting surroundings will there not be some troubles which have to be met.

But when one counts over the burdens which he expects or regrets, the future will usually appear to have a darker aspect than is justified by developments.

If one tries to find the bright side, he'll usually be so greatly enthused by his prospects that the burdens will seem small and easy to face.

SCHOOL DAYS

Something to Think About
By F. A. WALKER

THE SOFT ANSWER

WHEN you shall see, feel and know the sovereign power of the soft answer, you will not hesitate to admit its priceless value in preserving the friendship of peoples and nations.

Though a sponsor or all that is good and noble in mankind there is an illogical willingness in most of us to shun its charming companionship and turn to rougher acquaintances.

When the world is jangling and vicious tongues are spitting fire and brimstone, it is quite natural for us to pile more fuel on the flame, regardless of the spreading conflagration, even though it be singeing the good names of our friends.

We lose our grip on self-respect until calmness comes with afterthought, and shows us the error of our way.

For days we move shame-facedly from pillar to post, avoiding the friends we have hurt. And aside from the terror of separation which confronts us, we are tormented by remorse which undoes our nerves and throttles our spirits.

Then, as the scales fall from our eyes we become penitent.

As we reflect upon our behavior, we realize that our miseries come from our own workshop. They are not ground out in the mill of fate, tied in bulging bags and delivered at our door, as apologetic folk would have us believe, but of our own grinding—horrible grist filled with worms.

* * *

Upon those persons who have habituated themselves to use gentle words, and to use in stressful arguments the soft answer, the sun of good-will shines perpetually.

They are courted by the young and the old for their friendship and cheerfulness, which comfort and delight in the darkest days of sorrow, and warm in winter's cold.

Their influence for good is as immeasurable as a mother's love.

Perhaps you may have friends among these kindly persons to whom you turn when difficulties torment, life's skeins are tangled and your heart is burdened beyond its strength. If you have, heaven indeed has blessed you.

Observe the lightness of their eyes, the smile that is ever about the lips, the musical intonation of the voice when it answers softly. And as you do, resolve that you, too, will wed your tongue to the soft answer that "turneth away wrath."

FARM LIVE STOCK

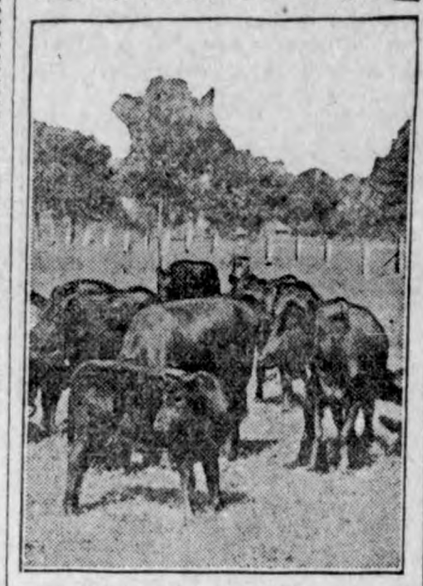
FEED FOR FATTENING CATTLE

Data Gathered by Department of Agriculture of Much Value to Producers of Beef.

(Prepared by the United States Department of Agriculture.)

Data gathered by the United States Department of Agriculture regarding the daily gain and the amount of feed and pasture consumed by 34,934 steers fattened on corn-belt farms during the last two winters, are of value to beef producers as an indication of how much feed is required on the average corn-belt farm to produce 100 pounds of gain.

The average weight of all the cattle at the start of the feeding period was 786 pounds, while the final weight was



Pasture Is Essential to the Profitable Production of Beef.

1,070 pounds, the gain amounting to 284 pounds in a period of 174 days. The average quantity of feed consumed for 100 pounds of gain was 680 pounds of grain, 62 pounds of commercial concentrates, 391 pounds of dry roughage such as hay and corn fodder, 863 pounds of silage, and the equivalent of 20 days of pasturage.

In addition to these co-operative feeding trials with cattlemen in Indiana, Illinois, Iowa, Nebraska, and Missouri, the United States Department of Agriculture is conducting investigations in southwestern Wisconsin to determine the costs and amounts of feed required to fatten cattle on grass, with and without a supplement, and of the feed required to maintain a breeding herd of beef cattle for one year, and to raise calves from weaning time to yearlings.

SELF-FEEDERS ARE POPULAR

Devices Eliminate Great Portion of Labor Involved and Insure Uniform Results.

Self-feeders for hogs have come into great popularity among farmers and feeders largely because they eliminate a great portion of the labor involved in feeding and insure more uniform results and gains from the hogs.

Hogs in the wild state were self-fed animals, living upon such feeds as would satisfy their appetites, and under domestication they seem to thrive best when fed by the same principle. The marked success of the self-feeding principle of hog raising is largely due to the fact that they may eat an abundance of those feeds which will nourish them to the best advantage.

The self-feeder should be designed primarily to keep an available supply of grain constantly before the hogs, and at the same time protect the contents against waste due to wind and rain. A self-feeder consists of a hopper to hold the feed and a trough below it into which the grain flows as the hogs eat it. Complete plans for the Iowa self-feeder can be obtained from the extension department, Iowa State college, Ames, Iowa.

ECONOMICAL BEEF IN SOUTH

Mixture of Silage, Dry Velvet Beans and Cottonseed Meal Is Most Satisfactory.

The United States Department of Agriculture has conducted a steer-fattening experiment in Mississippi which shows that velvet beans are well adapted for use in making beef. Feeding mixtures of silage, dry velvet beans and cotton seed were compared with combinations of silage and dry velvet beans, and silage and soaked velvet beans. The mixture of silage and soaked velvet beans resulted in the most economical and profitable production of beef, while the mixture of silage, dry velvet beans and cottonseed meal proved more satisfactory than the combination of silage and dry velvet beans.

WATCH FOR MOLDY SILAGE

All Stuff Found Decayed Should Be Placed Where Live Stock Can Not Reach It.

In opening the silo it is a good plan to watch out for mold which might be there. These molds are very poisonous to horses and often cause the death of cattle as well.

Be sure that the decayed silage is all scraped off the top and put where the livestock cannot get to it.

It is poor economy to try and feed the top silage and take a chance on losing valuable stock.

THAT Tanlac is a wonderful medicine for delicate children is conclusively proven by the remarkable results accomplished in the cases of the three children shown in this picture.

Little Blanche Blair, of Providence, R. I., age 13, gained 10 pounds; Regina McCabe, at right, age 9, of Scranton, Pa., gained 15 pounds; little Richard Leary, Jr., of Philadelphia, who was very delicate, is now in fine, robust health. The statements made by their parents are as follows:

Mr. A. M. Blair, residing at 20 Atwood street, Providence, R. I., said: "We are just so happy over the change Tanlac has made in our little girl that we can't do or say enough to show our appreciation. She had lost nearly 20 pounds in weight and looked so frail and weak that her mother and I were both almost worried sick over her condition. Since taking Tanlac, she has already gained 10 pounds, her color is better than it ever has been and she looks and acts like a different girl."

Mrs. Catherine McCabe, 414 Dickens Ave., Scranton, Pa., said: "The 'flu' left my little Regina in such a bad condition that I have no idea she would be with me now if it hadn't been for Tanlac. It is a mystery to me how she lived on the little she was eating and was so lifeless she never even cared to play with the dolls and toys she got at Christmas. Since taking Tanlac she is as hardy and well as any child could be and has gained 15 pounds in weight. I will always praise Tanlac for restoring our little girl's health."

Richard Leary, 2342 Palethorpe St., Philadelphia, said: "There is no doubt in my mind but that Tanlac saved my little boy's life. For two years I wouldn't have been a bit surprised to have seen him drop off at any time. He had stomach trouble and many a time the gas pressed up into his chest until his heart palpitated so I thought sure he could breathe but a few more gasps. Tanlac gave him back to us strong and well and we will praise it to the dying day."

The effect of Tanlac on the delicate stomachs of the young is one of the strongest evidences of its wholesomeness as well as its unusual merit. Although a powerful reconstructive, Tanlac contains no harmful ingredients, minerals or opiates which are so often found in other medicines. Being composed of the most beneficial roots and herbs known to science it is purely vegetable and can be taken by the most delicate children, and does not upset or injure the weakest or most delicate stomach.

There is a Tanlac agent in every town.—Advertisement.

Cities as Thunderstorm Spots.

The conclusion has been reached by a well-known engineer who has given the subject considerable attention that certain cities, if not indeed most inland cities of say 100,000 population or more, appear to be "thunderstorm spots." The observation has been made by E. R. Horton, of Voorheesville, N. Y., who also points out that "a shallow lake with sandy margins located in a forest may serve as a thunderstorm breeder" and cites as proof observations made by him over Oneida lake, New York.

Old Court Has Much Power.

In Liverpool (Eng.) there still exists one of the very few remaining mediaeval borough courts of record. At one time there were 215 in various parts of the kingdom. The Liverpool court of passage, as it is called, has practically unlimited jurisdiction in causes of action arising within the city, and has more power than has the City of London court which has jurisdiction only when the defendant is employed in the city itself.

Misery loves company, but the company isn't apt to make a second call.

Nature's Supreme Wisdom.

If it were not for the check that water interposes, vegetation would climb skyward until we had tropical jungles and flowers high in the branches of the forest, instead of violets, daisies and lady's-slipper orchids. It is, the year's tender growths die in the wet and cold of winter, furnish shelter to the seeds of grasses and small woodland plants, and so form a new growth for the coming of spring. Even in decay there is a purpose. In nature always there is a new beginning.—Youth's Companion.

Jewish Physicians to Popes.

Many examples might be enumerated of popes who patronized Jewish physicians. An exception was Pius IV, who introduced the Ghetto in Rome, but at least a score of popes seem to have gone out of their way extending friendly recognition to medical members of this race.

The Alibi.

The Secretary—This speech may get you into trouble.

The Honorable—Then you had better prepare a statement saying that I was misquoted by the newspaper.—

A "balanced diet" may sound confusing to many people

The facts, as explained here, are simple.

The secret of a "balanced diet" is to have food containing all the elements needed for proper nutrition. These elements are protein, to nourish the tissues; starch and sugar to furnish energy; fat to supply heat; and mineral salts to provide the material necessary for building nerves, brain, and tooth and bone structure.

Grape-Nuts, the nourishing cereal made of whole wheat flour and malted barley, served with cream or milk, is a complete food for young and old alike.

Go to your grocer today and get a package of Grape-Nuts. Eat it with milk or cream for breakfast; or with stewed fruit, jelly or jam, as a delicious dessert for lunch or dinner.

Every member of the family will relish this palatable and nourishing food—

Grape-Nuts—the Body Builder
"There's a Reason"

Made by Postum Cereal Co., Inc., Battle Creek, Mich.

Radio Tests Please Maxim

Declares Spanning of Atlantic Ocean by Amateurs Is Revolutionary.

SMALL APPARATUS IS USED

President of the League Foresees Nations Drawn Closer by Wireless Bonds—Amateurs Develop Super-skill.

New York.—The success of amateur wireless operators in this country and Canada in sending signals and messages to Scotland in the week's tests recently will be revolutionary in its effect on wireless communication, according to Percy Hiram Maxim, president of the American Radio Relay league, through which the tests were made. Amateurs had believed that some of them would crash through to the other side, but that many of them would do so night after night was almost more than they had hoped for.

Use Little Power.

The technical significance of the performance lies in the ability shown to make low-powered instruments do the work which in large commercial stations requires powerful apparatus. Less than one kilowatt was used by the amateurs in transmitting three signals over thousands of miles of land and sea—for some of those far in the interior of the country got across—whereas the large stations use from 100 to 200 kilowatts. In some weather that would not check the more powerful stations they would, of course, fail, but some of their work was done under conditions that were far from ideal.

That stations as far west as Ohio were able to reach Scotland, where Paul E. Godley, the official receiver for the league, was stationed, was due partly to the relation, not always realized, which Britain occupies to America. The general direction from points in this country is northeast. Signals from New England pass over the maritime provinces of Canada, and those from Denver pass over Hudson bay. Mr. Godley expressed the belief that because of better refraction and reflection inland stations had as good a chance of getting over as North Atlantic stations. This proved to be the case.

Proved It Could Be Done.

"Our success is revolutionary in radio communication," says Mr. Maxim. "It had not been thought possible by experts that amateurs could span the ocean, and we have proved that it could be done. It means the coming of citizen communication between England and America, the coming of the day when the people of one country can talk to one another and discuss momentous affairs without the intermediary of public or governmental agencies. What this means for the development of understandings and harmonious relationship can be better imagined than described. It turns one's thoughts to the recent discussions by Mr. Wells in his story of the ideal relationships between the peoples of the world.

"It is only a matter of time when this wireless telegraph communication will be followed by telephonic communication, and when citizens of one country may talk with the citizens of another country without any check upon their freedom of speech.

"The great thing about this test is that it was done by amateurs; their money and confidence put it through. They have developed super-skill in operating and supersensitiveness in apparatus. I think it will be a great surprise to all the wireless men of the world, from Marconi to the experts of the great private companies. The amateur's apparatus has been developed on the basis of love for his work; it is not the perfunctory, although skillful, performance of the hired employee."

The Radio league is divided into several divisions covering the entire country, and there are 20,000 amateur stations operating in it. Each division has a manager, an assistant manager and district superintendents, who develop long distance lines of communication and allot hours for local and long distance transmission.

MONUMENT TO RABELAIS

Monument by Villeneuve to Rabelais—who gave the world several million laughs and one good adjective—which will be dedicated soon at Montpellier in the presence of President Millerand of France.

Lands Must Be Kept at Work

Chief of the Forest Service Issues Warning Against Depletion of Wood Supplies.

OUR TIMBER IS RUNNING OUT

More Than 80,000,000 Acres Denuded to Point of Absolute Idleness So Far as Production of Timber Is Concerned.

Portland, Ore.—Forest lands not needed for agriculture must be kept at work growing timber instead of being allowed to lie idle.

This warning was sounded by Col. W. B. Greeley, chief of the forest service, who stopped here en route to Washington, D. C., from Mather Field, Cal., where he attended the forest fire conference.

"If we are to remain a nation of wood-users we must become a nation of wood growers," declared Colonel Greeley, pointing out that the United States produces more than half of the entire lumber cut of the world, and uses 95 per cent of the amount "right here at home."

"The exhaustion of our timber supply is coming about," said the forest service chief, "not because we have used our forests freely, but because we have failed to use our timber-growing land. The problem in a nutshell is the enormous area of forest land, which has been so logged and burned that it is producing little or nothing. We have more than 80,000,000 acres, an area greater than all the forests of France, Belgium, Holland, Denmark, Germany, Switzerland, Spain and Portugal, which have been denuded to the point of absolute idleness so far as the production of any timber of commercial value is concerned.

"We have other enormous areas of cutover land now growing but a fraction of the amount of timber which they might produce. And we are adding to these areas of idle or largely idle land from 10,000,000 to 15,000,000 acres every year, as destructive logging and still more destructive logging progresses.

Sees Trouble Ahead.

"This situation cannot continue long without grave consequences.

"Where Americans need more forests is largely on these 80,000,000 timber-denuded acres which could be made productive again with proper attention and proper protection against fires."

Some of the reasons why these forests are needed, according to Colonel Greeley, are:

"Our manufacturing centers are drawing at an enormous rate upon our timber supply—from two to four times as fast per capita as the country at large.

"Our railroads require 125,000,000 wooden crossties annually to maintain their roadbeds in fit condition and take care of new construction.

"Our average well-kept farms, using the upper Mississippi valley as an instance, require 2,000 board feet of lumber annually for repairs and improvements."

X-Ray Solves Theft.

Casper, Wyo.—An X-ray examination of a woman's stomach solved a diamond ring mystery, according to County Attorney Purcell. Mrs. Eva Hammond, a prisoner in the county jail was placed in custody of a physician while county authorities considered what method to pursue in recovery of the ring. Mrs. Hammond was arrested after she attended a dance one night, following complaint charging her with theft of a diamond ring valued at $1,200 last October. A tip from Mrs. Hammond's dancing partner led to the X-ray test.

Garibaldi's Widow Beside His Tomb

Donna Francesco Garibaldi, widow of the great Italian hero, is shown standing by his tomb at Caprera, Sardinia. Donna Francesco is now seventy-nine years of age. She was Garibaldi's second wife.

BRITISH LOSE OVER A BILLION

Hit Hard by Strike and Boycott in India.

Ghandi, Boycott Leader, Considers Violence Mortal Sin—His Punishment Would Set All India Aflame.

Washington.—How a slender, mild-mannered man of fifty-two, who believes violence of any kind a mortal sin, has caused the British government more trouble than any number of revolutionists, was described in an address to the National Popular Government league by Syud Hossian.

"The English government knows not what to do with this man, Mahatma Ghandi," said Hossian.

"If they imprison or execute him it will set India aflame. If they allow his non-violent, non-co-operative movement of boycotting British goods and everything British to proceed, it will bankrupt them and overturn the 'strategic' center of empire in the Orient.

"This month is the first anniversary of the start of the boycott instituted by Ghandi, and it has already cut down English export trade to 25 per cent of its normal volume, resulting in a cash loss of not less than $1,000,000,000.

"If the same success attends the refusal to pay taxes, which began last month, it will mean a loss of $300,000,000 per year in revenue to the government, which means collapse. John Bull is being hit in his most vulnerable spot—his pocketbook."

Hossian described Ghandi as the most remarkable person he had ever met. He quoted Colonel Wedgewood, a member of parliament, as saying:

"Ghandi is the only man in the world whose name can be mentioned with that of Jesus Christ without blasphemy."

"Although a trained lawyer," said Hossian, "Ghandi earns his living as a weaver. He works at his modest home, is a great reader and student.

"Ghandi believes the use of violence in any form is a mortal sin. Physical force he regards as the weapon, not of the strong, but of the weak.

"He thinks the most potent instrument for all purposes is 'soul force' and the power of self suffering, and does not permit himself an unkind thought, even toward his bitterest enemies."

Bank Robbed Often.

Shipshewana, Ind.—The Farmers' State bank here was robbed of $15,000 in currency and Liberty bonds early the other day. The safe had been opened with the aid of an acetylene torch. Officials said the loss was covered by insurance. Local authorities believe three men who came here late in the day in an automobile committed the robbery. It was the ninth time the bank had been robbed in 20 years and the third time this year. Shipshewana is located ten miles west of Lagrange.

CHIMNEY-CORNER SCHOOL BIG AID

Latest Information on All Subjects Is Available for Improving Farm Work.

MANY BULLETINS PUBLISHED

Important That Farmer Should Read Up on Textbooks for Purpose of Making Better Crops and Raise Better Stock.

(Prepared by the United States Department of Agriculture.)

Old pioneer stories tell of boys who, after working all summer in the clearing, attended school in the winter. Conditions have changed but little today so far as spare time for study in the summer is concerned, but winter still offers its opportunities, and no matter how old or young the farmer is he can generally find time at this season for a few extra licks at "reading up" on some phase of farming that will come in handy next year.

A School Around Fireplace.

His schoolhouse may well be in his own chimney corner. He has a wide range of subjects to pick from and is bound to find something on practically every question of farming with

The Chimney-Corner College of Agriculture May Well Be Coeducational.

which he is concerned. During the year there have been printed a considerable number of good textbooks on farming. The United States Department of Agriculture, as well as the various state agricultural colleges, has embodied in bulletins the results of long and patient labor on various things pertaining to farming, and have put into type facts that will mean dollars to the farmer who learns them and puts them into practice.

Of course, this chimney-corner school of agriculture allows its students much leeway. The curriculum is largely elective. The farmer may study one subject and leave another alone, as his interests and his business may dictate.

The Department of Agriculture has been publishing bulletins for a great many years. Hundreds of Farmers' Bulletins have been issued and every one of them discusses something that means money or better living to a large class of farmers. Many of the subjects have been supplemented and localized by state agencies—the agricultural college or the state department of agriculture.

There is no reason why any farmer may not have all the scientific information that exists on all phases of agriculture that mean anything in his particular operations. All he has to do is to read and study by his own fireside. If he needs tutoring, there is the county agent, whom he can consult when he goes to town on Saturday—or he might possibly have the agent out to supper and a session by the fireside some night.

The Department of Agriculture has printed lists of its various publications. Any farmer—or any city dweller or suburbanite who is interested in chickens or a garden or any of the things that pertain to farming—can have a copy merely by writing for it.

Then he can mail this checked list to the Department of Agriculture, and the bulletins checked will be sent to him without charge. There are a few bulletins the supply of which has become exhausted and copies are no longer given away, but they may be bought for a few cents each from the superintendent of documents at Washington. The procedure is explained on the list that is furnished by the department.

It Pays to Go to School.

Every farmer owes it to himself and his family to find a little time to go to school every winter—to read 5, 10 or 20 bulletins that will help him to make better crops, better live stock, to carry on his operations with less exhausting strain on himself.

It should be mentioned, too, that this chimney-corner college of agriculture is coeducational. A large number of the bulletins are devoted to household subjects. They contain information that will enable the farmer's wife better to carry her half of the load—to feed the family better with less work, to realize more for the portion of the farm output that comes under her direction, to have the minimum of inconvenience in the house and to get the maximum of comfort out of it—a thousand things that will help along in making farm life pleasanter and more profitable.

EGG-EATING HEN IS DIFFICULT TO CURE

Cut Her Head Off as Habit Is Practically Incurable.

Providing Well-Balanced Ration Is Insurance Against Development of Practice—Causes for Feather Pulling.

(Prepared by the United States Department of Agriculture.)

An egg-eating hen is a bolshevik that is liable to corrupt the rest of the flock with her uneconomic notions regarding rations. She should be removed to a place where her example will have no effect on her sisters, or she should have her head cut off, for the habit is practically incurable. Poultrymen of the United States Department of Agriculture say it can be prevented by taking proper precautions.

Eating eggs begins usually when an egg has broken in the nest, or when it has been cracked by freezing and then thawed out. Keeping the nests well supplied with straw or other nesting material will reduce the danger of breakage, and darkening them will reduce the chances of broken eggs being found by hens. It is a good idea to gather the eggs twice a day in cold weather so that none will be frozen.

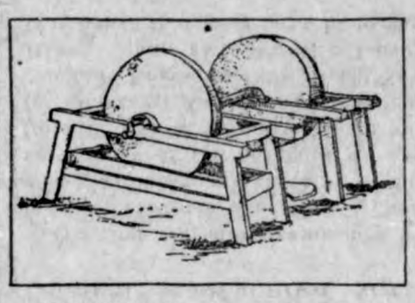
Hens that are not properly fed will have a ravenous appetite for eggs, both the shells and the contents, so that providing a well-balanced ration is some insurance against the development of the habit. In winter there is particular danger that some lack in the feed will develop an abnormal appetite, so plenty of animal matter, such as meat scraps, and lime in the form of oyster shells or bone, should be taken to provide it.

Another bad habit enjoyed by these dietetic bolshevists is feather plucking from themselves or from other members of the flock. Improper feeding, insect pests, and too close confinement are the usual causes for starting this habit. But it is not so hard to cure as egg eating. A plentiful supply of animal and green feed and good range or plenty of exercise by feeding in a deep litter, and freedom from insect pests will usually bring the fowls back to a normal appetite.

FLY-WHEEL AIDS GRINDSTONE

Jerky Movement That Is Destructive to Good Work on Ax or Chisel Is Eliminated.

To sharpen tools many people have to turn the grindstone without assistance, using the foot on a treadle and the hands on the article to be sharpened. This gives a jerky movement to the stone that is destructive to good work in putting an edge upon an ax or chisel. One needs a fly-wheel, and this can cheaply be found in a second stone of cement, and mounted



Fly-Wheel Steadies Grindstone.

on a frame beside the grindstone, as shown. Make a circle of stiff pasteboard upon a smooth surface and fill in with cement, with a few old wires to bind the whole together. Extend the iron shaft of the grindstone to enter the cement, with a square section made on the shaft, but leaving the shaft round on either side for bearings.—Farm Journal.

MILKING THREE TIMES DAILY

Additional Amount of Milk and Butterfat May Hardly Pay the Extra Expense.

Cows milked and fed three times daily will produce more milk and the average test will be higher than though they were milked only twice. The rule is that milking three times daily is advisable where records are being made, or where cows are milking so largely it is burdensome for them to carry their milk-making nutriments for periods of twelve hours each. Under practical conditions the question of time is the determining factor. It costs more to milk three times daily than only twice and if extra help must be hired the additional amount of milk may hardly pay the extra expense.

HERDS HEADED BY PUREBREDS

Cow Testing Associations in West Reach Mark of 100 Per Cent—Disgrace to Use Scrub.

One—two—three! One cow-testing association in Washington, two in Colorado, and three in Idaho have reached the mark of 100 per cent of their herds headed by purebred bulls. This was the count in the spring of 1921 in the territory of the western office of the dairy division of the United States Department of Agriculture. In the fall of this year one-third of the associations in the western states were 100 per cent in their use of purebred bulls. In some localities it is coming to be considered a disgrace for anyone to use a scrub bull.

Autos Named, Like Boats.

Autos in Paris are beginning to dispute yachts of the sea and fleet horses of the tracks the right to individualities of their own. Here and there one sees an imposing car bearing on the radiator the name chosen by the owner, perhaps fanciful, perhaps that of some dear one, and the fad is rapidly becoming popular. Names of persons thus far are more often seen than those of poetical, historical or literary allusion, and already the new fashion is giving rise to good-natured gossip.

SHERIFF'S SALE

H. A. CULVER
vs.
D. J. or DAVID J. McMAHON, and C. H. or CLEM H. McMAHON.

Notice is Hereby Given, That by virtue of a Special Execution issued out of the office of the Clerk of the District Court, in Hancock County, on a judgement rendered December 15th, 1921 Term of said Court, A. D. 1921, for the sum of Thirty Three Hundred Forty Four & 03-100 DOLLARS debt, and One Hundred Fifteen & 95-100 Dollars costs, in favor of H. A. Culver and against D. J. or David J. McMahon, and C. H. or Clem H. McMahon, and to the Sheriff of Hancock County directed. I have levied upon the following described property, to-witt: Northwest Quarter of Section 16. Township 97, North Range 24, In Hancock County, Iowa.

NOW, THEREFORE, Public Notice is hereby given that I shall, on the 21st day of January 1922, at 10 o'clock A. M., at the front door of the Court House, in Garner, in Hancock County, offer and sell at public outcry. to the highest bidder for cash, all the right, title and interest that the above named D. J. or David J. McMahon, and C. H. or Clem H. McMahon had on the 15th day of December A. D. 1921, or now has in and to the above described property, or so much thereof as is necessary to satisfy said execution, together with costs and all accruing costs, unless the same shall be sooner satisfied.

Dated at the Sheriff's office in Garner, this 19th day of December 1921, A. D.

E. P. HANSON,
2w Sheriff of Hancock County

NOTICE OF SPECIAL SCHOOL ELECTION
BOND PROPOSITION
MESERVEY, IOWA

Publis Notice is .Hereby Given. That a special election of the Consolidated Independent School District of Meservey, in the counties of Cerro Gordo, Hancock, Franklin and Wright, State of Iowa, will be held on the 17th day of February. 1922 at the City Hall, Meservey, Iowa, from one o'clock P. M. until six o'clock P. M. and that at said election there will be submitted to the voters of said Consolidated Independent School District to be by them voted upon. the following proposition:

Shall the Consolidated Independent School District of Meservey, in the counties of Cerro Gordo, Hancock, Franklin and Wright, State of Iowa, issue bonds in the sum of Sixty Thousand Dollars ($60,000) for the purpose of constructing and equipping a new school house?

At which time and place all the voters of said Consolidated Independent School District are hereby notified to appear.

This notice is Given by Order of the Board of Directors of said Consolidated Independent School District, pursuant to a sufficient petition with the requisite signatures in accordance with Section 2820-dl et seq. of the supplement to the Code of Iowa, 1913.

Dated at Meservey, Iowa, this 13th day of January, 1922.

J-19-26-F-2-9 K. Clarence Ruigh, Secretary. Board of Directors.

NOTICE TO BIDDERS
SCHOOL BUILDING--BIDS CLOSE FEB. 16, 1922 AT 1. Pm
MESERVEY, IOWA

Bids are desired on a school building, to be erected at Meservey, Iowa, by the Board of Education of the Consolidated Independent School District of Meservey, Iowa. Bids will be received by the Secty. of the Board of Education Mr. K. Clarence Ruigh at his office in the Farmers Savings Bank at Meservey up to 1Pm Feb. 16, 1922. Bids will be opened immediately and read publicly. Bids must be accompanied by certified checks or bid bonds in amount as follows:

General Construction .. Bid Bond	Check or $1500.00
Heating and Ventilating .. Bid Bond	Check or $1000.00
Plumbing	Check or Bid Bond $400.00
Seating	Check or Bid Bond $200.00
Equipment	Check or Bid Bond $200.00

Certified checks or bid bonds must be made out unconditionally to Mr. K. Clarence Ruigh, Secretary Board of Education. as a guarantee that the bidder, if successful, will enter into contract with the Said School District and furnish a bond in full amount of the contract in the form outlined in the specifications, guaranteeing the completion of the building and the payment of all leins and claims.

The plans and Specifications will be on file after Feb. 1, 1922, One copy only—at the office of the Secretary, one at the office of the Architect. 1353 University Ave., St. Paul, Minn., and one at 211 M. H. A. Building, Mason City, Iowa. also at the Builders Exchanges of Des Moines, Iowa, St. Paul, Minn. and Minneapolis, Minn.

Contractors may secure plans by application to the Architect, 1353 University Ave., St. Paul, Minn., upon payment of a deposit of $10.00 to insure return of plans and specifications. The entire amount will be refunded to all contractors who file their bids with the secretary, likewise the entire amount will be forfeited if the contractor fails to bid. Sub contractors and material men will be charged the exact cost of preparing the blue prints and specifications for such drawings as they may require to figure the part of the work they are bidding on.

Contractors will be required to bid on the exact form of bid outlined in the bidders blanks, any deviation therefrom will invalidate the bid and same will not be considered.

Contractors may combine any part of the work or bid on the entire contract by furnishing with their bid the certified checks or bid bonds required above.

The Board of Education reserves the right to accept any or reject any or all bids.

Signed:
Consolidated Independent School District of Meservey. Iowa.,
By K. Clarence Ruigh, Sec'ty.
Board of Education.

GOODELL HIGH SCHOOL NOTES

The first semester exams now being over everyone it at ease. Those who were lucky enough to be exempt from some of the subjects were as follows: Louisa Ahrenkiel, John Miller, Margaret Kearney, Mae Griggs, Adelaide Engeseth, Dale Chase Nava Bauch. Mann and Dorothy Lacore. It is hoped that more may be exempt next semester.

Marvel Chase was absent from school Monday morning.

The Juniors will take Civil Gov't and Commercial Arithmetic next semester instead of Political Economy and Advanced Physiology.

Dale Chase, Art Lowenberg, Ed Bollar, and "Mac" McNulty were absent Tuesday afternoon. The lost time was made up Wednesday after school during which a 250 word essay was written by each one.

The Basket Ball teams played Crystal Lake Friday—a good game was played. The scores for the boys team were 12 to 22 in favor of Crystal Lake, and the girls 3to 28. Perhaps or in fact we know the girls could have done better if our regular team could have gone, but one guard 1 forward and our jumping center were not able to go. but our "Subs" done good work. A return game will be played next month. Next Friday Klemme will play here. We hope to see a large crowd of spectators and a good game.

Aurthur Lowenberg and Frank McNulty were absent from school Friday morning.

Next Thursday evening Professor C. C. Swain of the Iowa Extension Division will speak on consolidation at the School House at 7:30.

As many as the school children posible are asked to attend the Lecture Course Tuesday evening.

Leona Sandry resumed her school work after a month absence.

Doings of the Week Reported By the Klemme Schools

BASKET BALL GAMES AT KLEMME FRIDAY NIGHT JANUARY, 27TH

The Klemme High School basket ball teams will play the Goodell High School teams on the Klemme floor on Friday night, January 27th. These will be the first games our High School will play at home and we want to see the garage packed full of enthusiastic Klemme people. Both these games will be interesting from start to finish, as two very interesting games were played at Good ell the week before. The Klemme boys are anxious to take the first victory on our floor the first time. The girls are anxious to get even with Goodell because of being defeated by a close score at Goodell last Friday night. Both teams are entering these games with a very good purpose in mind. We've got to win and we will win! So COME and see these games Friday night January27th. Admission for these two games will be, Adults 25c and Children 15c, under 12 years of age. This is a very small admission and we guarantee you'll get your Monys Worth. COME and BOOST your High School teams!

BOYS TEAM WIN FROM GOODELL

The Klemme High boys took their first victory from Goodell last Friday night in a hard fought and interesting game. K. H. S. Boys worked hard and at the end of the first half the score was 7 to 7. Our boys "pep ed" up and slipped in two baskets in the last half and held Goodell to nothing in the last half. The score was 7 to 11 in favor of K. H. S. boys. The girls also played an excellent game but was defeated by the close score of 8 to 12. Goodell boys here Friday night, January 27 The following is the lineup at the Goodell game last Friday night.

Lineup of Boys

C. Lauritzen
R. F. Bergmann
S. F. Ell
R. G. Koerner
S. F. Wiles
Sub. Schlicting.

Lineup of Girls

J. G. Maybelle Johnson
R. G. Bernice Tanner
F. Glenna Gruetzmacher.
F. Pearl Johnson
G. Neota Ridder.

Subs. Vona Greene, Adala Schroeder and Faith Ax.

Marie Blank had the misfortune of spraining her ankle last Thursday night at basket ball practice. She was not able to play at the Goodell game, but it is hoped she may be able to play Friday night and help the girls win. She is needed very much on the team as jumping center.

Prof. Wilson received rules and regulations from the Iowa Athletic Association, and has announced a few of these rules before the pupils. One important rule of this Association is that all pupils participating in athletic events are required to pass in three subjects each day.Each person in the basket ball teams are required to take a physical examination.

Don't forget the BASKET BALL game at here Friday night January 27th. COME!

A debate will be given by four pupils of the community civics class Friday. The question is: Resolved that the public opinion governs the action of the people of our commun more than law. Those on the affirmative side are Glenn Busch and Barz. an don the negative, Priebe and Sylvanies Walker.

Baumgartner is absent on account of sickness.

A new semester has begun and High School are taking up a new branch of studies with the exception of English which continues through the year.

The High School did not play Ventura as was stated in last week's school notes. Sending our letter of accepting their challenge evidently was sent too late and Ventura obtained a game from Clear Lake. We were to play them Wednesday. It is quite probable that K. H. S. will play them on a later date.

The K. H. S. girls will play the Garner High second team Thursday night January, 26. We wish the girls good luck.

Grammer Room Notes

Mable Schafer has been absent fro school for over a week on account of sickness.

The eight grade county examinations will be held on February 2nd and 3rd. The eight grade are now spending all their time in reviewing.

Mrs. R. Elder was a welcome visitor of the Intermediate room Tuesday P. M.

The Intermediate room are very thankfull for the Library Cupboard placed in their room. It is much larger than the old one and will hold more books.

Tuesday the school nurse exanined the pupils in the two lower rooms.

Celebrates 71st

HENRY WILLE WAS 71 YEARS YOUNG SUNDAY

Children Have Big Surprise Dinner For Him

Sunday was the 71st birthday anniversary of Henry Wille and in honor of the event Mr. and Mrs. Wille's children arrived at their home carrying baskets of good things to eat and declared they formed a surprise party to celebrate his birthday. A big dinner was prepared and the table was beautifully decorated with flowers for the occasion. Henry and wife thoroughly enjoyed the surprise the children had planned. Those who were present were Mr. and Mrs. Wm. Schlawein and family Mr. and Mrs. John Bock and family Mr. and Mrs. Fred Grieman and family, Mr. and Mrs. Cornelius Wille and family, Mr. and Mrs. Albert Barz and family, Mr. and Mrs. Harold Leitzinger, Catherine Wille, Carl Wille and Edna Goll. Henry is a spry man despite his age and really appears to be a man in the fifties. He says he feels fine, never was sick and intends to celebrate a great many more birthdays.

ART KUCK WRITES THE TIMES Will Start For Home Soon

Santa Monica, Cal.,
1-19-22

Friend Jergie:-

We are all fine and dandy. Hope these few lines will find you and the family and all Klemme people the same.

Well, Jergie, we are going to leave here this coming Sundap, so Charles says not to bother about sending the Klemme Times for they would just get lost.

We go from here to Long Beach and will visit G. A. Pabst and from there to San Diago and then across the Desert to Texas and then home. ha, ha.

Friend Kuck.

NOTICE TO STOCK HOLDERS OF THE KLEMME CO-OP. GRAIN CO.

All those who have paid up in full on their elevator stock can call at the First National Bank and receive their Stock Certificate by signing receipt. 2w.

By Order of Board of Directors

METHODIST EPISCOPAL CHURCH NOTES

Rev. W. O. Tompkins of Spencer, will preach both morning and evening services. He was unable to be here last Sunday on account of weather conditions.

Morning services at 10:00 oclock.
Sunday school at 11:00 o'clock.
Evening service topic will be, "The Dynamics of God."

Everybody invited to attend these services.

The End of a Perfect Day

WAR FINANCE LOANING FARMING COMMUNITIES OVER $1,000,000 DAILY

Each Statae Entitled to All Loans Its Agricultural Interests Ask for

WASHINGTON.—The tremendous amount of help which the War Finance Corporation has given the agricultural and livestock interests of the country. under its enlarging powers, as given it by the special session of the Republican Congress lasa summer, is shown in a report of the corporation for the year ending December 31st. According to that report between August 24, 1921, the time at which its new powers become effective, and December 31, 1921, inclusive, a period of four months and one week and the War Finance Corporation advanced to financial institutions and cooperative associations, for agricultural and livestock purposes, the total amount of $145,032,039. This is at the rate of over $36.000,000 a month, or over $1,090,000 a day.

Classified according to commodities these loans were made to interests handling the following agricultural products:

Cotton	$23,154,200.52
Grain	20,327,833.65
Live Stock	31,740,630 72
Sugar Beets	8,104,000.00
Rice	2.250,000.00
Canned Fruits	300,000.00
Dried Fruits	1,250,000.00
Peanuts	1,097,000.00
General Agricultural purposes	56,857,674.78
Total	**$145,082,039.67**

Classified by states, (Souhern states dealing in cotton omitted) the advances were as follows:

Arizona	$2.739,500.00
California	3,863,348.59
Colorado	3,517,736.85
Idaho	721,975.00
Illinois	2,477,000.00
Indiana	290,000.00
Iowa	15,029.341.95
Kansas	2,621,146.02
Minnesota	18,527,463.80
Missouri	5,408,586.65
Montana	3,703,352.50
Nebraska	5.048,724.38
Nevada	248,000.00
New Mexico	2,015,259.50
New York	300,000.00
North Dakota	6,160,656.16
Ohio	345,000.00
Oklahoma	6,386,544.27
Oregon	1, 910,916.76
South Dakota	7,109.099.50
Tennessee	5,060,060.29
Utah	7,919,957.00
Washington	5,459,333.65
Wisconsin	1,856,300.00
Wyoming	3,280,068.12

As the War Finance Corporation has repeatedly made public. the amount of money it advances to any interest, or to the agricultural interests of any state, depends wholly upon requests from those interests. There is not allotment or apportionment whatever of the $1,000,000,000 fund of the corporation. If any state has received what appears to be a disproportionately small amount of the loans from the War Finance Corporation, it is due wholly to the fact that the agricultural interests of the state have not made requests either through the cooperatice associations or through their banks for assistance.

They say that automobiles now are about "fool proof" but they will never be that as long as an automobile is not developed that refuses to allow a fool to drive it.

FIRST METHODIST CHURCH

A week ago Tuesday evening the Loyal Workers Class of the First Mothodist Church, of which Mr. Geo. Gruetzmacher is the effient teacher, assembled at the home of Mr. John Josten and intruded upon his hospitality for a social hour aand for the purpose of electing officers for the ensuing year.

The following officers were elected:

C. A. Arnold. Class President.
John Josten, Class Secretary.
F. Gruetzmacher, Class Treas.
Mrs. P. M. Griesemer, Chairman Devotional and Program Comittee.
Mrs. Martha Bredbenner, Chr. of Social Committee.
Mrs. Lillie Koerner, Chr. Flower and visiting Committee.

After the annual business was completed the evening was spent in a social way which everyone seemed to enjoy.

At the usual hour a nice lunch was served by the lady members of the class and the gentlemen mebres unanimously agreed that thep could not be beat in the culinary art.

Considering the weather, the Loyal Workers Class had an excellent attendance last Sunday and a goodly number of visitors. Let us keep up the good work and work "ere the night cometh when no man can work'

Midweek prayer service on Thursdap evening (tonight) at the home of Mr. Arthur Wellemeyer.
day afternoon et cb rdww rw cbmb

Quarterly conference on Saturday afternoon at 2:00 o'clock. All members are urged to be present. Because of this meeting the Catechism and Bible school will not meet this week.

On Sunday morning our Sunday school will begin at ten o'clock and the sermon at 11:00. Please note this change which is made for the reason tat tis being our Communion Service Sunday. we expect our members from the Liberty Congregation to meet and worship with us. Rev. L. J. Brenner, the district superintendent will conduct the services.

W. C. Bergmann, Pastor.

FINE POINTS IN ENGLISH

The man had just informed the Pullman agent that he wanted a berth.

"Upper or lower?" asked the agent

"Whatsthe difference?" asked the man.

"A difference of 50c in this case. The lower is higher than the upper. The higher price is for the lower. If you want it lower you'll have to go higher. We sell the upper lower than the lower. In other words, the higher, the lower. Most people don't like the upper, although it is lower, on account of being higher. When you occupy an upper you have to get up to go to bed and get down when you get up. You can have the lower if you pay higher. The upper is lowe rthan the lower because it is higher. If you are willing to go higher, it will be lower—" But the poor man had fainted.

SOUNDED HARSH TO HER

First Artist: "Been doing anything lately "

Second Artist: "Oh, knocked off a couple of girls heads last week and finished off the Mayor of Monmouth"

Old Lady (suspiciously) "Bolsheviks!"

A deep thinker is never a shallow talker.

County Political Pot Continues To Boil; More Candidates

LIVE STOCK SHIPMENTS THE PAST WEEK

There were six car loads of live stock shipped out of the Klemme stock yards Saturday night.

The shipments were divided up as follows:-

Cattle

Julius Priebe — 1 car

Hogs

A. C. Lau — 3 cars
Joe Johnson — 2 cars

No one is erported to have gone in to Chicago wiht the shipment.

Klemme is still in the lead with live stock shipments and will hold that place with all the neighboring towns at the tail end.

TO REDUCE POSTAL EXPENSES

WASHINGTON, Jan. 26.—The Postoffice Department has selected 50 of the larger postoffices for inspection in order to ascertain if the service is satisfactorp and whether re organization may not be effected that will result in many economies without lowering the quality of the service. Many of the postoffices expanded to meet war time conditions are still being run on that basis. Inspections so far have indicated that considerable savings may be made.

Thieves Get $15

POOL HALL ROBBED SATURDAY NIGHT

Entrance Gained Through Window

While proprietor John Etchen of the pool hall was at supper Saturday evening between six and seven o'clock, a theif or theives entered his place of business htrough a window and rifled the cash register of fifteen dollars in bills and silver. They did not take the small change or checks but overlooked some bills which were among the checks in the cash drawer.

They left the building through a rear door.

This is the first instance of petty robbery reported here for several years.

"SCRAPPING" OF U. S. NAVY ALREADY WELL UNDER WAY FAMOUS SHIPS JUNKED

WASHINGTON. Jan. 26—The process of scrapping Uncle Sams Navy is not waiting upon the final decisions of the armament Conference. The Navy Department has just disposed of 13 old warships of different types, which it officially declared worthless for naval purposes. Among them was the cruiser "Brooklyn" which was the flagship of Rear Admiral Schley in the battle of San-Diago. Another was the wooden sailing ship "Dale" built in 1839, and at one time th pride of America's wooden navy, being considered the crack worship of her period. She sailed the seven seas, sometimes on missions of peace and sometimes in pursuit of pirates. In her early day he played an important part in the abolition of slave trade. In the war with Mexico and later, in the Civil War, she was used in helping blockade the guff coast. She carried 16 9-inch smooth bore guns, which at that time were considered the most farmidable battery afloat. In more recent years she has been used at Annapolis and Washing as a training and receiving ship. This wooden warship at publis sale, brought the sum of $237.

On January 16th another lost of old battleships and monitors will be sold. Among those on this list are the battleship "Maine," successor to the one which was blown up in Havana Harbor, the battleships "Missouri" and "Wisconsin" and several monitors and cruisers.

Most of the vessels included in the list to be sold att this time played a very important part in the naval engagements during the Spanish American wra.

Girls more and more are exposing their ears. but there is nothing to indicate they mave missed much by keeping them covered.

CHRIS JACOBS ANNOUNCES FOR AUDITOR

In this issue f the Times we are carrying the announcement of Chris Jacobs who seeks the office of County auditor to succeed himself.

Chris is universally known all over the county and so needs little or no introduction to the voters.

The office of county auditor is perhaps the most important of any and a thoroughly competent man should be chosen to fill this most important position. We can think of no one better for that office than Mr. Jacobs. He has shown that he is perfectly capable of handling this position and has done so in a most satisfactory manner and is without a question the best auditor this county has ever had, and that is saying a great deal for we have had some excellent men in that office.

The office of county auditor is becoming more important every year with the extended drainage systems county paving, larger tax rolls and all the other one hundred and one things which have been heaped upon tat office. It is an office which should not be experimented with the one which requires the best man obtainable. Chris fills the bill to a "T" and will undoubtly be given the support of the voters at the June 1922 Republican primaries. There is no oppisition so far and we doubt if there will be any Chris will undoubtly carry the keys tor the office for the coming term.

PECK HANSON WANTS TO WEAR THE SHERIFF'S BADGE AN OTHER TERM

Has Been a Busy Man During H Administration

"Peck" Hanson. the sheriff of this little old county, called us up over the phone the other day and informed us that we were under arrest for a few minutes and to clean out our ears as he had comething to say. He informed us that he was announcing for sheriff for another term. We didn't have any objections so he released us from the sentencce.

"Peck" has been a busy boy since becoming sheriff, the busiest "chief" we have erer had with all the legal papers suc as attachments, foreclosures, etc,. to execute. besides the regular run of business and to run down "hootch mills" bootleggers and all that. "Peck" has run down some twenty-odd violators of the Volstead Act in the county so far during his term.

He is a real sheriff, does his duty preforms all the requirements of the office in a most satisfactory manner and is serving his first term. He should have the second term without any opposition as is customary in this county and will undoubtly be given the full support of the voters at the June primaries. Everybody knows "Peck" and everybody likes him. County the noses in the county and you will know the number of votes he will gather. We're for him strong.

MRS. CLARISSA ABEL OUT FOR CO-RECORDER

In this issue of the Times appears the announcement of Mrs. Clarissa Abel, of Garner, who is running for the office of County Recorder.

Mrs. Abel was born and raised in Hancock county; she received her education in the schools of this county and later completed her work at Waldorf College at Forest City, Ia. Previous to her marriage to Robin Abel she was a teacher in the rural schools of the county for several years.

E .P. HEALY OUT FOR REPRESENTATIVE AGAIN

E. P. Healy of Britt has announced in this issue of the Times. He is a candidate for re-election to the office of Representative from this county. Mr. Healy has been serving his first term and is giving good service. It is customary that the second term is given all office holders and so Mr. Healy should be given the office for another term without any oppisition.

BOTH GOOD AND BAD NEEDED

Rev. Sparrow Jones Had Ingenious Reasoning With Which to Satisfy Aunt Miranda.

Whenever Rev. Sparrow Jones called on Aunt Miranda, it was her custom to set a plate of gingerbread before him and then ply him with what she called "'ligious 'spoundings."

"What fo' does de Lawd send epidemics onto de land?" she asked him one day.

"When folks get so bad dey must be removed, some of 'em, Sister Miranda, den de Lawd permits de comin' of an epidemic," said the preacher; and he took a large bite of gingerbread.

"Uh," said Aunt Miranda. "Ef dat's so, how come de good people gits removed along wid de bad ones?"

"De good ones is summoned fo' witnesses," said Rev. Sparrow Jones. "De Lawd gibs every man a fair trial."—Philadelphia Ledger.

Clear Case.

"I don't take prohibition cases," said the lawyer.

"But I'm an innocent man, I tell you. I'm charged with having liquor in my possession, but I'm the person who called up the police department and stated that I had found twenty-four quarts of Scotch buried in my backyard."

"You say you called up the police and let them carry off that Scotch when you might have concealed it in a hundred different places and defied the true owner to get possession of it?"

"Certainly."

"Well, you must be innocent. I'll engage to defend you."—Birmingham Age-Herald.

Not One of Them.

"There seems to be no practical penalty for the bootlegger."

"Well," replied Senator Sorghum, "he's at least deprived of the privilege of writing pieces for the paper and signing them 'Taxpayer.'"

Plain spoken folks, every little while, run up against a human swordfish.

DON'T FEAR ASPIRIN IF IT IS GENUINE

Look for Name "Bayer" on Tablets, Then You Need Never Worry.

To get genuine "Bayer Tablets of Aspirin" you must look for the safety "Bayer Cross" on each package and on each tablet.

The "Bayer Cross" means true, world-famous Aspirin, prescribed by physicians for over twenty-one years, and proved safe by millions for Colds, Headache, Earache, Toothache, Neuralgia, Lumbago, Neuritis, and for Pain in general. Proper and safe directions are in each unbroken "Bayer" package. —Advertisement.

Garcia's Method.

Mesdames Viardot-Garcia and Malibran, the wonderful daughters of Manuel Garcia, who was perhaps the greatest vocal teacher of all time, literally "learned in suffering what they taught in song."

The discipline of the Garcia home was extremely severe. It was said that Garcia used to beat his daughters till they screamed.

The neighbors, however, did not confuse method with madness, and on such occasions they quaintly said: "It is only Monsieur Garcia teaching his girls to sing."—Pittsburgh Dispatch.

Double Correction.

Mrs. Newrich (to small son)—James, have you whispered today without permission?

James—Only wunst.

Mrs. Newrich (to nurse)—Jane, should James have said "wunst"?

Jane—No, ma'am, he should have said twict.—London Answers.

A legend is a barefaced lie that has grown old enough to wear whiskers.

You wouldn't put on hobbles to run a foot race

Then why load up on handicaps for the day's work?

A good deal of food, unwisely chosen, does weigh the body down and clog the digestion, and dull the brain.

Why put on the hobbles?

Grape-Nuts is a breakfast or lunch-time dish for those who want food efficiency, and mind and body efficiency.

Grape-Nuts satisfies and nourishes. It delights the taste. It is ready to serve whenever you are ready to eat. And it digests easily, quickly and completely—leaving no handicap of heaviness and drowsiness.

Grape-Nuts is the food for health and action.

FARM NAME REAL ASSET TO OWNER

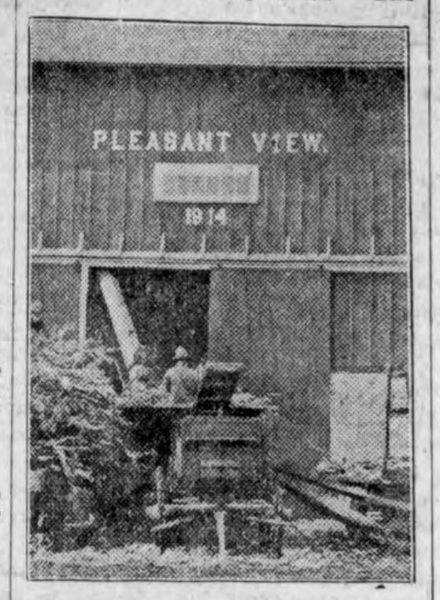
Can Be Used to Good Advantage in Connection With Marketing of Products.

OF MUCH VALUE TO BREEDERS

Acts as Sort of Guaranty That Anything From That Particular Place Is All That Is Claimed—Can Be Registered.

(Prepared by the United States Department of Agriculture.)

Many farmers throughout the country are finding it to their advantage commercially to give their farms attractive names that can be used in connection with marketing their products. Provided the quality of the product is kept up, a reputation is quickly established for the farm and the commodity that makes the name of real worth in dollars and cents when it comes in competition on the market with other products. The



Farm Name Has Money Value.

name becomes in time a real asset to the owner and has a money value much like the good-will in other kinds of business.

Breeders Recognize Value of Name.

In England many farms have borne distinctive names for years, which have become famous in connection with various products. This has been especially true in the case of certain breeders of cattle. The name of the farm passes current among cattle breeders as a sort of guaranty that animals from that farm are all that is claimed for them. The practice is coming into vogue in this country, and with it a desire to be protected against others adopting the same name and thereby benefiting by the reputation already established for it.

The United States government, through its patent office, which interprets the trade-mark and label copyright laws, is prepared to give this protection within certain limits. Some of the states have laws authorizing the registration of farm names with the state authorities, and no one else in that state is allowed to use the name. This is merely for use within that particular state. The United States patent office, however, is prepared to register farm names as trade-marks if they meet specified requirements. This will protect the owner against their use by others anywhere in the United States. There are certain requirements, however, that must be met, as in the case of other sorts of names used as trade-marks under the federal trade-mark law. The farm name, for one thing, must be used by the farmer as a trade-mark on his products that he ships to points outside his own state; in other words, a commodity that moves in interstate commerce. It must be printed, stamped, or otherwise attached to each parcel. The federal law makes no provision for the registering of names used as trade-marks on commodities that are shipped only within the state.

Common-Law Right in Name.

Although it is thought advisable, it is not necessary that the name be arranged into any [illegible] design. Under the trade-[illegible] merely a [illegible], it was not possible to [illegible] particular that is merely geogra[illegible] Such merely descriptive, or is misleading name not displayed in some [illegible] manner. [illegible] marks, however, can be regist[illegible] under the act of 1920, if they h[illegible] been in use by the applicant in interstate commerce for not less than one year. In this way congress sought to give recognition to a common-law right in a name used as a trade-mark on the ground of its use.

BEST DISTRIBUTER OF WEEDS

Oat Crop Put In Carelessly and Without Cleaning Seed—Noxious Plants Result.

One of our best weed distributers is the oat crop. Oats are naturally partial to weeds, and to add to the problem we usually put the oat crop in carelessly, often on weedy ground, frequently without cleaning the seed. The result is that smartweed, wild oats and pigeon grass dispute with the oat crop for the water and fertility in the soil. Were the same care given the oat crop that is now accorded wheat, our returns per acre would be more and our weed problem measurably less.

EXPERIMENTING WITH HOGS TO FIND MERIT

Scrubs, Crossbreds and Purebreds Are to Be Used.

Animal Husbandry Division of Department of Agriculture Endeavoring to Clear Up Points on Feeding and Breeding.

(Prepared by the United States Department of Agriculture.)

Although there is a higher percentage of purebred hogs in the country than of any other class of live stock, there is still much room for improvement. And there is much to be known concerning the relative merits of scrubs, crossbreds and purebreds. To make some of the points clearer the animal husbandry division of the United States Department of Agriculture is starting a breeding and feeding experiment that will contrast the results of using scrub, crossbred and purebred boars on scrub and crossbred sows. If appropriations provide sufficient money it may be that the effect of using crossbred and scrub boars on purebred sows will be studied.

Ten crossbred sows, of various breed mixtures, and ten scrub sows of the razorback kind will be used. Half of each of those groups will be bred to a purebred boar; half of the first group will be bred to a crossbred, and half of the other group will be bred to a scrub. This same scheme of breeding will be carried on from generation to generation. Some of the offspring will be fed out and some of them will be kept for breeding before being fed out. Shoats from the different lots will be put in feed lots together and fed alike so that a fair comparison can be made. Some of these scrubs and crossbreds will be compared in feeding trials with purebreds raised on the department's experimental farm at Beltsville, Md. Some will be put into different experimental lots on various feeds.

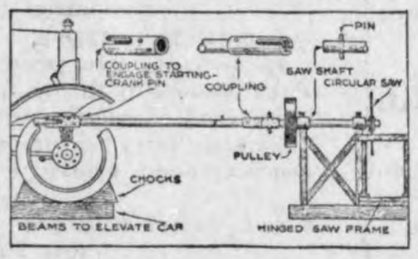
Nearly everybody thinks the purebred is superior to the scrub, but there is disagreement among farmers about the merits of purebred and crossbred feeders. The department hopes that in due time its experiments will give results that will answer any doubts.

MAKING USE OF AUTO ENGINE

Outline Given of Plan for Connecting Car With Circular Saw Will Be Found Handy.

An arrangement whereby an automobile may be coupled to a circular saw for occasional use, is shown in the drawing. The saw frame for this equipment should be quite low, in order to obtain alinement with the engine shaft, or the car may be elevated on a runway.

The couplings are made either of pipe with the necessary slots cut in the ends, or a solid bar may be used, with sleeves pinned to the ends; the latter



For Temporary Use, the Automobile May, With Very Few Fittings, Be Applied to Drive a Circular Saw.

arrangement is the better, as the sleeves can be made somewhat larger than the bar and shafts, and thus, to some extent, compensate for lack of accurate alinement. For continued use, the pin in the engine shaft should be replaced with a larger one, and a slight enlargement of the hole in the frame may be necessary with some cars.—Popular Mechanics Magazine.

BIG VALUE OF WHEAT STRAW

Ton of Material Carries Large Amount of Nitrogen, Phosphoric Acid and Potash.

The average of many analyses shows a ton of wheat straw carries about 10 pounds of nitrogen, 2.6 pounds of phosphoric acid and 14.8 pounds of potash. This amount of plant food in the more available commercial forms would cost some $5.48, valuing nitrogen at 30 cents a pound, phosphoric acid at 10 cents and potash at 15 cents. From the standpoint of actual plantfood, then, it would appear that $8 will buy more than the wheat straw carries, and in a more readily available form. More labor will also be involved in handling the straw as proposed than in using the commercial fertilizers.

IMPROVE FOWLS EVERY YEAR

Man Breeding for Egg Production Should Pick Out Best Layers for Breeders.

The poultry raiser who does best is almost always the one who carefully and closely picks out each year only his choicest specimens and breeds from these exclusively. As a natural result, his flocks become better and better each year. By the same token, the man who is breeding for heavy egg-production should pick out his very best layers to be used exclusively as breeders, and in the course of a few generations the habit of prolificacy will become firmly established in this family.

Something to Think About

By F. A. WALKER

THE EARLY MORNING

THERE is an invisible, inspiring force in the early morning air, drifting down from the hills, sweet with the incense of the dawn, which vitalizes everything it touches, from the sod and the sea to the souls of humans.

It is the birth of a new day, opening its eyes like a new-born child to a new world. Every atom, every sphere and every creature is facing a threshold that has never been crossed.

The old quiverfuls of arrows have been shot away.

Time is handing out another supply, selecting the sharpest and strongest for the hardy hand of youth, and urging youth to do its best, pointing to the dazzling paths that lead up and up to Arcadia.

* * *

Are you, young man and young woman, giving proper heed to Time's friendly admonitions?

Do you in the early morning of your life realize the blessed privileges that are yours?

Do you comprehend that this is the hour in which you must begin your march over the hills by every bowery road, toward a loftier peak, which in your delightful dreams you are picturing of wealth, and power and fame?

If you do, gird your quiver securely, look carefully about you and march on to the uplands nearer heaven, holding firmly all the while to faith and hope and honor, as you go.

Let not the lure of the valleys, the shade of the trees nor the purring waters call you back, when the sun approaches the meridian, and the day waxes warm and drowsy.

And at high noon, when the inclination comes to seek relaxation, and to side-step into fields of idle amusements, mind that you do not slip and go tumbling down among the failures.

* * *

If such desire confront you, summon all your resolution, all the fine virtues that within you lie, and face the way to Arcadia, though the outlines of the golden domes of the city do not yet appear.

At this moment, you are at the turning point, when a single deviation from high resolve, a step or two from the course you have been so faithfully pursuing, may ruin your career and blast your fondest hopes.

By passing the noontime of life in safety, you will soon come upon an easier path, and find no difficulty in wending your way homeward, where the ring and the fatted calf will be found waiting for you, with the glad smiles of loving friends.

KIDDIES SIX

By Will M. Maupin

MY PRAYER

GOD, for the gladness of this day,
Grateful, I come tonight.
Through all the days to come, dear Lord,
Guide Thou my steps aright.

I thank Thee, God, for health and friends,
And strength to work with cheer;
Grant me refreshing sleep this night,
Free from all care and fear.

And may I awaken calmed, renewed,
And ready for the day;
Whether of sorrow or of joy,
Help me to keep Thy way.

Grant, Father, purity of heart,
And courage for the right;
Grant me the gift of cheer alway,
And favor in Thy sight.

Amen.

THE ROMANCE OF WORDS

"TAMMANY"

WHEN political reports state that such-and-such a person is the "Tammany candidate" or that "the Tammany organization is back of a certain move," the expression is understood to refer to a prominent organization in New York—but the fact that it receives its name from a noted Indian chief is overlooked.

Tamanend, the chief in question, was the ancient, wise and friendly head of the Delaware tribe of Indians who, for want of a better candidate, was "canonized" by the soldiers of the American Revolution as the patron saint of the new country. The Tammany organization dates from May 12, 1789, when it was formed for benevolent and social purposes, but eventually became an important political body, formally chartered in 1805 and opposing the so-called "aristocratic" Society of the Cincinnati. It was essentially anti-federalist or democratic in its character and its chief founder was William Mooney, an American upholsterer of Irish extraction. The grand sachem and the thirteen sachems typified the president and the governors of the thirteen original colonies.

The Tammany Society today is a charitable and social organization, entirely distinct from the general committee of the Tammany political body, which cannot use Tammany hall without the consent of the society.

HOME TOWN HELPS

GIVE THOUGHT TO THE BIRDS

New York Authority Urges Prospective Home Builders to Remember Feathered Friends.

Home owners, in planting trees, shrubs and vines, should take into consideration the idea of growing plants that will attract birds, according to Professor Alan F. Arnold of the New York State College of Forestry, who finds that there is a possibility of many of our native birds disappearing altogether for lack of food and shelter.

The list of trees, shrubs and vines attractive to birds includes many of our most ornamental plants. There is no more valuable evergreen tree for ornamental purposes than the native red cedar; it aso provides the best shelter and nesting sites for birds, while they find food in the berries and insects commonly found on the tree.

The native flowering dogwood and the Chinese flowering crabapple are two particularly beautiful trees that are favorites with the birds. The gray-stemmed dogwood, honeysuckle, American elder and sheepberry are also serviceable to the birds, and ornamental. The Virginia creeper, one of the most popular vines, furnishes nesting sites for birds and draws the attention of the birds away from grapes, apples and peaches.

"If one has a place where plants of a wilder sort can be introduced," said Professor Arnold, "and wishes to make a special point of attracting birds, there is a great variety of native plants that could not perhaps be used for more finished effects, but here would be just the thing."

CIVIC DUTY SHARED BY ALL

Cultivation and Spread of Public Spirit and of Patriotism Must Not Be Evaded.

Civic responsibility, when the qualifying age is reached, rests on all alike.

Furthermore, the notion of one's public duty has during the last few years broadened considerably. Young and old are learning that voting, though a serious and weighty affair, is but one small part of a citizen's duty.

A citizen's business is to mind the law and help to see that others mind it.

A citizen's business is to be a good neighbor, to pay his debts, to collaborate in works of neighborhood benefit, to assist effort for the general social welfare.

He has not done enough when he has made himself rich. He may build himself a home of great costliness and beauty. He may surround himself with the appurtenances of ease and leisure. These things are legitimate rewards of honest, earnest toil.

But if he is a good citizen, he cares not merely to have, but to share.

Children taught to be unselfish in their games and diligent in their studies have had their primary and fundamental lesson in citizenship.

The habits they acquire, of industry and generosity, will make them in maturer years beloved and respected, as examples of public spirit and of patriotism.—Philadelphia Ledger.

Beauty as Civic Asset.

If we want to draw self-supporting outsiders to the city as a place of residence, beauty attracts more quickly than anything else, asserts the Indianapolis News. A good many hold to the view that this argument applies only to the more wealthy districts. There is nothing more false than this. It applies equally to the working home districts. There are working home districts in this city which, if left alone, will remain beauty spots. The houses are set back from the sidewalk sufficiently to admit of flower beds and lawns, which in summer are most attractive. These districts should be protected by a zoning law that would not permit a grocery store or a garage to get into their midst.

Analysis of the situation will show that by spending a little money the taxable value of certain districts can be raised so it will cost the public nothing and a beauty spot will be added to the city.

Argument for Clean Streets.

We notice in the description of the New Jerusalem, as given us by St. John in Revelation, that there are streets, and it is very certain that these streets are perfectly clean and that it will be required of all who would be a dweller in eternity that they must be of cleanly habits.

We may depend that in the final day of reckoning that it will count heavily against people who make a practice of throwing paper or other refuse in the street or spitting in improper places, for it will be taken for granted that they would in like manner defile and litter up the city of our God and will not be wanted.—Cleveland Plain Dealer Correspondence.

Doing Well.

"I guess my daughter has taken a course in housework at college."

"Heh?"

"She writes that she is on the scrub team."

Genuine

BAYER

ASPIRIN

WARNING! Say "Bayer" when you buy Aspirin.

Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians over 22 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Accept only "Bayer" package which contains proper directions.

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

DISTEMPER AMONG HORSES Successfully Treated With

Spohn's Distemper Compound

At this time of year horses are liable to contract contagious diseases—DISTEMPER, INFLUENZA, COUGHS and COLDS. As a preventive against these, an occasional dose of "SPOHN'S" is marvelously effective. As a remedy for cases already suffering, "SPOHN'S" is equally effective. Give it as a preventive. Don't wait. 60 cents and $1.20 per bottle at drug stores.

SPOHN MEDICAL COMPANY GOSHEN, INDIANA

WHAT THE CHILDREN WANTED

One Might Think It Was Not Altogether Miss Willet's Golden Voice That Entranced Them.

An entertainment was being given in the village school. When the program was half over the faces of the scholars shone with agreeable anticipation, for the next item was to be a vocal solo by Miss Willet, who on many occasions had delighted the school with her singing.

Finally the chairman made the announcement: "I am very sorry to say, children, that Miss Willet has contracted a cold and will be unable to sing. She is willing, however, to recite a poem instead if you wish to hear it. Do you?"

Several heads in the rear of the room became grouped as if in earnest conversation. Then they evidently elected a spokesman. "Please, sir," said the boy, "if Miss Willet don't mind, we'd rather have her get up an' try to sing; and if her throat's too sore to make a noise she can make her funny faces while the pianner plays the tune."—London Tit-Bits.

True Sympathy.

MacTaggart, a canny Scot, went to a motion picture show and sat down on the hat of the man next him.

"Get up! You're on my hat! Why don't you look before you sit down?" agonizingly cried the hat's owner.

MacTaggart arose and picked up the hat. "Ah, well," he remarked gently, "it might have been worse."

"Worse!" exclaimed the wrathful one. "It's ruined, man! How could it possibly be worse?"

"It might have been my ain," answered MacTaggart thoughtfully.

To Clean Slender Vase.

To clean a slender flower vase fasten a piece of old sponge on a stick and push this down into the vase; this will also be useful for cleaning decanters and water bottles.

The World's Croesus.

Knicker—What is Uncle Sam's ratio?

Bocker—Dollars to doughnuts.—New York Sun.

Cole's Carbolisalve Quickly Relieves and heals burning, itching and torturing skin diseases. It instantly stops the pain of burns. Heals without scars. 30c and 60c. Ask your druggist, or send 30c to The J. W. Cole Co., Rockford, Ill., for a package.—Advertisement.

REASON IN THIS ARGUMENT

Also Miss Katie Might Have Discerned Something Sounding Suspiciously Like a Compliment.

A faithful old servant in a southern family has recently become a grandmother. "What does Libby call her new baby, Mandy?" the old woman was asked.

"She named her 'Gabrielle,' miss—after you."

"Why, the idea, Mandy. You know my name is not Gabrielle. You've called me 'Miss Katie' all your life."

"Yas'm, Miss Katie—dat I does. But when it comes to naming babies after folkses, it ain't what dey is called it is what dey is like dat you names 'em foh. You shorely is mo' like 'Miss Gabrielle' dan you is like 'Miss Katie,' jes, like Libby says."

Remembrance.

I once wrote a verse to my lady's eyebrow.

It was beautiful, a charming bit of poetic fancy. Everybody admired it.

Now, five years later, this little poem has grown enormously in value. My lady herself treasures it—a sort of memento, I suppose, because—

She has no eyebrow to speak of.—Wayside Tales.

Long-Distance Music.

A concert was recently heard thousands of miles away over the wireless. "Nothing new about that," comments J. B. M. waggishly; "here in Boston 20 years ago I heard a young lady singing 'In Old Madrid.'"—Boston Transcript.

SCHOOL DAYS

Uncommon Sense

By JOHN BLAKE

IF YOU DON'T KNOW—

IF YOU don't happen to know how to spell a word, consult the dictionary. The effort you make turning over the pages and hunting out the word will probably fix the spelling in your mind.

Ask some boy how it is spelled, and you will almost instantly forget it. Then next time you need to use the same word, you will have to ask again.

Any form of knowledge, if it is to remain with you, must be got with some effort.

The child whose parents answer all his questions as he is studying his lesson books usually fails in examinations, where there are no parents to ask.

If he had been compelled to look up the answers he would have remembered them.

If there is no other way to get information than by asking questions, ask them.

You could not, for example, find out a man's name without asking. But you could find his place of residence and his telephone number, and his business, by looking him up. And if necessary for you to know these things, that would be the only sensible way of learning them.

In the study of languages, pronunciation and idiom can be learned of teachers. But the grammar and the vocabulary must be dug out of books with painful effort. If you tried to learn vocabularies by asking the meaning of words you would make little progress in the language.

Ask questions when you have to, but remember that you are pretty sure to overestimate the number of times when this is necessary.

Remember, too, that in gaining knowledge in this way you take chances on other people's mistakes.

The safest and surest way is to go straight to the printed authority, study the answer to your question, reason out for yourself why it should be the answer, and then think it over a couple of times after that.

The kind of an education you get for yourself is like the kind of a fortune a man gets for himself. You know what it is worth, how hard it was to acquire, and you are very likely to keep it.

(Copyright.)

MOTHER'S COOK BOOK by Nellie Maxwell

The making of friends who are real friends, is the best token we have of a man's success in life.—Hale.

SMALL CAKES AND COOKIES

A COOKY that keeps well, and at the same time is rich and good, can be made of the following ingredients:

White Cookies.

Take one cupful each of butter and sugar, and when well creamed add two eggs, one-half cupful of cream or milk, add three teaspoonfuls of baking powder in flour to roll and a half teaspoonful of grated nutmeg. Set away to chill before rolling and bake in a quick oven.

Fruit Cake.

Take three eggs, one and one-half cupfuls of sugar, one cupful of shortening, two cupfuls of flour, one teaspoonful of soda dissolved in one-half cupful of boiling water, one large cupful of coconut, one pound of dates, cut fine, add one teaspoonful of salt and one-half teaspoonful each of lemon and vanilla. This makes 40 small cakes.

Ginger Cookies.

Take one and one-half cupfuls of shortening, one cupful of molasses, one cupful of sugar, two eggs, and a teaspoonful of soda dissolved in a scant cupful of boiling water. Add salt, ginger, cinnamon and cloves to taste. Let stand on ice to chill before rolling. Add flour as needed to roll.

Almond Macaroons.

Take one pound of sweet almonds blanched and pounded, two pounds of powdered sugar, the whites of seven eggs, two tablespoonfuls of rose water. Beat the whites of the eggs until stiff, fold in the sugar and add the flavoring. Drop by spoonfuls on buttered paper and bake in a moderate oven until a golden brown.

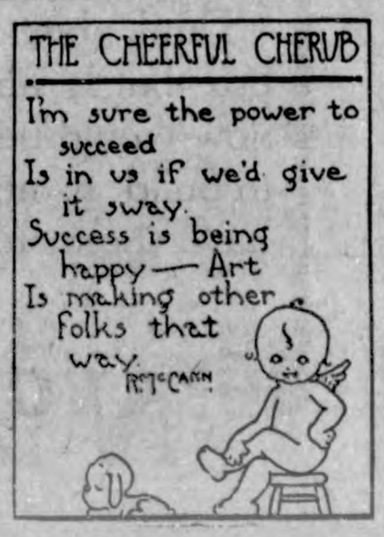
THE CHEERFUL CHERUB



YOUR HAND

How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm.

THE FINGER NAILS

THERE is much that can be gained from a detailed study of the finger nails, nature's protection for the tips of the fingers. In fact, in ancient times certain soothsayers professed to be able to read a person's entire past, present and future from a study of the finger nails.

If the nails are short, broad rather than long, and the skin grows far up on them, you may read in them a strong personality, but with a tendency toward too much criticism of others. The possessor will seek to dominate and control in circumstances affecting himself and his surroundings. He will be, often, a person hard to get along with. The type has its good points, of course; among them are order and regularity. If the nails described occur on spatulate fingers—that is, fingers which broaden at the end or tip—and the thumb is short, the owner, man or woman, will have a passion for tidying up, arranging and rearranging his or her surroundings, seeking always to attain the perfecting of orderliness.

(Copyright.)

Many ambitious men and women live only half a life—and don't know it

No person whose nerves are continually irritated, whose appetite and digestion are disturbed, or who doesn't sleep well has more than half his normal chance for success in life. For weakness, debility, anemia and general lack of tone are a serious handicap to anybody.

Those who drink tea or coffee are often sufferers from these conditions. Tea and coffee contain caffeine, a substance which has a decided stimulant action on the nerves and brain cells.

Each cup of strong coffee contains about as large a dose of caffeine as your doctor would ordinarily give to a very sick person.

You can readily see that the effect of giving this stimulant regularly to a well person might finally have a tendency to make him sick.

If you want to avoid a very common cause of irritation and enjoy restful sleep, good digestion, and all the feeling of vigor and robust endurance that comes to healthy, normal people, quit tea and coffee, and drink Postum, instead. It is a rich, coffee-like cereal beverage—perfectly delicious!

Order Postum from your grocer today. Drink this fragrant, aromatic beverage and see how much better you'll feel—able to do more without becoming fatigued—as thousands have discovered for themselves.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes. Sold by all grocers.

Postum *for* Health

State News Briefs

Gus Evers, 50 of Cherokee, bachelor, committed suicide for no reason.

There is a persistent rumor that the general offices will be moved to Ottumwa from Burlington.

John Tucker and Matthew Miller have been bound over on a charge of murderous assault on Earl Montz at Gifford.

The Town of Lake City was in darkness recently because the electric company and the council cannot agree on terms.

Defective chimney caused a fire which destroyed one of the stock barns at Iowa State College recently with a $2200 loss.

A fund to be loaned to students at Iowa City will be raised by weekly dances, the prices for dancing will be cut down to 75 cents the evening instead of $1.25.

Crazed from drinking moonshine liquor, Harry Kelly of Davenport committed suicide recently. He shot himself through the heart. Kelly was 35 years old and leaves a wife.

F. R. Davis on a trial at Mt. Ayr pleaded guilty of having burglar tool in his possession and go fifteen year Two others already have the same sentence. The fourth of the quartet will stand trial.

Thomas D. Feyen, 71 years old was instantly killed in a fall from a second story window at his home in Dubuque. He died from a skull fracture and without regaining consciousness after the accident.

Andrew Anderson of Hampton, charged with the theft of a number hides and an ettempt to dispose of them at Mason City, failed to appear at the hearing and his cash bond of $350 was forfeited.

Rushing homeward to show his mother a new pair of overshoes his teacher had bought for him, Orville Selby, 8 years old of Sioux City was caught by a swift moving street car he had not noticed and literally ground to pieces beneath its wheels.

As a result of getting tangled up in the belt which was running the wood saw, Mr. Jacob Miller of Jefferson, had his right foot torn off. The accident happened at the home of Roscoe Bennet, southeast of Jefferson whom Mr. Miller was assisiting in cutting some logs in the timber.

Aerial Mail Service.

Ecuador and Nicaragua are establishing aerial mail service, and in China 40 planes are operating 800 miles from Shanghai to Peking, according to the Nation's Business. Passengers and parcels are carried as well as postal matter and on letters thus delivered in Old Cathay are stamps bearing by way of fitting contrast a pictured airplane beside a picture of the Great Wall.

..A Brand New Feature..

: Old Time News Of Yourself and Friends of By Gone Days :

To be run each week in the Times

Twenty-five Years Ago This Week

Thursday, Jan. 21, 1897
Griswold & Cline, Publishers

The Advent Meetings have closed.

Sheriff Dickerson was in town Friday.

H. T. Walensky got the gold watch at Gruetzmachers. 44 was the lucky number.

Wm. Fuller went to Buffalo Center Tuesday evening for a short visit with his parents.

Miss Ella Arnold left for Mason City Thursday to make a visit with her sister Mrs. Lawrence Larson.

A. B. Schafer had every tooth extracted by Dr. Harkison of Garner, who will make a complete set as soon as the gums are healed.

Married-At the German M. E. parsonage Tuesday, Jan. 10th, Mr. Albert Neeman and Miss Borges, residents of Twin Lakes Twp. Rev. Heifner officiated.

Hans Nissen and wife drove to Goodell Monday evening, taking the editor and family, and Miss Skow along. all attending the second Quarterly Conference. Presiding Elder Yetter, delivered a very interesting sermon, after which the business was attended to.

Twenty Years Ago This Week

Thursday, Jan. 23, 1902
S. L. Sage & A. C. Flint, Publishers

Sleighs and sleigh bells are in fashion oncce more.

It is reported that A. Schurz, who returned from Illinois this week brought his wife with him.

The Titonka Topic was three years old last week. For a three-year-old the Topic is indeeed a spry one.

A pleasent surprise party was given to Miss Gracie and Master Floyd Lau, Tuesday evening by their parnumber of little ones were present ents, Mr. and Mrs. Chris Lau. A and all had an enjoyable time.

The Klemme Fire company got out their apparatus last Thursday afternoon and took a few practice spurts up the pavements on main street, to try their skill at speed and also to see how their pump works, as they now have it fastened on a platform an trucks. The boys say their experiment was satisfactory

Progress in New Guinea.

It is 13 years ago that Zahn of the Evangelical Lutheran synod went to New Guinea and began his work among the natives, who were then largely heathen. There were many cannibals in the territory. A letter recently received from Morobe, shows wonderful spiritual progress. A large proportion of the islanders have renounced heathenism and given up their instruments of witchcraft. It is estimated that 8,000 of them have been received into the Christian church.

Ten Years Ago This Week

Thursday, Jan. 25th. 1912
Allen C. Flint, Publisher

A little daughter arrived at the Fred Walker home last week.

August Baack is staying with his brother Otto this year and attending school.

Clarence Arnold has had his farm of 480 acres, near Klemme, registered under the name of "The Pine Knoll Stock Farm."

Jesse Krouse, relief agent on the Rock Island, was here a few days the past week visiting at the home of his sister, Mrs. T. F. Mitchell.

Joe Johnson and Herman Priebe each shipped a car of cattle, and W. R. Bloom and Herman Miller each a car of hogs this week.

Two of our Klemme young men are so hard to awaken in the orning that it takes three alarm clocks to get them up before nine o'clock. Sam and Tony may not believe this, but it is true.

It is reported that "Bally" was a visitor to Garner Sunday. Nothing particular strange about that, only it was rumored that he started for Thompson to visit a friend and the train only run as far as Garner. So "Bally" waited in Garner two or three hours and then returned home.

WATCH YOUR POTATO SEED

Hot Summer of 1921 Made Local Seed Drop in Vitality So That Seed is of Poor Grade

Seed potatoes for Iowa growers for 1922 will require considerable watching, according to C. L. Fitch, of the truck crops department of Iowa State College, who estimates that any one desiring to get a good crop o fearly potatoes this season will have to import a new supply of seed potatoes from northern sections. During the season of 1921 the hot summer deteriorated the home grown seed to such an extent that if it is used there is danger of losing about one-fourth of the state's crop.

According to Mr. Fitch there are grown in the state about 75,000 acres of early Ohios. This particular variety was damaged the greatest so that in planting this variety a new crop of seed ought to be secured. With Rural New Yorkers and Cobblers the damage was not so great so that the seed from stock secured from northern areas a year ago will all right to use.

However, unless an exceptionally good crop was secured last summer, it will pay the grower of potatoes to get new seed.

Mr. Fitch estimates that there are about 100,000 acres of potatoes grown annually in Iowa and if this acreage and if this area is planted this year with carefully selected seed a saving of at least one-fourth of the crop will be effected. If a good supply of seed is secured from last years crop it will pay any grower to get enough new seed stock this year to raise seed for another season so that in case of another bad season there will be plenty of seed on hand.

ALLOW BROOD SOWS TO EXERCISE

Will Keep Them In Better Shape for Spring Farrowing

To produce the best litter of pigs brood sows require plenty of exercise during the winter months. According to the animal husbandry department at Iowa State College many sows become inactive in winter and as result are constipated due to lack of exercise. They do not like to leave warm quarters and unless they are mand to, trouble will result. This is easily accomplished by feeding them away from their quarters and forcing them out in order to get water and food.

Proper rfeeding will also make the litter stronger. Sows need not to be fat for breeding. They should be fed a liberal amount of protien along with a little corn. Good clover hay and alfalfa along with a liberal supply of minerals such as salt, lime nd wood ashes are essential in the production of strong litters as these will build bone.

AMERICA NOT A SANTA CLAUS

For reasons of enlightened self-interest the United States is interested that Europe get on its feet. Depreciation currency, international debts, balanced national budgets, economics in armaments, freer trade—all these matters effect the well being of the corn and wheat and cattle and cotton farmer, as well as of the American manufacturer.

Yet it is questionable whether such a conference should be called by the United States as has been proposed in Congress. There are several counties that would regard such a move as an indication that America is ready to play Santa Claus. That would be demoralizing. The world needs to get down to brass tacks. It cannot be saved by philanthropy.

Europe needs radical remedies. But is is primarily Europes problem. It would be well to wait and see what Europeans have to offer, what sacrifices they are willing to make, and then to consider what America can do.

A Real Number.

"Of all the nerve I ever saw, Miss Upstart has the most complete supply! She seems to think her newly-acquired wealth will take her anywhere!" said a disgruntled acquaintance of the lady.

"Well, it has taken her into the exclusive Country club, anyway, I hear," said another.

"Yes, but that is not the limit of her ambitions, by any means. I heard her bragging at luncheon that she thought she would send in her application to join the League of Nations!"

New Type of X-Ray Apparatus.

The West London hospital announces the possession of a new Roentgen-ray apparatus, the design of a Bavarian roentgenologist, and the only one in England which makes use of rays of a wave length not hitherto employed. The current is of a voltage greater than 200,000. It is expected that with this new apparatus double the number of cures of cancer possible in the past will be obtained. The tube gives the highest penetration yet achieved.

Pals.

Ethel, age seven, had disobeyed her mother, and as a result was severely spanked. After the girl had had her "cry," she walked into the next room where her mother was sitting, threw her arms around her and said:

"Mother, you and I are pals; we don't care anything about spankin', do we?" And mother could not restrain a smile.

GOVERNMENT "BENCH MARKS" BASES OF LOCAL SURVEY

Washington, Jan. 26.—Have you a bench mark in your town. It so, do you know its meaning and who placed it there?

The "bench mark" is the trade mark of the United States Coast and Geodetic Survey, the oldest scientific government bureau to be organized in the United States. It was created during the administration of President Jefferson. The "bench mark" which is usually found in every town of any size, is a wetal plate or tablet embedded in some landmark, masonry of soe building or in a rock or boulder of soe size which is fixed in its location. The "bench mark" is distinguished by two crossed lines in the center of a metal plate. In the government records, as well as in the records of local engineering offices, the altitude above sea level and the latitude and langitude of this mark are officially recorded.

These "bench marks" are the basis of local engineering,—laying out tracts of land and surveying farms and city lots. These were placed by engineers from the United States Coast and Geodetic Survey during the pioneer days of practically all real estate, either rural or urban. are defined from measurements which stated from "benc!

I cannot perscribe the cure, but much of the unrest of the world today is changeable to our living too rapidly and too extravagantly.—President Harding.

Pertinent Inquiry.

The newest member of Miss Jones' Sunday school class was a lad whose frankness was equal to his curiosity in many matters.

On one occasion Miss Jones' made a few remarks touching untruthfulness and earnestly endeavored to impress her charges with the necessity of being truthful at all times and under all circumstances.

Now the new pupil appeared to be intensely interested in Miss Jones' remarks, and, after due reflection, put this query to her:

"What I'd like to know, ma'am," he said, "is it a lie if nobody ever knows?"—Milwaukee Sentinel.

COUNTRY TOWNS IN WINTER

City visitors ni rural communities often express the opinion that these towns would be pleasent places for residence in the summer, but would be terrible isolated and lonely in the winter. Yet if they came out and spent a winter in a lot of these small towns, they would find more social life than in a hustling city.

Many country towns where folks the friendly and social have something doing about every night. People will complain that they have no evenings to themselves, and if some unusual event is to occur, it is hard to find an evening when some society is not having a meeting.

Meanwhile in the cities where people live their own lives, there is nothing doing in a social way except for the narrow element of people called "society." Folks who are not in the Four Hundred have to stay at home or go to shows, and they soon get tired of the latter.

Painting
Paper-hanging

At Pre-War Prices

I am ready to do your painting, paper hanging or any other interior decorating or finishing at actual

PRE--WAR--PRICE

You can save money by having your painting and paper hanging done NOW before the spring rush comes on—you need it done and I need the money, so let's figure on it NOW.

I absoiutely Guarantee all my work to be high class and satisfactory to you—or no pay.

For Recorder

I hereby announce myself a candidate for the office of County Recorder, subject to the decision of the voters at the June 5th, 1922, Primaries. Oscar H. Wenck. tf.

For Recorder

I hereby announce myself a candidate for the office of Recorder of Hancock County, subject to the decision of the Republican voters at the June, 1922 primary. Mrs. Clarissa Abel. tf

FOR AUDITOR

I am a candidate for re-election subject to the decision of the voters at the Republican primary election held in June 1922.

Chris Jacobs

FOR REPRESENTATIVE

I hereby announce myself a candidate for re-election to the office of Representative of Hancock County Iowa, subject to the decision of the Republican primaries to be held June 5th, 1922.

E. P. Healy

Strat an Inventory

Now is a good time to take an inven of the farm, say the agricultural econimics experts at Iowa State College. List all the available implements and strat the year on a business basis.

A ready letter writer is often just as ready a trouble maker.

Every time you fall down on your job it is harder to pick yourself up on the next one.

ABOUT KLEMME PEOPLE

Jacobs sells the Mellote Cream Separator. 1wc

Emil Lau will hold a bred sow sale at his farm on the 17th of February.

Miss Caroline Smid left Monday ofr Mason City where she has a position.

M. O. Hocum left Tuesday for Ft. Dodge to attend the annual Grain Deslers Convention.

A fine baby boy came to the home of Mr. and Mrs. Georg Schoenwetter Sunday. All are reported fine.

Miss Marian Luick, of Belmond, is visiting here at the home of Mrs. Millie Smith this week

Messrs. Marlin Croner and Wes Schuldt were at Garner on business Monday.

Mrs. Herman Bridges is enjoying a visit from her parents from Dows, Iowa, this week.

Miss Anna Griewe went to Reinbeck, Iowa, last Friday for a visit at the home of a relative.

Mrs. Leo Wilkins and children went to Meservey Friday for a few days visit.

Mrs. Ed. Bachman and children returned to Goodell Monday after a visit of several days with relatives in this city.

Mr. and Mrs. Mart Bachman are rejoicing over the arrival of a fine baby girl who arrived at their home last Friday.

Ed. G. Ell and Elmer Fuller left Monday on a business trip to Minnesota. Theh former went to Mankato nad the latter to Dexter.

Mellotte Cream Separators are for sale in Klemme at Jacobs & Son. 1

A fine baby boy arrived at the home of Mr. and Mrs. Frank Sandry one day last week. Frank is stepping them off high now and is all smiles.

Rev. and Mrs. A. A. Depping left last week Wednesday for Baxter, Ia., being called there by the illness of Mrs. Depping's father.

Mrs. A. Kirkwood stopped at this city Monday on her way home to Goodell from Crystal Lake where she had been visiting with her brother and family.

Tuesday morning was perhaps the coldest day we have had this winter. The thermometer registered twenty two degrees below the zero mark at seven A. M. That spell of California weather was all a pipe dream.

The Northern Lumber Co. has become quite an athletic center of late. Those who like the sport of boxing can usually find plenty of worthy opponents there each evening who are becoming handy with the gloves.

Mr. and Mrs. Will Hoest and Mr. and Mrs. Charlie Hoest and son, of near Miller, were visiting with Miss Esther Yahnke at the A. G. Koerner home here Sunday afternoon and evening.

Klemme bachelors, who are matrimonially inclined, should pause and think the proposition over before attempting to take the "fatal step." A look in Wellemeyer's store window on the left will convince most bachelors.

We do not like to tell secrets but we are just wondering if Vern Smith rented the rooms over the F. Gruetzmacher store for the purpose of strating a bachelor apartment, or is he going to——well we won't say any more about it just at present.

A number of the young people about town and vicinity had a charivari on Mr. and Mrs. Harold Leitzinger last Thursday evening. The discordant music was followed by the groom setting up the treats to the noisy music makers.

We are pleased to report this week that Mrs. Everett Amey is improving rapidly and she is able to sit up in bed a little each day. She had been critically ill following an operation for appendicitis after which gangrene set in. Her many friends are glad to hear that she will recover now.

BASKET SOCIAL

There will be a League and Basket Social at the Liberty Twp. church Thursday evening, Feb. 2nd. Everybody Come—ladies bring baskets.

KLEMME MARKETS

Pigs, 125lb.	$8.00

NORTH ELEVATOR

Avery Township News

Mrs. Ed Bachman and two children are visiting with Mrs. Leo Wilkins.

Fred Bell was a caller at the Dentist's office at Garner last Thursday afternoon between trains.

Mrs Nettie Roths. teacher of the Avery No. 2 School has been staying at the Frank Roths home for the past two weeks.

Mr. and Mrs. Martin Jenson and children were Sunday visitors at the home of Mr. and Mrs. Wm. Bell. and family.

Mr. and Mrs. John Bachman entertained a few of their friends to a party Saturday night. All present report a good time.

Herbert Marshall, who was operated on at Mason City some few weeks ago returner home last week, and is reported getting along nicely.

GOODELL NEWS ITEMS

Clara Johnson was a Belmond caller Friday.

A large crowd attended the lecture course Tuesday evening.

Mamie Costello of Forest City visited at the home of Tom Hamilton Friday and Saturday.

Elias Hetland is reported as being very ill with pneumonia at this writing.

The Hoot Owls enjoyed a party at the Ed Bachman home last Friday night.

A meeting at which Prof. Swain of the Iowa Extension Division spoke on consolidation was held Wednesday in the school house.

Halleye Kitz returned to her home in Fairbault Minnesota, after visiting for some weeks with friends in Goodell.

Mamie McNulty accompanied her father to Chicago Monday where he will remain for an indefinite lenght of time taking treatments.

Pat Quigley died at the home of his son Frank, Thursday morning following an illness of pneumonia. Mr. Quigley was well known around here and will be greatly missed by all who knew him.

GOODELL HIGH SCHOOL NOTES

Adeliade Engeseth was absent from school Wednesday.

The Klemme Basket ball teams played our teams last Friday night. Two very good games were played especially the girls. The Klemme girls played very well for beginners but they have the same trouble that Goodell first had when they began to play and that is. overguarding and traveling with the ball. The scores stood 8 to 12 in favor of our girls, who proved a little too much for the Klemme team, had our forwards been ore accurate in making free throws, the scores would have piled up faster—for our team, our guards done excellent team work, and our jumping center served us very well, considering that she had not practiced. Our real jumping center did not play. The Goodell girls have proven that they have the real stuff in their team and all they need is a little real good practicing. The boys also played a good game but the Klemme boys were a little too much for them. The score for the boys was 7 to 11 in favor of Klemme. A return game will be played Friday night. Drive to Klemme and see these games on Friday night. January 27th.

Harold Savague was absent Thursday.

An accuracy test was given Tuesday afternoon in which so any questions were to be answered in 5 minutes.

Nearly all the High School pupils attended the Lecture Course Tuesday night, finding it very interesting.

Having finished studying the Restoration Period in American Literature an examination covering the 1st part of the book was taken Friday.

Halleye Kitz of Fairbault Minn. visited school Tuesday morning.

IS YOUR CLOVER SEED PURE

Iowa State College Will Test it for You Free of Charge

Farmers who have decided to plant more clover and soy beans or other forage crops may take advantage of the offer made by the farm crops department of Iowa State College and have their seed tested free of charge.

The department will test all samples of seed sent in and will send back a completed report of the analysis showing the percent germination and purity.

By purity is meant the proportion of abnoxious weed seed found in the sample. In case of alsike clover particularly, all growers should take proper precautions to prevent the well known Canada Thistle from entering their territory. Canada thistle is frequently found in alsike clover seed.

Other weed seeds are often found present in forage crops are sour dock, buckhorn and sheep sorrell, all obnoxious weeds of disagreeable tendencies to unsurp the rightful place of the crop.

Samples for analysis should be carefuly enclosed in a package and addressed to the farm Crops Department. Iowa State College, Ames Iowa

If you haven't learned that a dollar put away to day is worth a dollar and six cents a year from today, you are morally certain to end your days in the poor house or as a penniless dependent upon somebody that doesn't want you around but has to keep you for fear the neighbors will talk.

MOTHERS AND DAUGHTERS

Read This Letter from Mrs. W. S. Hughes

Greenville, Del.—"I was under the impression that my eldest daughter had some internal trouble as ever since the first time her sickness appeared she had to go to bed and even had to quit school once for a week. I always take Lydia E. Pinkham's Vegetable Compound myself so I gave it to her and she has received great benefit from it. You can use this letter for a testimonial if you wish, as I cannot say too much about what your medicine has done for me and for my daughter."—Mrs. WM. S. HUGHES, Greenville, Delaware.

Mothers and oftentimes grandmothers have taken and have learned the value of Lydia E. Pinkham's Vegetable Compound. So they recommend the medicine to others.

The best test of any medicine is what it has done for others. For nearly fifty years we have published letters from mothers, daughters, and women, young and old, recommending the Vegetable Compound. They know what it did for them and are glad to tell others. In your own neighborhood are women who know of its great value.

Mothers—daughters, why not try it?

BETTER DEAD

MR. FOX'S NEW SUIT

"I REALLY must have a new suit of clothes," said Mr. Fox, one morning to his wife, "and while I am about it I may as well have a stylish one. I noticed in the fashions that they were wearing the trousers tighter."

"You can't get about very well in tight pants," said Mrs. Fox, "and goodness knows that you are slow enough now about getting food for the family. You better think a little more about work and less about style."

But in spite of all of Mrs. Fox's good advice Mr. Fox got a new suit, and had it made tight-fitting.

"You better put on your old suit of clothes tonight," said Mrs. Fox, as her husband started off with the market basket on his arm. "You know that

Mr. Dog up at the hill farm is a very restless sleeper and if he should chase you he might catch you with those tight clothes on."

"I guess I can jump and run faster than lazy old Mr. Dog, even if I am dressed up," replied Mr. Fox, as he slammed the door behind him, for he was tired of hearing so much about his stylish clothes.

As he walked along in the moonlight Mr. Fox looked at his fine-looking shadow and forgot all about his anger, or even about Mr. Dog, and, while he was careful not to tear his clothes, he jumped lightly over the wall and went to the poultry-house.

He soon had two plump birds in his basket and over the wall he sprang and started for home, but he had gone only a little way when he heard a bark behind him and, looking around, he saw Mr. Dog in full run coming after him.

Right in front of Mr. Fox was a high rail fence, and for this he ran, feeling sure that he could easily escape Mr. Dog by leaping over it and running home through the woods before Mr. Dog could crawl under.

But, oh, how little he reckoned on those new clothes. He forgot he had them on, now he was in danger, but he reached the fence and made the leap and but for a rail that stuck up where they were crossed to hold the fence he might have escaped.

Yes, Mr. Fox leaped, but he did not go over. Instead, he caught by the seat of those new trousers and hung there above the head of Mr. Dog, who by this time had reached the scene and was barking loudly.

Of course, Mr. Fox dropped the basket and the birds were crying loudly as they ran for home, and every second Mr. Fox felt sure the farmer would appear with a gun and he would never see his home and family again.

He jerked and he wiggled and at last the cloth gave way and, luckily, he fell on top of Mr. Dog and knocked him over, and while he was scrambling to his feet Mr. Fox lost no time, you may be sure, in running home.

When Mrs. Fox saw him with the torn trousers and no basket she was very angry, but she did not say a word. She just took those new trousers, put a big patch of red flannel on the torn part, and when her husband saw that he put on his old ones and never again wore tight pants.

When he goes out at night now he wears a pair that are large enough for him to make a wide leap and not get caught on rail fences.

Lady Diana Duff-Cooper

Lady Diana Duff-Cooper, formerly Lady Diana Manners, daughter of the duke and duchess of Rutland, has long been known as England's most beautiful woman. She was the first British woman of title to enter the "movies." She recently completed her first work as a film actress in a large production in natural colors.

WHY—

DO OUR EYES "SPARKLE" WHEN WE ARE HAPPY?

THE term "sparkling," as generally employed, is equivalent to "bright" or "glistening" and the latter synonym provides the key to the question as to why people's eyes sparkle when they are merry.

There is some nervous reaction between the feeling of merriment or joy which makes one's eyelids move up and down more rapidly than usual. This movement of the eyelid causes a tiny drop of tear-liquid to spread over the ball of the eye, precisely what occurs every time we wink, thus washing the eyeball clean and leaving upon it a film of moisture which naturally glistens or sparkles in the light. The statement that a person's "eyes sparkle" is, therefore, not strictly true. It is not the eye, but the coating of liquid over it, which causes the reflection of light and produces the impression of brightness.

IN THE STREET CAR

Travelers must be content.—Shakespeare.

DOES the well bred man always give his seat to a woman in the street car? This is a question that often comes up for discussion. Now although in New York and some other large northern cities a good many men who are considered to be well bred do not make a constant practice of getting up for a woman who is standing it is generally regarded as an essential of the well bred man, that is, unless because of age or infirmity he is not well able to do so. When a man does not perform this act of courtesy it is sometimes because he does not notice that women are standing or because in a crowded car he feels that he would inconvenience more persons by attracting the attention of the ones who are standing.

When you do give your seat to a woman you should invariably do so with an air of courtesy. You should raise the hat slightly and say: "Won't you take my seat, madam?" This is the conventional, formal thing to say and really the simple act of offering a woman your seat does not entitle you to any further comment than that.

In entering a car it is usual for men to permit women to precede them but in crowded cities where traffic congestions are intense it is usually conducive of less disturbance if you simply enter the car in the order of your position. In getting out of a crowded car, while a man precedes the woman he is accompanying so that he can help her to alight, he makes no effort to do this for the other women present. However if a feeble or aged woman is alighting from the car he does not hesitate to assist her in alighting. Having performed this little courtesy he raises his hat as she thanks him.

The courteous person does not go his way through the street cars and other public conveyances without keeping his eyes open, for if one attempts to go about entirely taken up with one's own thoughts one is sure to be a very annoying traveling companion.

If you have a wet umbrella you must take care that it does not drip against someone else. If you have a suitcase or other sort of luggage be sure that it is as little annoyance to others as is possible. If you see two persons enter the car when there is a vacant seat beside you and another somewhere else in the car it is courteous to change your seat so that the two friends may be seated next to each other. One woman would do that for two other women or possibly for a man and a woman together if they were obviously engaged in conversation. A man would always do it for two women or a man and a woman for two men. Usually, however, a woman would not thus change seats with two men.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel.

VIRGINIA

THE real origin of Virginia is curious and somewhat unexpected. It means "flourishing" and comes from an old Latin gens who called themselves Verginius. Their name was derived in turn from vireo, meaning to flourish, and was connected to the word "ver," translated as spring. Virginio was the name of the far-famed Orsini family.

The more popular and prevalent belief regarding the origin of Virginia has always been that she came from the Latin virgo, meaning "a virgin." Indeed, the first instance of her use in England was in the time of Queen Elizabeth when Sir Walter Raleigh, named his American colony Virginia in honor of the Virgin Queen.

It was under a similar belief that Bernadin de St. Pierce called the heroine of his tropical Arcadian romance, Virginie. The widespread popularity of this story in England, France and Germany brought Virginia into enormous vogue throughout Europe. France still adores Virginie, and her popularity is assured forever out of sentimental memory of the famous queen.

The first American colony established the name in this country. Likewise the first white child born on American soil, and named Virginia Dare did much to spread its vogue. The South has always abounded in Virginias, which, unfortunately, has been contracted to unmusical "Virgies" and "Jinnys."

The emerald is Virginia's talismanic stone. It promises her wisdom, prophetic vision, long youth and charm. The hawthorne bud, England's spring flower, is Virginia's flower. Wednesday is her lucky day and three her lucky number.

There is an enormous number of people who will be sociable, if you will begin it.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease.

Dr. Kilmer's Swamp Root is on sale at all drug stores in bottles of two sizes, medium and large. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper. Advertisement.

Plan to Cut Corn Acreage

Agreement Made by Farmers to Reduce Supply Because of Low Prices.

LAST YEAR'S CROP IS UNSOLD

One Nebraska Farmer Shipped Carload of Corn to Montana, Paid Freight Bill of $416.58 and Collected $416.52.

The proposal to curtail corn acreage in the West in 1922 is likely to affect the price of food before the end of the year. The entire country is heavily interested because if successful, it means an increase in the cost of corn and meat, with a resultant and sympathetic increase in the price of wheat and bread. Nebraska is not the only state in which the movement is gaining ground. Iowa, Kansas, Missouri, Illinois, South Dakota and all the states of the great "Bread Basket" are moving in the same direction. Signs are plentiful throughout the Middle West that far less corn than usual will be planted unless there is an immediate and considerable increase in the price of that cereal.

Most farmers recognize that the price of corn is not due to any combination of capital or a "conspiracy," but is governed solely because of the law of supply and demand and they are preparing to cut the supply.

Farmer Is Stung.

Nebraska farmers are getting about 17 cents for their corn. Farmers in states closer to markets are getting a cent or two more. Two weeks ago a farmer near Broken Bow, Neb., shipped a carload of corn to Billings, Mont. The freight was $416.58. The selling price in Billings was $416.52. The farmer paid the difference, six cents. He had provided the land and seed, planted and worked the corn, gathered and shucked it, hauled it to the railroad station and then paid out six cents for all his trouble.

All over the corn belt the farmers are having similar experiences.

The executive committee of the Illinois Agricultural association has recommended to the Illinois farmers that they cut the acreage they will plant in corn for 1922. Illinois is the second largest corn producing state in the country.

A special committee from the state farm bureau federations of Iowa, Indiana, Kansas and Missouri has advised similar action. Iowa is the heaviest corn producing state in America. Missouri, also, is close to the top. Indiana is not far away. The Kansas corn crop is second only to the Kansas wheat crop.

Thousands of farmers in the corn belt states still have on hand the corn they raised in 1921. They have refused to sell at the low prices. Recent action of the War Finance corporation is permitting them to hold on to the corn already in their bins. These farmers, in thousands of cases, are preparing not to produce crops in 1922, but to hold their present grain for the increase in price which must inevitably follow if the production is cut.

Will Reduce Acreage.

One big land company has 5,000 acres of land at Herman, Neb. Ordinarily, this company plants 2,000 acres to corn every year. Here is what one of the owners of the company, as well as owner of the Omaha Bee and one of the most prominent business men in this state has to say:

"There is no doubt that if corn is not up to the cost of production in the coming year, in a systematic or an individual way farmers will decide not to plant it. On our 5,000-acre farm, not an acre of corn will be planted unless the price goes up to meet the cost of raising a crop. We have notified the manager to summer fallow the 2,000 acres of corn land if prices are not up to cost. It is better that the land should rest than that it be worn out growing a crop that does not pay out.

"The surest way to prevent the price of corn from being unduly depressed, is to reduce the acreage. If the farmers can get more by not farming than they can get by farming, the choce is easy."

The Illinois Agricultural association has issued a statement to the effect that by cutting production farmers will be doing only what manufacturers in all other lines do—shaping the supply to meet the demand. That is the answer Middle Western farmers are preparing to give to the question as to what is to be done to save agriculture.

Man's Finger Will Replace Lost Nose

Michael Feighley of Rohersville, Md., whose nose was cut off when the windshield of his automobile shattered and cut his face, will have his little finger grafted on in place of the missing member. After the finger grows fast to Feighley's face it will be amputated from his hand.

OFFICIALLY REPORTED "DEAD"

Several Installments of War Risk Insurance Paid to Family—Now Everything Possible Is Being Done to Correct Record.

San Antonio, Texas.—America's greatest woman World war hero, Miss Alene E. Frawley, who has been wounded and shot, buried alive and bombed, and carries seventeen wound stripes on her coat sleeve, now is facing what she calls the toughest job of all—that of proving to the world that she is still alive!

And all this because, following the bombing of an emergency hospital in the trenches at Chateau Thierry, she was officially reported "dead" in the government war casualty records.

"A. E. F."—that's what the boys "over there" called her, because of her initials—headed for France two months after the United States entered the war. She joined up with the Ninetieth division as a member of the United States army nurse corps.

Survives Hospital Blast.

Then things began to happen rapidly. Wound stripe after wound stripe went on her sleeve. At Tours a hospital was blown up. All but two persons in the building were killed. She was one of the two. In another case a piece of shrapnel broke her finger, caromed and killed a man.

Fourteen other wounds came, all while she was on the front, and then the "fatal" blast when the trench hospital was blown to pieces. "Killed in action" was the report after her name.

In the meantime American soldiers dug her out of the ruins and took her to a hospital, where she remained unconscious for twenty-seven days. A year and eight months later she left the hospital and was sent to the Walter Reed General hospital at Washington. Miss Frawley's mother and her step-father had long believed her dead. Several installments of her war risk insurance had been paid to the family.

Then came a telegram stating that Miss Frawley's "body" was being sent to the hospital. Wondering why a "body" would be sent to a hospital, the parents went to Washington, where they found Miss Frawley alive but feeble.

Shortly after Miss Frawley was taken to San Antonio to recuperate in a cottage just outside the military reservation of Fort Sam Houston. At that time she weighed 86 pounds and was able to walk only on crutches.

Today she weighs 162 and has discarded one of the crutches.

Fighting to Change Records.

And, in the meantime, everything is being done to blot out the record that she was "killed in action." Mrs. Frawley has made affidavits that Miss Alene E. Frawley is her daughter and not an impostor and the wheels are beginning to turn that will straighten out the mixup, Miss Frawley believes.

Miss Frawley was born near Rochester, N. Y. Her own father was a doctor and her mother was a trained nurse. Before going to Europe Miss Frawley had served as nurse in the Philippines, China, Hawaii and in Panama.

Besides her seventeen wound stripes this greatest woman hero wears a distinguished service cross, the French croix de guerre and many other lesser decorations.

Bounty Better Than Trapping.

Superior, Wis.—Charles Baldwin, town of Superior, has trapped 12 wolves this year and received $240 in bounties. He is laughing at fur trappers, who have had a poor year.

Machine That Predicts the Tides

This machine, possessed by the coast and geodetic survey in Washington, predicts the tides in any body of water in the United States from two or three years in advance. The machine not only records the year, but the month, day, hour and minute of either high or low tide. In this picture the operator is revealing the tide prediction for Port Townsend, Wash., for the year 1923.

Seeks "Cell for Winter"; Gets One for Forty Years

Parry Sound, Ont. — Forty years in the penitentiary was the sentence imposed by Police Magistrate George Moore on Stephen Zowisluk, who pleaded guilty to smashing 21 windows, "in order to earn a term in a nice warm jail for the winter."

Dog Acme of Politeness.

Boston.—There is a French bulldog that is the acme of politeness. His name is C'est Toi and he is the property of Miss Alice F. Dunne of 46 Cortes street, Boston.

C'est Toi got his reputation as an extremely polite canine when he chanced to pick up a lady's coat that was dragging on the floor. He did this so gracefully and with such evident enjoyment that he was immediately nicknamed "the Page" by his loving mistress.

SAYS THAT INDIANS ARE STARVING

Turned Cannibals, According to Reports From Canada.

Mounted Police Start on Four-Month Trail in Far North to Investigate—Miss Yearly Migration of Caribou.

Winnipeg.—A member of the Canadian mounted police and a guide left Edmonton, Alberta, to investigate reports that Indian tribes north of Lake Athabasca, in northern Canada, had resorted to cannibalism, their food having failed them.

These Indians have heretofore been living largely on caribou, but last summer they missed the yearly migration of caribou from the shores of the Arctic and their hunt was a failure. Reports indicate that they are starving.

The trip is a long and dangerous one, across barren lands and through a wilderness for a distance of 400 miles. No food can be obtained there and little wood for camp fires is obtainable, there being in the region only isolated sticks of stunted timber. The ground is almost entirely rock ridges, interspersed with swamp land and bogs. Another party of Canadian mounted policemen also is leaving Fort Fitzgerald.

Indians from all sections of northern Canada converge at a central meeting point in the heart of the howling wilderness of this north country, where they remain for months. It is at this central point that the police hope to find them, and if cannibals are found among them, to bring these human flesh eaters to civilization.

Long trains of Indians and dogs will accompany the police, carrying supplies for four months.

It is reported that the port of Copenhagen is filled with American goods that cannot be sold on account of their extreme high prices.

POPE BENEDICT XV SUCCUMBS TO PNEUMONIA

Illness That Was Not at First Regarded as Serious Has Fatal Ending.

PONTIFF HAD BRIEF REIGN

Elevated to the Papal Throne in 1914, His Life Was Saddened by the Atrocities of the Great War—Ordained Priest in 1874.

Rome, Jan. 21.—Benedict XV, the 259th sovereign pontiff of the Church of Rome, died late today at the Vatican. The end came after a day of extreme agony and delirium, relieved at times by merciful periods of sleep.

At one time during the day there was slight hope that the pope might survive, as he lapsed into apparently restful and refreshing slumber. This hope was shattered later when, on awakening, there was a return of pain and suffering.

He had lapsed into delirium earlier in the day and failed to recognize any one at the bedside, and during the early hours of the forenoon death was expected within a few hours.

The pope was in extreme weakness and restless.

Lying with closed eyes, he murmured "Peace, peace," evidently alluding subconsciously to the great mission of the pontificate in war time.

Tragic Scene at Dawn.

Other undistinguished messages fell from his lips from time to time, but his vitality had sunk so low that he spoke in the weakest of whispers.

The day dawned upon a tragic scene at the Vatican. The papal court joined

Pope Benedict XV.

the cardinals in prayer. Outside in the piazza of St. Peter's a crowd of reverent men and women, mostly kneeling with faces heavenward, uttered their supplications for the recovery of the Holy Father.

The four attending physicians did all in their power to relieve his sufferings, but they could hold out no hope for ultimate recovery. The strain was telling on all. In the anteroom off the sick-chamber high prelates of the church, faces drawn with the agony of their sorrow, prayed without cessation.

Suffers Great Pain.

At 8 a. m. the Holy Father was still breathing, but was in great pain and suffering agonized contractions of the throat. A brief bulletin was issued saying:

"His holiness is weaker. The symptoms of pneumonia have extended."

By this time all hope had been abandoned and the most optimistic of the Vatican entourage had come to realize that the end was a matter of hours if not minutes.

Realizes Approach of End.

When the pope lost consciousness late Friday afternoon the attending physicians did not hesitate in expressing their fears that death was at hand.

The pope had been sinking all day, due to inflammation of the lungs and weak heart action, but had retained consciousness. When he sank into a state of coma, after many hours of patient suffering, all preparations had been made and all pre-death ceremonies completed.

Shortly before noon the Vatican announced that the pontiff had requested the last sacraments, realizing that he was dying.

Throughout the afternoon he was kept alive by use of oxygen and artificial heart stimulants. At night the four physicians at the pontifical bedside administered these restoratives at frequent intervals.

Shortly after noon Mgr. Zampani administered the last sacrament.

Cardinal Merry Del Val, who, as cardinal chamberlain, asumes papal authority until a new pope is elected, assumed permanent residence at the Vatican.

Cardinal Giorgi began recitation of the prayers for the dying at 10 o'clock Friday morning. This was the official beginning of the grand penitentiary ceremonial.

At 11 o'clock official notice of the grave condition of the Holy Father was sent to the Italian government.

Cardinal Gasparri was notified as soon as it was ascertained that the condition of his holiness was critical. The cardinal, in tears, hurried to the bedside of the pontiff.

When the papal secretary of state arrived the pope was resting tranquilly and immediately requested that the last sacraments be administered. His holiness was conscious and calm as Mgr. Zampini read the ceremony. The pope then continued fully conscious, but owing to his weakened condition, only a small drop of holy water was placed on his tongue. The few cardinals gathered about the pontiff's bedside recited the Psalms in subdued tones while the ceremony lasted.

The grand penitentiary of the sacred college, surrounded by assistants, then approached the bedside and read to the pontiff the profession of faith as formulated by the Vatican and the Trent councils.

Monks Recite Formulas.

Cardinal Giorgi, after reading the profession of faith, gave to the pontiff the absolution in articulo mortis. As though to impress on every one within hearing the solemnity of the occasion, the words of the formula were pronounced slowly.

The heads of all the various religious orders in Rome then entered the sick-chamber. One by one they bestowed on the pope the indulgences of the various orders which each represented. Throughout the ceremony a profound silence pervaded the room, which was broken only by the low voice of each aged monk as he recited the formula for his order.

Following the ceremony the procession slowly returned to the Basilica of St. Peter. Only the domestic prelates, whose duty it is to assist the pontiff until his death, remained around the sick man.

Groups of nuns and monks belonging to nearly all of the religious orders having convents or monasteries in Rome gathered in the space extending from the great bronze doors of the Vatican to the top of the Scala Regia, praying for the pope.

HAD FILLED HIGH POSITIONS

Pope Benedict Prominent in Church Counsels Before His Elevation to the Papal Throne.

Pope Benedict XV rose to the supreme head of the Catholic church Sept. 6, 1914, less than six months after he was elevated to the cardinalship. He was born of noble parents at Pogli, near Genoa, Italy, Nov. 21, 1854. His father was Marquis Della Chiesa.

Educated at Capronican college and the Academy of Ecclesiastics, he was ordained to the priesthood in 1878. He was taken to Madrid, Spain, by Cardinal Rampolla, and for four years was secretary of the nunciature in Spain. In 1901 he was appointed consultor of the holy office and in 1907 Pope Pius gave him the appointment of archbishop of the see of Bologna. He was made a cardinal in May, 1914.

Pope Benedict was much affected by the horrors and sorrow of the World war and many times tried to bring about peace negotiations. Germany's violation of Belgium's neutrality filled him with great sorrow and after the sinking of the Lusitania, he telegraphed the German emperor telling his abhorrence of the deed.

Pope Benedict's first appeal for peace was issued one week after his coronation. The appeal failed to bring results, as did also his later plan for a Christmas truce. In January and in July, 1915, he again tried to bring about peace negotiations. In March, 1916, he repeated his attempts and in May of the same year suggested that America should act as conciliator between the warring nations. His note to President Wilson to this effect reached Washington when Germany and the United States were involved in a diplomatic crisis. The Vatican approved of President Wilson's peace note in 1917, but three months later the United States entered the war.

The Pope's most memorable appeal for peace was issued in his own handwriting on August 8, 1917, and asked belligerent rulers to end the struggle. During the peace conference his pleas were issued in behalf of weaker nations.

Just before the conference President Wilson had a private conference with Pope Benedict at the Vatican in which many questions of a social and international nature were discussed.

The settlement of the 700-year-old Irish problem was received with great pleasure by the pope, who issued a message congratulating the principals in the negotiations.

History of Pope's Illness.

By Professor Battistini, chief medical adviser of the pope and head of the group of physicians attending him.

Rome, Jan. 21.—The Holy Father's illness began on Tuesday. He at first suffered only from slight inflammation of the bronchial tubes but unfortunately failed to pay sufficient attention to it with the result that the illness gradually developed into lung trouble.

The inflammatory process was very rapid so that while at first only the left lung was affected, it spread to the right lung yesterday morning.

Many Ills Due To Catarrh

The mucous membranes throughout the body are subject to catarrhal congestion resulting in many serious complications.

PE-RU-NA

Well Known and Reliable

Coughs, colds, nasal catarrh, stomach and bowel troubles among the most common diseases due to catarrhal conditions.

A very dependable remedy after protracted sickness, the grip or Spanish Flu.

PE-RU-NA is a good medicine to have on hand for emergencies.

Tablets or Liquid — Sold Everywhere

IN USE FIFTY YEARS

Much Longer.

Two young women were discussing clothes and styles. The first was telling about a new dress that she had just bought. After she had gone into detail about many features of it the second asked about the length of the skirt.

"Oh, yes, the skirt is longer," she said. "It is down to my knees."

Foresighted.

"Has Jack anything laid by for a rainy day?"

"Yes, he's engaged to an heiress."

Have You a Cold or Cough?

Read What This Woman Says!

Blair, Nebr.—"In my younger years I had very weak lungs and as I grew older seemed to become susceptible to weather conditions to such an extent that I always seemed to have a cough or a cold. I took Dr. Pierce's Golden Medical Discovery as a tonic and builder and found it to be so helpful to me that I used no other medicine or doctoring for a period of about seven years. I did not take it continuously but just whenever my system seemed to require a tonic. That was twenty-five years ago and my lungs are in good condition today."—Mrs. L. H. Lothrop, 211 East Lincoln St.

When run-down you can quickly pick up and regain vim, vigor, vitality by obtaining this Medical Discovery of Dr. Pierce's at your nearest drug store in tablets or liquid.

Place for Him.

There were weird howls from Tommy.

"What does that hyena want now?" demanded father.

"Wants you to take him to the zoo," cooed mother.—Judge.

MOTHER, QUICK! GIVE CALIFORNIA FIG SYRUP FOR CHILD'S BOWEL

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold or has colic, a teaspoonful will never fail to open the bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste from the tender, little bowels and gives you a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement

Valuations.

"My face is my fortune," sang the milkmaid.

"That was very long ago when a bucket of milk was not nearly as valuable as at present."

NOTICE OF SPECIAL SCHOOL ELECTION BOND PROPOSITION MESERVEY, IOWA

Publis Notice is Hereby Given. That a special election of the Consolidated Independent School District of Meservey, in the counties of Cerro Gordo, Hancock, Franklin and Wright, State of Iowa, will be held on the 17th day of February, 1922 at the City Hall, Meservey, Iowa, from one o'clock P. M. until six o'clock P. M. and that at said election there will be submitted to the voters of said Consolidated Independent School District to be by them voted upon. the following proposition:

Shall the Consolidated Independent School District of Meservey, in the counties of Cerro Gordo, Hancock, Franklin and Wright, State of Iowa, issue bonds in the sum of Sixty Thousand Dollars ($60,000) for the purpose of constructing and equipping a new school house?

At which time and place all the voters of said Consolidated Independent School District are hereby notified to appear.

This notice is Given by Order of the Board of Directors of said Consolidated Independent School District, pursuant to a sufficient petition with the requisite signatures in accordance with Section 2820-d1 et seq. of the supplement to the Code of Iowa, 1913.

Dated at Meservey, Iowa, this 13th day of January, 1922.

J-19-26-F-2-9 K. Clarence Ruigh, Secretary. Board of Directors.

NOTICE TO BIDDERS SCHOOL BUILDING-BIDS CLOSE FEB. 16, 1922 AT 1. Pm MESERVEY, IOWA

Bids are desired on a school building, to be erected at Meservey, Iowa, by the Board of Education of the Consolidated Independent School District of Meservey, Iowa. Bids will be received by the Secty. of the Board of Education Mr. K. Clarence Ruigh at his office in the Farmers Savings Bank at Meservey up to 1Pm Feb. 16, 1922. Bids will be opened immediately and read publicly. Bids must be accompanied by certified checks or bid bonds in amount as follows:

General Construction	Check or Bid Bond	$1500.00
Heating and Ventilating	Check or Bid Bond	$1000.00
Plumbing	Check or Bid Bond	$400.00
Seating	Check or Bid Bond	$200.00
Equipment	Check or Bid Bond	$200.00

Certified checks or bid bonds must be made out unconditionally to Mr. K. Clarence Ruigh, Secretary Board of Education. as a guarantee that the bidder, if successful, will enter into contract with the Said School District and furnish a bond in full amount of the contract in the form outlined in the specifications, guaranteeing the completion of the building and the payment of all leins and claims.

The plans and Specifications will be on file after Feb. 1, 1922, One copy only—at the office of the Secretary, one at the office of the Architect, 1353 University Ave., St. Paul, Minn., and one at 211 M. B. A. Building, Mason City, Iowa. also at the Builders Exchanges of Des Moines, Iowa, St. Paul, Minn. and Minneapolis, Minn.

Contractors may secure plans by application to the Architect, 1353 University Ave., St. Paul, Minn., upon payment of a deposit of $10.00 to insure return of plans and specifications. The entire amount will be refunded to all contractors who file their bids with the secretary, likewise the entire amount will be forfeited if the contractor fails to bid. Sub contractors and material men will be charged the exact cost of preparing the blue prints and specifications for such drawings as they may require to figure the part of the work they are bidding on.

Contractors will be required to bid on the exact form of bid outlined in the bidders blanks, any deviation therefrom will invalidate the bid and same will not be considered.

Contractors may combine any part of the work or bid on the entire contract by furnishing with their bid the certified checks or bid bonds required above.

The Board of Education reserves the right to accept any or reject any or all bids.

Signed:
Consolidated Independent School District of Meservey, Iowa.,
By K. Clarence Ruigh, Sec'ty.
Board of Education.

CLEAN AND REPAIR HARNESS

Good Time to Get Repairs and Clean Up for Spring Work

Now is a good time to get the harness cleaned up and repaired so that it will be ready for spring work, say the animal husbandry men at Iowa State College.

During the winter when the weather is too cold to be at work it is a fine idea to carry all the harness into a warm room and examine it. Take off all the buckles and see that the sewing is in good order. If the thread is rottening either sew it up or take it to the harness maker. Good linen thread well waxed is the best to sow with.

To clean, wash with warm water and a good neutral soap, such as castile or ivory. Laundry soaps contain substances that will damage the leather. Scrub with a stiff brush and allow the leather to become nearly dry before oiling. For the best results harness ought to be oiled while damp. Good neats foot oil or a castor oil or a mixture of two is the best to use. Do not get the harness too oily as this will collect sand an increase wearing on the leather. Let the harness dry for 24 hours and then wipe off extra oil with a cloth.

In oiling harness never apply oil that is intended for machinery as this is often mineral oils and contain substances that damage the leather.

★111 one eleven cigarettes

Three Friendly Gentlemen

Made to Suit Your Taste

We have for years catered to the cigarette smokers of America.

With this experience, we created One Eleven—"111"+"Made to Suit Your Taste," of the world's three greatest cigarette tobaccos—

THE KLEMME TIMES

Twenty-sixth Year—Number 21 | Klemme, Iowa, Thursday Afternoon, February 2, 1922 | $2.00 In Advance—$2.50 Outside of County

Doings of the Week Reported By the Klemme Schools

KLEMME HIGH SCHOOL NOTES

Howard Wiles, High School Reporter
Jack Wellelneyer, Grade Reporter

Edwin Bock was absent on Tuesday.

Pearl Johnson was absent Wednesday.

Ewald Josten was absent Wednesday forenoon.

Albert Priebe was absent Wednesday forenoon.

Sylvanius Wacker was absent on Wednesday forenoon.

Blanche Medaus was absent from school Mondap.

John Baumgartner has been absent for several days on account of sickness.

The seventh grade will be excused Thursdap and Friday on account of the eigth taking cocunty exams.

The 9th grade Science class have changed their experiment day to Friday instead of Wednesday.

Prof. Wilson has started the Gram mar Room girls practising in order to have a second team and which will give material for the first team next year.

Albert Priebe and Ewald Josten are taking Physiology with the sophomores; the first half they took only three studies, but they are taking four the last half.

Miss McKahan has begun practising on thhe play which is to be given sometime in February as one of the lecture course numbers. The name of it is "A Box of Monkeys," which sounds good and by all appearances will be a big success.

Some of the 9th grade pupils are to prepare a debate on the question, "Resolved that the country is a better place to live in than in town." Neota and Faith are to take the negative side and Adala and Leona are to tke the affirmative.

A very interesting basket ball game was played Friday night on our floor when Goodell came up with both the boys and the girls teams. The girls played a fast, close game, as they were well matched. Our girls defeated Goodell by a score of 15 to 17. Hurrah! for our girls as it was the first game they had won and it sure helped pep them up. The boys also played a fast game and defeated the Goodell boys by a score of 20 to 33. Our boys have won both games with Goodell. A good. big crowd attended the games which sure encourages our players to see that our friends are for us. Mr. Marvin Weigmann refereed the girls game and the first half of the boys game and gave fair decisions to both games and certainly put pep into both the home and the visiting team as he kept them busy and there was no time lost. The Goodell referee was also very satisfactory.

Snowflake Is Really Transparent.

The reflection of the sunlight on the snowflake crystals is what gives them the appearance of being white. Snow is simply water turned into crystals by the low temperature. The flake itself is transparent, as is water, but because of its crystal formation the snowflake is only partially transparent, the facets of the crystal reflecting the light and giving the whole flake a white appearance.

If the light reflected by the snow crystal is red or green the snowflake will take on the same appearance. When millions of snowflakes are combined in one mass on the ground their ability to reflect the light is increased and in this way a snow bank appears even more white than would one isolated snowflake.—Cleveland News-Leader.

The married folks club held their dance last week Thursday at the Idle Hour theatre at which time they enjoyed a masquerade party. The costumes were all good. Everyone har a fine time.

OBITUARY

Cena Hansen was born near Goodell, Iowa, March 18, 1887, and departed this life at the residence of her parents in Concord at 2:15 on the afternoon of Wednesday, January 25, 1922, her age being 34 years, 10 months and 7 days. With the exception of the two years 1916 and 1917, which she spent near Whittemore, she spent her entire life in Hancock County.

On December 21, 1910, te deceased was united in marriage with Andrew Andreasen. They became the parents of six children whose names follow in the order of their seniority: Marven, age 10; Marjorie, age 8; Avis, age 7; Verna, age 5; Donald, age 3 and Leola, age 10 months.

Mrs. Andreasen was one of the many influenza victims of this county in 1918, and, while she was not taken off by the ravages of the disease, she was maimed in health, and from the effects of this malady she never fully recovered. Instead of recuperating, in March of 1921, she began to show signs of still further failing health, and it soon became apparent that any hope for a restoration to permanent health was futile. Everything that loving relatives could do to assauge her suffering was done, but the struggle to save the life of this young mother of six little children terminated in defeat in the early afternoon of Wednesday of last week.

There are left to grieve her early departure. her grief stricken husband, an aged mother, two brothers, Alfred and Chris, three sisters, Mrs. Dave Jackman, of Waterloo; Mrs. John Bachman of Klemme, and Mrs. McCaskey of Ogden, Iowa, and the six little children already enumerated in this sketch.

A brother of the deceased with his wife have moved into the Andreasen home on the farm northeast of Klemto aid the bereaved father in the care of the children and the farm work.

Another sad part of the above is that the following day, on Thursday the father, Chris Hansen of Garner, also died. A double funeral of father and daughter was conducted from the Methodist church at Garner by Rev. Webb who preached the sermon for Mr. Hansen and Rev. Gauger had charge of Mrs. Andreasen's funeral.

Klemme people extend heartfelt sympathies to the bereaved father and the little children.

—T—

Helping Him Out.

While visiting friends in Cleveland, a young Detroiter was presented with a quart of rye whisky. He decided to take it home in his suitcase.

As the steamer neared the dock he became more and more nervous. Finally, in desperation, he confessed his fears to a fellow voyager. This kindly individual offered to trade suitcases and assume all responsibility. The young man was vastly relieved and the change was made.

The luggage was not searched and a few minutes later the two met on shore. The young man was exceedingly grateful.

"By the way," he observed, as they exchanged again, "you must have a lot of things in your suitcase; it's awfully heavy."

"Yes," said the stranger. "I have twelve quarts in mine."—Harper's Magazine.

Maine's Gold Mines.

Gold has been found in a granite quarry at Skowhegan, Me. The presence of gold in Nova Scotia has given a certain plausibility to the expectation that where Maine passes into the sub-boreal terrain auriferous deposits may be found. Yet even the Nova Scotia field, one understands, has received about as much gold in stock subscriptions as it has ever emitted in bullion. —Lowell Courier-Citizen.

Social Distinctions.

Little Elmore—What does your papa do?

Little Florence—He's a horse doctor.

Little Elmore—Then I guess I'd better not play with you; I'm afraid you don't belong to our set.

Little Florence—I don't see why. What does your papa do?

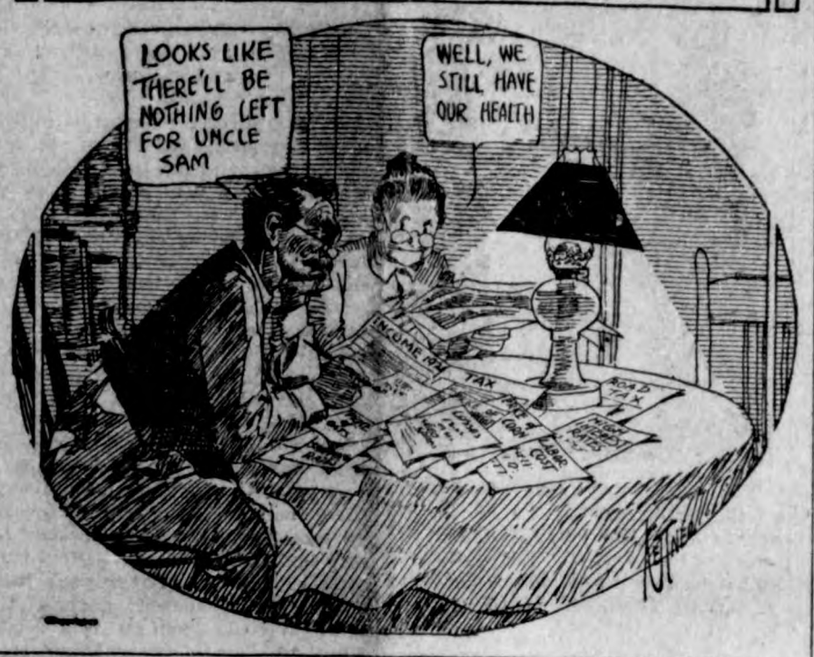
Little Elmore—He's a veterinary surgeon.—Cincinnati Times-Star.

Commuter's Impression.

"Is this an accommodation train?" asked the traveling man.

"Only in a technical sense," replied Mr. Crosslots. "As a matter of fact it's one of the most disobliging trains I ever rode on."

Net Income



Duroc Jersey Breeders To Promote Further Interest In Red Pigs

DUROC JERSEY BREEDERS ORGANIZE IN COUNTY

Klemme Man Elected An Officer

At a meeting in Garner, Friday afternoon, January 27th, the Pure Bred Duroc Jersey breeders of Hancock County orgnized what is called the Hancock County Pure Bred Duroc Jersey Association. The idea is to promote the breed and boost for better Duroc Jerseys.

They also laid plans for promoting a Pure Bred Duroc Jersey Sow and Litter Club for the boys and girls between the ages of ten and eighteen inclusive. Any boy or girl in Hancock County is eligible for membership in this club, and any one interested should get in touch with the County Agent. Help will be given in buping the gilt, and arrangements will be made for financing the purchase. We expect to use gilts farrowed in March, 1921, and bred to farrow between March 15th and April 15th, 1922. A show will be put on at the County Fair, and every boy will be requested to show his sow and littel. The breeders will offer cash prizes, as well as the Fair Association will pay good prizes. A pure bred sale will be held some time after the Fair, whereby the club members can sell their gilts at auction. Further particulars as to the club can be had by writing the County Agent.

The Association members hope to promote a larger show of Duroc Jerseys at the County Fair, and also pledged themselves to help the young men who are just starting in the business. Thep also suggest that a close selection should be made of all animals offered for sale so that nothing will be sold but what would be a credit to the breed, as well as to the herd from which they came.

Another meeting will be held on Saturday, February 25th, where further plans will be laid.

The follownig men were elected as officers: Ray Durant, Garner, President; J. G. Anderson, Garner, Vice President; Emil Lau, Klemme, Secretary-Treasurer.

Emil Lau and Fred Schuldt, both prominent Duroc men of this place attended the meeting at Garner and are very enthusiastic.

THE DARN JUICE WAS NIX!

The electricity was off all yesterday morning and we were unable to use any of our machinery in the office as it is all electrically driven and so we are experiencing some difficulty in getting the paper out this week and will have to slight some news as the linotype machine will not run without power.

There are a lot of power users about town who depend on electricity to move the wheels of their industry but when the power is shut off they loose a lot of time and money, wich the Iowa Falls Companp do not pay for either.

But its better late than never!

SOFT ANSWER IN SWEDISH

"Explanation" That More Than Satisfied the Offended Representative of the Law.

A pretty young Swede and an American girl were crossing the Ellipse, regardless of a lettered warning to keep off the grass. A bicycle policeman wheeled up to ask if they couldn't see the sign whereupon the American whispered to the other to answer him in Swedish. The little foreigner burst forth in excitedly mystifying language and the other girl chipped in with the few words of her own acquired stock.

Realizing the impossibility of enforcing the law on two young and attractive aliens, the officer not only permitted them the right of way but took the trouble to point out the Monument, government buildings and like public views.

When she got the chance the American girl asked her friend what she had said to the policeman—and that upholder of the law may be interested in the answer.

"I was so nervous that all I could think of was the Lord's Prayer. And I gave it to him from start to finish." —Washington Star.

GREW WHISKERS TO GET JOB

And Secretary of State Hughes Has Worn the Required Facial Adornments Ever Since.

Charles E. Hughes, secretary of state, gave little indication to his teachers and classmates at Brown university that he was to become a leader in the nation, though it is true that he had his bachelor degree before he was 21. It was his intention to make teaching his life work, and he did devote some years to that occupation. His first application for a job was as a teacher of Greek in a small eastern college. The head of the department received him kindly, but evidently regarded his youthful appearance as making him an impossibility in that line.

"Why," said he, "you have no more hair on your face than an egg."

"If a beard is necessary I can raise one," said Hughes, who knew his own ability in that line, and soon was able to qualify for the job and got it. And, by the way, he has the same whiskers yet. He has never worn a clean-shaved face since.—Columbus Dispatch.

HIS POINT QUITE REASONABLE

A Good Logic in Negro's Contention as to Lion's Probable Change to a Meat Diet.

A negro employed at one of the Hollywood movie studios was drafted by a director to do a novel comedy scene with a lion.

"You get into this bed," ordered the director, "and we'll bring the lion in and put him in bed with you. It will be a scream."

"Put a lion in bed with me!" yelled the darky. "No, sah! Not a-tall. I quits right here and now."

"But," protested the director, "this lion won't hurt you. This lion was brought up on milk."

"So was I brung up on milk," wailed the darky, "but I eats meat now."—Los Angeles Times.

BASKET SOCIAL

A Box Social will be held in Bailey Grove School, District No. 3, Twin Lake Township, February 10th. The ladies are requested to please bring boxes. Emma Toftey, teacher. 1wc

Interesting Events Long Forgotten Retold Once More

Twenty Years Ago This Week

Jan. 28, 1897

26 below zero Monday.

Our post office fight is still on, each aspirant with about equal honors.

Elmer Dow is reported down with the mumps, this is the first case reported in town.

Miss Anna Skow, while feeding the job press Tuesday, got her hand caught between the bed and table of the press but fortunately no bones were broken.

W. P. Sterling has started draying in town. It is said he intends moving to town, and continue the busiess during the summer. We are inclined to the opinion that two drapmen in Klemme is one too many.

There was a pleasant party held at Morris Day's on Tuesday evening. Invitations were issued by Miss Ida Day and Willie Zook (who is staying at Day's.) It was a surprise on John Day. Refreshments were served and all enjoyed themselves.

The Band Concert Monday evening was a success cocnsidering the weather. The Band rendered their numbers in a creditable manner; the solo "In the Shadow of the Pines" bp Mrs. Ida Griswold received the most applause, and the recitation "Mrs. McCarthy's Goat" by Chris Blumer was well received. Valuable assistance was rendered by Mr. and Mrs. L. A. Griswold of Goodell, and the Misses Hubbard, Terhufen, Haefner and Mrs. Henry. The program was worthy of better patronage but the boys are thankful for small favors.

Twenty-five Years Ago This Week

Thursday, Jan. 30, 1902

Wm. Koerner left Wednesday morning for Charles City.

T. Gauley is hauling his grain to Klemme, the best market on the map

Rumor has it that there will be a wedding in this vicinity in the near future.

Having purchased the Lau Bros. store building, I have put my bench in there. Bring in your watches and clocks for repairs. J. W. Waterman.

Jake Meyers of near Garner, purchased a fine surrey from our popular implement dealer, H. W. Schoper one day last week. The Garner farmers know where to get a square deal on machinery all right.

Hancock County's new treasurer W. L. Mitchell, is to be married on February 4; the lady of his choice being Miss Nettie Hinchon. one of Algona's fairest daughters. May prosperity be theirs.

Gruetzmacher Bros. have bought back their store building and George and John Gruetzmacher will continue the business here after March 1. At that time an entire new stock will be put in.

Ten Years Ago This Week

Thursday, February 1, 1912

C. L. Blumer has opened up a general repair shop in the building two doors west of the barber shop.

Chas. Busch is filling his ice house this week. The ice is of good thickness and fine quality tis winter.

10 YEARS AGO THIS WEEK

Alvin Haupt, of Rowan and Dick Kenefick, of Garner, are visiting at the Fred Haupt home.

Miss Esther Lenz entertained her Sunday School class last Thursday evening at her pleasant home in the south part of town.

Emil Peterson from Garner has accepted a position in the Wellemeyer Department Store to take the place of Anton Pankuk who will leave soon to farm near Titonka.

We notice by a dispatch from Renwick that at the annual election of officers of the First National Bank at that place, Frank Wenck was elected to the position of Vice President.

We note by a dispatch in the daily papers that a new bank with a capital of $50,000 has been organized at Ackley, Iowa. I. B. Bleeker, formerly assistant cashier of the First National Bank of Klemme. is to be the cashier of the new institution.

MR. GROUND HOG SEES HIS SHADOW

Six Weeks of Cold Weather Ahead

According to the old superetition f the ground hog see his shadow on Feb. 2nd it is a sure sign that six weeks of cold weather will follow..

The sun was shining brightly this morning so evidently the ground hog would experience no difficulty in obtaining a clear view of his shadow nd so would of course become verp frightened and crawl back into his hole for another six weeks.

SEVEN CARS LIVE STOCK SHIPPED SATURDAY NIGHT

Seven more car loads of live stock were shipped from the Klemme yards Saturday night for the Chicago market, whichc was a little lighter than other sipments for some time but vich still compares very favorably with other points along the line.

The shipments were as follows:

Cattle	
Joe Johnson	1 car
Hogs	
Joe Johnson	2 cars
Shipping Association	1 car
A. C. Lau	3 cars

TAX COLLECTOR TO BE AT THE COURT HOUSE

Deputy Collector P. A. Lonergan vill be at the Court House at Garner Feb. 20th to Feb. 28th and at Britt March 1st to March 4th to assist tax payers in filing their 1921 income ax returns.

The Department desires that the axpayers would request blanks and nformation from the Division Headquarters which for this territory is located at Mason City, Iowa.

Folding Fan Invented 700 A. D.

The ordinary folding fan was invented in Japan in the Seventh century by a native artist who derived the idea from the way in which the bat closes its wings

Dreaming of Writing.

To dream that you write with a pen denotes good luck; with a quill, loss of health; with a stick, firmness of purpose; with a pencil, warns you of secret enemies. To dream of writing a letter foretells good news; a bill, an accusation.

Also the rich you have with you always, and they're often more troublesome than the poor.

If you try to be "all things to all men," you soon will be nothing to anybody.

Did you ever notice the husband of a woman who boasts that she has "a mind of her own."

The love of money may be the root of all evil, but money itself is the oil of much joy.

Sees Big Death Toll From Hooch

Cleveland Chemist Declares Undertakers Will Have Prosperous Year About 1926.

DANGER FROM RAW FUSEL OIL

It Removes the Oxygen From the Blood, Causes Lips and Body to Turn Blue and Has the Same Effect as Asphyxiation.

Cleveland, O.—Undertakers will have a prosperous year about 1926, in the opinion of analytical and consulting chemists here, because, they claim, the Grim Reaper is whetting his scythe for a harvest of prohibition liquor drinkers.

Hundreds of persons are slowly but surely asphyxiating themselves, according to J. M. Kovachy, assistant city chemist, by unsuspectingly assimilating the poisons found in almost every sample of what was believed to be "pure bonded" liquor. Hundreds of samples are brought to Kovachy each month for analysis, he said, and all thus far analyzed have contained a high percentage of fusel oil in the raw. In large quantities, consumed by steady drinking, fusel oil changes the blood from oxyhemiglobin to methemiglobin, he insists.

Same as Asphyxiation.

In other words, Kovachy says, fusel oil removes the oxygen from the blood, causes the lips and body to turn blue and has the same effect as asphyxiation.

"Illicit peddlers of whisky use ethylacetate for flavoring purposes in some cases, and this is very injurious if taken in any quantity, acting as a heart depressment," the chemist declared.

M. E. Crutis, proprietor of the Chemical Laboratories, advises the present-day drinker to "analyze well before using." Traces of adulteration that clip year after year from a life have been found in almost every bottle of alleged "bonded" liquor he has analyzed, he asserted.

"It is true a portion of the contents of most bottles is pure bonded whisky. That gives it the color, flavor and taste," Curtis added. "But the good liquor is mixed with ingredients that are harmful to the human system, and the question uppermost in the minds of those who come to me for analysis of their liquor is how to remove the ingredients and leave the bonded stuff."

Gross Misrepresentation.

That "bonded" whisky is being grossly misrepresented by bootleggers was revealed recently when a raid of a printing shop in the downtown section by federal and police officials uncovered a plant which is said to have been devoted exclusively to the manufacture of counterfeit labels and bottled in bond revenue stamps.

The labels were similar to those used by prominent distillers on popular brands of intoxicating liquors previous to the eighteenth amendment going into effect.

Ten thousand alleged counterfeit revenue stamps were confiscated. Federal secret service operatives declare that statements made by some of the six persons arrested in connection with the raid indicate that $50,000 had been "cleared" during the last year through sales of the labels to bootleggers in Kansas City, New York, Chicago, Detroit and other cities.

CHECK DOGS; IGNORE BABES

Berlin Theaters Provide Accommodations for Patrons' Pets But Not for Children.

Berlin.—Pet dogs have become so popular among the feminine population of Berlin that theater managers have been compelled to install rooms where the dogs may be checked. Some patrons complain that none of the theters has made similar provision for checking babies, and think this is an unwarranted discrimination.

During the intermissions the women repair to the "dog room" and feed the animals with bits of sandwiches which it has become the custom for theatergoers to eat between the acts.

"PRUNES YOSEMITE"

The battleship California, flagship of the Pacific fleet, has mascots that attract attention in every port at which the ship stops. One is a small cinnamon bear answering to the name of "Prunes Yosemite," shown here with Ensign Van Bergen.

Yanks Explore Arctic, Tropics

Forsake Home Comforts Seeking Specimens and Data World Over for Scientists.

SEARCH FOR "MISSING LINK"

Stefansson Expedition Is Mapping Little-Known Boundaries of Wrangel's Island, North of Siberia—Seek "River of Doubt."

New York.—Comforts of home weigh little when cast in the balance with the interests of science, it is declared by museum experts and learned societies. Expeditions have gone forth from the United States and foreign countries into the frozen arctic, the blistering areas of Africa and to the varying climes of Asia, South America and other lands in quest of animal and vegetable specimens and data to add to the knowledge of man.

Some of the explorations have not stopped with the earth. Conan Doyle recently claimed to have talked with his dead relatives, and not a few wireless operators assert that kindred souls on Mars were trying to wireless folks here.

Hunt "Missing Link."

Among the expeditions now at work are:

The third Asiatic expedition of the American Museum of Natural History, which is to remain five years in the Orient hopeful of finding the "missing link," and of gathering a wealth of scientific data.

The Stefansson expedition which is mapping the little-known boundaries of Wrangel's island, north of Siberia, where polar bears are most numerous. This party of Americans and Esquimaux expects to remain away two or three years, and Donald B. MacMillan and his comrades are exploring Baffin's land.

An expedition to hunt gorillas is trekking in Africa under the direction of Carl E. Akeley of the American Museum of Natural History. Recently he reported having bagged a family of five.

Seek "River of Doubt."

The Mulford biological expedition, now in South America, is exploring the headwaters of the Amazon, seeking Colonel Roosevelt's River of Doubt, and gathering rare plants and herbs desired by chemists and the medical profession.

The British expedition which climbed to within 6,000 feet of the world's highest summit, Mount Everest, in 1921, expects to finish the job this year. Minor expeditions are working in Peru, Ecuador, Bolivia and elsewhere, most of them being American.

Roald Amundsen, who is quite used to cold weather, having spent many previous years in the Arctic, will set forth in the spring on a trip to the north pole.

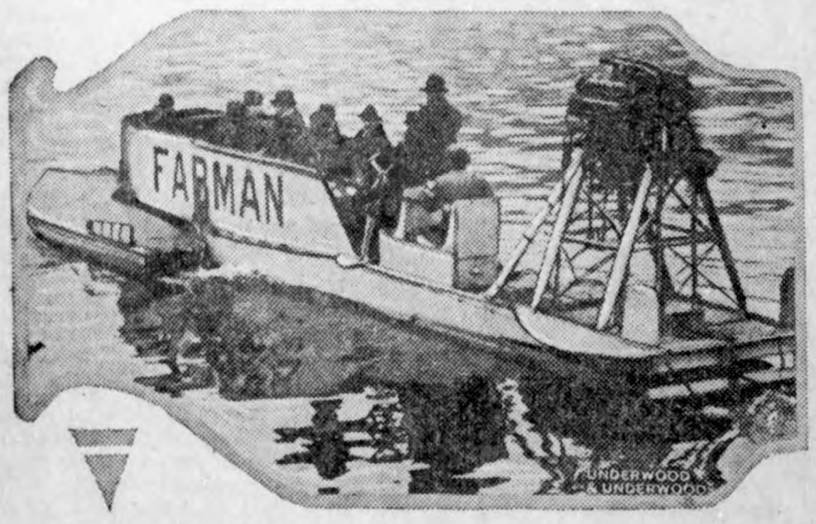
164-Year-Old Bible Found.

Goshen, N. Y.—Miss Caroline Vail has just found in her home in Montgomery, Orange county, a Dutch book printed 164 years ago in old Holland Dutch language. It was believed that her ancestors brought it to this country. The book was a Dutch Bible, printed in 1758. The name of Miss Vail's great-grandmother, Sarah Brett, was inscribed on a leaflet, and it had been handed down from generation to generation along with other old relics of Revolutionary and Colonial days.

Man Is Saved From Wolves by Jackrabbit

Roundup, Mont.—W. H. White, a rancher in the Cameron Creek district, while walking across the fields unarmed, noticed that two wolves were following him. Not even a stone was available as a weapon and White gave himself up for lost. As the wolves drew near, ready to attack, a jack rabbit jumped up in their path and they suddenly abandoned man meat to give chase to the jack. White is now carrying a gun.

Speedy Farman Glider on the Seine



This is the Farman Glider, propelled by a huge airplane engine and aerial propeller, gliding along the Seine. It makes a speed of 50 miles an hour.

BOSS BUFFALO IS LICKED AT LAST

Famous Herd Leader Meets His Kingly Downfall.

"Old Scotty," Shipped to Washington From South Dakota, Is Put Out in Seven-Hour Battle With Younger Bull.

Wenas Prairie, Wash.—"Old Scotty," for years leader of the famous herd of buffalo near Pierre, S. D., but recently shipped here with several hundred of his kind, has met his kingly downfall. He has been dethroned, and by a younger and stronger bull.

The terrific fight, in which fences and sheds were demolished and huge holes dug in the earth, and "Old Scotty," bleeding, haggard, was vanquished, lasted seven hours. A new bull, "Yakiman" by name, reigns supreme, having gained the title by the self-same tactics used by the old buffalo years ago on the Dakota prairies.

On arrival here the herd of buffalo, purchased by local capitalists, were liberated in an extensive fenced area of hills and valleys. "Scotty" was haughtily parading his 3,000 pounds of selfishness when a picturesque young bull, nearly equal in size, made a vicious lunge at the wrinkled old king. "Scotty" swung and caught the blow with his head. Then started the battle, the most remarkable ever witnessed in this section of the West. Great calm settled over the big herd as the two fighters bellowed and roared. The fighters pawed earth, plunged and tore at each other with horns and hoofs. The battle scene shifted back and forth on the prairie for seven hours, when darkness allowed "Old Scotty" to lose his adversary and limp painfully away.

Yakima Indians who saw the animals fighting are now fearful lest these animals, so near their reservation, break out of the confines and invade their villages.

It is estimated by the owners of this newly established herd that there will be an annual increase of 50 calves. If as anticipated then each autumn 50 of the largest animals will be slaughtered for the Pacific Coast markets.

Puzzling Murder Mystery Is Uncovered by Cat

Wheeling.—The frantic efforts of a cat to get out of a window at Warwood, a suburb, led to the discovery of an unsolved murder. Thomas Panlach, forty, was found on the floor by those who went to release the cat. The man's head was almost severed. An ax and razor lay nearby. Thrift stamps and stocks to the value of several thousand dollars were not touched.

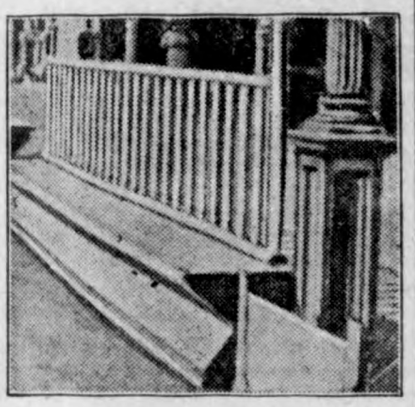
Home Town Helps

TURNING TO HOME BUILDING

Gratifying Increase in Construction Noted In Practically All Parts of the Country.

It is gratifying to read with what vigor and energy Americans are building homes for themselves. During the war and for a time after it few private homes were built, but now the country is making up for lost time. In the ten months of this year ending October 31, more than $600,000,000 worth of houses were built, and before the year is ended the value of newly constructed buildings will be above $722,000,000. Domiciles will help the nation to bring about better conditions. Men who own houses always are good citizens; they feel of more importance in the land, and no man on earth will fight harder for anything than will the person who battles to protect the roof that covers himself and family. It is believed that 1922 will be the banner year in the putting up of houses; perhaps their total value will reach the billion mark. Then will come the cheaper rents; landlords no longer will go about baiting and hazing tenants, but rather will they be offering—as of old—a month of free rent to those who will lease their apartments.—New York Morning Telegraph.

SEAT BACKS DETACHABLE



Concrete Seats Along the Shores of Southern Coast Towns Have Wooden Backs Made Detachable So That They May Be Stored During the Season of the Year When There Are Few Visitors. Iron Piping Fits in Holes in Both Parts.—Popular Mechanics Magazine.

Village Has No Poor.

Stony Bottom, W. Va., a village of forty-two families, challenges the world for the honor as the most model and contented town.

There are just thirty-five families with an average of four persons each in the village who own their own homes and seven other families who pay the landlord for their domiciles.

Of the thirty-five home owners but one has an encumbrance on his property, and that is small and will be cleared off within sixty days. A fine undenominational church counts every resident of the town as a member. There are no poor people in Stony Bottom, neither are there any who can claim to be rich. None is in debt. Twelve automobiles are owned by residents of the village. Everybody appears happy and contented with life. —Exchange.

"Holding Together."

In the preface to "The Glass of Fashion" reference is made to a letter written by the artist, Burne-Jones, to Mary Gladstone. This idealist broke forth into lamentation over the quarrels and trivial animosities which too often exist between men of genius. "My dear," he exclaims, "if twelve of these men would hold together for ten years, the whole world aspect would now be changed, and twelve men did once hold together and the whole face of the world was changed."

Why cannot this wise comment be applied to the existing groups in any city and village—i. e., to its churches, its schools, its lodges, its clubs and what not? How great would be the good to individual and community! The very fact of communities "holding together" would itself be the millennium. — Correspondence Chicago Daily News.

Used the Wrong Word.

There was a curious case in Michigan where a wealthy decedent left $60,000 to build a home for indigent old women. But instead of indigent, the maker of the will wrote "indignant." As it would have been possible to find a great many indignant old ladies and hard to decide between their claims, the money finally went to relatives.

Leavenworth Bars Skyscrapers.

Skyscrapers are not possible at Leavenworth, Kan., now, under an ordinance passed by the city commission, as an emergency. Buildings are limited to ten stories. Stringent construction rules, designed to minimize liability of fire also are contained in the ordinance.

Uncle Eben's Proviso.

"Fightin' ought to be abolished," said Uncle Eben, "but it ain' gineter happen in my neighborhood till dey gits some reliable agreement to abolish loaded dice."

LITTLE GRAY LADY

By MILDRED WHITE

Copyright, 1922, Western Newspaper Union.

She was a little gray lady. So Joe, the Westerner, thought of her. He was sure that he could not be in love with so quiet and colorless a person, and he decided, deliberately, to marry her for money.

The gray lady's real name was Barbara Waite, and her father, a ranch owner, had left her a lot of money.

Barbara studied her lessons at her mother's knee, and when the sweet old lady passed on to her reward, Barbara as patiently took up her household burdens.

Thus, Big Joe found her. He came recommended to take up the management of her lands.

The dresses that she wore from habit, because of their serviceableness, were usually of a soft gray, and her eyes, too, were gray, wistfully appealing as a child's. But the hair that had lain fair across Barbara's temples was now gray too—before its time.

She was not young, Joe concluded—nor yet old. Yes, he would marry her for her money. In a lifetime of labor and good fortune he might not accumulate such a sum.

She had never known a lover's attention, he decided, nor, in all probability, had an admirer. Wooing would be easy. Many sighing maidens had fallen before the unusual charm of the man's adoring dark eyes—which had not been adoring after all, but faithless. He would first show Barbara devotion, rendering her in her loneliness sympathy and helpful service; would make himself necessary by his kindness, then abruptly absent himself awaiting the assurance of her affection.

If Barbara Waite was lonely without him, if she watched and longed as others had done, he would return to her and ask his question.

The little gray lady gratefully accepted Big Joe's many deeds of kindness.

Often he felt Barbara Waite's eyes upon him, and when he looked back at her boldly, he could detect her shy tenderness.

So when Joe went away she missed him—missed him with an ache that her true heart had never known before, and when he came confidently back to her, Barbara married him.

If he was less kindly attentive as weeks passed, she told herself that his greater personal interest in the ranch was accountable for this lapse.

And then one day he came to her frankly, brutally almost, and told her that he was going away.

"I can't stand it any longer," said Joe. "I thought I could, but I can't. I—the truth is I married you for money, Barbara, and the money doesn't seem to bring me happiness. I've got to go away."

The little gray lady did not cry out; she did not reproach him. She just sat and studied for a time his flushed, daring face. "All right, Joe," she answered at last, her tone almost cheerful.

He stared at her, but she was in the pretty chintz-draped bedroom sorting out his clothes.

Mechanically she packed his black leather bag. "You can send for the rest of your things when you are located," she told him.

Joe took the bag. Some way he was disappointed.

"Good-by Joe," she said insinuatingly. "If money was all that you wanted when you married me, why you are still married to the money and I'll send it on until you find the work, or whatever it is that you need."

His bravado failed. He wanted to thank her, wanted to refuse her perplexing generosity, but found the door quickly locked and barred against him. Barbara had taken him at his word.

Back in the East he found a position that paid. He worked hard at it and made a success. When Barbara's checks came to him he saved them, returning them later in a neat pile. He met a young woman—the daughter of his employer, who supposed him to be free and who was gracious in her hospitality. But her gayety and flaunted attractions tired him, as did those pleasures which he had formerly enjoyed.

It was inexplicable; success in his grasp, the companionship of men whom he had coveted, and yet—dissatisfaction. Joe marveled on his need, when illness seized him—a long and serious illness, leaving him helplessly weak in a city hospital. Convalescence brought no promise of contentment, happiness he almost ceased to hope for, unless—

A small soothing hand caressed his forehead. Joe's dark conquering eyes opened listlessly, then were alight with eagerness. The little gray lady stood beside him, her gray eyes soft with sympathy, her cheeks twin roses beneath his ardent gaze. Joe put his big hands to clasp hers.

"It was you, you, that I wanted all the time," he cried wonderingly. "Just the sight of you now rests me, takes all my world weariness away. Yet, it was true, I did—marry you for your money."

Barbara Waite hushed him. "No, my dear," her voice was a soft, hurried breath, "you thought that you wanted my money, but oh, it was love all the time. I read love in the first glance of your eyes. That is why I married you; that is why I allowed you to go—across the world. I knew you must come back to me."

Joe's thin cheek was against her hands. "Yes," he said, "I was going back."

LAND GROWS RICH

Wonderful Development of Canada in Forty Years.

Four Decades Ago Little Considered, Today One of the Greatest Granaries and Dairying Centers.

The recent announcement that the sale of the first section of Canadian Pacific land was sold forty years ago, and when you read that the first carload of wheat was shipped from Winnipeg forty years ago, the changes that have taken place since then are matters of reminiscence, but yet of interest. What forty years ago was an unknown quantity, barren because but little production was attempted, is today one of the greatest granaries in the world. Then there was scarcely any farm live stock in the West. Dairying was not engaged in at all. Today there are 6,998,317 farm animals on the prairies, of which 881,899 are milch cows; and dairying is only second in importance to grain growing, in the West.

Forty years ago the shipment of one carload of grain was a notable exploit.

Today, Canada ranks as the second largest wheat-producing country in the world, with 329,185,300 bushels, 90 per cent of which was grown in the three prairie provinces, of which the province of Saskatchewan produced more than half. The Dominion is today the second largest producer of oats, with 530,710,000 bushels, of which 60 per cent was grown between Winnipeg and the Rocky mountains; and the fifth largest producer of barley with 63,311,000 bushels, of which the prairies yielded 65 per cent.

Forty years ago scarcely any of the rich soil had been brought under cultivation. The farm machinery of the time was crude; there were no competent advisers; government experimental farms were a blessing that came years later.

Yet these hardy pioneers stuck it out, and in forty years numbers of them are enjoying their declining days in the communities they wrested from the wilderness, prosperous, contented, with their children's families gathered about them or seeking their own fortunes still further westward or northward. They have seen civilization step in to the West and the wilderness swept out. Today are thriving cities and towns where bleaching buffalo bones marked the ox trails of forty years ago. Today are mighty freight trains, each with its thousand-ton cargo of wheat or merchandise, roaring down the roads where the old carts creaked. Today are schools within walking distance of every farmhouse, churches within driving distance of every home. Today are telephones and every modern convenience linking communities over vast distances by the common bond of the spoken word.

Forty years ago the Rockies were practically an impenetrable barrier, the Pacific coast being reached from the east by ships sailing round Cape Horn. The province of Manitoba had a population of 62,260, compared with 613,008 in 1921. Winnipeg was then a frontier town with 7,987 people, and Brandon, which was regarded as a far-flung outpost of the West, boasted of a few hundred in population. In 1891 it only had 3,778. Such places as Calgary and Edmonton were mere trading posts in the Northwest territories. Buffalo roamed the prairie in their native state.

Today on these plains are to be seen herds of cattle, bands of horses and droves of sheep, from any of which can easily be selected stock that can carry off premiums, sweepstakes and championships in competition with the best in any other part of the world.—Advertisement.

Proceeding With Caution.

Angelina—I'm afraid I'm not a very good cook, but I'll try ever so hard after we're married.

Edwin—Better try now, before we're married. Try it on your folks and let me know how it comes out.

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

We are willing to get together; the hitch comes when we try to work together.

Funniest witticism loses all its point if it is greeted by "what?" for the third time.

Something to Think About

By F. A. WALKER

DEPENDENT ON OTHERS

TO PEOPLE who harbor the foolish idea that they are not dependent on others, there is sure to come at some period of their existence a rude awakening.

And this is true of everybody, the man or woman with five talents and those with but one talent. It is true of you!

It is immaterial how able you may be, how much money you may have, or how exalted you may be, you will, as you go through life, eventually discover that, aside from your ability and wealth, you are largely dependent on others for most of your daily comforts and happiness.

Argue this as you may from the abstract to the real, and turn back again to the beginning, you will find that your dependence on others is one of the most incontestable facts in the world.

And it is only when you soberly ask yourself why, that the truth comes with overwhelming force.

* * *

Self-dependence will not endure logical scrutiny.

It cannot stand the simple test of common sense.

From birth till death, men and women of every degree are dependent on one another, forced by a natural law to rely on one another for support and favor.

Everything worth having comes from others.

Love, companionship, power and fame are the priceless gifts bestowed upon you by the kindly hearts and generous hands of those who are traveling beside you through life's sunshine and shadows.

And you, whether aware of it or not, are giving something of which you are possessed to weld a link in this endless chain of dependence, being constantly beaten into new form and character on the anvil of Time.

* * *

Those who should understand each other with a fulness impossible otherwise, should make daily notes of their inability to help or provide themselves without outside assistance.

These notes may pain sharply as they are set down in long rows, but if they are studied in the right spirit, they will soon sweeten the bitterness in the soul and allay the rancor.

Indeed, if this should be done regularly, with good-will towards all mankind, the world will soon become a better place to live in, the needless animosities between man and nations would cease, and all hearts would beat happily in spiritual harmony.

Uncommon Sense

By JOHN BLAKE

BASED ON EXPERIENCE

IT IS decision or the lack of it that makes the difference between first class and second class men.

No man is fit to command an army or even a company of infantry unless he has decision.

Hesitation in time of war is fatal. It is dangerous and destructive in times of peace.

No man can always make up his mind quickly and be sure he is right every time.

But the man who does this oftenest, is the man who gets furthest in the world.

All important leaders of action or thought are men of decision.

This is particularly true of executives, who have many men under them. To such men hestitation means lost time—hundreds of hours of it, and is not to be tolerated.

But be very careful, in cultivating decision, to base it on experience.

It will be anything but an advantage to be able to make up your mind quickly if you make it up wrong every time.

Neither you nor I would be able to decide instantly between two reports of engineers as to the best course to run a railroad.

A railroad president or general manager who was worth his salt could decide very shortly.

He could do so because years of experience would have taught him how to weigh the question, and to decide for the combination that meant the easiest grades and the most traffic.

But we can, or at least ought to, be able to decide our own problems without much waste of time.

We ought not to hesitate more than half an hour over the choice of a suit of clothes, or more than ten seconds over the choice of a necktie.

Yet even to make trivial choices such as these, requires a knowledge of ourselves, which is not lightly acquired.

Learn to decide, for decision means efficiency. But learn to decide right. Base decision on thought and experience, and it is not very likely to go wrong.

KIDDIES SIX

By Will M. Maupin

FOR ME

I ASK not wealth or golden store,
Nor right to rule my fellow man.
Just this I ask, and nothing more,
To live my life as best I can.

I ask not fame, nor high estate,
Nor argosies upon the sea.
I only ask that loved ones wait
To give sweet welcome unto me.

I ask no crown of high finance,
Nor plaudits from the crowing throng.
I only ask a man's fair chance
To save my loved ones from all wrong.

I ask not for the pomp and power
Of those who rule from golden throne.
I only ask that every hour
I can provide well for my own.

SCHOOL DAYS

MOTHER'S COOK BOOK by Nellie Maxwell

Come out! Come lightly out to play
Like children and like gods, this day—
Over the hills and far away.
—Fannie S. Gifford.

CAKES TO BE EATEN THE DAY THEY ARE BAKED

ALL shortcakes are best served hot from the oven, and so are blueberry gems, those delicious berry-filled cakes which we enjoy in the season. Cakes which are not rich enough to keep well should be eaten the same or the following day they are baked.

Feather Cake.

Cream three tablespoonfuls of butter, add three-fourths of a cupful of sugar, a little at a time until the whole is light. Drop in the yolk of an egg and beat until light. Sift one and three-fourths cupfuls of flour, add two and one-half teaspoonfuls of baking powder. Beat this into the finest mixture, alternating with one-half cupful of milk, one-fourth of a teaspoonful of grated orange rind and three drops of vanilla. Fold in the white of the egg beaten stiff and bake in a sheet. Serve broken in pieces with a fork.

Rose Cake.

Cream one-half cupful of butter, add one and three-fourths cupfuls of sugar, a little at a time until the whole is creamy. Sift two and three-fourths cupfuls of flour three times, then add three tablespoonfuls of baking powder and sift again. Add the flour to the butter, alternating with one cupful of sweet milk and then fold in the stiffly beaten whites of five eggs. Take half the butter and color with a little fruit coloring, flavor with rose and the white with pistachio. Drop spoonfuls of each into an angel food pan. Bake fifty minutes to an hour in a moderate oven. Turn out on a thick cloth and do not slice until perfectly cold.

YOUR HAND

How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm.

THE FINGER NAILS

WE FIND sometimes in the hand of a woman short nails combined with the following characteristics:

The line of the heart (the upper of the two lines crossing the palm horizontally) is short, and the head line underneath it is straight and inclined to turn up toward the finger of Mercury, the little finger. The mount of Mercury is flat and covered with lines, and the mounts of the moon and of Mars (at the outside of the edge of the palm) are high. The joints of the hand are very plainly visible.

These are the marks of a woman of harsh disposition and quarrelsome nature, and they are made more strong by the shortness of the nails. For a confirmation of this sign of quarrelsomeness, consult the triangle formed by the line of life, the line of the head and the line of health. If there is a decided cross to be perceived in this triangle, we may say with fairly good assurance that the disposition of the possessor is pugnacious and quarrelsome.

THE ROMANCE OF WORDS

"SANDWICH"

LORD SANDWICH, who held high rank in England during the latter part of the Eighteenth century, not only gave his name to the chain of islands discovered by Captain Cook in 1778, but it is also from him that the slice of meat or cheese or the like between two pieces of bread gets its name.

It was because of the earl of Sandwich's aversion to wasting even a moment of time, that the "sandwich," as we know it, came into being. At his office in the admiralty he made it a rule to pay no attention to any letter that was more than a page in length, saying that anyone can state everything they have to say in a single page, and that if the petition was longer, he wouldn't have anything to do with it because it was wasteful of the writer's time and of his. The same principle governed his hours of play. He was an inveterate gambler, and it was far from unusual for him to sit for 12 to 14 hours at a stretch, watching the fall of the cards.

At such times it was his custom to summon the waiter and order "whatever food happens to be in the house." Cold meat and bread were usually forthcoming, so the earl would slip a slice of the former between two slices of the latter and devour it with great relish. Soon it became the fashion to serve "Sandwiches" — always spelled with a capital—at the various functions of the day, and this time-saving device of an English lord gave rise to a word which is common wherever the language is spoken.

PREPARATION OF HAY FOR MARKET

Producers Have Suffered Great Losses Because of Use of Improper Methods.

VITAL INFORMATION LACKING

Product That Grades Highest and Brings Prices Is That Having Natural Green Color—Time of Cutting Counts.

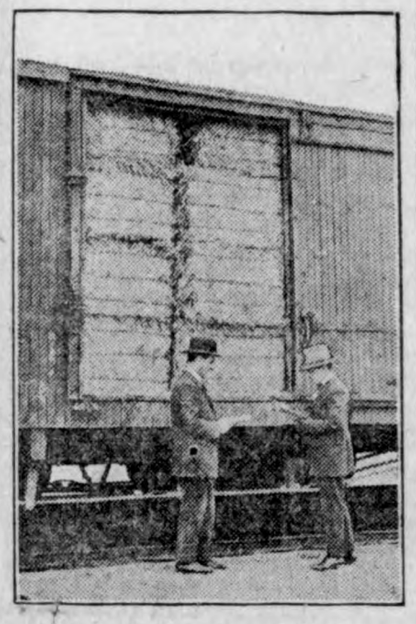
(Prepared by the United States Department of Agriculture.)

What to do with low-grade hay has long been a vexing problem to the hay trade. Losses running into the thousands of dollars annually have been suffered by producers because of the difficulty encountered in disposing of hay that is improperly prepared for market, or is of a mixture that causes it to be regarded as of a low grade.

In Department Bulletin 977, "Marketing Hay at Country Points," recently issued by the United States Department of Agriculture, the failure to remedy this situation is ascribed to two chief reasons: The producer and the dealers do not yet agree as to what constitutes quality in hay, and many producers lack vital market information regarding the preparation of hay for terminal and consuming markets.

Color Counts Most.

Quality of hay is at present indicated largely by its color, which is used to gauge the stage of maturity at which it is cut. The hay that



Inspecting a Car of Hay.

grades highest, and consequently brings the most money, is usually that having the best natural green color. Hay dealers can often tell from the color whether hay was cut early, medium, or late, and in their opinion the best hay is the early cut hay and the poorest that which was cut late.

The average hay grower, however, in some sections at least, does not agree with the terminal market theory of quality as indicated by color. Many producers prefer medium or late cut hay, especially for horses, because it is easier to cure and not as "washy" as early cut hay.

In some markets size and weight of bales is an important factor, since there is sometimes a difference of several dollars a ton in the same grade of hay in small or large bales. The reasons for the demand for certain sizes and weights are numerous and not always based on facts, it is said. However, as in many other kinds of trading, it pays the seller to aim to meet the desires of the buyer.

Undesirable Mixtures Cause Loss.

The production of undesirable mixtures for the market will cause a loss to the producer as long as the market does not want mixtures. Certain of these are discriminated against regardless of their true nutritive or feeding value. The producer may know positively that certain mixtures are palatable and contain more total digestible nutrients than the kinds now in greatest demand, yet he is powerless to make feeders realize their value. The introduction and general use of a new kind or mixture of hay is a very slow undertaking, as in the case of clover and alfalfa.

About the only way to avoid trouble with undesirable mixtures, says the bulletin, is for the producer to cease growing them and to produce only the kind in demand in the markets to which his hay is usually shipped. Copies of the bulletin may be had free upon application to the department at Washington, D. C.

ADVANTAGE OF VELVET BEAN

When Properly Dried It Is Distinct Addition to Protein Concentrates for Cattle.

When properly dried before shipment, velvet bean feed is a distinct addition to the protein concentrates at the disposal of northern feeders, in the opinion of Dr. J. B. Lindsey of Massachusetts station. It has proved slightly better than wheat bran for making milk. It may constitute as high as 40 per cent of the grain ration for cows; but 20 per cent for pigs and horses is considered enough. Doctor Lindsey recommends for cows a ration of 40 per cent velvet bean feed, 40 per cent corn or hominy meal or ground oats and 20 per cent cottonseed meal or some other high-grade protein concentrate.

SWEET POTATO CROP DAMAGED BY WEEVIL

Outline of Successful Measures of Eradication.

Review of Work Done in Florida and Georgia Where Situation Was Worse—Use of Clean Planting Stock Is Urged.

(Prepared by the United States Department of Agriculture.)

A method of rendering negligible the heavy damage that would otherwise be inflicted by the sweet-potato weevil has been found by the United States Department of Agriculture. A review of the work done in Florida and Georgia is contained in department circular 201, bureau of entomology, United States Department of Agriculture. Measures successful in the eradication of the pest in that section are outlined briefly as follows:

The old field should be thoroughly cleaned over at harvest, the vines being fed to stock or burned, and the field hogged over.

The potatoes should be banked as far away as possible from the old field and from the site selected for the next year's potato field.

All potatoes on the farm should be disposed of early.

No potato or plants from the old crop should be used on the farm and no draw-bed should be planted.

Old potato banks should be cleaned as soon as empty.

Only draws from sources known to be free from the weevil should be used.

The Georgia-Florida location was selected for the test because the situation there was serious, the section inland, climatic conditions adverse, and many growers unused to ways of cooperation. No more unfavorable conditions, it was thought, were likely to be encountered anywhere in the country. All these, and other minor difficulties, have been surmounted, however, and the department, in its circular, announces the following conclusions:

"The results of the work offer convincing proof that the same methods, followed with painstaking care, will be successful in eradicating the sweet-potato weevil in almost any infested locality where abundant wild food plants do not offer a fresh and continuing source of new infestation. Careful sorting of the crop, the use of clean planting stock, and an annual change of location for the main planting, even in a continuously infested locality will reduce infestation of the tubers to a practically negligible quantity.

"There is no more reason for allowing a sweet-potato crop to be destroyed annually by weevils than there is for letting the weeds take it, and conscientious neighborhood effort in the application of the principles that have been outlined may free any district from a heavy annual tax."

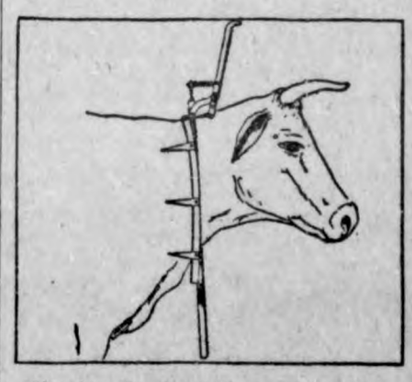
A copy of the circular may be obtained free of charge upon application to the department at Washington, D. C.

SIMPLE AND EFFICIENT POKE

Device Recently Invented to Prevent Animal From Forcing Itself Through Fences.

The Scientific American in illustrating and describing an animal poke, the invention of H. Gerdes of Benkelman, Neb., says:

An object of the invention is the provision of a poke of simple and efficient construction which is formed



Showing the Invention as Applied.

with spurs mounted to automatically engage the neck of an animal when he attempts to force his way through a fence; by means of a lever the spurs are so held that they will not engage the neck of the animal under normal conditions.

PRODUCE HIGH-GRADE SEEDS

Many Farmers Are Not Careful to Prevent Mixture and Keep Out Harmful Weeds.

Even in communities where a single variety of a crop is raised almost exclusively there is a place for the production of pure seed for local sale, says D. W. Frear, extension specialist in field crops for the Missouri College of Agriculture.

Many farmers do not go to the trouble to keep their seed up to a high standard but allow it to become mixed, weed-infested and diseased and are glad to pay a good price every few years for high grade seed.

Those who are favorably situated can produce pure seed to meet this local demand. Seed produced for this purpose must be of high quality and considerably better than the average in the community, because farmers will not pay an advanced price for seed that is very little better than their own.

MONTHS OF SUFFERING

How a Baltimore Girl Recovered Her Health

Baltimore, Maryland.—"For several months I suffered with severe backache and general weakness. I could not sleep comfortably at night for pains in my back. I found your book at home one day and after reading it began at once to take Lydia E. Pinkham's Vegetable Compound. I have had very good results and some of my girl friends are taking it now. You may use this letter to help other girls, as the letters in your book helped me."—ROSE WAIDNER, 3018 Roseland Place, Baltimore, Md.

That is the thought so often expressed in letters recommending Lydia E. Pinkham's Vegetable Compound. These women know what they have suffered, they describe their symptoms and state how they were finally made well. Just plain statements, but they want other women to be helped.

Lydia E. Pinkham's Vegetable Compound is a medicine made from medicinal roots and herbs, and without drugs, to relieve the sickness women so often have, which is indicated by backache, weak feelings, nervousness, and no ambition to get anything done or to go anywhere. It has helped many women. Why not try it?

ARE THEY?

By MARGARET M'CONKEY.

©, 1921, by McClure Newspaper Syndicate.

The office was alive with noises. A messenger whistled, typewriters clicked, an adding machine buzzed, a multigraph thumped. It would seem to a mere outsider that amid all this speed and activity there would be no room for anyone so distracting as Dame Gossip or no time to listen to her stories in case she could force her way in.

Yet if this outsider had supernatural ears, he might have heard one stenographer buzzing to another. "And just before he has to leave for South America! What a shame!" Or, if his powers of observation had been acute, he might have noticed that the messenger had stopped whistling long enough to listen to a new development in the story, such as "He has been working for six months for his appointment so that they could go to South America for their honeymoon." If a mind reader, he might perhaps have noted a pang of envy flashing through the mind of a plain-looking stenographer in an obscure corner of the room. Perhaps she was thinking. "Any girl with a bunch of curls and baby-vampire eyes can treat a man as she pleases."

His curiosity as to the victims of these little snatches of gossip might have induced the outsider to go to the root of the trouble. If so, his investigations would eventually have led him to a dilapidated old boarding house, the home of one Genevieve West.

A small, blue-eyed girl sat in front of a mirror deftly pinning some curls that in shining waves over a large protruding ear. Having accomplished this to her private satisfaction she turned her head, carefully avoiding a prominent flaw in the mirror, and proceeded to cover up the other ear, equally large and equally protruding.

Three floors below in the boarding house parlor sat Lyman McCullough, a clean-cut young Scotchman, characterized mainly by a rather square jaw, but with a pleasing face for all that. His Scotch jaw for once was serving him well for, in a position where most men would have given up in despair, he was able to hold on with a stubborn persistence which would excite envy from the most tenacious bulldogs.

Curiosity well aroused now, the outsider would probably have followed the couple as they strolled through the Boston common, and he might even have eavesdropped a little to their conversation as they sat on a bench beneath the sheltering shade of a large tree.

Lyman was arguing. "Genevieve, if you love me as you say you do, you will marry me tomorrow and go to South America."

While Genevieve was persisting with much determination. "You know I love you, Lyman, but I can't marry you tomorrow. I can't."

Falteringly she added, "I'll wait for you."

Lyman exploded. "Wait for me! Why do you suppose I took this position? For the privilege of traveling alone?"

Calming down a little, he asked her patiently for the hundredth or perhaps the thousandth time, "Why, why can't you marry me tomorrow? We were planning to be married next month, anyhow."

And for the hundredth or perhaps the thousandth time, Genevieve answered, "I can't, Lyman, I just can't."

Lyman changed his tactics and resorted to coaxing. "Come, Genevieve, please tell me what is troubling my pretty curly-headed girl."

Genevieve winced. "I'm not."

"Not what?" asked Lyman.

"Not what you think I am," answered Genevieve.

Lyman looked puzzled and then laughed. "What are you then, sweetheart?"

Genevieve shook her head with a decided negative, but did not answer his question.

"How soon will you marry me if I give up the trip?"

Genevieve counted on her fingers. "A week from Thursday. Oh, Lyman, will you? Can you?"

But Lyman, too, was counting on his fingers. "Aha!" he detected. "I have a clue. Thursday! Pay day! Money!"

But Genevieve refused. "I couldn't take your money. We aren't married."

"Very easy," remedied Lyman. "We'll get married now and I'll give you the money."

When Genevieve refused, Lyman lost his patience and left her. The outsider would probably have been losing his patience, too, by this time and be relieved to see Genevieve shedding tears, which is a sure sign that a woman is about to tell what is troubling her.

She called to Lyman and he turned to her roughly. "Look here, Genevieve, you're going to tell me this minute why you want that money."

Genevieve crumpled into a pathetic little heap beside him and gulped her explanation.

"It's for a p-permanent wave. I know you would divorce me if you saw my hair on c-c-curlers."

Lyman's relieved laugh rang through the common, but if the outsider had been there he would probably have strolled away, saying disgustedly: "Aren't girls fools?"

A TOOTHSOME TALE

ANNETTE C. SYMMES.

©, 1921, by McClure Newspaper Syndicate.

When Cousin Phrony Butterfield made her annual visit to the Blakes, little Phrony, as she still continued to call her namesake, in spite of that winsome damsel's 20 years, was unanimously elected to the pleasing task of "giving Cousin Phrony a good time." A rather bleak and cheerless girlhood which merged into a womanhood filled with hard and unappreciated toil as the bond-slave of a brother whose body was crippled by rheumatism and whose soul was warped worse than his body long before the latter knew a rheumatic pang, had brought Cousin Phrony to her mid-fifties with a girl's keen relish for good times—and she wanted the kind of good times girls have, too! Only little Phrony could stand her namesake's pace, when she attempted to cram into a fortnight enough jaunting to last the other 50 weeks of the year—and little Phrony frankly admitted that Cousin Phrony was more fun than any girl she knew.

"It's wicked, I know," little Phrony said to herself," but I'm glad Cousin Hiram is dead! And I wish he'd died before! And do wish, too that Cousin Phrony would sell that wicked farm and move somewhere where she wouldn't have to take her amusement in chunks!" But Cousin Phrony clung to the farm, and came regularly after haying each year for her visit.

This year the first few days passed rather drably, owing to the guest's attendance at a dental office, where an under set of "store-teeth" were being fashioned for her. But the night after she bore them home in triumph, she announced cheerfully that tomorrow she "wuz in hopes 't she'n Phrony could have a real good time."

Little Phrony knew where to take her cousin, and from the moment when they descended from the trolley into the gay crowd at the beach resort, Cousin Phrony was in her element. The clanging music of a merry-go-round drew her into the big pavilion, her eyes clinging to the gaily-painted beasts and their riders.

Little Phrony, knowing what the woman really wanted, proposed a ride and after a very slight resistance Cousin Phrony gave in, and settled her generous weight upon a gaudy elephant, "because it'd take an el'phant to hold her up!" The spectacle of the dear soul, in her black-striped muslin, her hat, a descreet combination of hat and bonnet, and her "comfort" shoes, careering in a circle with delight, written broadly all over her rosy, wholesome face, was striking enough to compel the attention of a good-looking young man near-by. When the ride was over, and the two descended, he followed them.

And when they dined, he sat at the table next them.

Now Cousin Phrony had not yet subdued her new "store-teeth." The upper set she was used to; but the new lower set bothered her to that extent that the delicious fried clams and "French fried" potatoes lost half their flavor for her, as she painfully concentrated upon mastication.

"Take out these horrid under teeth, cousin!" begged little Phrony, at last. "They're spoiling your dinner?"

"I declare, I b'lieve I will!" sighed the harrassed diner, and lifted a discreet napkin to her lips. When she removed it, the teeth were in its folds.

It was when they rose to go that the catastrophe occurred! In her engrossment in the dinner, Cousin Phrony had totally forgotten the teeth lying in her lap. With a horrifying chatter they struck the floor, and, not content with that, "skittered," to use her own phrase, right out in front of the young man at the next table, who was rising, too!

Little Phrony made a dart for them, but the man was the quicker. Picking them up, he handed them to the blushing girl, with a bow and a smile that had in it nothing but kindness and understanding.

"Mr. Crawford!" gasped little Phrony, and blushed the harder. Just to think of meeting the distinguished, much-sought-after Elliot Crawford in this way! And to think that, hardly knowing her at all, he should plainly be so pleased to see her!

But there was Cousin Phrony to introduce, and her rebellious teeth to be restored to her, and the story of the morning's doings to be told, as simply as if it was the commonest thing in the world for a girl and an elderly woman to participate in the giddiest sports of the beach together.

"And we'd admire to have you come with us awhile, Mr. Crawford," invited Cousin Phrony, with country-neighborhood feeling for the young man all alone in a place that demanded companionship. "The's quite a number of things we ain't had time to try out: an' we e'n get our fortunes told by the seventh daughter of a seventh daughter. I want to see if she says I'm going to marry a rich, dark-complected man."

So Mr. Crawford came. And the canny gipsy predicted the obvious after looking at his own and little Phrony's face. But she didn't tell the girl that it was her sweet cheerfulness and considerateness for a pleasure-starved woman that tilted Crawford into love with her.

And so she didn't know it till her lover told her himself, as he slipped the diamond upon the engagement finger.

GOODELL NEWS ITEMS

Gus Wenzell was a Goodell caller Friday.

Anson Avery was a Saturday night caller at Kanawha.

Sleighing among the young folks seems quite popular at present.

Vernon Griggs and Bill Kirkwood were Belmond callers Sunday morning.

A large number of Goodell folks attended the basket ball game in Klemme last Fridap night.

A dance was held Saturday night after the show. All present report a good time.

Elias Hetland has been very ill with pneumonia but is much better at this writing.

Don't forget the Masquerade and oyster supper after the Basket Ball game Friday night this week.

A bob load of young people attended the American Legion dance in Belmond Wednesday evening, all report a good time.

Mrs. Miller and Mrs. Reed entertained the Ladies Aid in the Basement of the U. B. Church last Thursday afternoon.

H. S. Items

Dale Chase was absent Tuesday.

The County Nurse visited school Tuesday.

Marvel Chase was absent Wednesday.

Agnes Fuller returned to school Monday after two weeks absence on account of a broken collar bone.

Mrs. Miller served as a substitute for our Caesar and Latin teacher on Monday morning.

Crystal Lake plays Friday night, completing our schedule for this season.

Don't forget the basket ball game next Tuesday night, Goodell against Garner on the Goodell floor.

Our basket ball teams went to Klemme last Friday night and we are sorry to say were defeated. The girls game was very fast and close, the scores being 15 to 17. Both teams played very well but our girls were not used to playing in such hard surroundings as cement and brick but, nevertheless they made a larger number of scores than did Klemme when they were down here. One thing we noticed in particular and that was that one of Klemme's forwards has practiced jumping since she has been at Goodell. We were very sorry that Goodell could not take all of her first team, two being unable to play. Our R. C. and J. C. done excellent team work, our guards and forwards not being used to oiled cement &oors were not able to make all of the short turns they are accustomed to making at home. But they must be given credit for what they did do.

Our boys did not do as well as we expected them to do, as John Miller and Don Estelle were not able to play. Summing it all up we give both teams credit for the good work they did.

Something Burning.

At a summer camp, two girls shared an upstairs sleeping porch.

One, never having been very far from the comforts of home, knew very little about some of the "wonders" of nature.

Waking, one night, she became aware of a most unusual odor. Sitting up, she called out: "Mildred, Mildred, I smell something burning! I am going downstairs to see about it."

Experienced Mildred drawled: "Lie down, Betty, and go to sleep. That's nothing but a skunk."

New One, Anyhow.

"Judge, you ought to let me off this time."

"But you acknowledge you were going fifty miles an hour."

"It was this way, judge. I'm an aviator and very absent minded. I thought I was in my air bus instead of a motor car. When I glanced at the speedometer and saw I was traveling only eight miles an hour I got panic stricken and stepped on the gas to keep from going into a tail spin."

Not a Compliment.

"So you have named a new brand of cigars after me, have you?" said the celebrity.

"I have taken that liberty, sir," replied the manufacturer.

"Well, I wish you would call it something else. I have tried one."—Boston Transcript.

Spring Goods Arriving

We are getting in our nice new spring goods and you will find here

House dresses and Aprons
Children's Aprons

in all the latest pretty designs.

Curtain Goods

We have a full line of curtain material, drapes, cretonnes, etc.

Dress Goods

Our new ginghams and percales are here in all the newest patterns

Hosiery

New spring lines of ladies silks just arrived.

ABOUT KLEMME PEOPLE

LuVerne Smith was a business caller at Mason City last Thursday.

C. C. Tessier was down from Garner last Thursday on business here.

Wellemeyer's are busy invoicing this week after their January sales.

Mrs. R. W. Elder was a Garner visitor between trains Friday.

Mr. and Mrs. Ben Katter, of Garner spent Sunday at the R. W. Elder home.

Dr. W. F. Missman and family spent Sunday at the C. H. Tompkins home at Garner.

A sister of Mrs. Dick Goodell, left last Wednesday after visiting at the Goodell home.

Miss Lovine Swartz went to Garner last Tuesday for a visit with her friends.

Miss Lulu Wilkins, of Goodell was visiting at the home of Mrs. Leo Wilkins here a few days the past week.

J. Jorgenson, of Garner came Mon day from Garner for a few days visit at the R. A. Jorgenson home.

Mrs. Jacob Groh, Jr. and family returned last Friday from Belmond, where they had been visiting friends.

Mr. and Mrs. T. F. Mitchell, of Swea City, were over Sunday visitors with Klemme relatives and friends.

Miss Mamie White was up from Goodell Monday visiting with Klemme relatives and friends.

Louie Sampson is making his regular annual rounds with the assessor's book.

Herman Miller was called to Langsing, Iowa, on a business mission the fore part of the week.

Harold Gruetzmacher and wife of Belmond were Sunday visitors at the Frank Gruetzmacher home.

Communion services were held at the First Methodist church last Sunday morning.

George Luick was up from Goodell Tuesday transacting business in this city.

Miss Clara Merkel went to Miller, Iowa, Monday for a few days visit with her sister.

There will be some building going on in Klemme this spring and summer. We will give particulars when we get the proper "dope."

Levi Klotzbach was on the sick list a number of days the past week and was unable to be at Jacob's store where he keeps Ed at work.

Harvey Stille has been helping at the Klemme Co-Op. Grain Co. elevator the past two weeks during the rush season.

Mr. Wm. Bell received the sad news Monday that hi sfather had passed away and left Monday night for Illinois to attend the funeral.

Bud Kent, mechanic at the Ford Garage accompanied his boss. Olof M. Twedt to Dolliver for a Sunday visit. Bud returned Monday.

Emil Lau will hold a bred sow and gilt sale under a heated tent on his farm near Klemme on Friday, February 17th. Plan to attend this sale.

The Klemme Boy Scouts have received their Tenderfoot Badges this week. All the Scouts are working on their second class tests now.

During this winter season Ted and John Albers bagged a total of 160 cotton tails and 12 jack rabbits, it looks like these two fellows hold the record for this winter.

Mr. and Mrs. Fred Barz are the proud parents of a fine baby girl. The little miss arrived at their home last Saturday. They now have a family of 3 boys and 2 girls.

Ben Coobs is sporting a Ford coupe which he accumulated about Saturdap and got it all groomed for the regular Sunday evening trip out towards Arnold's.

Billy Baack was able to be up on the street Saturday for the first time in about four months. He was sick with pneumonia but is getting along fine now.

Howard Doyle left last week for his home at Alta Vista, Iowa, where he will work in four counties taking subscriptions for a farm paper.

Mr. Charles Gruetzmacher came from Minneapolis last week Wednesday for a visit with his brothers, John, George and Frank, all of this place.

Mrs. C. V. McCullough and little daughter, Maxine, of Garner, came last Thursday and remained until Saturday visiting at the home of her son, G. P. McCullough and wife.

Leonard Sampson was taken to a Mason City hospital last Friday and was operated on Sunday. He had a severe cold which seemed to settle in the fore part of his head and which caused him a great deal of pain.

Kenneth Schaefer, of Hebron, Ill., came last week Wednesday for a visit at the John Gruetzmacher home. He is a son of E. P. Schaefer who was formerly a Klemme business man and the founder of what is now the business grown into the present Wellemeyer Department Store.

Mrs. Raymond White and children came from Forest City for an over Sunday visit to keep "Pat" from becoming home sick. Whites have rented the John Heginger place in the north-west part of town and will move in there in a few weeks. John will move back to the farm.

Ben Katter, who has been attending a Minneapolis barber college for the past four weeks came home last Thursday and on Saturday he got a little pratcieal experience with the razor and brush by assisting at the G. P. McCullough barber shop. Ben will turn out to be a good barber.

LuVerne Smith has definitely promised us that the "bells will ring" sometime this month. It is a great relief to us as we were afraid he would postpone the date too long and might be influenced by the other Klemme bachelors to lead a single life.

Yesterday started out like a real spring day. It rained all night before and the sun came out bright and warm in the morning; all looked to be rosy and we were figuring on how was the best way to plant a garden th the least amount of work. Then n a big hurry it clouded up and began to blow like Old Harry and the spring stuff was all off. A regular blizzard; we then began to figure coal bills instead of garden seeds.

Clint Mann and family left yesterday for Boone, Iowa, where they will make their home. They have resided on the Wiles farm for the past three years and ave made many good friends here who regret to see them leave. Mr. Mann will go back to his old job in the mines at Boone. He held a public sale and told us that his sale was very successful and he says it sure paid him to use advertising space in the Klemme Times as it did the trick.

NO DISTINCTIVE AMERICAN TYPE

Study of Old American Stock Shows Heredity Is Still in Evidence.

RESULT OF EIGHT-YEAR STUDY

Intermarriage of Old Stock With More Recent Elements in Population, Leaves Little Hope for Truly National Type.

New York.—To determine whether there is in this country an approach to an American type of man and woman, the Smithsonian institution, with Dr. Ales Hrdlicka, curator of the division of physical anthropology in the U. S. national museum, in charge, has been carrying on an extensive investigation, which has covered eight years, of the physical and physiological features of the oldest and most American element in the population of this country. Doctor Hrdlicka made the first announcement of the fundamental study in a paper given before the second international congress of eugenics at the American museum of natural history here.

"There is no American type of either man or woman as yet; but there is an approach to such a type in physiognomy, stature, build, pigmentation and in other directions," Doctor Hrdlicka said. "Heredity is still most in evidence, but is no longer absolute. The old Americans are to an important degree still the English, Scotch, or Dutch of their ancestry, but in part they are already something new, common, acquired in this land; they are American. Were it possible for this stock to breed exclusively among themselves for several more centuries they, according to all indications, would produce as distinct a national type as have the various older European nations. But intermarriage with more recent elements of the population is so common, that no hope can be entertained for any rapid progress in this direction. Form of head, that was supposed once to show rapid changes, was found, under the new environment to be one of the most persistent of characters.

Blondes Are Disappearing.

"Another prevalent notion that finds no support in the results of these investigations, is that of any physical difference between the old Americans of the northeast, the Yankees, and those of the South; there is no difference of any importance. The people of the South are not darker, the Yankees are not taller. The only regional differences in the old American stock are such as are due to different ancestry (English, Scotch, Huguenot, etc.) But the whole strain shows a plain tendency towards darkening of hair and diminution of blondness."

"The main characteristics of the old Americans are, first of all, a tall stature. They are, if we disregard a few small groups, the tallest of whites, averaging 5 feet 8 inches in the men, and 5 feet 4 inches in the women. This superiority is in part a distinctly American acquisition.

"They are mostly relatively 'spare' in early adult life, with rather a tendency to overweight later on. In this connection there appears one serious feature—many of the younger women are behind their due standard. Their chest, their muscles, are relatively not as well developed as are those of the men. The men, in the average, are in every way a fine lot. The non-working women, many of them, are physically somewhat neglected, which calls for an improvement. Naturally this does not apply to the farm girl or the athletic girl.

"But the American woman shows a superior head. The size of her head is somewhat above what it usually is in relation to the average head of the male, and it is also perceptibly above that indicated by her stature. As the size of head means a corresponding size of brain, we have here a highly favorable condition.

"The form of the head in the old American stock differs widely, according to parentage.

Face Shows Progress.

"A much greater progress in 'Americanization' is shown by the face. This has lost the prominence of the cheek bones and that of the angles of the lower jaw; and in the well-nourished approaches a characteristic straight-sided, rather high oval.

"The nose is variable, with tendency to convex (aquiline) in males, and concave-convex in females. The hands, feet, mouth, ears, are not large, but also not small.

"Only healthy men and women between twenty-four and sixty-five years of life and at least three generations American born on each parental side, were included in the study, and the majority of the subjects were examined under standardized conditions and with best instruments as well as care at the U. S. national museum," Doctor Hrdlicka explained. "They included unselected individuals from all walks of life and all occupations. The length of the study was caused by the unexpected rarity of those who could fill the requirements. The studies extended to a total of 700 persons, but to obtain so many it was found necessary to make trips to parts of New England as well as southward. A particularly interesting group was obtained among the mountaineers of Tennessee and neighboring regions."

MR. COON'S SNOW MAN

MR. FOX had not had good luck catching hens and chickens at the barnyard for a long time.

"If I could only be around there then without being seen," thought Mr. Fox, "I might get one before Mr. Dog gives the alarm, but here I hide every day behind this rock and never once has one of those silly creatures left the barnyard.

Mr. Fox's thoughts came thick and fast and one came to him just then that caused him to run for home with lighter steps than he had for a long time past.

He went right to Mr. Coon's house, for it was a nice, sunny day, and got him up: "I want you to do something for me," said Mr. Fox, "and if you watch out you should be able to get a nice dinner as well."

"Now all you have to do, Mr. Coon, is to cover me with snow, so I will look like a snow man, and when those hens and chickens come along I'll pop out of my white coat and grab one."

"One?" questioned Mr. Coon, "where do I come in?"

"Well, for mercy sake, you don't expect me to do all the work, do you?" exclaimed Mr. Fox. "If I stand here all night in the cold snow to get them out here I guess you can take a chance at getting one for yourself. I shall have all I can do to look out for my own dinner."

"There," said Mr. Coon at last, "no one would ever dream but you are a real, true snowman."

"I am sure I feel like one," Mr. Fox muttered. "I am more thankful than ever I was before for this nice thick coat of fur. I do hope the sun comes out bright and early today."

But there was no answer, for Mr. Coon was some distance away now and running very fast toward the homes of the wood folk.

The moon was still shining when he returned some time later with Timmy and Benny Coon and all their playmates, and even the grown-ups came, too, for Mr. Coon had told them of a big snowman he had seen and that if they hurried he was sure they all could have great sport snowballing it before daybreak.

Of course, they were careful not to make a noise, for they did not wish to disturb the slumbers of Mr. Dog if he happened to be unchained.

First, they all made nice, large, hard snowballs, which Mr. Coon showed them how to prepare by mixing a little water with the snow, and when they had a high pile they all began to throw them.

"Try for his shoulders first," said Mr. Coon in a whisper. He wanted the fun to last as long as possible and he was sure if they struck Mr. Fox on the head and broke away the snow he would jump out and run.

All the little animals were having great fun, and so were the grown-ups, when all at once Timmy Coon, with a well-directed aim, threw a very hard snowball right in the face of the snowman and away went the white covering and there was the scared-looking face of Mr. Fox.

"Well, if it isn't Mr. Fox," said Mr. Coon, just as if he knew nothing about it. "This is a good joke, but, of course, you always think of some funny trick to play on us, Mr. Fox, and we might have guessed you were up to something as you were not with us."

Mr. Fox did not feel a bit like joking, but he had to smile, for he did not dare say anything for fear Mr. Coon would tell the others how he had tried to get Mr. Coon to work for him without giving him anything in return.

He knew the animals would all laugh when they heard how Mr. Coon had paid him off by getting him snowballed, and he did not like to be laughed at.

When they came to the turn in the wood path, where Mr. Coon had to leave the rest, he called to them: "Good night, boys, and, Mr. Fox, when you want something done for nothing never pick out a coon."

Lilly Flor

Czechoslovakia's "Mary Pickford" "movie" star comes to America to play the part of a gaiety actress spy in a new film dealing with the fall of the Hapsburgs. As Miss Flor has been reported engaged to no fewer than three ex-archdukes, her arrival here is of more than usual interest.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

WHAT ABOUT RINGS?

The apparel oft proclaims the man.—Shakespeare.

IT MAY be that some friend of yours in Paris will write and tell you that "they" are wearing rings outside of their gloves in the French capital, and from New York you may hear that this fad has reached this side of the Atlantic. But in spite of this information you will probably not choose to wear your rings in this way, and to do so would show not very good taste if you belong to just a sane, average group of mortals who do not strive after the new and unusual in dress. For to wear rings over the gloves is still so unusual that it would make you tremendously conspicuous if you attempted it. But it has been an established custom and there is a famous portrait of a queen showing her with a large ring on the index finger of her gloved right hand.

A few actresses and women who like the unusual in dress did wear rings on the index finger a season or so ago, but it was a passing fad, and not an attractive one at that. You will notice, too, that women of taste practically never wear rings on the middle finger. They appear especially awkward there. They are now worn almost always either on the ring finger or on the little finger.

It is not in very good taste, and it was never attractive, to wear many rings on one finger. Fingers weighed down by diamonds indicate that the wearer is more anxious to show the value of her rings than their beauty. A married woman does not wear any ring but her wedding and engagement ring, or her wedding ring alone, on her left hand ring finger. Of course, there are some married and engaged women who do not care much for the wearing of these betrothal and wedding rings, who sometimes substitute for them a ring of another sort. But in this case the other ring should be worn instead of the wedding or betrothal ring and not with it.

The old-time rule used to be that a well-bred woman never wore diamonds in the morning, and you will still notice that most women of taste wear none save in the form of their engagement ring. At least, one should not wear diamonds, save an engagement ring, on the golf course or for any athletic meeting. It is extremely bad form to wear rings in profusion in a business office. In general, children are not permitted to wear any very valuable rings, and the most discriminating mothers perhaps do not permit their children to wear any rings at all. Girls are not usually permitted to wear precious stones until they have "come out" or are seventeen or eighteen at least.

There is a rule in most hospitals that the nurses in training should not wear any rings, and the sensible young woman does not object to this.

"What's in a Name?"

Facts about your name: its history, meaning, whence it was derived, significance, your lucky day and lucky jewel

By MILDRED MARSHALL

SADIE

THE quaint name of Sadie, lately spelt Sadye, has its origin with Sarah. It comes from a Hebrew verb meaning to fight or rule, and hence came to signify "princess." The first record of the use of Sarah or Sara belongs to Bible history where the wife of Abraham was so called.

Sadie came into existence through the Irish—unless one cares to believe that she is only an Americanization of one of Sarah's many diminutives. But for the sake of etymological exactness, it is nice to believe that the Irish Sadhbh was the real forerunner of Sadie.

But between the time of Abraham's wife and the appearance of the Irish version of her name, Sarah had been adopted by other countries and had won great popularity. In England Sara Beauchamp gave it vogue in the reign of Edward I and Sarrota de Moulton, who lived in a former reign, was also supposed to possess a name which was another and favorite form of Sarah.

The French preferred Sara without the "h" and it still continues in great vogue there. They have another form, Sarotte, which is also popular. Ireland's Sadhbh and America's Sadie are apparently the only other existing forms.

Sadie has a curious talismanic gem—malachite. If it is engraved with an image of the sun, it will bring her peace, freedom from danger and disease, and sound sleep. It is particularly lucky for children, and, it is said that a piece of malachite tied to a child's cradle will protect it from dangers throughout later life. Saturday is Sadie's lucky day and 7 her lucky number.

LIVE STOCK

SHEEP CARE DURING WINTER

Breeding Ewes Should Be Kept Thrifty and Not Allowed to Lose in Weight.

(Prepared by the United States Department of Agriculture.)

At this season the flock owner is principally interested in fall and winter feeding and maintenance. The shepherd should train himself to read the condition of his sheep by feeling the bone of the loin or back. At no time while they are in lamb should ewes be allowed to lose weight. In open, wet, fall seasons there is danger of waiting too long to start feeding.

Winter management is very important in its effect upon the returns from the flock. Leguminous hays, straws and cornstalks usually form the main part of economical winter rations. Clover, alfalfa or cowpea hay, if of good quality, may be used as the sole feed until near lambing time, from 3 to 3½ pounds daily being sufficient for ewes weighing less than 150 pounds. Oat and wheat straw are better than rye or barley straw. Cornstalks placed where the ewes can eat off the leaves may be used as a part of the roughage ration. If this ration is made up largely of cornstalks or straw, a nitrogenous concentrate should also be used. Timothy hay is not good sheep feed.

Silage will reduce the cost of the ration, but it is best to use it with hay. Feed only silage made from well-matured corn, and be sure that it is not spoiled, frozen or moldy. Three pounds per head a day is the limit for this feed. For breed ewes, roots, particularly turnips, should be used sparingly until after lambing. The two rations here given will be found satisfactory for ewes from 120 to 145 pounds in weight:

Ration No. 1.

2 pounds alfalfa or cowpea hay.
2 pounds corn silage.
½ pound shelled corn.

Ration No. 2.

2½ pounds alfalfa hay
2 pounds corn silage.

If the ewes run on fall wheat or rye during the winter the pasture must be supplemented by some dry or concentrated feed. Silage and roots are not desirable when the pasture is green. One-half pound of cottonseed meal contains the daily protein requirement for pregnant ewes and it should be used when the price is right. However, a quarter-pound along with other feeds containing protein may be better than one containing a larger amount of cottonseed meal.

A Good Pasture to Range Over Provides the Best Exercise for the Breeding Flock.

Exercise for the ewe in winter is necessary if strong lambs are to be produced. They can be induced to take exercise by scattering their feed over the ground which will induce them to do a great deal of walking. Another way is to do the feeding some distance from the shelter. Winter pasture will, of course, solve the problem of exercise. But the flock ought not to be out in rain or wet snow, as a wet fleece is a frequent cause of colds and pneumonia. A sheep will shake off dry snow and be none the worse for having been out in a storm.

Present conditions should be no discouragement to a person who thinks of starting a flock, for the man who succeeds with live stock is the one who goes in and stays in through fat years and lean. Perhaps it is better to go in when prices are low, for then it costs less for foundation stock.

It is doubtful whether a man should start keeping sheep unless his farm will allow the keeping of at least 30 ewes, and in most cases 60 or more will be handled better and more economically than a very small flock. Old ewes should be discarded at five years of age. When this is done and the poorest of the ewe lambs are sold a flock will ordinarily double in size in three years.

CASTOR OIL GOOD FOR SWINE

Simple, Harmless and Generally Effective Remedy for Animals When Off Feed.

Castor oil for hogs that are off feed is a simple, harmless and generally effective remedy. Put salt on the hog's tongue, and when she starts to lick put the castor oil in her mouth with a spoon. Two tablespoonfuls is the right dose. Give it immediately you notice a hog is off feed.

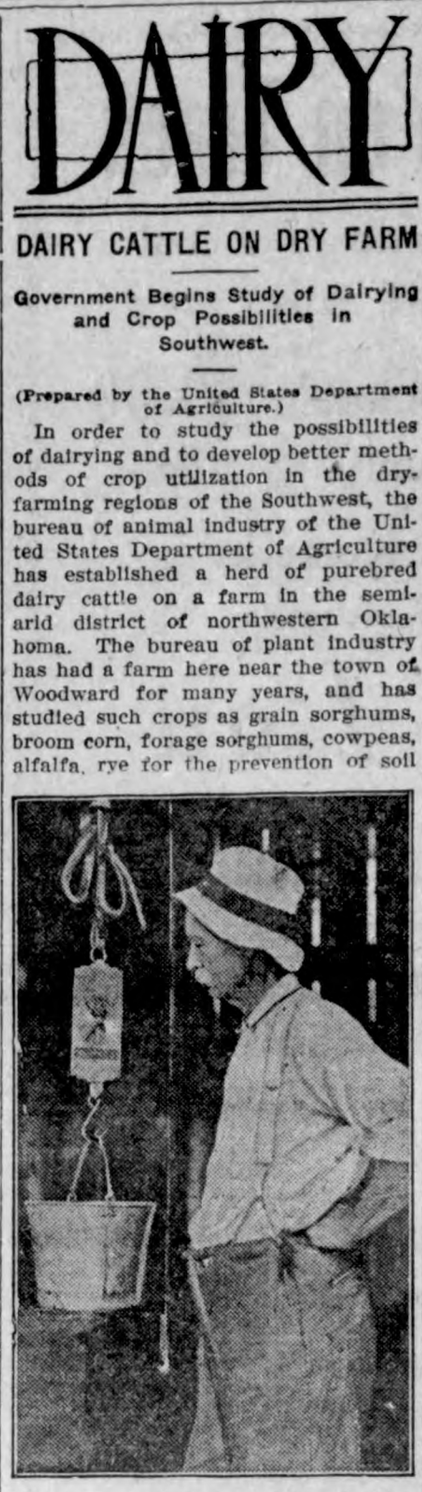
DAIRY

DAIRY CATTLE ON DRY FARM

Government Begins Study of Dairying and Crop Possibilities in Southwest.

(Prepared by the United States Department of Agriculture.)

In order to study the possibilities of dairying and to develop better methods of crop utilization in the dry-farming regions of the Southwest, the bureau of animal industry of the United States Department of Agriculture has established a herd of purebred dairy cattle on a farm in the semi-arid district of northwestern Oklahoma. The bureau of plant industry has had a farm here near the town of Woodward for many years, and has studied such crops as grain sorghums, broom corn, forage sorghums, cowpeas, alfalfa, rye for the prevention of soil blowing, and winter wheat for pasture. From now on the farm will be used co-operatively by the bureau of plant industry and the bureau of animal industry. This is considered a necessary combination, as most of the feeds grown there are of the kind that must be fed largely to live stock.



Weighing Out the Proper Rations Requires But Little Time.

The dairy division hopes to determine whether or not it is desirable to produce live stock under those dry-land conditions, and to grow the crops which will give the largest returns per acre in terms of milk or cream. The question is not one of crop tonnage, but of the amount of finished dairy products that can be turned out. The work here is not designed to discover the best practices for any particular state, but to study practices that will be desirable in the large dry-land regions where only certain crops can be grown.

The people of this little Oklahoma town have shown great enthusiasm in regard to the investigations that the department of agriculture contemplates. The town purchased 160 acres adjoining the old government farm, and turned it over free to the government for a period of 99 years. The voters of the town were almost unanimous in favor of this donation.

The cattle that are being used on this farm are also in the country-wide breeding project being conducted by the dairy division and bulls have been sent from the government farm at Beltsville, Md. In this breeding project, which now includes more than 300 cows and 50 bulls, it is hoped to determine what are the best methods of breeding for the improvement of cattle. The large scale of this investigation should make the results particularly valuable.

CLEAN ALL DAIRY UTENSILS

Where Several Cows Are Kept Water May Be Heated by Means of Small Boiler.

One of the greatest conveniences on the farm where cows are kept is some means for heating an abundance of water for washing the milk vessels. Where a considerable number of cows is kept, heating water by means of steam from a small, low-pressure, upright boiler is desirable, but on the small farm a stove with a basin fitted into the top (or it may be separate from the top) can be purchased cheaply and will serve the purpose, provided the water is properly heated. Water can be pumped from the well directly into the basin. In order to avoid heating the milk room and to do away with smoke and ashes, the water heater should be placed immediately outside of the milk room; and, if elevated, the water from it can be run into the washing vat.

PRUNE APPLE TREE PROPERLY

Orchardists Should Take Care Not to Cut a Hole in Top—Too Much Wood Taken Out.

In working on apple trees be careful not to cut a hole in the treetop. Many people read about opening up the center of the tree in order to let sunlight in and then make the mistake of cutting out too much wood. A tree properly pruned should never show where the limbs come from when viewed at a distance of 25 feet.

Help Your Kidneys

Is a cold or grip keeping you miserable? Are you tortured with dull, persistent backache and sharp, cutting pains? Likely your kidneys need help. Colds and grip fill the blood with poisons. Your overworked kidneys have become weakend filtering these poisons off. That's why you feel weak and depressed and suffer from headaches, dizzy spells and urinary disorders. Don't wait for serious kidney disease. Help your kidneys with *Doan's Kidney Pills*. *Doan's* have helped thousands and should help you. *Ask your neighbor!*

An Iowa Case

Mrs. G. T. Klein, W. Washington St., Pella, Iowa, says: "My housework and the farm work weakened my kidneys. My back hurt and was lame mornings, so I had dizzy spells and specks floated before my eyes which gave me severe headaches. My kidneys acted irregularly. Doan's Kidney Pills cured me and my cure is a lasting one."

Piles

are usually due to straining when constipated.

Nujol being a lubricant keeps the food waste soft and therefore prevents straining. Doctors prescribe Nujol because it not only soothes the suffering of piles but relieves the irritation, brings comfort and helps to remove them.

Nujol is a lubricant—not a medicine or laxative—so cannot gripe. Try it today.

Nujol

For Constipation

Garfield Tea

Was Your Grandmother's Remedy

For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

DYED HER BABY'S COAT, A SKIRT AND CURTAINS WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old, worn, faded things new. Even if she has never dyed before she can put a new, rich color into shabby skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade or run.—advertisement.

Says Sam: There's a whole lot of religion just in getting along with people.

A Lady of Distinction

Is recognized by the delicate fascinating influence of the perfume she uses. A bath with Cuticura Soap and hot water to thoroughly cleanse the pores, followed by a dusting with Cuticura Talcum powder usually means a clear, sweet, healthy skin.—Advertisement.

A girl will never believe a man who tells her he loves her and lets it go at that.

As Advertised.

Jones sent ten shillings to a concern that advertised to send for that sum five pairs of hose by post. When they arrived he looked them over, and then wrote to the senders:

"Hose received. The patterns are vile. I wouldn't be seen in the streets with them on."

Back came the answer: "What are you kicking about? Didn't we advertise that you wouldn't wear them out?"—Pearson's Weekly.

MOTHER! CLEAN CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, give a teaspoonful to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste out of the bowels, and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

Yeast Vitamon Tablets Bring Real Beauty

Banishes Skin Eruptions. Puts On Firm Flesh, Strengthens The Nerves and Increases Energy.

Concentrated Tablets Easy and Economical to Take. Results Quick.

If you want to quickly clear your skin and complexion, put some firm, healthy flesh on your bones, increase your nerve force and power, and look and feel 100 per cent. better, simply try taking two of Mastin's tiny yeast VITAMON Tablets with each meal and watch results. Mastin's VITAMON contains highly concentrated yeast vitamines, as well as the other two still more important vitamines (Fat Soluble A and Water Soluble C). Pimples, boils and skin eruptions seem to vanish like magic under its purifying influence, the complexion becomes fresh and beautiful, the cheeks rosy instead of pale, the lips red instead of colorless, the eyes bright instead of dull. The whole system is toned and invigorated, and those who are under-weight begin to get some firm, "stay-there" flesh. So rapid and amazing are the results that success is absolutely guaranteed. Be sure to remember the name—Mastin's VI-TA-MON—the original and genuine yeast-vitamine tablet. There is nothing else like it, so do not accept imitations or substitutes. You can get Mastin's VITAMON Tablets at all good druggists.

If what use are beautiful features if you have an ugly skin, flabby flesh, hollow cheeks or a scrawny neck? Mastin's VITAMON is positively guaranteed to give you new health, beauty and a well-rounded face and figure.

MASTIN'S VITAMON TABLETS — THE ORIGINAL AND GENUINE — YEAST VITAMINE TABLET

Are Positively Guaranteed to Put On Firm Flesh, Clear the Skin and Increase Energy When Taken With Every Meal or Money Back

If it isn't MASTIN'S it isn't VITAMON

POULTRY

HATCHET BEST FOR SICK HENS

Many Reasons Enumerated Why Ailing Fowls Should Be Killed Rather Than Cured.

(Prepared by the United States Department of Agriculture.)

The most reliable and profitable method for curing sick poultry is the hatchet. At least that seems to have been the experience of a large number of commercial poultry raisers. They find that it does not pay to spend much time or money in trying to bring a sick fowl back to health. One reason is that it takes considerable time, during which the bird will not be laying, and another is that a sick bird is always a menace to the rest of the flock. However, in spite of the efficiency of the hatchet as a cure, it is not good business to be careless just because such

Profits Are Greater Where Houses Are Kept in Sanitary Condition.

an efficient remedy is at hand. Prevention in most cases is not difficult nor costly, and pays big dividends.

The poultry flock is subject to a number of diseases, some of which spread rapidly and cause big losses. The birds may also be infested with various parasites, some of which live on the surface of the body and others in the various parts of the interior. Such parasites, whether they are outside or inside workers, are injurious because they take a part of the nourishment which should be used to put on flesh or to produce eggs, and also because of irritation and inflammation of the parts they attack.

The contagious diseases caused by germs and the weakness and loss of flesh caused by the larger parasites are the most important conditions which the poultryman must consider in order to keep his birds in health. These germs and parasites can be kept down by suitable preventative measures, and the aim of study of the diseases should be to learn prevention rather than cure. Medicines may be given advantageously at times but as a rule, as has been suggested, it is better to kill the sufferer. There is another reason not yet mentioned that makes the killing of sick birds desirable. Birds that first contract diseases are apt to be the weakest ones in the flock and should be culled out.

The more birds kept on a farm or plot of ground and the more they are crowded the greater the danger from contagion and parasites, and the more important the measures for excluding, eradicating, and preventing development of these causes of disease.

The best way to do this is to secure eggs from a flock that has shown no indication of contagious disease for at least a year. If precautions are taken to keep the eggs absolutely clean and they are hatched in a thoroughly cleaned incubator the young chicks will have a much better chance. They will also grow up with a better chance of escaping disease if they are raised in clean brooders and kept upon ground where poultry has not run for some time.

Sometimes these directions cannot be followed explicitly. If all the available ground has been recently used for poultry, fowls should be taken from that part which is to be used for the new flock, a good coating of freshly slacked lime applied to the surface, and a few days later it should be plowed. Then it should be cultivated three or four times with intervals of a week, and finally sowed to a small grain crop. In a few months the greater part of the germs will be destroyed, but it is better to leave the ground unoccupied by poultry until a winter has passed.

It is more difficult to raise a new flock free from parasites if the eggs are hatched by hens, for hens may carry lice and mites and various parasites. For this reason it is a good idea to select hens for brooding from a flock free from disease and pests.

To keep germs and parasites from developing to a great extent, poultry houses need to be cleaned frequently and the drinking fountains and feed troughs need a weekly washing with boiling water or other disinfectant. If any lice or mites are found on the birds or in their houses, the roosts and adjoining parts of the walls must be painted with commercial carbolineum or a mixture of 1 quart kerosene and 1 teacupful of crude carbolic acid or crude cresol, or the house may be whitewashed with freshly slacked lime and sprayed with kerosene emulsion. Dust the fowl with sodium fluoride or lice powder.

SEMI-MOURNING, AS IT WERE

Offer of That Red Skirt Made Caroline Reconsider Her Demonstration of Sorrow.

Every Saturday Caroline used to go forth on a cleaning job. One day she appeared robed in black.

"What's the matter?" her employer asked.

"Oh, Miss Sophy," she moaned, "my uncle he is dead, and I'se gwine to mourn. I'se gwine to mourn for him four months."

The lady expressed sympathy and added:

"I had out that red skirt of mine for you. I thought you might like it; but of course you won't want it now."

"No, Miss Sophy; I'se gwine to mourn four whole months."

Next week brought Caroline as usual.

"I been thinkin' 'bout that red skirt, Miss Sophy," she said. "It's just the kind of a red skirt I like, and I believe from now on I'll mourn from the waist up."—Everybody's Magazine.

Santa Claus Best Advertiser.

Christmas trees undoubtedly represent a destruction of timber of great value. They also represent a stimulation to business which every merchant depends upon in his annual calculations. It pays to advertise, and Santa Claus, though a myth, is the greatest advertiser on earth.

Neglect the "beg pardons" and presently you will hear cuss words.

DIDN'T SEE END OF INCIDENT

Gap Johnson Had More Important Thing to Attend to Than Witnessing a Hanging.

"While I was in Tumlinville yesterday," relates Gap Johnson of Rumpus Ridge, Ark., "a mob came r'arin' around a corner hauling along a gent with a rope around his neck, and flung the end of it over a limb within forty feet of me."

"Did they hang him?" interestedly asked an acquaintance.

"Dogged if I know! You see, just then a feller bantered me for a hoss swap and drug me off to look at his nag, and I didn't learn how the anecdote came out."

"What had the gent done?"

"Well, I heerd somebody say that he'd either been selling bone dry licker to the mob or else he'd refused to do so; I forgot to ask which."—Kansas City Star.

Domestic Science.

Selby—Won't you dine with me?

Grimes—Thank you, I've just dined! I have been home and had my regular meal of apples, apricots and asparagus.

Selby—Isn't that a rather odd combination?

Grimes—Well, you see, my wife went to a domestic science school and had to leave after the first week—before she had reached the second letter of the alphabet!

There is no cure for overwork but to quit.

GOOD JOKE ON DANISH KING

Monarch Jumped Too Quickly to Conclusion That Eskimo Was Actuated by Loyalty.

An amusing story of the king of Denmark's recent visit to Greenland was recently told by M. Aagaard of the Danish legation, to members of the Danish club in London.

As the royal yacht was approaching Greenland a dark speck became visible on the open sea. It proved to be a solitary Eskimo in his little cayak (native canoe). The Eskimo came on board and his loyalty in having braved the perils of the sea in such a frail craft assured him the warmest of welcomes. The king presented him with a cigar and, what the Eskimos most highly prize, a rifle.

On landing, the king described the incident to the Danish commissioner in Greenland and asked him who the man was.

The commissioner, in accents of horror, replied: "The man's an escaped convict. He broke prison yesterday, stole a canoe and put to sea. We thought he had been drowned."

Five-Pound Box, at That

In the good old days we could make a girl's heart flutter by handing her a lozenge with a love message stamped upon it; but nothing less than dollar-a-pound candy makes any impression upon the cardiac organ of the modern girl.—Boston Transcript.

Imitation cheerfulness is better than none.

One third of your life is allotted to sleep. Do you get your share?

The most important period in the process of applying nutrition to the repair of the body is while you are asleep. For the most favorable transformation of digested food into nerve and cell tissue, so doctors tell us, sleep is absolutely essential.

Is it any wonder that those who suffer from lack of proper sleep are weak, pale and lacking in energy or ambition?

One of the causes of insomnia is nerve-irritation from tea and coffee drinking. Tea and coffee both contain caffeine, which has a tendency to cause undue stimulation. The irritating effect of caffeine often results in insomnia, depression, and a weakened nervous system.

You can easily overcome these troubles by drinking Postum instead of tea or coffee. Postum is a delicious, satisfying cereal beverage, and it is absolutely free from caffeine, or any other harmful substance.

Ask your grocer for Postum. Drink this delicious, refreshing beverage for ten days. Then see if you do not feel better and more clear headed, and if you do not sleep better at night—as so many other people have proved for themselves.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

NOTICE OF SPECIAL SCHOOL ELECTION
BOND PROPOSITION
MESERVEY, IOWA

Publis Notice is Hereby Given. That a special election of the Consolidated Independent School District of Meservey, in the counties of Cerro Gordo, Hancock, Franklin and Wright, State of Iowa, will be held on the 17th day of February. 1922 at the City Hall, Meservey, Iowa, from one o'clock P. M. until six o'clock P. M. and that at said election there will be submitted to the voters of said Consolidated Independent School District to be by them voted upon. the following proposition:

Shall the Consolidated Independent School District of Meservey, in the counties of Cerro Gordo, Hancock, Franklin and Wright, State of Iowa, issue bonds in the sum of Sixty Thousand Dollars ($60,000) for the purpose of constructing and equipping a new school house?

At which time and place all the voters of said Consolidated Independent School District are hereby notified to appear.

This notice is Given by Order of the Board of Directors of said Consolidated Independent School District, pursuant to a sufficient petition with the requisite signatures in accordance with Section 2820-dl et seq. of the supplement to the Code of Iowa, 1913.

Dated at Meservey, Iowa, this 13th day of January, 1922.

J-19-26-F-2-9 K. Clarence Ruigh, Secretary. Board of Directors.

NOTICE TO BIDDERS
SCHOOL BUILDING--BIDS CLOSE FEB. 16, 1922 AT 1. Pm
MESERVEY, IOWA

Bids are desired on a school building, to be erected at Meservey, Iowa, by the Board of Education of the Consolidated Independent School District of Meservey, Iowa. Bids will be received by the Secty. of the Board of Education Mr. K. Clarence Ruigh at his office in the Farmers Savings Bank at Meservey up to 1Pm Feb. 16, 1922. Bids will be opened immediately and read publicly. Bids must be accompanied by certified checks or bid bonds in amount as follows:

General Construction .. Check or Bid Bond	$1500.00
Heating and Ventilating ..Check or Bid Bond	$1000.00
Plumbing ..... Check or Bid Bond	$400.00
Seating ..... Check or Bid Bond	$200.00
Equipment ..... Check or Bid Bond	$200.00

Certified checks or bid bonds must be made out unconditionally to Mr. K. Clarence Ruigh, Secretary Board of Education. as a guarantee that the bidder, if successful, will enter into contract with the Said School District and furnish a bond in full amount of the contract in the form outlined in the specifications, guaranteeing the completion of the building and the payment of all leins and claims.

The plans and Specifications will be on file after Feb. 1, 1922, One copy only—at the office of the Secretary, one at the office of the Architect, 1353 University Ave., St. Paul, Minn., and one at 211 M. B. A. Building, Mason City, Iowa. also at the Builders Exchanges of Des Moines, Iowa, St. Paul, Minn. and Minneapolis, Minn.

Contractors may secure plans by application to the Architect, 1353 University Ave., St. Paul, Minn., upon payment of a deposit of $10.00 to insure return of plans and specifications. The entire amount will be refunded to all contractors who file their bids with the secretary, likewise the entire amount will be forfeited if the contractor fails to bid. Sub contractors and material men will be charged the exact cost of preparing the blue prints and specifications for such drawings as they may require to figure the part of the work they are bidding on.

Contractors will be required to bid on the exact form of bid outlined in the bidders blanks, any deviation therefrom will invalidate the bid and same will not be considered.

Contractors may combine any part of the work or bid on the entire contract by furnishing with their bid the certified checks or bid bonds required above.

The Board of Education reserves the right to accept any or reject any or all bids.

Signed:
Consolidated Independent School District of Meservey. Iowa.,
By K. Clarence Ruigh, Sec'ty.
Board of Education.

Strat an Inventory

Now is a good time to take an inven of the farm, say the agricultural econimics experts at Iowa State College. List all the available impleents and strat the year on a business basis.

SAYS WORD IS MISPLACED

Writer Criticizes the Too-Frequent Employment of Phrase, "The Psychological Moment."

A correspondent of the London Times sternly scolds all who are so slipshod in their speech as to employ that most useful of phrases, "the psychological moment," says the Living Age. Asserting that by no possible distortion of the English language can it legitmately be forced into its current meaning of "the proper, or fitting, moment," he proceeds to give a history of the phrase which is vastly more interesting than his diatribe against its users.

"The psychological moment" is an English translation of the French le moment psychologique, which is, in its turn, a mistranslation of the German das psychologische moment, which was used in the Neue Preussissche Zeitung in December, 1870, when the bombardment of Paris was about to begin. The German writer said: "The psychological momentum (das psychologische moment) must be allowed to play a prominent part, for without its co-operation there is little to be hoped from the work of the artillery." Confusing the neuter German word das moment (which means "momentum," and, as here used, a dynamic part of the human mind urging it to action), with the masculine der moment (which means moment in its ordinary English sense) the French translated it le moment psychologique, and with derisive gayety incorporated it into the slang of the hour.

The French writer Francisque Sarcey, in his "Diary of the Siege of Paris," tells how the beleaguered Parisians pluckily made game of their enemy's phrase:

"You know how we laugh over that 'psychological moment.' The word has become all the rage. . . . Everybody says, 'I'm hungry. The psychological moment for sitting down to dinner has arrived.' . . . When the first ball fell in the streets of Paris, everybody cried laughingly, 'Tiens! They must think the psychological moment has arrived!'"

The facts are vouched for by the new English dictionary, but for all the lexicographers may say, "the psychological moment" is too firmly fixed in the usage to be withdrawn readily.

Indians Doing Well.

Liberty bond subscriptions by Indians of the World war, running into the millions of dollars, first awakened the public to the importance of the race as a business factor. A glance at their income returns is enlightening.

In Oklahoma about 116,000 Indians received during the fiscal year ended June 30, 1920 (the latest data available), incomes aggregating more than $39,000,000. In North Dakota 9,000 received more than $1,500,000; in Utah more than 1,000 received nearly $2,500,000; and in South Dakota 32,000 received about $4,333,333. The total income of the race was $72,696,431 that year, and since then has greatly increased.

Many of those, not rich through oil, are busy with basket weaving, pottery and other native pursuits; but they make good farmers, too, and about 50,000 of them are thus engaged. The crop raised, for instance, in Oklahoma and in South Dakota each amounted to substantially more than $1,000,000. The total value of Indian crops was nearly $37,000,000 in the year named.—The Nation's Business.

Pearl Johnson has been absent this week on account of sickness.

Adala Schroeder was absent Monday and Tuesday forenoon on account of a cold.

The basket ball boys had a meeting Friday night after school to elect another coach as Sam Harvey is going to be busy from now on and could not help us any more. We sure appreciate what he has done for us and thank him heartily. Marvin Weigmann who was elected cooach, has accepted his job and we are sure he will do his best to show us the right way to play the game as he has played on a college team. He was down to practice Friday evening and by te looks of the maneuvers that were accomplished he will prove all that has been expected of him.

Blanche Medaus has been absent this week.

The 9th Grade in General Science are taking chemistry now.

The 9th Grade Algebra Class had an examination over factoring Wednesday.

By the request of the basket ball squad Prof. Wilson has decided to give them nearly every day a few exercises and gymnastics to help keep them limbered up a little. On days when the weather will permit all the boys in High School and in the Grammar room are to participate in these exercises which will be given out doors. This is not entirely compulsory but it is requested that everyone should take these exercises. Our first lesson was Wednesday morning during the time which we generally have for opening exercises.

Grammar Room

The Eighth Grades from the country, who took the County Exams. in Klemme were: John Fuller, Esther Fuller, and Alvin Goll.

Lavohn Larsen has been absent a week.

A new pencil sharpener was installed in the Intermediate Room.

—T—

MANY WRITE EIGTH GRADE EXAMINATIONS

Two Hundred Twenty Five Prepare For High School Work In County

About two hundred twenty five pupils in the eigth grades of the county schools wrote the state examination last week. This is a greater number than have ever written in any previous year. These examinations are under the immediate direction of the State Superintendent The questions are made out by the State Department. The dates for writing these examinations are also fixed by the same authority.

Each County Superintendent is required to conduct the examinations in his own county, and the papers are graded under his direction.

The purpose of holding the examination is to determine what pupils are entitled to admission certificates to any approved high school in the state. Every child in the state of school age, now has the right to attend some approved high school at the expense of his home school corporation. Since tuition up to twelve dollars a month may now be charged for non-resident pupils, it is quite necessary that only those capable of doing high school work be granted the high school admission certificate. It is also an injustice to a pupil to admit him to High School unless he is prepared to do the work, for it means to him failure and disappointment.

Since over two hundred pupils wrote the examination in this county, making a total of over two thousand papers to correct. it will be at least two weeks before pupils will receive the report of their examination.

J. R. Baggs, County Superintendent.

Obituary

EMELIA CHRISTINE SCHAEFER

Mrs. Emelia Christine Schaefer, nee Lembgen, was born July 25th, 1869, at Lowell. Wisconsin. In June 1902 she was united in marriage with Mr. C. C. Schaefer and shortly afterward came to Hancock County, Iowa, where with her family she lived on a farm some three miles west of Klemme. Four children, two sons and two daughters were born to them. One son preceded the mother to the eternal home.

From her youth up, the deceased had the privilege of Christian influence and training bot of church and home. And these blessings were not in vain in her life. In early childhood she learned to love, and loved to serve her Christ. She lived a very devout, conscientious Christian life. To her, God was a loving Father;; Jesus Christ a personal Saviour; the Bible, the unquestionable Word of God, a ligh upon her path and a comfort to her soul. In her home as wife and moter she was kind and affectionate, ever mindful of the best interests for her family, and by example and precept holding before them the noble, the pure and the true.

The days of her great suffering, which were many, were to her as the refining fire that purifies the gold. As the days passed her submission to the Will of God became more perfect. She loved to be with her dear ones here, but she often said, "If it pleases God, I would like to be releaved and go home to see Alven." How it did bring the light to her eye and smile to her face when we together read such portions of scripture as P's. 23, John 14 and 15 Chapter, etc. How she did desire and several times asked us to sing for her some of her favorite songs. Two days before her departure she told the writer, "I have tried to do my best for my family, to admonish my children and warn them of the dangers awaiting our youth at this present age and I am sure it will bear fruit in their lives sometime." May God grant her wish.

The deceased leaves to mourn her so early departure. her husband, one son, two daughters, her aged mother, one brother at Milwaukee, one sister who resides with her mother at Watertown, Wis., more distant relatives and many friends who live in the glorious faith of meeting again in the Home of the Redeemed.

—Rev. W. C. Bergmann.

Mrs. Schaefer's death occured early Monday morning, February 6th. Funeral services were conducted at 1:30 o'clock Wednesday afternoon, from the First Methodist Church by her former pastor, Rev. G. H. Wessel, of Algona, Iowa, assisted by Rev. W. C. Bergmann, of Klemme.

Card of Thanks

We wish to thank all our frineds and neighbors for the help they gave and interest they showed us in the time of our bereavement. Also for all tokens of love in bouquets of flowers, etc.

C. C. Schaefer and Family.

HAPPENINGS AT LIBERTY TOWNSHIP CHURCH

Rev. Wessel filled the pulpit last Sunday morning. In the evening there were no services on account of the Epworth League leader ot being able to be there.

The basket social that was planned by the League for last Thursday was postponed until Tuesday of this week, on account of the storm.

A couple of the Sunday School teachers were absent last Sunday .

Quite a number turned out last Sunday morning and there is no reason why the number shouldn't keep on growing.

Dance Hall Devil Mystery Now Cleared Up; Devil Shot

FAMOUS DANCE HALL DEVIL OF THE NORTH SHOT BY BOY

Methodist Preacher Had Elaborate Devil Costume To Break Up Dances

Some few weeks ago we printed a sensational bit of news in the Times telling of the devil who made his appearance at a questionable dance at Hutchinson, Minn., and other resorts. The devil was a great mystery and no one could solve the riddle. The following news dispatch from Fairmont, Minn., tells the story:—

Fairmont, Minn.. Feb. 7.—The mystery of the Devil, who broke up a questionable dance in the vicinity of Hutchinson, Minn., by appearing in the middle of the dance floor with fire streaming from eyes, mouth and tail, has been solved, according to a story told by Miss Louise Miller, who has returned from a visit with relatives in that part of Minnesota.

His Satanic Majesty did not stop with one appearance, according to Miss Miller's report, but appeared at several barn dances, each time frightening the dancers away, until finally a reward of $5,000 was offered among those who frequented these dances to anpone who would shoot the Evil One on his next appearance.

A 14 year old boy took the dare. The Devil, shot through the abdomen proved to be a human and was rushed to a hospital where he is still in a critical condition, according to the report.

His Satanic costume was a very wonderful affair, equipped with electric batteries to give the effect of fire. He came down on a rope thru the cupola spreading terror as he came.

The man who conceived of this idea to put an end to the dance evil and who so nearly proved a martyr to the cause is said to be a Methodist minister of that vicinity.

—T—

BASKET SOCIAL

There will be a Basket Social at Liberty No. 8. School, 3½ miles west of Klemme, on February 21st. A play, entitled "His Uncle John" will be given by the eigth grade. Every one welcome. Ladies please bring baskets—boys, please don't forget your cash. Celia Brouwer, teacher.

—T—

MILAGE BOOKS TO COME BACK

Will Mean Cheaper Railroad Rates

A bill has been presented in congress demanding that railroad mileage books. one to five thousand miles be again placed on sale, at the rate of two and one-half cents per mile. The traveling public has long felt the necessity of lower rates, and the prospects are that favorable action will be taken on them.

On Sunday evening at 7:30 o'clock the Epworth League of the First Methodist Episcopal Church will put on a Lincoln Literarp Program which every person in Klemme should hear. Come to hear something new and beneficial about this immortal man.

FIRST METHODIST CHURCH

Was much pleased to learn of the large audiences that in the absence of the pastor, greated Rev. G. H. Wessel, of Algona, Iowa, in both the morning and evening services last Sunday.

On Thursday evening the regular prayer service will be held at the home of Mr. August Ridder.

Sunday morning sermon at ten o'clock.

Sunday School at eleven o'clock.

In the evening the Epworth League will give a Lincoln Literary program which will be well worth coming to hear. Much thought and also time has been given in the interest of this program and a full house should greet those that take part in it.

Lincoln, the immortal man, will never die in the hearts of his countrymen.

Program to begin at 7:30 o'clock.

All are most heartily welcomed to all these meetings.

W. C. Bergmann, Pastor.

FINE SERVICES AT THE ENGLISH METHODIST CHURCH

As there is no regular pastor at the English Methodist church at the present time Prof. Harry E. Wilson of this city has kindly volunteered to occupy the pulpit next Sunday for the morning services.

Mr. Wilson ably filled the pulpit last Sunday morning and gave a very interesting and instructive talk.

Mr. Wlson has had a great deal of experience along this line as he was actice in Y. M. C. A. work both in this country and in France during the war and it is a real treat to be able to hear him talk. The church feel fortunate in being able to procure him to fill the pulpit. All are invited to come out and hear Prof. Wilson next Sunday morning at ten o'clock. Sunday school will be held at eleven o'clock to which all are also invited.

Card of Thanks

We wish to thank our many friends and neighbors for their kind assistance during the sickness and death of our wife and mother. Also wish to thank all who contributed flowers in her memory, and thanking all who helped with our farm work.

A. C. Andreasen and family.

The school board of Cedar Rapids has prohibited extravagance of expenditures in social affairs among the high school students. A plan for a party to cost each boy $12 was the starting point of the agitation among the board members.

Joe, the hound that tracked Earl Throst. murderer of Inga Magnuson of McGregor, has credit for landing Louis Johnson, 19 years old, who robbed the C. F. Craner drug store and got as far as Mason City where he gave himself up to the Sheriff because he was cold and hungry. The ound tracked him from the store to the Marquette depot.

An easy mark in early life generally has a hard time in old age.

Klemme Consumers Not Satisfied With Iowa Falls Electric Rate

Enie-menie-minie-mo!

THERE'S A BIG FAMILY AT LIDDERDALE, IA.

A news dispatch reveals another large Iowa family, this time at Lidderdale, a town on the C. G. W. railroad south west of Fort Dodge.

Every meal time eighteen persons gather about the dinning table in the home of Mr. and Mrs. John Peters, near Lidderdale, a scene like a regular old fashioned threshing crew at meal time. Father and mother and sixteen children. And when the family is at home—three children, two boys and one girl, married, there are twenty-one to feed. There are sixteen children still at home, a son having just been born to them. Nineteen sons and daughters—eleven sons and eight daughters have been born to this family and all are living. The three married children live in the same neighborhood.

—T—

CONTRIBUTED

We who were present last Sunday to hear Rev. George Wessell's wonderful sermon must admit that if we, all of us, live up to the good Lord's will, this town of Klemme and surrounding country, would be a paradise instead of what it is now. The text was a long one but how wonderful and full of good promises. May the good Lord help all of us to come before him and pray forgivness. Let us all come and seek salvation, and pray to our Lord Christ for clean hearts and a better world we would see.—By One Who Lissened.

A MID-WINTER'S WAIL

From North Dakota it is reported that one of Harvey's fastidious newly married ladies kneads bread with her gloves on. The incident may be somewhat peculiar, but there are othrs. The editor of this paper needs bread with his shoes on; he needs bread with his shirt on; he needs bread with his pants on; and unless some of the delinquent subscribers of this old rag of freedom pay up before long he will need bread without a deuced thing on—and North Dakota is no Garden of Eden in the winter time.—Fessenden (N. Dak.) Advertiser.

—T—

The County Auditor said Monday he had sold 964 dog licenses. According to the assessor's books of last year there should be something like 1500 dogs in the county. The assessors will take a list of the dogs that have not been licensed and a list of the owners will be published in May and a penalty of $1.00 will be added to the license. If you have a dog you had better pay the license and save paping the penalty.

A Valentine Dance will be given at the Idle Hour Theatre on the evening of Tuesday. February 14th. The famous Hawkeye Orchestra of Britt will furnish the music. Good time assured to everybody. Come, yourself and friends are invited. 1wc

The one who is fond of repeating that "all fools are not dead yet," knows of one that is'nt.

ELECTRICITY RATES ARE FORCED DOWN

Now On Pre-war Level of 1913

Mason City, Iowa, Feb. 7.—Announcemet was made this afternoon by F. J. Hanlon, general superintendent of the People's Gas and Electric company here, that after a mroning's consultation with Mayor A. H. Beecher the company had decided to reduce electric and power rates per kilowatt hour to prewar prices, or to a level with those prices effective in 1913. Electricity will be reduced one-half cent and power one-fourth of a cent, effective with the Marche billings.

KLEMME TO STICK WITH GARNER ON IOWA FALLS ELECTRIC LIGHT QUESTION

Councils Hold Joint Meeting To Talk Things Over

Feeling is running high at Garner concerning the Iowa Falls Electric Company's present rates there and the question of whether or not Garner will grant them a new franchise when their present franchise expires next month.

Garner, along with a great many other towns, has a high rate and they want the Iowa Falls Company to get off their "high horse" and come to as low a rate as their lowest rated town which they serve.

There is also talk of building a big plant at Garner, which is also receiving strong support here in Klemme.

The Klemme Council met with the Garner Council Monday and were in favor of helping Garner build a plant if the Iowa Falls Company did not come down on the rates here to compare favorably with the lowest rates the Company are giving other towns. The Garner Council are sitting tight with the Klemme Council in their demand.

All that Klemme is asking for is as low a rate as the Iowa Falls Company are giving their best costumer, meaning as low a rate as any town which they serve. Garner probably wants the same, and if the Company will not grant this, then the two towns here will build their own plant and they should be able to operate as cheaply as any other plant of a similar nature.

We have a higher rate here than at Garner, although our rate is 16½ cents per KWH, we understand there is no reduction for the amount used, while at Garner they have a sliding rate beginning at 18 cents for the first 10 KWH, from 10 to 20 at 16 cents, for the entire consumption, 25 to 35 at 15 cents for the entire consumption. from60 KWH up at 10 cents for the entire consumption. It will be seen that the large user at Garner gets a very cheap rate while the small user pays big for what he gets. And here at Klemme all pay the same, big or little.

The rate at Belmond is somewhat different again and is as follows:

For the first 20 KWH consumed 16 cents per KWH.

For the next 20 KWH consumed, 13 cents per KWH.

For all consumption in excess of 10 KWH, 9 cents per KWH.

So, a customer using 30 KWH would pay $3.20 for the first 20 KWH; $1.30 for the next 10 KWH, or a total of $4.50. while in Klemme the same amount would be $4.95. Why should our rate be higher.

On heating rate we pay 5c per KWH straight. At one time we had a sliding rate on power which made it quite reasonable. We should be given back the old power and heating rate also. The war is over now and it is about time to get back to prewar rates.

The former rate on heating was 8 cents for the first 50 KWH, 3½ cents for the next 50 KWH and 3 cents for all over 100 KWH, which made it about half as cheap as the present 5 cent rate straight.

Perhaps the Iowa Falls Company will explain a few things, one especially we would like to know and that is: "Why don't Klemme have as low a lighting and power rate as the lowest rated town served by the Iowa Falls Company?" Why don't they treat all towns alike?"

The Iowa Falls Company have a franchise here which will be effective for a number of years yet, but that does not prevent the Council from granting another franchise to the Garner-Klemme plant should they decide to build. Garner and Klemme are asking for a square deal, no lower rate than any other town, but they want just as low a rate and they will be satisfied.

DUTY WELL DONE

Springfield Citizens Worthily Honored Lincoln's Memory.

Writer Who Knew the Great President Commends Placing of Tablets at Points of Interest.

Springfield citizens have discharged a duty which the nation has owed to future generations. They have recalled the memory of Abraham Lincoln's life in Springfield by placing thirteen bronze tablets at places made historic by events in Lincoln's career while he resided there, writes Henry B. Rankin in the New York Tribune.

These tablets bear his name and tell of the events that transpired at the various places and dates. The bronze, the designs and the workmanship represent the best quality of memorial art.

To younger citizens who never knew him and to the thousands of visitors who are attracted to Springfield only because it was the home of Lincoln, these tablets will be most revealing of his presence in the Illinois capital. These memorials are a living embodiment of the Lincoln spirit in Springfield and are as appealing and more voiceful than even his tomb. He still lives at Springfield now in daylight

The Old United States Court Building, Springfield, on the Third Floor of Which Was Lincoln's Law Office.

as well as at midnight and limited no longer by Lindsay's poetic vision of "Lincoln Walks at Midnight." The poet wrote:

It is portentous and a thing of state
That here at midnight, in our little town,
A mourning figure walks, and will not rest.
Near the old Courthouse pacing up and down.

Some of the locations marked are more intimate than others to the writer, though all are worthily and correctly placed. Four of the tablets mark places and events where I was present and familiar with the events cited. These are the ones at the old Journal office, where Lincoln received the telegram notifying him of his nomination; at the C. M. Smith building, in the third story, where Lincoln wrote his first inaugural address; also the tablet reciting events at the State house (now Court house), where his great speeches were delivered and where his body lay in state and from where it was borne to the tomb. The fourth tablet marks the law office which Lincoln occupied the last seventeen years he was in Springfield. This is to me the most appealing and sacred of all in memory's retrospect.

Lincoln's Law Office.

The first three mentioned I will not further refer to here, as they were fully described in my "Personal Recollections of Abraham Lincoln."

Of the Lincoln law office some more intimate recognition of the part it had in Lincoln's life deserves mention at this time. This office was the center of Lincoln's legal, political and literary activities in Springfield. Volumes might have been written of what took place here, had there been such a competent, gossiping scribe as Boswell always present to take notes of what transpired.

It is now more than sixty years since I passed daily under the swinging sign, "Lincoln & Herndon," and up and down the stairway, into and from a back room, located in what was then a two-story building. This had been the law office of Abraham Lincoln for the last seventeen and most strenuous years he spent in Springfield.

It was my privilege, for several of those later years, to share in that office its routine as a student, and to enjoy the personality and instruction of this most remarkable man of his century.

The end of his presence at the law office came the evening of February 10, 1861. I recall seeing Abraham Lincoln passing that night, for the last time, out of his office and down the narrow stairway to the street. On the following morning he departed from Springfield on his mission into the strange, strenuous sacrificial life that has embalmed his memory forever to endure in the heart of the ages.

Foresaw Coming Events.

No place in Springfield, not even his tomb, throngs with memories such as this office brings to the students of Lincoln's history. Lincoln's most studious years were spent here, as well as the most aspiring ones. It was here that he grew clear visioned on the future's national problems and threw his whole soul into their solution. Here he acquired his dexterous skill in handling human implements. Political events rapidly succeeded each other in those years he spent there. These arose to a climax at length with swiftness unlooked for by most others. Not so to Lincoln. They culminated at last suddenly, bringing fierce strife of brother against brother, of state against state. Dark clouds filled the political and national skies, bursting at last into a storm of bitter hate and bloody war. This had become inevitable.

When that hour of need had struck it was from this office there came a man fully prepared by years of study for those fateful hours. An honest,

The Lincoln Home at Eighth and Jackson Streets, Springfield.

tall, gentle, strong man, heroic and sad, who was constitutionally called by his fellow countrymen from this office and placed at the helm of state to preserve our national union. In that time of political turmoil and civil revolution he guided his country safely through blood and fire and tears, with a steady, unshaken faith in God and man.

Truly "A Man for the Ages."

It was not the opportunity nor the stress of great occasions, such as the delivery of his speech in the Illinois state capital on "a house divided against itself cannot stand," nor the debates with Douglas that followed it, nor the opportunity before a New York audience at Cooper institute, that account for or explain the progressive development of Lincoln.

It was not Salem, Springfield or Washington; it was neither Stuart, Logan, Herndon, Douglas, Baker, Hardin nor the able men in his cabinet and who surrounded him in so many other capacities, both civil and military; who can have the credit of prominence in the making of Abraham Lincoln, much as those places and some of those men have contributed to it.

After and beyond all these influences and those times and men that he there moved among, and rising beyond all comparisons with them, we clearly discern the unique and exclusive personality of Lincoln himself.

WRITTEN AT TOMB OF LINCOLN

Here idle lies behind this gate,
Where little children and the great
Forget-me-nots and laurel lay,
All the useless, hallowed clay
Of Lincoln, in his lonely state.

A spirit, vast, compassionate,
Unfaltering in a world of hate
Of little men who rage when they
Hear idle lies.

Lord, how we silly humans prate
Of life's inconsequential date,
And epoch passes while we pray,
An epic sung while asses bray;
A god went by that we, too late,
Here belize!

MOTHER! OPEN CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Your little one will love the "fruity" taste of "California Fig Syrup" even if constipated, bilious, irritable, feverish, or full of cold. A teaspoonful never fails to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the sour bile, and undigested food out of the bowels and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup," which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

A Lover of Quiet.

"You wouldn't think it to look at me, sir," said the seedy caller in quest of a famous jazz orchestra. Even if I do say it, I was a bear with drums, cowbells, dishpans and cymbals."

"You were, eh?" replied Mr. Grumpson. "Well, I'm a wolf for peace and quiet. I've discharged no less than 17 stenographers for tapping on the floor with their toes and rapping on desks with pencils."

"In that case," said the seedy caller, hastily, "I'll wish you good morning."—Birmingham Age-Herald.

IN BUYING ASPIRIN ALWAYS SAY "BAYER"

Look for the Name "Bayer" on Tablets, Then You Need Never Worry.

"Bayer Tablets of Aspirin" can be taken safely for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Joint Pains, Neuritis, and Pain generally.

To get quick relief follow carefully the safe and proper directions in each unbroken package of "Bayer Tablets of Aspirin." This package is plainly stamped with the safety "Bayer Cross."

The "Bayer Cross" means the genuine, world-famous Aspirin prescribed by physicians for over twenty-one years.—Advertisement.

NOT A MATTER FOR POLICE

Elderly Gentleman Meant Well, but He Had Not Allowed for Possible Contingencies.

The wisest person may sometimes make a serious mistake by judging entirely by appearances, as is shown by this case.

A careless young woman, in starting to leave a car, dropped her purse. A young man, who evidently intended to leave the car at the same time, saw her drop the purse, picked it up and put it into his pocket.

But his action had not been unnoticed. Just as he stepped from the car an elderly man gripped him by the arm and whispered: "If you don't give that purse to the young lady this instant I'll expose you."

"Yes, certainly!" gasped the astonished young man. Then, with a grin, "I beg pardon, Marie; you dropped your purse."

"Oh, thank you, Harry," she replied, as she took it.

"I hope you are satisfied," said Harry, turning to the elderly man. "The lady is my sister."—Pittsburgh Dispatch.

Clarification.

"Did you make your ideas perfectly clear to your auditors?"

"If I did," rejoined Senator Sorghum, thoughtfully, "I hope some of 'em will take the trouble to drop around and explain 'em to me."

THIN FRAIL PEOPLE SHOULD TAKE TANLAC

Hundreds of Men and Women All Over America Appear To Be Physical Wrecks Simply Because Their Systems Are Starving for Nourishment.

There are hundreds of thin, run-down, nervous men and women all over the United States who should be strong, sturdy and vigorous, with rich, red blood tingling through their veins and feeling brimful of life and energy, if they would only profit by the experience of others all over the United States and Canada, and assist nature to digest the food they eat, by simply taking Tanlac.

Millions of people have not only been relieved of the most obstinate forms of dyspepsia and indigestion by Tanlac after other remedies have failed, but large numbers of them have reported a remarkable and rapid increase in weight and a return to normal health and strength by its use.

In fact, so phenomenal have been the gains in weight by thin, frail people through the use of Tanlac that this remarkable preparation is now being proclaimed everywhere as the World's Greatest Tonic.

The food people eat does them absolutely no good unless they digest it properly. When you suffer from indigestion and other forms of stomach trouble, the food does you harm instead of good, because food which is not digested stays in the stomach and ferments, causing pains, swelling, gas on stomach, shortness of breath, bad taste in the mouth, dizziness and many other disagreeable symptoms. If this condition is permitted to run on for an indefinite period the entire system becomes saturated with poisons, the patient becomes thin and pale and in time various complications are apt to result.

Tanlac is a powerful reconstructive tonic and quickly overcomes this condition by aiding nature to eliminate the impurities from the system in a natural way and enable the vital organs to properly perform their functions. That is why it is called Nature's Medicine.

In fact, there is not a single portion of the body that is not benefited by the helpful action of Tanlac, which begins its work by stimulating the digestive and assimilative organs, thereby enriching the blood and invigorating the entire system. Next, it enables the weak, worn-out stomach to thoroughly digest its food and convert the nourishing elements into bone, blood and muscle. The result is you feel strong, sturdy and well with the proper amount of flesh, as Nature intended. Sold by all good druggists.

Pithy Paragraphs.

Thousands of men are striving, with their best light, to introduce Christianity into their business, and you and I are not helping them by shouting "greed" into their ears.—Marion D. Shutter.

The new church will be founded on moral science. Poets, artists, musicians, philosophers, will be its prophet teachers. The noblest literature of the world will be the Bible. Love and labor, its holy sacraments. Truth its supreme being—and instead of worshiping one savior, it will gladly build an altar in the heart for every one who has suffered for humanity.—Ralph Waldo Emerson.

The piling up of armaments is causing general bankruptcy, anarchy and perpetual and universal war. If governments, after the lesson of the war, do not agree simultaneously to limit their armaments, they commit suicide.—Baron d'Estournelles de Constant.

Caused a Grin.

The sidewalk was a bobbing garden patch of umbrellas.

Around the corners of buildings the wind swept, cold and wet and miserable.

The crowd huddled along, morose, subdued. . . .

On one corner a newsboy was standing, the rain beating blithely in his face as he threw back his hair and yelled:

"Read all about the beautiful winter down in Florida."

And in spite of themselves the bedraggled pedestrians grinned.—Louisville Courier-Journal.

Slow to Learn.

"De difficulty of learnin' by experience," said Uncle Eben, "is shown by de fact dat we kin go on year after year bein' surprised when de weather turns freezin' cold in January."

NOT BEGINNING OF ROMANCE

Beautiful Girl Mistaken in Thinking She Had Made Impression on Attractive Stranger.

They sat together; total strangers, on the narrow seat of a Fifth avenue bus.

She was beautiful and conscious of it. And she felt his eyes upon her. She turned her lovely head and met his gaze. He was good to look upon, dark and virile, and in his clear eyes was a look of question and pleading.

She turned away, her young blood thrilling with the premonition of romance and adventure.

Again she felt his longing but hesitant gaze fixed upon her averted face. She flashed him a fleeting look of encouragement.

Emboldened, he bent toward her, his eager breath fanning her flushed cheek and whispered, hoarsely:

"Say, can't you move over, lady, and gimme some more room?"—Judge.

Chinese Women Advance.

About the only thing of modern times to which China has not laid claim as being so old in that country that it was outworn and discarded centuries ago, is the new woman with a magazine of her very own, published in the interest of her development. This publication, called the New Woman, boldly states as its object the reform of the old society to give more honorable place to women and the new woman is described as "a joyous being, of honest occupation, complete personality, free, independent and mutually helpful," says the Pittsburgh Dispatch.

What Most of Us Do.

"What does your father do when the car breaks down?"

"Just stands around and swears."

Why does any healthy person want to be kicked into wakefulness in the morning?

Many people feel that they have to be agitated into wakefulness in the morning. They think that without the tea or coffee they take in the morning that they will not be able to meet the tasks and duties of the day.

Nothing could be more false than this reasoning. Any doctor can tell you this. For a healthy body does not require a stimulant. It gets all the stimulant it needs from food.

The thein and caffeine found in tea and coffee are irritating to the heart and nervous system. They jolt the nerves into undue activity. The result is a reaction. This is why regular tea and coffee drinkers think they must have their stimulant the first thing in the morning to wind them up for the day.

If you will stop using tea and coffee for a week, and drink Postum, the pure cereal beverage instead, it will give Nature an opportunity to rid the system of the irritating substances that harass your nerves, upset digestion, increase your heart action, and make you nervous and irritable.

Many people who have tried Postum say that inside of a week they wake in the morning without that "all gone" feeling that they used to have, and are full of energy, strength and endurance.

Order Postum from your grocer today, and make it according to directions. Your first sip of Postum will surprise and please you.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

Postum *for* Health—"There's a Reason"

Made by Postum Cereal Co., Inc., Battle Creek, Mich.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

SPOHN'S DISTEMPER COMPOUND
is indispensable in treating
Influenza, Distemper, Coughs and Colds
so prevalent among horses and mules at this season of the year. For nearly thirty years "SPOHN'S" has been given to prevent these diseases, as well as to relieve and cure them. An occasional dose "conditions" your horse and keeps disease away. As a remedy for cases actually suffering, "SPOHN'S" is quick and certain. 50 cents and $1.20 per bottle at drug stores.
SPOHN MEDICAL COMPANY GOSHEN, INDIANA

MAY REMODEL UNION JACK

Ireland's New Position in British Empire Likely to Bring Change in Famous Flag.

Among the lesser and more sentimental sacrifices the British feel they are making for Irish peace, there is the prospect of the changed Union Jack.

The diagonal red cross in the Union Jack stands for Ireland. The original national flag was the banner of St. George, a plain red cross on a white background. In 1606 the Scottish flag, a white diagonal cross and a blue background, was blended with the white upright cross, with a blue background of the diagonal white cross being added.

On the death of Charles I the cross of St. George again became the national flag, but in 1706, after the union with Scotland, the cross standard with the blue background was restored. In 1801 the red cross of St. Patrick was superimposed on St. Andrew's cross, making the present Union Jack.

Important to Mothers
Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it

Bears the Signature of *Chas. H. Fletcher*

In Use for Over 30 Years.
Children Cry for Fletcher's Castoria

Expressive but Modern.

Mother had just brougth Judy, age three, some candy. As children usually do, Judy forgot her lessons in courtesy.

"What are you going to say to me for bringing you the candy?" her mother asked.

With a grin, Judy threw her arms around her mother and exclaimed: "I'll tell the world, mother, you're some kid!"

Kissing Custom Centuries Ago.

Three hundred years ago it was a sign of hospitality for the lady of the house to welcome the men guests in her husband's presence with a kiss. It might be on lips, forehead or cheek. An interesting reference to the freedom of kissing in olden times is introduced by Sir Walter Scott in "The Fair Maid of Perth," where one of the characters says: "Thou knowest, the maiden who ventures to kiss a sleeping man, wins of him a pair of gloves."—Philadelphi Ledger.

A Feeling of Security

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy.

The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything.

It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

The Heathen Come to Light.

A Wisconsin newspaper, the Boston Transcript says, reports the following:

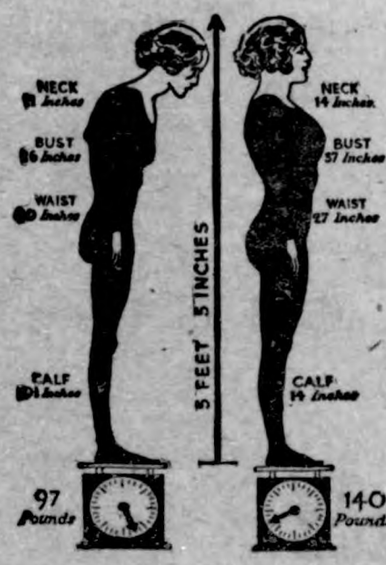
The young people here have a new game called "Christianity." Here is how they play it: The Christians, who are the girls, get one one side, and the boys on the other are the heathen; then the heathen cross over and embrace Christianity. It has become very popular.

Unkind.

"My face is my fortune," she said.

"Well," he replied, "never mind that. The richest people aren't always the happiest."

How Yeast Vitamon Tablets Put On Firm Flesh



Strengthen The Nerves and Invigorate The Body—Easy And Economical To Take—Results Surprisingly Quick.

If you want to put some firm, healthy flesh on your bones, increase your nerve force and power, clear your skin and complexion and look and feel 100 per cent. better, simply try taking two of Mastin's tiny VITAMON Tablets with each meal and watch results. Mastin's VITAMON Tablets contain highly concentrated yeast-vitamines as well as the two other still more important vitamines (Fat Soluble A and Water Soluble C) and are now being used by thousands. Mastin's VITAMON Tablets never cause gas or upset the stomach but, on the contrary, improve digestion. Be sure to remember the name—Mastin's VI-TA-MON—the original and genuine yeast-vitamine tablet. There is nothing else like it, so do not accept imitations or substitutes. You can get Mastin's VITAMON Tablets at all good druggists.

THE ORIGINAL AND GENUINE
YEAST VITAMINE TABLET

Are Positively Guaranteed to Put On Firm Flesh, Clear the Skin and Increase Energy When Taken With Every Meal or Money Back

If it isn't MASTIN'S it isn't VITAMON

GROWING SEASON FOR MANY CROPS

Hotbeds and Cold Frames Enable Gardener to Protect Plants From Weather.

OPERATIONS STARTED EARLIER

Beds May Be Utilized Throughout Spring and Summer—They Are Inexpensive and Easily Operated—Ventilation Essential.

(Prepared by the United States Department of Agriculture.)

Hotbeds and cold frames enable the home gardener to lengthen the growing season for his crops. With them he can start his operations a few weeks in advance of the last chilly days of spring, before which it is not possible to plant out of doors. Throughout the spring and summer these beds may be utilized, and after the first fall frost they furnish protection for late vegetables. They are inexpensive and easily operated, say garden specialists of the United States Department of Agriculture.

Making a Hotbed Sash.

Standard hotbed sash are 3 by 6 feet, and it is customary to make a home garden hotbed with one, two, or more sash, according to the size of bed desired. Select a well-protected and thoroughly-drained spot, dig a pit 12 to 18 inches deep and a little larger than the bed is to be made. Throw the good top soil to one side. For a two-sash bed about one good wagonload of fresh horse-stable manure will be required. The manure should be thrown in a flat pile a few feet away from where the bed is to be constructed and the pile turned about twice at intervals of three or four days. As it is turned the outer portion of the pile is thrown to the middle and the inner portion to the outside, in order to get uniform heating throughout. Then put the manure into the pit, each forkful being shaken to break it apart and spread it evenly. It should be well tramped. Put in a layer about 3 inches deep, then another layer, treading each until the pit has been filled level with the ground. It should be just moist enough to pack reasonably solid, but springy under the feet.

The frame of the bed, made of wood, is then set on top of the manure and the earth from the bottom of the pit banked up outside of the frame to keep out the cold. The north side of the frame should be 6 inches higher than

Preparing a Hotbed to Get Ahead of Jack Frost.

the south side. The good soil from the surface of the pit is spread on the packed manure. It is a good plan to mix a little well-rotted manure with this soil.

Put the sash on and leave the bed to heat for several days. First the manure will become very hot, then after two or three days it will gradually cool. The temperature will then remain more moderate. No seeds should be planted until the temperature of the soil has fallen below 85 degrees. Use a thermometer, the bulb of which is buried about 3 inches deep in the soil. Feeling the bed with the hand is not a reliable method of taking the temperature. Have a piece of old carpet or a burlap mat to throw over the sash for protection on extremely cold nights.

Care of Hotbeds.

Hotbeds must be watched during bright weather to prevent them becoming too warm, as the sun shining directly on the glass soon brings the temperature above that suitable for the growing of plants.

Ventilation is provided by propping the sash up at one side or the other according to the direction of the wind. Have the wind blow over the opening and not directly into the bed.

Cold frames are hotbeds minus artificial heat—simply sash-covered frames with no pit under them but banked up on the outside to keep out the cold. They are useful for growing plants that have been started in hotbeds, and for hardening plants to get them in condition to plant in the garden. Sometimes a bed about 12½ feet in length covered by four regular hotbed sash is divided into two parts, one part being made into a hotbed and the other a cold frame. This is an excellent arrangement and one that is not expensive.

START EGGPLANT IN WARM, SUNNY PLACE

Rich Soil and Good Cultivation Is Necessary.

Occasional Applications of Very Weak Liquid Manure Is Beneficial—Little Flea Beetle Is Most Troublesome.

Eggplant, so called because the great fruits are about the size and shape of an ostrich egg, is closely related to the tomato and pepper and requires very much the same treatment as do peppers, say garden specialists of the United States Department of Agriculture. The eggplant is very easily injured by cold and the plants must be started indoors throughout the greater part of the country. Start the seed in the house by sowing in a small box filled with good soil. The small plants should

Eggplant Is Prolific Yielder.

be transplanted to pots or to a shallow box or tray filled with soil and kept in a warm, sunny place until the weather is quite warm. Eggplant requires a rich soil and good cultivation. Occasional applications of very weak liquid manure also benefit the plants greatly.

Eggplant is attacked by several kinds of insects, the most troublesome of these being the little flea beetle which works upon the leaves, filling them full of small round holes. As a remedy, dust the plants thoroughly with air-slaked lime or very fine tobacco dust. By removing the fruits of the eggplant as soon as they attain good size the plants can be kept fruiting until killed by frost. Black beauty and improved large purple are among the leading varieties.

OX-WARBLE IS COSTLY PEST

Loss Caused by Decrease in Milk Flow, Destruction of Hides and Meat Wastage.

"The little ox-warble means an actual cash loss of $50,000,000 to the United States each year," stated F. C. Bishop, of Dallas, Tex., in an address before the American Association for the Advancement of Science, at their meeting in Toronto, recently.

"The loss comes," he said, "through a falling off in the milk flow, illness among the cattle, due to irritation and worry, destruction of hides and wastage of meat when the beast finally goes to the block."

"When the grubs reach the back of the animal," said the speaker, "they make their presence apparent by the lump or swelling their body causes. Gradually they make their way out through the back of the animal and drop off, to begin all over again their life history. The only hope of dealing with the pest lies in energetic action by cattle owners in working out and destroying the warbles from the backs of their stock. The herd should be gone over systematically every 30 days, the grubs squeezed out and destroyed. Of course, even then, there is loss because of the holes left in the hide; five punctures of the back or sides by warbles reduce any hide to No. 2 grade."

CLEANING AND GRADING SEED

No Other Single Farm Operation Which Gives Larger Returns in Producing Crops.

There is no single farm operation so easily and cheaply done, which gives larger returns than the thorough cleaning and grading of all seed sown. Besides cleaning out the weed seeds, the light weight seeds are taken out when the job is properly done, thus preventing the reproduction of the poorer plants. This practice carried on year after year permits the increase of the best and kills out the poorest. Thorough cleaning and grading of all seeds planted is the first step toward a successful crop. There is no time like the present to put the seed in proper shape for planting.

HIGH PRICE FOR CORN CROP

Much Depends Upon Kind of Stock It Is Given to—Purebreds Make Best Returns.

Despite the low corn prices, there are many farmers disposing of all they raised at good prices, while others are getting less than market prices. It all depends upon the kind of stock that eats it. Purebred stock insures the best returns.

Dropping the Pilot.

Mr. Old-Timer, Miss Knowall and Miss Wise stood at the rail of an outgoing steamer as it slowed up to let the pilot off.

"Why are we stopping?" asked Miss Knowall.

The obliging Old-Timer replied, "To drop the pilot."

"Why are they letting him go?" Miss Wise wondered.

"Another case of incompetence, I suppose," Miss Knowall suggested.

"Well, it's lucky the captain found him out right away, before we got out any further into deep water," and Miss Wise heaved a sigh of relief.—Harper's Magazine.

NOTICE OF SPECIAL SCHOOL ELECTION
BOND PROPOSITION
MESERVEY, IOWA

Publis Notice is Hereby Given. That a special election of the Consolidated Independent School District of Meservey, in the counties of Cerro Gordo, Hancock, Franklin and Wright, State of Iowa, will be held on the 17th day of February. 1922 at the City Hall, Meservey, Iowa, from one o'clock P. M. until six o'clock P. M. and that at said election there will be submitted to the voters of said Consolidated Independent School District to be by them voted upon. the following proposition:

Shall the Consolidated Independent School District of Meservey, in the counties of Cerro Gordo, Hancock, Franklin and Wright, State of Iowa, issue bonds in the sum of Sixty Thousand Dollars ($60,000) for the purpose of constructing and equipping a new school house?

At which time and place all the voters of said Consolidated Independent School District are hereby notified to appear.

This notice is Given by Order of the Board of Directors of said Consolidated Independent School District, pursuant to a sufficient petition with the requisite signatures in accordance with Section 2820-dl et seq. of the supplement to the Code of Iowa, 1913.

Dated at Meservey, Iowa, this 13th day of January, 1922.

J-19-26-F-2-9 K. Clarence Ruigh, Secretary. Board of Directors.

NOTICE TO BIDDERS
SCHOOL BUILDING--BIDS CLOSE FEB. 16, 1922 AT 1. Pm
MESERVEY, IOWA

Bids are desired on a school building, to be erected at Meservey, Iowa, by the Board of Education of the Consolidated Independent School District of Meservey, Iowa. Bids will be received by the Secty. of the Board of Education Mr. K. Clarence Ruigh at his office in the Farmers Savings Bank at Meservey up to 1Pm Feb. 16, 1922. Bids will be opened immediately and read publicly. Bids must be accompanied by certified checks or bid bonds in amount as follows:

General Construction .. Check or Bid Bond $1500.00
Heating and Ventilating ..Check or Bid Bond $1000.00
Plumbing ..... Check or Bid Bond $400.00
Seating ..... Check or Bid Bond $200.00
Equipment ..... Check or Bid Bond $200.00

Certified checks or bid bonds must be made out unconditionally to Mr. K. Clarence Ruigh, Secretary Board of Education. as a guarantee that the bidder, if successful, will enter into contract with the Said School District and furnish a bond in full amount of the contract in the form outlined in the specifications, guaranteeing the completion of the building and the payment of all leins and claims.

The plans and Specifications will be on file after Feb. 1, 1922, One copy only—at the office of the Secretary, one at the office of the Architect, 1353 University Ave., St. Paul, Minn., and one at 211 M. B. A. Building, Mason City, Iowa. also at the Builders Exchanges of Des Moines, Iowa, St. Paul, Minn. and Minneapolis, Minn.

Contractors may secure plans by application to the Architect, 1353 University Ave., St. Paul, Minn., upon payment of a deposit of $10.00 to insure return of plans and specifications. The entire amount will be refunded to all contractors who file their bids with the secretary, likewise the entire amount will be forfeited if the contractor fails to bid. Sub contractors and material men will be charged the exact cost of preparing the blue prints and specifications for such drawings as they may require to figure the part of the work they are bidding on.

Contractors will be required to bid on the exact form of bid outlined in the bidders blanks, any deviation therefrom will invalidate the bid and same will not be considered.

Contractors may combine any part of the work or bid on the entire contract by furnishing with their bid the certified checks or bid bonds required above.

The Board of Education reserves the right to accept any or reject any or all bids.

Signed:
Consolidated Independent School District of Meservey. Iowa.,
By K. Clarence Ruigh, Sec'ty.
Board of Education.

Goodell High School News

The Crystal Lake Boys and Girls Basket Ball Teams met our teams on the home floor Friday night. Two good games were played, both sides working very hard. The girls game which was first, was very fast and interesting. Our girls proving a little too much for the Crystal Lake team, defeating them 14 to 9. The Boys game was very good, but our Boys were defeated. A large crowd was present which proves that the public is as much interested in our school activities as we are. This game completes our basket ball schedule for this season. We admit that we haven't won as many games as we would like to. but we have gotten out of basket ball what we intended to, which is exercise for the boys and girls.

Marvel Chase was absent Friday afternoon.

Folding Fan Invented 700 A. D.

The ordinary folding fan was invented in Japan in the Seventh century by a native artist, who derived the idea from the way in which the bat closes its wings

MOSTLY TRUE

One can grin without an inner impulse, but a smile needs better backing.

Tears which are shed inward fan rather than put out the flame of anger.

We should strive to love our neighbors. We can get more out of them that way.

The average man no sooner does a kind act than he begins to feel big over it.

No matter how great the frontage of a house, the background is only a yard wide.

When a man sneers at a woman's talkativeness he makes a noise like sour grapes.

Many a weak man has good intentions, but isn't strong enough to carry them out.

Scarcely anything seems impossible to the man who can will strongly and long enough.

Fanciful names for dogs are almost universal; and now "Rover" would almost be a novelty.

If you cannot honestly obtain all you want, you have an easy remedy—do not want so much.

The fact that a man has the sleeping-in-church habit is no sign that he will find rest in heaven.

Some have a hard time picking out a car to heaven because the lower berths all seem to be taken.

If the men had the brains they think they have their legs would not be strong enough to carry them.

As for the girl who has always lived in a flat, why expect her to know everything about housework?

CLEARLY NOT UP TO DATE

Profiteer Saw at Once What Was Lacking in Dictionary That Agent Was Offering.

Archer Milton Huntington, the famous author and collector, said at a dinner to Baychester:

"When a war profiteer begins to collect, the spectacle is amusing.

"A New York profiteer was visited by a book agent who tried to sell him a very elaborate dictionary for his library.

"'This dictionary,' said the book agent, 'has all the latest modern improvements, sir. It includes the newest technical and scientific terms, and there isn't a feature lacking that goes to make a first-class work of the kind.'

"'Let's have a look at her,' grunted the profiteer.

"He examined the dictionary a moment, then he handed it back.

"'Young feller,' he said, 'you can't work that book off on me.'

"'What's the matter with the book?' said the agent.

"'She ain't got no copious index,' said the profiteer."

ABOUT KLEMME PEOPLE

When its news, tell it to the Times.

Jay Griggs, of Goodell, was a caller here yesterday.

Mr. and Mrs. Abe Scott were up from Goodell Monday.

Mr. and Mrs. Buckles from Grafton were Klemme visitors Monday.

Mr. Ed. G. Ell was at Thompson on business Tuesday of this week.

R. A. Jorgenson was a business caller at Garner Tuesday morning.

Miss Leoda Smith was a visitor at Belmond between trains Saturday.

Mr. Wm. Voiles was up from Belmond Saturdap on business.

Paul Grange was over at Garner on business Tuesday morning.

Mrs. Klamp, of Algona, was here yesterday to attend the funeral.

It's a Valentine Dance at the Idle Hour Tuesday night, Feb. 14. The Hawkeye Orchestra. Nuff sed, come.

A baby boy was born to Mr. and Mrs. Green yesterday morning. All reported doing fine.

Cyril McGuire, of Belmond, was visiting with Klemme friends Tuesday.

FOR SALE—Adjustable dress form, as good as new. Inquire at Times office.

Miss Viola Freie was a passenger to Mason City Monday for a visit at the home of her sister.

Ray Nelson, of Garner, was a visitor in Klemme Tuesday between trains.

Tanlac is made of roots, herbs and barks and contains no minerals or opiates. E. S. D. Kahrs.

Fern and Lloyd Ulrich went to Meservey Saturday for a few days visit.

You will find Emil Lau's ad in this issue. He is having another big pure bred sale on the 17th.

Clint Dutton was a passenger to Garner Saturday afternoon for an over Sunday visit with friends.

The Times tries to tell all the news, you can help us by phoning or sending in your news items.

Mrs. Walter Schultz and daughter Gloria, went to Mason City yesterday for a visit.

Mrs. Henry Wille went to Garner yesterday for a visit with her daughter ,Mrs. Harold Leitzinger.

Mr. Montgomery, of Des Moines, was shaking hands with Klemme friends yesterday.

Mr. and Mrs. Joe Heginger and Mrs. Will Heginger, of Goodell, were visiting here yesterday.

People who have been helped by Tanlac are always anxious and willing to tell others about it. E. S. D. Kahrs. adv

A farm sold near Red Oak recently for $300 an acre. This is an indication of better conditions being anticipated.

Mrs. Hoffman and children left yesterday for Wisconsin in their car for their new home. R. F. will leave with the car load of goods.

Byrnes Missman went to Belmond Saturday for a visit with his grand parents. Byrnes is getting to be a regular travelor.

Mrs. H. Ludwig, of Nevada, Iowa, came Tuesday afternoon for a visit with her daughter, Mrs. E. S. D. Kahrs.

J. Jorgenson, "dad" of the editor, has been here this week doing some cabinet work for us in the print shop.

Miss Caroline Smid went to Garner Saturday afternoon for a visit at the home of Mr. and Mrs. Harold Leitzinger over Sunday

Miss Emma Sampson was at Mason City Sunday and Monday for a visit with her brother, Leonard, who is in the hospital there recovering from an operation. Paul and Erma accompanied her for a visit with their father also.

Mrs. Clarence Kluckhohn was hostess to an afternoon party at her home last week Thursday at which a number of ladies were present.

Sure the ground hog sow his own shadow last Thursday. We saw our shadow also. But what about that cold weather you old timers were talking about?

You can't have good health with a disordered stomach. Correct your stomach disorders with Tanlac and you will keep well and strong. E. S. D. Kahrs. adv

C. W. Wiles and Howard Doyle went to Alta Vista. Iowa, Monday. The men are working in that vicinitp taking subscriptions for a farm paper and are doing very well.

Everpbody was pussy footing it around last week like they were walking on sore corns. The walks were icy after the rain and freezing spell and it was hard to navigate.

If people who are always kocking would spend the same amount of energy in boosting they soon wouldn't have anything to kick about.

Mr. and Mrs. Walter Lau entertained a number of their friends to a card party last Friday evening. After cards Mrs. Lau served a most refreshing lunch. All had a fine time.

The Times Print Shop printed a sale catalog for Emil Lau this week which he is very well pleased with. The shop is fully equiped to handle any kind of a catalog job in quick time. Practically the entire catalog was set on the Linotype machine.

Oscar Swanson went to Spirit Lake, Iowa, yesterday morning to be present at a pure bred Chester White hog sale. Oscar is very much interested in Chester Whites and is one of the oldest and successful breeders of that kind of hog in this part of the state.

Chris Mayne was up from Goodell Saturday on business. While here he dropped into the Times office and gave us an order for advertising his sale which he will hold on Feb. 21. Mr. Mayne will move to Klemme and will live in the house now occupied by Paul Grange.

"Happy" Johnson came back to this city yesterday to resume his work at the Larsen Meat Market, after an absence of four or five weeks which he spent visiting with his mother in Wisconsin. We are glad to see "Happy" back in Klemme and we also presume that school work will take a sudden boom again.

Death in a Hospital

When a patient dies at a Hospital, almost before the relatives know what is going on, the Big Town Undertaker is called.

The Doctors and Nurses are working for "Their Town" and in some cases, even call the Big Town Undertaker without consulting the relatives or family of the deceased.

There is a Better Way to handle a case of this kind: Now if your loved one should die whh ae liat Loved One should die at any Hospital in Mason City or Hampton. call Wellemeyer at once, daytime or at night; my auto is always ready to go. I have a special basket for this purpose which is always ready with clean blankets and pillows, in which I can transfere the Remains of your dear one direct from the Hospital to your Home, just an hour and a quarter after you call me I will be in Mason City, and in two hours I drive to Hampton.

Don't let the Hospital People tell you that the body must be moved "at once." You are paying for the room, stand up for your rights, the body can stay right where it is until I arrive.

There are two reasons why you should call Wellemeyer:-

1st. You get Home at once after the death, otherwise you would have to stay over under expense a day or two longer in the city.

2nd. You save $50.00, or more, on your entire funeral bill by calling your own Home Town Man.

Wellemeyer makes no charge for bringing a Body Home from a Hospital.

Arthur Wellemeyer

Your "Home Town Man" and Your Friend.

Smashed Leg Is Worth $17,500

Old Man Statistics Does Some Investigating Into Suits for Damages.

PRICE SET BY JURIES VARIES

Loss of Arm Is Valued at From $800 to $60,000—One Man Demands $25,000 for "Harrowing Experience"—$500 for Half Mouse in Pie.

New York.—Old Man Statistics is loose again. Now he comes forward to say that if you contemplate losing a leg and suing for damages the sum you ask will average around $25,000. If you lose an eye, your reputation—in fact, anything—the average remains the same, says he. But the sum you will get (if you win) he declares, will be considerably lower—$17,500.

The price of a leg, as decided by various and sundry juries, varies from $800 to $60,000. What makes for this wide range in value of pedal extremities was simple in the old days when juries consisted of men only, but it is different now. One is left in a quandary.

Damages Total $28,507,125.

There was a total of approximately $28,507,125 involved in suits last year in the metropolitan district. That against William M. Baldwin, capitalist, for $17,000,000 was the largest.

A number of cases involved odd complaints.

Not so long ago a man demanded $25,000 for a "harrowing" experience he had while being chased about a ship by a madman.

An actress decided to take heroic measures to reduce. She consulted a surgeon as to the advisability of having it "cut off." She forgot one thing—that the operation would leave scars—and she alleged in court they forever marred her "asthetic" beauty.

She admitted, however, that "several" pounds of flesh had been removed and her figure was more graceful than before. The jury decided the figure was worth the money the surgeon charged.

Somebody hit a young matron with the wrong side of a slap stick, loaded with a blank cartridge. She was being initiated into the mysteries of the Modern Order of Praetorians and was leaning over to kiss the altar when the undignified incident occurred. The flash of the powder raised a blister which she thought was worth $20,000.

$500 for Half a Mouse in Pie.

One of the youngest complainants in a suit was a four-months-old child. The defendant was a doctor, who was alleged to have so injured the complainant when he brought him into the world as to have permanently impaired his health. Another child recovered damages for a prenatal injury received when his mother fell through a coal hole, the lid of which had been removed.

One woman demanded $5,000 for finding half a mouse in a piece of mince pie given her in a restaurant.

A boy valued his ability to smile at $20,000, and the jury agreed with him.

If a guest of yours should happen to fall over one of your rugs and fracture his nose you need have no fear if he should sue you. The Supreme court held in a case of this kind that the host is not responsible for a fall on a loose rug.

Backs, arms, legs, ribs, toes, fingers, noses, jaws, hearts, resolutions, vows and everything else breakable were broken during the year. For these injuries the litigants sought from $500 to $100,000.

Amputations, too, were manifold. One child got $40,000 for the loss of four toes. Another got $60,000 for the loss of two hands. They were the high records for cases of that sort.

The lowest award on record was that of a Bronx woman who sued the National Biscuit company for $2,000 because a splinter in one of the biscuits lodged in her gums. The jury thought $50 would just about cover the cost.

SKELETON 250 YEARS OLD

Scientist Studies Remains Found in Hawaii to Find Origin of Race.

Honoulu.—Half of a human skeleton believed to be two hundred and fifty years old, discovered on this island by a bather, is being examined by Dr. Edward Handy of the staff of the Bishop museum, in the hope that it may help solve the problem of the origin of the Polynesian race. The skeleton includes the major portion of a man's torso, and is in an excellent state of preservation, especially the teeth. These are of unusual size and strength and give rise to the belief that the skeleton may be older than 250 years. Doctor Handy said. The spinal column also is preserved partially.

Baby Playhouse Costs Million

Mr. and Mrs. Dan Hamilton, Memphis, Erect Structure for Their Two Youngsters.

EMPLOYS ARTISTS FOR JOB

Beautiful Panels Illustrate Characters From the More Popular of the Fairy Tales—Miniature Stage Is One of the Features.

New York.—A beautiful, artistic building created by New York artists who flock to Cape May in the summer season, is the $1,000,000 playhouse erected on the country estate at Centreville of Mr. and Mrs. Dan Hamilton of Memphis, Tenn., for their children, Dan, Jr., and Margaret. It is truly a playhouse, fiber, timber and beam. Mrs. Hamilton, sensing that artists were the people to create a house radiating beauty and the make-believe, commissioned Thomas Hunt and his wife, Dorothy, to build and decorate the playhouse.

The little house, with its golden-white stucco walls and steep-pitched red-tiled roof, stands in a cluster of pines above the marshes and overlooking the sand dunes of the cape and the blue waters of Vineyard sound.

Beamed With Oak.

One enters a spacious, low-ceilinged playroom, heavily beamed with oak and stained in gold and cerulean blue, the rough plaster walls radiating the same golden hue. Here is a big fireplace, faced with orange tiles of special design done in daring lines and hues and giving a touch of the old-world peasant fireplace. Above the fireplace is a low-hung balcony, which invites untold adventure, since it can be reached only by a ship's ladder.

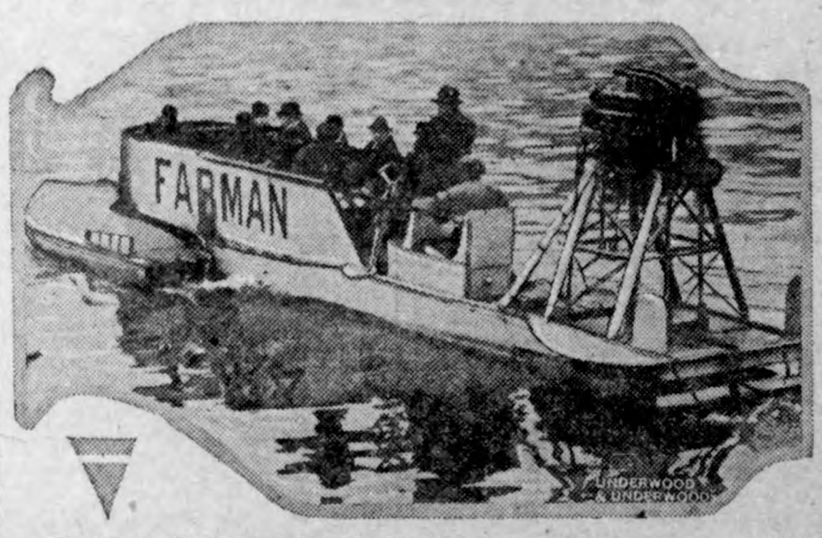
Over the fireplace and along the balcony are three panels executed by Mrs. Hunt, illustrating characters of fairy tales—"Red Ridinghood," "Prince Charming," "The Enchanted Princess" and "Hansel and Gretel." Big windows let in masses of light, and tiny windows form enticing peepholes from which imprisoned princesses can gaze far down the winding river and search the woods for the approach of the prince.

Fully Equipped Stage.

At the far end of the playroom is a little stage fitted with footlights and a spotlight and curtained with a blue and silver tapestry whereon is depicted the love of Pierrot and Columbine in an abandoned park.

But perhaps nothing pleases "Dan Ham" and his playfellows so much as his treasure chest. It is of oak, modeled after a famous old Spanish sea chest, with hammered brass corners, straps and lock plate, and with rings around the base to lash it to the deck in rough weather. On it Mr. Hunt has wrought in gorgeous and daring color pictorial scenes of pirates burying their treasure, and Spanish galleons. A close inspection of the characters brings squeals of joy from the children, for as has been said, the Hamilton group has been used as motif in many of the designs. Captain Kidd bears a remarkable resemblance to Daddy Hamilton.

Speedy Farman Glider on the Seine



This is the Farman Glider, propelled by a huge airplane engine and aerial propeller, gliding along the Seine. It makes a speed of 50 miles an hour.

Girl, Dressed as Boy, Walked Miles in Sleep

Dorothy Sherman, nineteen years old, daughter of J. L. Sherman of Eaton, Colo., walked 11 miles in her sleep recently, garbed in her brother's clothes. She declared she went to bed as usual and knew nothing more until she was awakened by a passing automobile on a bridge 11 miles from her home.

GIRL MAKES MOVIES REAL THING

Invention of California Girl Promises Big Improvement.

Through Series of Silver Screens Characters Are Made to Appear as Actual Humans Moving.

San Francisco.—Ever since the cinema industry became an industry, persons with mechanical turn of mind have developed this and that kind of invention calculated to "humanize" the film character.

There was the "picture that talks," in which a phonographic record was synchronized with the speed of projection. It never came into popular favor.

It has remained for a Los Angeles girl to provide an invention that has promise of actual merit.

The invention is that of Mary Bruce, twenty-one-year-old girl, who lives with her mother at 1828 S. Vermont avenue. By means of a series of silver mesh screens, which have been tested out and found practicable, Mary is able to "absorb" the usual projection.

The result is that characters on the screen appear in their true shadow gradation, and the appearance to the observer is that of actual humans moving.

The full body of the actor or actress is visible to the eye. The "flat" appearance of them has been overcome. The series of silver mesh screens are mounted in varying sizes and may be erected in front of any ordinary projection screen. They take up very small space in front of the screen.

A local picture house will install the invention with a view to proving or disproving its merit.

Caught Big Snapping Turtle.

Poplar Bluff, Mo.—Probably the largest snapping turtle ever taken from Black river was captured one Sunday recently by Ed Anse. It was 5 feet 3 inches from tip of nose to the end of its tail, weighed 84 pounds and bore a shell that measured 19 by 25 inches. His mouth, opened wide, measured 11 inches. Its severed head weighed 12 pounds and measured 8 inches across.

SICK WOMEN THIEF'S TARGET

Victims Just From Hospital Are Gulled by Wily Trick of Paris Crook.

Paris.—The limit in fraudulent audacity is displayed by a man of fifty-three for whom the Paris police are looking. He has been in the habit of calling at the homes of women who have just come out of the hospital, presenting himself as a Poor Law doctor sent to examine them and report on their progress.

Having caused a woman to undress, he gravely covers her head with her clothes, instructs her to count 40 slowly and then hold her breath. When the woman's attention is thus distracted the man snatches up anything of value and steals away.

NAVAL AND SUB TREATIES O. K.'D

Far Eastern Settlement Is Announced; Arms Parley Believed Near Conclusion.

SHANTUNG PLAN IS ADOPTED

Pact Presented by Secretary Hughes Is Approved by the Fifth Plenary Session of the Conference at Washington.

Washington, Feb. 3.—The armaments conference wiped clean the naval limitation half of its slate and made considerable headway in clearing up the Far Eastern side at its fifth plenary session.

The clean-up leaves only two matters of importance to be settled before the Far Eastern phase of the conference is completed and the treaties embodying results there ready for submission at a plenary session.

The plenary session approved:

The naval treaty between the United States, Great Britain, France, Italy and Japan.

A second treaty between the same powers abolishing poison gas in warfare and outlawing submarine attacks on merchant vessels.

The settlement of the Shantung issue between China and Japan.

Secretary of State Hughes presented the naval treaty. When it had been read the secretary said that while it was necessary for the powers to ratify it through their constitutional agencies before it could become effective, he thought it well for the conference to express its approval. He called the roll, there was no dissenting voice, and it was approved.

"This treaty ends—it absolutely ends—the race in competitive naval armament," said Secretary Hughes. "In it we are taking the greatest forward step in history toward the reign of peace. It is perhaps the most important international undertaking ever completed. It is important because it means we no longer talk about limiting armament—we are doing it by this treaty.

"While there have been some changes in the original proposal, I am glad to say that the spirit of the American plan remains unimpaired."

Applause broke out as he sat down after an exhaustive analysis of the treaty, and then the heads of other delegations rose to express their national sentiments on its completion.

M. Albert Sarraut, head of the French delegation, defended France's course in the negotiations, which at several stages held up the conference. Much of the criticism of French acts, he said, was due to German propaganda. "I bring the adhesion of the French delegation to the treaty," he said. "This adhesion is sincere and confident."

The second treaty on submarines and poison gas was presented by Elihu Root of the American delegation and was immediately adopted.

"You will note," said Mr. Root, "that it does not attempt to codify international law. It merely attempts to state in unmistakable language that the use of submarines against noncombatants, innocent women and children is stigmatized by all the civilized world.

"Cynics have said such agreements could not be enforced, but it must be remembered that behind governments stands the public opinion of the world, and there is nothing more powerful in the world than public opinion.

"This treaty is an attempt to state the clear opinion of the civilized world that never again shall women and children be murdered on the high seas, as on the Lusitania."

Secretary Hughes then reported on the work of the conference on the various resolutions adopted affecting China.

He read first the resolution pledging the removal of foreign post offices, adopted on December 12. There was no objection and it was readopted.

Next he read the resolution respecting the proposed removal of foreign troops from China.

Then the Root open-door proposition, providing for an international board of reference in China to decide disputed questions, was put and approved, pledging no discrimination on Chinese railways.

Then followed in rapid succession the reading and formal adoption of all the other resolutions, previously agreed upon, respecting China—reduction of China's military forces, registration of Chinese treaties and agreements with the Washington conference.

When this was concluded Secretary Hughes formally announced that the Shantung controversy was settled and Arthur Balfour, for Great Britain, announced Wei-Hai-Wei would be returned to China.

Advocates Special Taxes.

Washington, Feb. 4.—The soldier bonus should be paid out of special taxes, such as increased first and second-class postage and tobacco levies, Secretary Mellon declared before the house ways and means committee.

Oldest Priest in Northwest Dies.

Duluth, Minn., Feb. 4.—Mgr. Joseph Francis Rub, pioneer member of the Catholic clergy in northern Minnesota, died at a hospital here. He was ninety years old and was considered the oldest priest in the Northwest.

Home Town Helps

ALL BENEFITED BY ZONING

Minnesota Newspaper Points Out the Advantages of Farseeing and Comprehensive Plans.

The prosperity of a city depends much on how it is built. It is always an advantage to a city to draw to it those well able to support themselves, because they become supporters of the city and pay their share of the taxes. The amount of taxes that newcomers can provide is enormous. By paying attention to the proper points in city building, the city establishes the very thing that brings this population without cost to itself.

Cities grow by natural means sometimes. A water power may develop a large city, but the city itself may be built in a clumsy way and without beauty. One factor in city building is arrangement. This is why zone laws are proposed so that a home builder of any class may feel sure that his surroundings will not be spoiled by the invasion of unsightly things that are wholly unnecessary.

The best good of a city should prevail over the more selfish desire of some property owner to make money regardless of his neighbor. There is just as much chance to make money under the zoning law, however, as there is without it, and even a greater one.

VALUE OF PROPER PLANNING

Fundamental Business Idea In Looking to the Future Development of the Community.

Town and city planning do not find their value in developing the esthetic side alone, but also apply the sound business fundamentals of maintenance and improvement to the community, declared B. Loring Young, speaker of the Massachusetts house of representatives, in an address at the eighth annual conference of the Massachusetts Federation of Planning Boards. By directing proper provision of water supply, sewage disposal, housing facilities, adequate municipal buildings and local forest reserve, he said, they work to the enhancement of citizenship in its relation to the community, the state and the nation.

As an opening to the conference, citizens of Winchester acted as hosts to the members of the federation on a motor trip of inspection of the many developments of the town which make it pre-eminent among communities where town planning has been carefully and intelligently applied. The first evidences of this were a large playground and park, a redirected stream and an attractive bridge, which have replaced unsightly tanneries and tenements and permit an unrestricted view of the community center.

Home Ownership Best.

Aside from the security which the home owner enjoys, the possession of his own home should be the ambition of every man. Naturally the first step is the most difficult, for the purchase of a home means a cash payment that is usually well beyond the $1,000 mark. Once that hurdle is taken, however, the other payments are easy, for they should not exceed, at the outside, $75 a month on the kind of a home the average man can afford. When the current business depression, with its deplorable unemployment situation, goes by the boards I believe many more Americans will see the wisdom of owning their own homes and thus increasing the percentage of our people who are free from the clutches of the landlord.—Washington Post.

To Hurry the Zoning.

The Chicago zoning act should be put into effect as quickly as possible. Many a beautiful residence neighborhood has been ruined by the steady encroachment of factories, coal yards and the like and the sooner the city is zoned the sooner this stupendous loss will be eliminated. It would also be a positive assurance to a man building or buying a home that his property will not loose value through the introduction of low-class improvements, and will also tend to stabilize real-estate loans as well as reduce fire hazards.—E. C. Roos in Chicago Daily News.

Daily Short Story.

Willoughby Wampus, the sunshine editor, reached his desk prepared to scatter large gobs of sunshine.

Then he reached for his plug tobacco.

It was missing.

He was gloomy the rest of the day.

Refused to Vote Bonds.

Bradford, Pa., voted against bonding the city for a municipally owned electric plant. A vigorous campaign was waged. In the election municipal ownership was defeated by a vote of 1,700 to 117.

Swiss Have Joint Dairies.

Switzerland has many co-operative cattle associations, besides joint stock dairies in every village.

Good Man, Good Citizen.

By far the greatest thing a man can do for his city is to be a good man.

STOMACH CATARRH

Causes untold misery and suffering, all of which is needless. Pe-ru-na acts as quickly and surely on catarrh of the stomach and bowels as in cases of that common form, nasal catarrh.

PE-RU-NA

IN USE FIFTY YEARS

Exercises a soothing, healing effect upon all mucous linings. Belching gas, sour stomach, nausea, vomiting, cramps, pains in the abdomen, diarrhoea, constipation are all symptoms of a catarrhal condition in the organs of digestion.

Don't suffer another day. It is needless and dangerous. Two generations have found Pe-ru-na just the medicine needed for such disturbances.

Sold Everywhere Tablets or Liquid

The world's standard remedy for kidney, liver, bladder and uric acid troubles, the enemies of life and looks. In use since 1696. All druggists, three sizes.

Look for the name Gold Medal on every box and accept no imitation

Not a Laxative

Nujol is a lubricant—not a medicine or laxative—so cannot gripe.

When you are constipated, there is not enough lubricant produced by your system to keep the food waste soft. Doctors prescribe Nujol because its action is so close to this natural lubricant. Try it today.

Nujol

For Constipation

Didn't Advertise It.

"Isn't it queer that Methuselah lives to be 969 years old, and other men lived to be very aged in Bible times, without a woman to be that old?"

"It isn't a bit queer. It merely shows that women were the same as now. What woman would ever confess to being a thousand years old?"

Shave With Cuticura Soap

And double your razor efficiency as well as promote skin purity, skin comfort and skin health. No mug, no slimy soap, no germs, no waste, no irritation even when shaved twice a day. One soap for all uses—shaving bath and shampooing.—Advertisement.

Every Dad Knows It's True.

"Johnny," said a neighbor to the little boy next door, "how do you like your elephant that waggles his ears and your camel and your gamey goat and that railroad train that runs all day on its own track?"

"Well, I don't know how I like 'em. Dad plays with them all the time. But he had to go back to the office tomorrow and then I'll get to."

There are some opinions so emphatic as to reduce you to silence—but have good judgment.

ARE YOU DISCOURAGED? BLUE? READ THIS

Galva, Iowa—"I have always been a certain degree, out of sorts in general but after my last baby girl came three or four months I suffered with pains and discomfort due to female and intestinal troubles. Then I became gloomy, subject to fits of blues, and completely discouraged. Finally, after becoming almost a skeleton from suffering, my sister urged me to try Dr. Pierce's Favorite Prescription. I took six bottles of this, also one vial of Dr. Pierce's Pleasant Pellets and one package of Dr. Pierce's Golden Medical Discovery Tablets and now I am in perfect health."—Mrs. Dorothy [illegible]

You should obtain this Favorite Prescription *now* at your nearest store in tablets or liquid. Write Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial pkg. tablets.

Something to Think About

By F. A. WALKER

NE THING AT A TIME

HE successful worker, whose achievements are greatest at the end of the day, is he or she who s but one thing at a time, and re- es to leave it until it is finished. Such a worker never vacillates tween one duty and another. There is no undue confusion in the nd by wavering. By putting off the seemingly dif- lt task for the easier. Everything is taken up as it nes, completed in every detail, dy for the scan of the master at top.

The worker who flits from pillar post, starts in one direction and ldenly sets his face in another, ver really gets anywhere. He is lacking of stability, and at end of the year he is about where began, with no prospect of ad- ncement and no hope of improve- nt. Indeed, in spite of his fever- , hurried efforts, he is slipping wn grade.

* * *

Doing the job in hand and sticking it until it is done to the very d is the only way to achieve suc- ss.

Train yourself to do this. In a lit- while you will find that you are tting speed with less friction. There ll be no more irritability and lassi- de at the end of the day.

Instead of going home at night in ill humor, with every nerve ngling and on edge, you will find that your brain is clear and your thoughts at rest.

This, you will discover later, is because of the orderly method adopted of taking up but one subject at a time and not letting it go until you have no further use for it.

* * *

One of the foremost merchants of New York, confronted with thousands of serious questions every day, has formed the habit of returning to his home at night as care-free as a school boy during vacation season.

When he leaves his desk, he leaves his perplexities.

The next morning he comes in bright-eyed, light-hearted, eager to get in the fray.

If by chance the first encounter should happen to be troublesome, he dispenses with it before proceeding to another.

There is no loss of time, no trying of nerve force in flitting from one problem to another.

He drives straight ahead and makes decision after decision without the slightest sign of flurry.

And you, however burdened you may be, can do the same if you hold unswervingly to the same course.

YOUR HAND

How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm.

THE HANDS

WHEN the hands hang limply at the side, and are heavy, thick, and fat, you may deduce therefrom, generally, that the intellect of the possessor will be likewise heavy and "fat." All is density, and there is no use trying to raise the possessor of such a hand out of the depths of materialism. When you read his or her hand, says one authority, "if you attempt a keen analysis, he will blankly stare at you. No use trying to lift him out of his trough of materialism. It can't be done. He wants to know his brother's name, whether he is married, how many children, how long he will live, whether he will be rich, and you cannot lift him above this plane."

Last, we have the cautious person who enters your room with an air of investigation and with the hands carried behind the back, where they are clasped. This person is timid and well meaning, but suspicious of the value and merits and standing of palmistry. You must deal gently with him; he is open to conviction, but must be led and cannot be driven.

BETWEEN THE LINES

You will not find a sentiment . . .
In this, my Valentine; . . .
To put such words on paper seems
To cheapen thoughts divine.

'Tis not the words writ large or bold,
Or even those writ fine . . .
That stir the heart the most, 'tis those
That hide between each line.

—From the Philadelphia Ledger.

SCHOOL DAYS

KIDDIES SIX

By Will M. Maupin

THE BIGGEST BOY

THE "Biggest Boy" is not at home—
He "flew the nest" last night.
I knew the day was bound to come,
And yet tears dim my sight.
The "Biggest Boy" has said goodbye,
And gone to play his part
On life's grim battlefield, and I
Am lone and sad of heart.

The "Biggest Boy" said "Goodbye Dad!"
And "Dad" said, "Goodbye, son!"
And then the boy with head erect,
Went forth—his work begun.
And over in the corner there
"Dad's" eyes will fall upon
The "Biggest Boy's" now vacant chair,
And miss the boy that's gone.

The "Biggest Boy" gulped back a sob
When on his lips was pressed
The little mother's goodbye kiss,
When mother's hands caressed.
And then he smiled and went his way
To fight and win, or die;
While "Dad" and mother could but say,
"God bless you, son; goodbye!"

The "Biggest Boy" is in the ranks
Of that great fighting band
That seeks by arts of toil and peace
To upbuild this fair land.
And "Dad" and mother fondly hope
As only parents can,
The "Biggest Boy" will do his part
And do it like a man.

Uncommon Sense

By JOHN BLAKE

KIND OF INTEREST

ASK the man of affairs what he is interested in and he will probably tell you:

"Everything."

He is interested in everything, and ought to be.

But he also is especially interested some one thing, which is why he a man of affairs.

A very important editor is so abrbed in the study of the world and hat is going on in it, that in workme or playtime he is engaged in its udy.

But he is especially interested in en and women. And specializing in is specialty he is interested in what ey like to read.

He is so deeply interested in this, at he never meets a man or woman at he does not find out, in some shion or other, what it is that atacts their attention in newspapers d magazines.

The results of the several hundred ousand questions he has asked are entially put away in his brain, and en he gets out a number of the blication he directs, it is always ught and read by a very large numer of people.

To have a live personal interest in l created things is necessary to thvery well-educated and active man.

If you sat at a dinner next to John age. Rockefeller you could get few rises t of him by discussing the theory of relativity. But if you began to talk of how to give away money intelligently, which is his special interest just now, you would probably hear something of much value.

Golf, music and many other things are fine interests to have, but the one interest you need most of all concerns your business or your profession.

If that is paramount, and you give it enough intelligent thought, you will prosper. If you "scatter" too much you will not.

(Copyright.)

Mother's Cook Book

"Life is not a cup to be drained, but an spring to be poured out."

HAVE A CRACKER

CRACKERS are the ever-ready standby of the "up-to-the-minute" housewife. They will keep indefinitely if kept dry and air-tight. If they do soften—five minutes in a hot oven will crisp them again as good as fresh ones. Any kind of crackers, sweet, graham, oatmeal or ginger may be used for a dainty sandwich to be served with a cup of tea or a refreshing drink. An old-fashioned dish and one good for an invalid or a child is cracker soup. Toast the crackers until brown, spread with butter, sprinkle with a little sugar and pour over hot milk.

Any sweet cracker put together with marmalade, jelly, cream cheese, nuts or any other good filling makes a good substitute for cake.

Tomato English Monkey.

Take one and one-fourth cupfuls of cracker crumbs, two tablespoonfuls of butter and three-fourths of a cupful of milk. Beat two eggs, add salt, pepper, a pinch of soda, one and one-third cupfuls of cheese; add to the scalded milk. When the cheese has melted add three-fourths of a cupful of tomato strained, stirring until well mixed. Serve on hot toasted crackers.

Graham Cracker Pudding.

Take four tablespoonfuls of butter, one-half cupful of sugar, one-half teaspoonful of vanilla, the yolk of an egg and a pinch of salt; mix well, then add three cupfuls of finely rolled graham crackers, three-fourths of a cupful of milk, one and one-half teaspoonfuls of baking powder; lastly fold in the well-beaten egg white, add one-half cupful of dates cut in bits, with the stones removed. Steam for one and one-half hours. Serve with a hard sauce or whipped cream.

WHY—

DO WE YAWN?

OXYGEN is one of the elements of the air which is essential to the healthy, normal action of the lungs. Unless a sufficient quantity of oxygen is taken into the body, the lungs become irritated and flash a signal to the brain that a larger supply is necessary. The easiest method to overcome this shortage of oxygen is, of course, to take in an increased amount of air at one time. Hence the nerves which regulate our breathing apparatus react upon our jaw and throat muscles, causing both of them to open wide. Expansion of the lungs at the same time results in the inhalation of a much larger amount of air than is obtainable through ordinary breathing, thus supplying the needed amount of oxygen.

The reason that yawning is usually connected with a feeling of drowsiness is because a desire for sleep is a sign that the body is tired and is seeking a stimulant of some kind—either rest or an added amount of oxygen, the fuel which keeps the human furnace burning brightly. The satisfaction which follows a yawn is due to the fact that the blood has received an extra supply of the material which it needs and we immediately feel the benefit of this.

HAD ORIGIN IN PAGAN FESTIVAL

CUSTOM OF CHOOSING A VALENTINE IS ANCIENT.

Fathers of Christianity Modified the Practices, Which They Were Unable Entirely to Eradicate.

St. Valentine's day is the 14th of February, and singularly ominous to lovers. St. Valentine is said to have been a bishop who suffered martyrdom under the Roman emperor, Claudius, or else under Aurelian in 271.

Like many another semi-Christian custom, the day set apart to the memory of St. Valentine in the Christian calendar is an old pagan festival upon which our ancestors believed that the birds chose their mates for the coming year. This, at least, is the commonly received version of our modern custom of "choosing a valentine" on the 14th of February and of sending a billet-doux or a fancy valentine through the mail to some favored one.

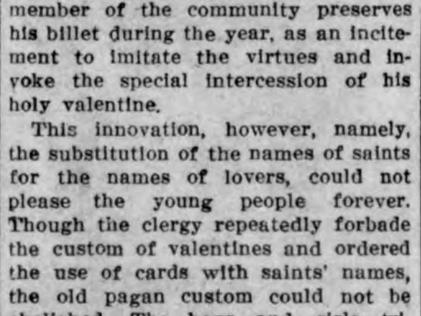
In old Rome, the 15th of February was the festival of Juno Februata (Juno the fructifyer), and the Roman church substituted St. Valentine for the heathen goddess. At that festival, called "Lupercalia," it was there customary, among other ceremonies, to put the names of young women into a box, from which they were drawn by the men as chance directed.

The Christian clergy, finding it difficult or impossible to extirpate the pagan practice, and in accordance with their general principle to eradicate the vestiges of pagan superstition by retaining the ceremonies but modifying their significance, gave it a religious aspect by substituting the names of particular saints for those of women. The saints whose names were drawn were proposed for imitation to the persons who received the slips of paper whereon they were written, and in many religious houses, where this custom still prevails, each member of the community preserves his billet during the year, as an incitement to imitate the virtues and invoke the special intercession of his holy valentine.

This innovation, however, namely, the substitution of the names of saints for the names of lovers, could not please the young people forever. Though the clergy repeatedly forbade the custom of valentines and ordered the use of cards with saints' names, the old pagan custom could not be abolished. The boys and girls triumphed over the saints, and in the end the girls triumphed over the boys, wresting from them their exclusive privilege of choosing mates.

The old custom of drawing names is to this day observed in many parts of England and Scotland in the following manner: A number of clips of paper with the names of an equal number of men and women are shuffled and drawn, so each young man has a valentine in the person of a young maiden, and each maiden draws a young man whom she calls hers. The valentines give each other gifts, and often this little sport ends in love and marriage.

FEBRUARY FOURTEEN



Oh, ware ye all, my maidens fair,
And ware ye, gentlemen,
For there is danger in the air
Now Cupid's come again.
Encase your hearts in adamant,
And guard them round about,
For Cupid is a sly gallant
And like to draw them out.

Oh, guard ye well, my maidens all,
And ye, my gentlemen;
Where Cupid's darts are like to fall
Is always uncertain.
Gird on your armor, strong and true,
And steel your hearts, and wait,
And be convinced he shoots at you
Ere you capitulate.

Copyright, 1922, Western Newspaper Union.

THE DAYS GONE BY

1
What has become
Of ye Olde way time
When you sent your girl
A Valentine?

2
Not one of these modern kind.
I mean
The ones that folded
With lace between.

3
And a heart with an arrow
Running right through,
And a verse inside about
"Violets blue."

4
Whose jingling rhyme
Sent thrills through your heart,
'Til you'd almost feel
Dan Cupid's dart.

5
It's scented folds
Made you dizzy with hope.
Remember, it smelled
Like a new bar of soap.

6
And when it came
You trembled for fair,
When you looked and found HER
Name written there.

7
Oh, what has become
Of ye Olde way time
When your girl sent you
A Valentine?

A FRIEND IN NEED A FRIEND INDEED

Writes Mrs. Hardee Regarding Lydia E. Pinkham's Vegetable Compound

Los Angeles, Calif.—"I must tell you that I am a true friend to Lydia E. Pinkham's Vegetable Compound. I have taken it off and on for twenty years and it has helped me change from a delicate girl to a stout, healthy woman. When I was married I was sick all the time until I took Lydia E. Pinkham's Vegetable Compound. I was in bed much of my time with pains and had to have the doctor every month. One day I found a little book in my yard in Guthrie, Oklahoma, and I read it through and got the medicine—Lydia E. Pinkham's Vegetable Compound—and took eight bottles and used the Sanative Wash. I at once began to get stronger. I have got many women to take it just by telling them what it has done for me. I have a young sister whom it has helped in the same way it helped me. I want you to know that I am a 'friend indeed,' for you were a 'friend in need.'" —Mrs. GEORGE HARDEE, 1043 Byram St., Los Angeles, California

Let Lydia E. Pinkham's Vegetable Compound be a "friend indeed" to you.

Cap or Skin?

In probably the last speech Booker T. Washington ever made, an address at the anniversary exercises of the American Missionary association in New Haven, with that quiet humor so characteristic of him, he satirized the prejudice against his people. "A member of my race," he said, "wanted to go from New York to San Francisco. He wanted to travel first class in a Pullman sleeper. He bought a red cap—fez, I think you call it—forgot the English language, and went as an East Indian, and no one objected. It appears that it is not the color of the skin, but the color of the cap to which you object."—The Outlook.

SHE DYED A SWEATER, SKIRT AND CHILD'S COAT WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.—advertisement.

An Even Break.

"She's a girl after his own heart, Hunter says."

"Yes, and he's a man after her money."

"But you know it's whispered on the quiet that she hasn't any money."

"Well, it's a notorious fact that he hasn't any heart."—Boston Transcript.

Quite often, one who is behind the times in the fashions is right up to date in his intellect.

FACTORY TOLL HEAVY

Loss of Life in Industries Almost Equal to That of War.

American Loss of Life in France Was 48,000 Men, During Same Period of Time Industries Took 35,000.

Washington.—Some very interesting statistics have been prepared and made public recently showing the tremendous loss in human life in the nation's industrial plants.

These figures indicate that these appalling conditions continue day by day at a rate almost equal to the sacrifice of American soldiers during the war. In the nineteen months of our participation in the war we lost approximately 48,000 men, while a total of 35,000 were killed in factories during the same period. This sad loss is in addition to the prodigious waste of human energy brought about through accidents in industrial plants.

There is no way of computing the value of human life, and any condition which permits of the monthly destruction of almost 2,000 lives constitutes a state of affairs that cries aloud to our human instincts as well as to our hard-headed American common sense.

Life at all times and under all circumstances is uncertain, and accidents are bound to happen, but every safeguard that human ingenuity can create should be introduced to lessen our frightful waste of human material.

Thrift of human life—no element of our industrial activity is of greater importance than this.

Yet it is not to be doubted that a very large percentage of the sacrifice of human life is preventable, just as it is possible to prevent a large percentage of disease and fires and other forms of distress and disaster.

These are problems which to a great extent depend for their solution on public conscience, and as the public becomes aroused on the matter of the loss of human life in industry a correspondingly greater efficiency will exist in every phase of our business life.

Hence the problem becomes one not to be solved alone by those directly engaged in industry, but a share of it rests on the shoulders of every citizen of the country. More intensive thrift thought and practice in the lives of all citizens of the country will be reflected in better safeguards for those engaged in the various trades and crafts of industry.

LADY BLACKSMITH

Mrs. Ashby, wife of an ex-sergeant major, has started a shoeing and blacksmith's business near Leatherhead, Surrey, Eng. She gained her experience during the war, and has now satisfied her ambition by starting her own forge.

Six Generations in One Family.

The Pas, Man.—Six generations of one family are holding a reunion at Nelson House. They belong to the Creek tribe of Indians.

Sarah Donkey, aged one hundred and twelve, is the common ancestor of the other five. They are: Caroline Spence, ninety, daughter; John Donkey, seventy, grandson; Ina Spence, forty-four, great-granddaughter; Sarah Donkey, twenty-two, great great granddaughter; Jemina Donkey, two, great great great-granddaughter. Sarah Donkey the first retains possession of all her faculties except her sight, which is failing. She traveled 150 miles by canoe for the reunion.

Sea Otter Bites Fish Off Hook

London.—C. S. Jay was fishing for sea trout in Lake Ddinas, near Mount Snowden, when a big otter seized a fish which he had hooked, bit a piece out of the sea trout and, after diving, disappeared. On the following evening the same angler saw the otter swimming near the shore of the lake, and making a cast with his trout rod he hooked the otter in the neck. The animal fought hard to free itself and jumped into the air during its struggle, which lasted nearly ten minutes. Finally the otter broke from the hook and swam away.

SUNSHADES FOR LUCKY DOGS

Innovation That Was Brought About by the Protracted Spell of Unusually Hot Weather.

One of the quaintest innovations of the recent heat wave in London was the introduction of sunshades for dogs. These consisted of light crepe-de-chine protections suspended over the animal's necks by light wire strands.

The "lucky" animals whose masters or mistresses bought the sunshades did not seem so pleased with them as perhaps the donors had hoped, remarked London Answers.

One dog found the heat so oppressive that he sought the shelter of a railway tunnel on the Highbury tube. Here he was, however, so frightened by the continual passing of trains that he shrank into a dark corner and remained there for two days, until his master, on the information of a railway man, fetched him.

Although sunshades for dogs made their first appearance, there was a strange absence of the straw hats that horses used to wear before the war. Have horses been so hardened by the great campaign that they do not need the consideration that dogs get?

TAKES UMBRELLA TO MASTER

Clever Dog That Keeps a New York Commuter Dry When He Gets Caught In Rain.

"I'll show you a regular dog," said Gardiner to his friend Johnson, whom he had invited to dinner at his home in Long Island, according to the New York Sun. They had alighted from the train and it was raining. Gardiner gazed up and down the street anxiously.

"What are you looking for?" asked Johnson.

"There!" exclaimed Gardiner, ignoring his friend's question and pointing down the street. "There's a regular dog."

A Belgian police dog came running toward the station with an umbrella in its mouth. The dog stopped in front of Gardiner.

"That's my dog," said Gardiner. "On rainy days my wife gives him an umbrella and he brings it down to the station so I don't have to walk home in the wet."

PICKED OUT WRONG COLLEGE

Mrs. Cassidy's Own Fault That She Did Not Hear From Her Daughter Regularly.

Mrs. McIntyre was calling upon Mrs. Cassidy, whose husband was in affluent circumstances and whose daughter had, therefore, been sent away to college.

"By the way," said Mrs. McIntyre, when the two had been gossiping for awhile, "where is Clara? I haven't seen her for an age."

"Clara is at college," proudly responded the fond mother, and then added: "And I am so worried about her. I haven't had a letter from her for nearly two weeks."

"There is where you made a mistake," was the prompt rejoinder of Mrs. McIntyre. "Instead of letting her go to college, why didn't you send her to one of those correspondence schools?" —Philadelphia Ledger.

Hopeless.

Little Grace was met by a strange lady on the street who endeavored to question the child as to her father's first name.

"What does your mother call your father?" was the question first put.

"She calls him my daddy."

"Yes, yes, I know; but when she wants to speak to him, what does she say?"

"Oh, she says, '587, please,'" was the child's reply.

"I don't mean when she calls him at the office. When she tells him to get up in the morning, what does she call him?"

"Oh, she says to be ready for breakfast in about five minutes."—Philadelphia Public Ledger.

New Medical Standards for China.

The United States Pharmacopoeia is being translated into the Chinese language under the direction of the Philadelphia College of Pharmacy and Science. Before the war Germany tried to have the German Pharmacopoeia translated into Chinese, with the object, of course, that German manufacturers might export to China drugs of German standards. Great Britain has made similar attempts since the war, but our own standards are to be adopted.

Proceeding With Caution.

"What are your views concerning the tariff?"

"You ought to speak first," replied Senator Sorghum.

"Why?"

"Because you are an influential voter. As a patriotic yet practical statesman it should be my duty, as well as my privilege in this interview, to reconcile my opinions to yours as far as I can conscientiously do so."

Strenuous Job.

Johnny, 5 years old, was reprimanded for his disobedience, and when told that God did not love naughty boys, asked:

"Mother, how does God know I have been naughty?"

"He sees everything you do, my son," was the reply.

Then after a moment's reflection he said, "Gee, but I must keep him busy." —Tulsa World.

Students Activity Body Organized

The Students Activity Body held an election for members Tuesday. They decided to divide the body into three divisions. which are: Entertainment, Public Speaking, and Athletic. The members elected for the Entertainment are Leona Lau, Marie Blank and Pearl Johnson; for the Public Speaking are Adala Schroeder, Clarence Elder and Edna Bergmann; for the Athletics are Gearald Koerner, Milvern Ell and Adolf Lauritsen.

Basket Ball Game Tomorrow Night

Our basket ball game which we had dated for the 24th of February with Crystal Lake will be changed to tomorrow night, Friday, February 17th. This is promising to be a very interesting game because when we played at Crystal Lake it was only our second game we ever played and the score was only 11 to 22 and on their floor. When they come down here the great change in floors will be some handicap for them as they have a very fine gym, with high ceiling and wood floor and the big change will be to our favor as that is all we are accustomed to. So now lets all come for we need your support and we will sure give you your money's worth. We are hoping to see you all there Friday night. on our floor so don't disappoint us.

Home Talent Play

The home talent play to be given by the High School for one of the Lecture Course Numbers will be given Monday night, the 20th, instead of Friday the 17th, on account of one of those who take part having taken sick and another person substituted for her place. This is sure to be a big success as in addition to the play there will be two acts of vaudeville by two of the town comedians, R. M. Thomas and Sam Harvey, which is sure to be good. The cast of characters for the "Box of Monkeys" is as follows:-

Edward Ralston ..... Adolf Lauritzen
Chauncey Oglethorpe ..... Fred Schlichting
Mrs. Ondego ..... Jhones Marie Blank
Sierra Bengaline ..... Pearl Johnson
Lady Guinevere Llanpoore ..... Edna Bergmann

Everybody come!

Blanche Medaus has been absent this week.

Andrew Wellemeyer was absent on Wednesday.

Ewald Josten was absent Wednesday of this week.

Sylvanus Walker was absent Wednesday.

Albert Priebe was absent Wednesday.

The 9th Grade are divided into three debating teams with four in each.

The 9th and 10th English Class have finished Silas Marner and will have their classes separated now. The 10th Grade are going to take their class, Julius Caesar.

The debate for this week in the Community Civics class will be:—Resolved, that the churches should be supported by taxation. Albert [illegible] and Ewald Josten are to uphold the affirmative, and Gearald [illegible]er and Harvey Barz will take the negative.

The debate for last Friday was: Resolved, That it is better to have a common education than $10,000 at the age of 21. John Baumgartner and Albert Buschh upheld the affirmative and Gearald Koerner and Andrew Wellemeyer the negative. The judges were Adala Schroeder, Neota Riddle and Sylvanus Walker. It was decided in favor of the negative side.

ELECTRIC LIGHTS FOOL THE HENS

More Eggs Result of the Experiment

GARNER.—Electrical Contractor C. C. Tessier is no friend of the festive hen or he would not be a party to perpetrating such jokes upon her as he has. Henry Duesenberg complained that his hens were loafing on the job and producing very few eggs—averaging only a half a dozen eachh day.

Tessier explained to Mr. Duesenberg that he had a scheme to make them more attentive to their prescribed duties and explained his plan to Henry. Mr. Duesenberg is always ready to try a new thought, and so set Cliff at work. Tessier wired the Duesenberg coop for electric lights, and connected the switch with a clock that automatically turns on the light at about 4:30 o'clock. Of course, the clock can be set at any hour desired.

The device was finally installed and it is a positive fact that within four days time Duesenberg's egg production jumped from six to sixty per day. The explanation is simple. The lights go on at an early hour, long before the sun is up. The hen gets off the roost as the coop is lighted and starts her day's work. This makes the day just as long as those of summer, when egg production is the heaviest. It is the activity of the hen rather than the season of the year that governs egg production.

KLEMME BOY BREAKS INTO THE SUNDAY PAPERS

Hilliary Grieman who lives on a farm near Klemme has attracted state-wide attention and even had his picture appear in the Des Moines Sunday Register a few weeks ago due to his excellent record made at school in his studies.

Hilliary goes on record as having one of the best of fifteen highest graded eigth grade examination papers in the State of Iowa. His paper will be sent to the educational headquarters at Washington, D. C. who will award him a special certificate.

He has made a record that he can well feel proud of.

—T—

Surprise Party Given

Elmer Schlei had a birthday last week Thursday and was given a big surprise by the neighbors.

Elmer didn't have anything to say for a minute or two but he soon recovered and saw that everybody was having a good time. About fifty were present; they brought along a dandy supper of buns, cake, jello and served coffee. After supper all departed wishing Elmer many more birthdays.

The End of a Perfect Day

Here's a Klemme Farmer Who Knows How to Make Money

HOGS BRINGING KLEMME NICE SUM OF MONEY

Hogs are about the only farm product that is bringing the farmer real money this year. The other day we were talking with A. C. Lau and he gave us item that is well worth passing on to our farmer readers.

Saturday Henry Buseman sold him 87 head of hogs which brought him the neat sum of $2,163.00 and which perhaps is the biggest valued bunch of hogs brought in this winter by one farmer. Mr. Lau also stated that from the 7th of January to the 10th of February he has paid out to the farmers for ogs $23,369.20. Very good and we are glad to hear that the farmer is making money on at least one of his products. We presume the other live stock buyers also have paid out about the same amount, to the farmers for their live stock.

Klemme is a good live stock shipping point and the market price here is always much higher than what buyers pay in te other nearby towns so that it is quite frequent that farmers closer to another town brings his stock here to sell. Just Saturday a farmer near Goodell drove his cattle to Klemme and sold them to a local buyer. That speaks well for the Klemme buyers.

—T—

BASKET SOCIAL

Remember the basket social Feb. 21st at Liberty No 8. School, 3½ miles west of Klemme. See how "Jack" succeeds in keeping his marriage a secret from his "Uncle John" who beleives "A man that's married is a man that's marred." Ladies please bring baskets and say boys you know what is expected of you. Program commences promptly at 8 o'clock.

GOV. KENDALL SPEAKS AT FARMERS MEETING

Governor Tells Farmers His Views On Conditions at Ames Meeting

Governor N. E. Kendall who was the feature speaker at the banquet held at the close of the Farmers' week course at Ames spoke of the many phases of present day conditions.

"While I am not a pessimist," said Governor Kendall, "neither am I the other extreme. I am neither discouraged nor deceived. The situation of the farmer today is bad and there is no use trying to conceal it. And I tell you that we will never have prosperity in the Mississippi valley until the farmers can market their products at a profit."

"If I were to point out the one important item in our economic system that should be corrected at once, I should sap 'Reduce the freight rates,' declared the Governor.

Government expense, national, state and county must be cut down, the governor stated in denouncing the heavy tax burdens. "We must get back to the old principles of frugality and economy, thrift and economy in our daily life and in our government."

Dean Eugene Davenport of the college of Agriculture of the University of Illinois in speaking at the same meeting declared the Mississippi valley farmer had a place to work, work to do, had intelligence to do it with, that he had a surplus of food and no fear of hunger which cannot be said of many people elsewhere.

Lieutenant Governor John Hammill also addressed the farmers and showed the need of better marketing and more co-operation among the farm interests.

THE ORDERLY COUNTRY TOWN

The ordinary country town can not expect to present a fine appearance as the result of having many costly edifices. It may have some handsome buildings, but it usually cannot invest any great amount in expensive architecture ad building materials. It has to acquire a pleasing appearance in other ways largely by a scrupulous care of its business buildings, homes and streets, with the patien effort to beautify the same.

Property thkat is kept in perfect repair has a finish and trimness about it that counts more than costly architecture. You see many towns where a great deal has been spen on ornate and elaborate buildings, but where the streets are not kept clean, and where many people still tolerate disorderly conditions. A place like that looks far inferior to many simply built country towns which are carefully maintained.

The physical appearance of a town has much to do with its business success and progress. People are not attracted to a disorderly town. It looks like the kind of a place where inefficiency is the rule. Visitors have the feeling that that spirit would prevail in the stores in their dealings with the public. But a town whose business and home buildings are kept in good repair and well painted, looks like a winnr. People feel that the same spirit of order and system and enterprise must make it a good place to do business in.

The people of Klemme have on the whole kept a very orderly looking community. But there are some folks everywhere whose instinct is to slip along as easily as possible. They realize that their real estate is getting to look a little run down, but their motto is, "Never do today what you can put off until tomorrow."

Every time anyone gets out and straightens up a leaning fence, or repairs some tumbledown building look shabby, he helps his home town or paints a house that is getting to take a step toward progress. His desire for improvement spurs on his indifferent neighbors, and soon the whole street begins to have a new air of alertness and success.

Let's all try to make Klemme a better looking town this coming year by getting out at the first signs of spring and clean up our property as well as the streets and alleys..

—T—

SWIFT COMPANY TO HAVE STATION IN KLEMME

We understand that M. A. Fell of Garner has rented the little room in the east part of McCullough's barebr shop to the Swift Co., who will install a produce and cream station there sometime soon and will have a man from Clarion here to run the business for them. We are of the opinion that Swift will find strong competition here in that line.

—T—

HAPPENINGS AT LIBERTY TOWNSHIP CHURCH

A fair crowd was in attendance Sunday morning.

The young men and young ladies class, of which Roy Schaefer is the teacher, has quite a large membership and most of them were present last Sunday morning.

The evening attendance was rather small. There was League service and also preaching.

Wednesday afternoon the weekly prayer meeting was held at the J. W. Haefner home.

The basket social that the League had planned was again postponed. It will probably be an evening next week.

Mahaska Lead Juniors

Mahaska county had a representation of 42 boys and girls at the Junior farmers short course work at Ames and led all other counties in the kind of work done during the year.

LIVE STOCK SHIPMENTS FOR THE PAST WEEK

There were ten car loads of live stock shipped out of the Klemme stock yadrs Saturday night. Shipments are continuing to stay pretty well toward the top of the list compared with the other near by towns.

Those who shipped Saturday night were as follows:

Cattle	
Ed. Schoenwetter	1 car
Joe Johnson	2 cars
Hogs	
Albert Schmidt	2 cars
Joe Johnson	1 car
A. C. Lau	4 cars

Joe Johnson was the only one to accompany the stock shipment to Chicago this week.

A Financial Excuse.

"There is no excuse for anonymous communications." "Not unless you can find a publisher for them."

Timely Advice.

"I want to leave footprints on the sands of time."

"Well, keep out of the mud."

Where He Does His Practicing.

"He's a wonderful cornet player." "That so?" "Yes, even the neighbors where he lives admit it."

Doing Well.

"How's your book of poems coming on?" "Fine. Selling more copies than I can autograph."

Her Reason.

Alice—"How do you know you love George?" Virginia—"Because Gladys wants him."—Town Topics.

After Eden.

Adam—"Now we shall have to live in a house." Eve—"Certainly; I'll need a roof to dry my hair on."

Nothing Thin About It.

"I suppose your husband gave you a thin excuse."

"No, he made a stout denial."

No Harm Done.

Contributor—"You sit on every joke I write." Editor—"Well, I wouldn't if there was any point to them."

The Modern Need.

Knicker—The wind is tempered to the shorn lamb.

Bocker—How about the bobbed hair?

Farce Comedy.

"All the world's a stage."

"Those knockabout van comedians act like it when you're moving."

Easily Pleased.

"Which do you prefer, the Greek or Roman nose?" "Any nose suits me that keeps out of my business."

She Doesn't Now.

Knick—"Does his wife handle the reins?" Knack—"She did until he jumped over the traces."

Deadly Effective.

Rub—I've got to kill time.

Dub—You might come in and argue with my wife.

Next!

Rub—Are you engaged to Mary?

Dub—No, but I'm on her waiting list.—Exchange.

Where Was He?

Ag—I dreamt I died last night.

Wag—What woke you up?

Ag—The heat.

Appropriate Name.

"Why do you call your car Regulator?"

"All other cars go by it."

Good Luck.

"Have any luck on your fishing trip?" "Yep. Won $28 playing poker."—Detroit Free Press.

Why Else!

Rub—I owe no man a penny.

Dub—Isn't your credit good?—New York Sun.

A Mystery Solved.

Rub—"One-half the world now knows how the other half lives."

Dub—"Yes; it pays the bills."

Market Reports Sent by Radio

Quotations on Agricultural Products Are Broadcasted by Government Stations.

KEEP FARMER WELL POSTED

Government Aims to Make the American Farmer the Best-Informed Farmer in World—States Also Interested.

Washington.—The wireless is now being used by state and federal agencies to broadcast national and local agricultural market reports throughout virtually the entire country. Reports on the national markets are dispatched daily by the United States Department of Agriculture from wireless stations of the post office department at Cincinnati, Omaha, Washington, North Platte, Neb., Rock Springs, Wyo., Elko, Nev., and Reno, Nev. These reports are received by hundreds of amateur wireless operators. National market reports are also received by state bureaus of markets and agricultural colleges, supplemented with local market reports, and relayed by wireless telegraphy and telephone to farmers, shipping associations, newspapers, banks, and other agricultural interests.

The St. Louis university at St. Louis, Mo., was perhaps the first among educational institutions to broadcast market reports by wireless. Their reports are received by hundreds of farmers, shipping associations, banks, and other agricultural interests, and a telephone company in eastern Illinois which receives the reports telephones the news regularly to its 5,000 subscribers.

Telephone and Telegraph.

At Lincoln, Neb., the University of Nebraska and the Nebraska Wesleyan university are co-operating in broadcasting crop and market reports furnished by the state bureau of markets. Both radio telephone and telegraph are used. In Wisconsin the State department of markets broadcasts national and local market reports from the University of Wisconsin wireless station at Madison. At Minneapolis, crop and market reports are broadcast from the University of Minnesota radio station. The Minnesota college of agriculture has also assigned an extension representative to instruct the farmers in the use of wireless receiving apparatus. The college of agriculture of Cornell university has assigned an expert for similar work, and to assist rural radio clubs that are being organized in New York.

A high-powered transmitting wireless telephone has been installed in the office of the Missouri state market bureau at Jefferson City, Mo., and will disseminate market information. Government reports from the larger market centers of the country will be received by means of a "drop" from the leased wire system of the United States Department of Agriculture, and transmitted by radiophone to all sections of Missouri. Demonstrations intended to interest farmers, dealers and shippers installing the necessary wireless receiving apparatus will be held in various rural communities of the state, and it is anticipated that telephone offices, newspapers, chambers of commerce, county agricultural agents, banks, high schools, and co-operative marketing associations will be among the first to install receiving sets.

Complete Program.

A most complete program in the dissemination of market reports by wireless is being planned by the state bureau of markets in Ohio, a specially-constructed radiophone transmitter of the most improved type being installed in the radio station of the University of Ohio for that purpose. The Texas markets and warehouse departments are also planning a market news service by radiophone for farmers, dealers and shippers in Texas, arrangements being made to use the radio equipment of the University of Texas at Austin.

The first national market report to be broadcast by wireless anywhere in the world was sent out by the United States Department of Agriculture from the radio station of the United States bureau of standards only a little over a year ago. The department soon demonstrated the practicability of utilizing the radio for disseminating market information, and rapid progress in expanding the work has been made possible through the co-operation of state and federal agencies. To make the American farmer the best-informed farmer in the world is the aim of these agencies, and equal progress during the coming year will go far toward securing that result, say officials of the federal department.

Operate to Stop the Pain in an Arm Already Gone

Salem, Ore.—An operation of sympathetomy, believed to be the first in the United States, was performed here on Marius Sahuo. Surgeons removed part of the cuff of the brachial artery from the stump of one of his arms, amputated some time ago, to alleviate pain apparently in the removed arm. The arterial cuff, they explained, contains a sympathetic nervous plexus in which the painful sensation had its source.

Gray Squirrels Bred in England

Introduction of American Variety of Rodents in Parks Causes Some Difficulty.

DESTROY NESTS OF WARBLERS

Spread From London and Are Invading Country Over Wide Areas—Drive Out Red Squirrels—Popular in Parks.

London.—American gray squirrels, which have been introduced into England, are causing some difficulties, according to the Times, which remarks in an editorial:

"The introduction of North American gray squirrels into this country has had an unexpected success, which, if we may judge from many letters sent to us, has not gained universal approval. English visitors to Central park, New York, have often been delighted by the bold and confiding habits of these little rodents, which seem never to have acquired the red squirrel's distrust of man. Doubtless there have been several attempts to acclimatize them in this country, but their definite establishment is recent.

Introduced Into Park.

"Some dozen years ago the Zoological Society of London obtained a number of individuals from a private collection in Bedfordshire, for the purpose of inducing them to breed at liberty in the gardens in Regent's park. They were first given the relative freedom of a large open-air inclosure, from which, when they had become accustomed to receive tribute from visitors, they were allowed to pass in and out by a rope bridge to a tree. It was anticipated and indeed hoped, that they would spread from the gardens to the park. The office of works took a benevolent interest in the experiment and restrained visitors from taking dogs, except on lead, through the main avenue.

"After two or three years, in which they seemed to be disappearing, they suddenly became ubiquitous, forming a charming addition to the sparrows and wood pigeons, hitherto the only creatures attracting popular attention. The gray squirrels are plainly happy and equally plainly give happiness to the London population—two weighty reasons for their presence in the London parks. But it is alleged against them that they destroy the nests of warblers, a railing accusation easier to bring than to justify. In fact, there is room for both; possibly a few nests have been destroyed, but the squirrels frequent the regions of the parks where dispensers of nuts most abound, whereas the shy singing birds covet the more secluded thickets. Careful observers of birds are inclining to the opinion that the avian population is improving in numbers and in variety, and that it might improve still more were some small and suitable sanctuaries to be inclosed.

Spread to Country.

"On the other hand, the gray squirrels, whether by taking advantage of tubes and busses or by deliberate human connivance, have spread from London and are invading the country over very wide areas. They are said to drive out the red squirrel, to raid gardens, and to add to the anxieties of the pheasant breeder. We hope that fuller inquiry will not sustain these charges. On general grounds we doubt if a creature with so marked a preference for living as a sturdy beggar will settle down to the hardships of a predatory and hunted life. The biological problems following on the introduction of an animal to a new country are interesting, and we admit fully that there has often been no middle way between complete failure and disastrous success."

Aged Man Proud Father.

Mammoth Spring, Ark.—Dr. D. F. Curtis, aged eighty, and whose wife is forty-four years of age, is the father of a twelve-pound baby girl born recently. This is the couple's twelfth child, two of whom are dead.

GIVES DATA ON ALL MARRIAGES

Proportion of Married Men Has Gone Up, Says Census.

Probably More Indicative of Change in Age Composition of Population Than Growing Propensity to Matrimony.

Washington.—The proportion of married men to the total male population of the country fifteen years of age and over increased from 55.8 per cent to 59.2 per cent in the ten years preceding the 1920 census, according to a compilation of marital statistics made public by the census bureau.

The bureau believed, however, that this was probably more indicative of a change in the age composition of the population—an increase in the percentage of males between fifteen and twenty-five years of age due to increased immigration—than a growing propensity to matrimony.

Of the total male population of 53,900,431 above the fifteen-year classification the census figures showed 21,849,266 married, 1,758,308 widowed and 235,284 divorced, the latter figure, however, including none divorced and remarried. The divorce total showed an increase of 20 per cent in its ratio to the total population during the ten-year period, constituting six-tenths of 1 per cent of the latter against five-tenths in 1910.

Although due to the absence of the wives of many foreign-born residents, the number of married women was shown to be about 500,000 less than the male total, the number of divorced women exceeded men by approximately 40,000, representing closely the difference between the number of men and women remarried after divorce.

By states, Massachusetts led the field in the proportion of single women with a percentage of 34.4, although the District of Columbia exceeded this with 37.3 per cent. The census bureau pointed out, however, that the ratio of men to women in the population "naturally has a very important bearing on the proportions of single men and women." Wyoming led with 70.5 per cent in the proportion of married women, while 62.8 per cent was shown for Mississippi and Arkansas, and the smallest, 45.9 per cent, for Nevada.

BURIES BANK LOOT IN PARK

Paris Detectives Dig Up 350,000 France Plunder Hidden by French Legion Member.

Paris.—Detectives have just dug up 360,000 francs, plunder of a clerk of the Bank of France, who hid it in four preserve jars and buried them in different spots in the park of Versailles in this city.

The detectives say Armand Grenet, a former army aviator and knight of the Legion of Honor, admitted that he embezzled 400,000 francs from the bank, kept 40,000 of them and hid the rest in the jam jars.

SENATE IS GIVEN SEVEN TREATIES

President Submits Pacts of Arms Meet and Asks Prompt Approval.

NO ENTANGLEMENTS FOR U. S

No Alliance or Involvement Which Requires America to Surrender Any Worth-While Tradition — Contains No War Commitment.

Washington, Feb. 13.—President Harding on Friday submitted the seven treaties of the arms conference to the senate and asked "prompt approval" of them.

With the treaties he submitted the report of the American delegation and the minutes of both the plenary sessions and the committee meetings of the conference.

The President asserted there is in the treaties "no entanglement, alliance, or involvement which requires the United States to surrender any worth-while tradition."

"I am not unmindful," he said, "nor was the conference unmindful, of the sentiment in this chamber against old world entanglements.

"But I can bring every assurance that nothing in these treaties commits the United States, or any other power to any kind of an alliance, entanglement or involvement. It does not require us to surrender a worthwhile tradition."

The treaties the President submitted were:

The four-powered Pacific treaty, which replaces the Anglo-Japanese alliance.

The supplementary treaty to this pact, taking the Japanese homeland out of its provisions.

The five-powered treaty that limits the size of navies.

The five-powered poison gas and submarine treaty.

The nine-powered Chinese treaty.

The nine-powered Chinese customs treaty.

A treaty covering American rights in mandated territories (Yap treaty).

The President defended the four-powered treaty which replaces the Anglo-Japanese alliance and to which already much senatorial opposition has been manifested.

"The four-powered treaty contains no war commitment," he said. "There is no commitment to armed force, no alliance, no written or moral obligation to join in, or arrive at, any agreement except in accordance with our constitutional methods."

The treaty, he said, was a mutual pledge on the part of the four powers to respect their insular possessions.

The President described the pact as a "moral warning" to the world that the four great powers of the Pacific would protect the peace of those waters.

It is now up to the senate, he said, as the executive branch of the government has done its work, and much depends on the senate's decision—if it is against "these advanced expressions of conscience, then it will be futile to try again."

The senate's concern for freedom from entanglements, the President said, was never once forgotten by the American delegation.

The President said that if the senate turned down the treaties "the republic would be discredited, future peace efforts rendered futile and unlikely, and discouragement would be written where there is now world hope."

PROFITS TO PAY FOR BONUS

Tax on Gasoline and Autos, Documentary Stamps, Admissions, Cigarettes, Gum and Tobacco.

Washington, Feb. 13.—A tax of 2½ per cent on the undivided profits of corporations as a part of the soldiers' bonus revenue program was agreed by a house ways and means subcommittee. A slight increase in parcel post rates to yield a total of $20,000,000 a year also was understood to have been agreed upon.

The subcommittee decided against a tax on bank checks.

The program includes:

One cent a gallon on gasoline, estimated to yield $70,000,000.

Twenty-five cents per horsepower on automobiles, $50,000,000.

Five dollars per $1,000 on real estate transfers, $20,000,000.

Increased documentary stamps, with the rate on the transfer of stocks and bonds at one-tenth of 1 per cent, $64,000,000.

Double the present 10 per cent tax on admissions where the charge exceeds 25 cents, $70,000,000.

An increase of 50 cents a thousand on cigarettes, $25,000,000.

An increase of 2 cents on chewing and smoking tobacco, $5,000,000.

Many Ex-Officers Jobless.

New York, Feb. 11.—There are twelve ex-majors of the American army and five ex-commanders of the navy among the 7,500 jobless service men still registered with the city employment bureau here.

Foretold Lusitania Disaster.

New York, Feb. 10.—James P. Keating, magazine writer, asserted that George Sylvester Viereck, former editor of the Fatherland, had predicted the sinking of the Lusitania four days before it had happened.

Home Town Helps

SHOWED RIGHT CIVIC SPIRIT

Interesting Story of How Youngsters Brought About the Regeneration of Their Village.

Twelve boys who started out in a semi-playful mood under the name of "Dirty Dozen" finally were led on until they had cleaned up a whole community of 1,500 people physically and morally. At last their name was changed to "Diligent Dozen."

There was a quiet little mother of one of the twelve hidden behind the scenes, who never appeared publicly to be connected with the affair, but at whose house there was a mysterious generator of brilliant ideas for such boys. The twelve "D's" met both Friday evening and Sunday afternoon for conference, writes William A. McKeever in the Chicago American.

The town cleanup of the boys was worked in accordance with the rules of what we call "good psychology." They met with the proprietors of the main business section, two blocks in length, and agreed to clean up the streets in front of them and keep them clean for a year, provided these men would do likewise with their store fronts and interiors. The general transformation began with a rush. Saturday morning early the dozen were there with sweepers, shovels and wheelbarrows, and by noon the street looked strangely new.

The week following soap, water, paint and putty were brought freely into use on the old store buildings. Old tobacco tags, circus bills and notices of painkillers were raked down and burned. About one-third of the display windows—under the influence of this "revival" were torn out and replaced with plate glass fronts. Many interior improvements followed.

The school buildings and church structures were next attacked by the "D's." The school officials were requested to clean and repair the buildings, and the teacher gave a half-holiday so that pupils might thus review the school yards. The dozen themselves took care of the vacant lots on which the church buildings stood.

MAN'S DUTY TO HOME TOWN

Civic Obligations Are Not Always as Thoroughly Recognized as They Ought to Be.

There is no country in the world in which wealth so generally recognizes its obligations to the public as in America. Vast sums have been devoted to public use, to the great benefit of the public. But municipalities have not figured largely as beneficiaries, though they have to some extent. Indianapolis has by no means been forgotten. And it surely ought to be a pleasure for any person with the right feeling toward the city or town in which he has lived to do something with his money to make life in it happier and pleasanter. The obligation of a man to his town is like that which he owes to his church or his university, and it should be as gladly performed. This feeling is becoming more widely prevalent in Indianapolis, and it will bring results in which all will rejoice. Civic life can be made better, and a proper civic pride developed in this way that will be worth much.—Indianapolis News.

Life in Big City Not Best.

Cream will rise to the surface anywhere, says Mr. Bok, and the institutions of the big city will reach out for their captains only where they find quality. He says of the aspiring youth:

"Let him use the great city as a market in which to buy or sell; to see and profit; let him use it as a place to go for a good time if he chooses. Let him bring back with him the best within it to serve his own community, but leave behind him its turmoil and restlessness that vexes the spirit and makes the young old. Let him think twice and thrice before he raises his children with the ghastly memory of a steam radiator in a city flat."

Which is pretty good advice after all.

City Zoning Spreads.

The chamber of commerce of Kansas City has recently heard the first official presentation of the work of the city planning commission of that city. The chamber has unanimously voted to make an intensive study of zoning principles and co-operate with the city plan commission.

Beauty In Trees.

When a small town starts civic beautification it can count on its trees having already done 50 per cent of the work.

But Not to a Girl.

She—And, Harold! you have never loved any other girl but me?

He—No, my love!

She—Yet somebody told me that you have been engaged once before!

He—Yes, but that was to a widow.

Worth Remembering.

"Mr. ex-Kaiser," said Uncle Eben, "ought to serve to remind a heap o' folks dat a man gits mo' respeck when he's a-choppin' regular wood, dan when he's braggin' 'bout his family tree."

Washington's Farewell Address

NEW YEAR LEVEE

President Washington's Reception at the White House.

Friendly Greetings of Citizens, It Is Recorded, Greatly Pleased the First Chief Executive.

"In the Republican Court," a volume published in 1854 by D. Appleton & company dealing with the administration of Washington, appears the following interesting description of New Year's activities of 1790, and particularly the manner of observing New Year's at the White House, where Martha Washington, the ever-considerate spouse, dismissed her guests at 9 o'clock in order that her "general's" slumber might not be interfered with:

"The winter of 1789-90 was warmer than any which the oldest inhabitants could remember. In the last week of December and the first of January gardeners and farmers on the island of Manhattan were plowing, and women appeared in the streets of the city in their summer dresses. The pleasant custom of making New Year's calls had long obtained in most of the countries of continental Europe, and it was brought to New York by both the Dutch and the Huguenots, who had preserved it as one of their peculiar institutions, which never could be naturalized in towns of a more purely English origin and population.

"On Friday, the first of January, 1790, we are informed by the late venerable John Pintard, who was then a young man of fashion, and a close observer, the President was waited upon by the principal gentlemen of the metropolis. The day was uncommonly mild and agreeable, even for that year of perpetual verdure, and the great festival of friendship was never kept more universally or with a livelier gratification. The visitors of the President, after an interchange of the usual congratulations of the day, withdrew, delighted at his gracious manner.

Washington's Stately Bearing.

"It is not known, though Mr. Pintard assures us that a majority of them were personally unacquainted with him, if there were any to complain of his stately bearing as about this time alarmed a sagacious colonel from Virginia for the safety of the republic. This colonel had traveled, and after attending one of the receptions of the President he declared, at the table of Gov. Beverly Randolph, in Richmond, that "his bows were more distant and stiff" than any he had seen at St. James's. A correspondent informed Washington of the fearful apprehensions thus awakened, and he replied, "That I have not been able to make bows to the taste of poor Colonel Blank, who, by the way, I believe, never saw but one of them, is to be regretted; especially as, upon that occasion, they were indiscriminately bestowed and the best I was master of. Would it not have been better to throw the veil of charity over them, ascribing their stiffness to the effects of age, or to the unskillfulness of my teacher, rather than to pride and dignity of office?"

Martha Washington as She Appeared in 1790. (From an Old Engraving.)

Mrs. Washington's Levee.

Mrs. Washington held her levee, as on other Friday evenings, but on no previous occasion had one been graced with so much respectability and elegance. The air was almost as gentle as it should be in May, and the full moon shone so brightly that the streets to a late hour were filled with a delicious twilight. It was not the custom for visitors of the President to sit, but it appears from Mr. Pintard's diary that, on this night, at least, there were chairs in the rooms where Mrs. Washington saw her guests, for "after they were seated," tea and coffee, and plum and plain cake, were dispensed by the attending servants. She remarked, while speaking of the day's occurrences, that none of them had so pleased the general (by which title she always designated her husband) as the friendly greetings of the gentlemen who called upon him at noon.

To an inquiry by the President whether such observances were casual or customary, it was answered that New Year's visiting had always been maintained in the city. He paused a moment, and then observed: "The highly favored situation of New York will, in the process of years, attract numerous emigrants, who will gradually change its ancient customs and manners; but, whatever changes take place, never forget the cordial and cheerful observance of New Year's day."

Mrs. Washington had stood by his side as the visitors arrived and were presented, and when the clock in the hall was heard striking 9, she advanced, and with a complacent smile said. "The general always retires at 9, and I usually precede him;" upon which all arose, made their parting salutations, and withdrew.

TREASURE COMMON TO ALL

Fame and Character of Washington Honored in All the Countries of the Earth.

Webster, this nation's greatest orator, said:

"Inspiring auspices, this day, surround us and cheer us. It is the anniversary of the birth of Washington. We should know this, even if we had lost our calendars, for we should be reminded of it by the shouts of joy and gladness. The whole atmosphere is redolent of his name; hills and forests, rocks and rivers, echo and re-echo his praises.

"All the good, whether learned or unlearned, high or low, rich or poor, feel, this day, that there is one treasure common to them all, and that is the fame and character of Washington. They recount his deeds, ponder over his principles and teachings, and resolve to be more and more guided by them in the future."

TOMB OF WASHINGTON, AMERICA'S NATIONAL SHRINE

LIVE STOCK

MORGAN IS DESIRABLE HORSE

Steady Increase in Weight and Height of Animals Maintained at Government Stud.

(Prepared by the United States Department of Agriculture.)

There has been a steady increase in the weights and heights of the horses maintained in the stud at the United States Morgan horse farm at Middlebury, Vt., says a recent department circular No. 199, "Breeding Morgan Horses at the United States Morgan Horse Farm." In 1911 the average height of mature stallions was 14.3 hands and of mature mares 14.2½ hands. By 1916 these figures had been raised to 15 and 14.3, respectively, and by this year to 15½ and 14.3½.

The average weight of mature stallions in 1911 was 1,025 pounds; in 1916, 1,040 pounds; and in 1921 it had been increased to 1,200. During the same period the weights of mares went from 1,025 to 1,049 to 1,063 pounds.

At the same time, however, the other qualities received just as much consideration as size. A frequent objection raised against the Morgan has been that it is too small, but the steady improvement in scale and weight is making the modern Morgan a handy and desirable horse for use on farms, as pleasure saddle horses, for police mounts, and for cavalry purposes. It has good speed and exceptional endurance.

The government farm at Middlebury was established to insure preservation of the famous American breed, and the stock at the farm is a fountainhead where good blood will always be available. The circular just mentioned contains information concerning foundation animals, the story of the movement to conserve the breed, methods of breeding and management, show-ring records and the records made by Morgans in endurance contests held in recent years.

Since the early days of the breed up to the present time the Morgan has repeatedly demonstrated his endurance, one of the most desirable qualities in any horse, particularly a light horse. In this publication attention is called to the great reputation made by

The Morgan Stallion Scotland, Weight 1,150 Pounds; Height 15 Hands 2 Inches, Is a Good Specimen of the Modern, Larger Morgan.

the First Vermont cavalry in the Civil war. This regiment was mounted on Morgan horses, and official reports made to the War department stated that the horses stood the hardships of the campaigns better than any others. Also, their short, strong legs, round, full-muscled bodies, and beautiful heads called forth universal admiration.

The Morgan still has the endurance. Castor, a Morgan gelding bred by the United States Morgan horse farm, made the second best time in the 300-mile endurance contest in 1919. He carried 200 pounds and made the trip in 51 hours and 18 minutes. The next year he carried 245 pounds and finished in 58 hours and 40 minutes, taking seventh place. In the contest for 1921 he was fourth out of 17 entries, carrying 245 pounds and making the 300 miles in 51 hours and 38 minutes.

This circular, which is well illustrated with halftone reproductions of beautiful Morgans, may be obtained free by addressing the Department of Agriculture, Washington.

DRAFT CAUSE OF PNEUMONIA

Just as Essential to Have Hog Houses Well Ventilated as to Avoid Closing Tight.

Drafty hog houses are frequently the cause of pneumonia but it is just as essential to keep hog houses well ventilated as it is to avoid closing the house up tight. If the hogs are shut up in a warm building where they become too warm and then subjected to cold drafts, they are very likely to contract pneumonia.

Silage-Fed Cattle.

Silage-fed cattle do not finish quite as well as those strictly dry-fed. Adding corn to the silage produces a better finished animal, that usually brings a better price, and it also results in better gains on hogs that follow the cattle.

Ox Warble Loss Big.

The ox warble causes a loss of $50,000,000 in this country, due to spoilage of hides, lessened flow of milk and slow gains in beef cattle. It is always time to swat the ox warble.

DAIRY

BENEFITS OF PUREBRED SIRE

Striking Results Obtained by Maryland Association by Use of Registered Bull.

(Prepared by the United States Department of Agriculture.)

A gain of 17 per cent in milk production and 20 per cent in butterfat production in daughters over their dams because of the use of a purebred bull is the striking result obtained in the New Windsor (Md.) cow-testing association which has a bull association as a subsidiary. The records of 21 cows were compared with the records of their 21 daughters after the latter had become mature cows. The average production of the dams for one year was 5,560 pounds of milk and 219 pounds of butterfat. The daughters averaged 6,523 pounds of milk and 263 pounds of butterfat, a gain over the mother of 963 pounds of milk and 44 pounds of fat. In the association every one of the daughters sired by one of the three association bulls was better than her dam. One of the bulls

A Purebred Holstein Bull.

produced an average improvement in his daughters of 1,414 pounds of milk and 62 pounds of butterfat.

The worth of the purebred sire as an improver of the productive capacity of dairy cows has been measured in a number of localities where there are both cow testing and bull associations. The United States Department of Agriculture has collected figures from a number of communities, but in the past it has been difficult to keep tab on the improvement that bulls have made in herds. The plan of the dairy division now is to get such figures, as far as possible, on cows owned by members in all of the 158 bull associations in the United States.

MEDIUM SALTING FOR BUTTER

Creamery Men Would Profit by Avoiding Excessive Use of Salt and Pack Tubs Carefully.

Butter that is too highly salted is difficult to move in the ordinary trade channels, and creamery men would do well to guard against high salting unless they have a special outlet which calls for that kind, say specialists of the bureau of markets and crop estimates, United States Department of Agriculture. A gritty condition of the salt in butter seriously injures its market value.

A number of butter receivers are advising shippers not to fill their butter tubs too full. During the summer shipments are often exposed to the heat of the sun at some point in transit, and the butter at the top of the tub becomes very soft and runs over the edge of the tub when handled. Such shipments are brought to receivers' stores in bad condition, often showing a heavy shrinkage in weight, resulting in a direct financial loss to the creamery, which could easily have been avoided by filling the tubs properly. This condition rarely occurs in carlot shipments. When less-than-carlot freight or express shipments are made the butter should be thoroughly chilled before shipping.

SUPPLY OF WATER AND SALT

Two Essentials Should Be Given to Calves After They Have Reached Proper Age.

Fresh water should be supplied to calves more than a month old. In cold weather it is well to warm the water, so that a sufficient quantity to supply the calves' needs will be drunk. A small amount of salt should be supplied to calves 2 to 3 months old. A little may be sprinkled in the feed trough or it may be kept in a box to which the calves have access at will.

Tank Heater Pays Well.

A tank heater pays big dividends. If the dairy cow be compelled to drink ice cold water she must use heat and energy from her body to raise the temperature of the water up to body heat. This detracts from the energy available for milk production.

Crowding Calves Is Bad.

The practice of crowding calves closely into small pens or of tying them in dark corners of the barn without permitting them to exercise should be discontinued.

Michigan Game Refuges.

Game refuges and breeding grounds established in 1921 by the Michigan state conservation department total 25,000 acres. They are located in Midland, Gladwin, Emmet and Otsego counties. Particular attention has been given in these areas to the distribution and establishment of the Chinese ring-necked pheasant.

MOTHER! MOVE CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Hurry, mother! Even a sick child loves the 'fruity" taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful today may prevent a sick child tomorrow. If constipated, bilious, feverish, fretful, has cold, colic, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California' or you may get an imitation fig syrup.—Advertisement.

Plain Diction.

"Your constituents say you don't use classical English."

"That's the way I want them to feel about it," answered Senator Sorghum. "When we eat together I want them to realize that the object of the meeting is to talk business and not to organize a literary society."

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription.

Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

Uncle Eben.

"De availability of a friend in need," said Uncle Eben, "is liable to depend on whether you or him is doin' de needin'."

Are You a Mother? Do You Need Help?

THEN THIS LETTER IS OF VITAL IMPORTANCE TO YOU

Omaha, Nebr.—"Dr. Pierce's Favorite Prescription was a splendid tonic and relieved me of all nauseating conditions during expectancy. My baby and I were both strong and hardy in every way. I surely am glad to recommend Dr. Pierce's Favorite Prescription to the expectant mother because I know by actual experience that it is good."—Mrs. Jobe Cooper, 4318 Erskine St.

You should obtain this famous Prescription *now* at your nearest drug store in tablets or liquid, or send 10c to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., for trial pkg. tablets and write for free medical advice.

HE'S A GONE GOSLING NOW!

Now we know its a sure enough thing that LuVerne Smith will no longer be a bachelor, despite the many warnings we have given him, he is bound to become a married man and his friends have given up all hopes. This morning Wellemeyer's truck drove down into our neighborhood and LuVerne's furniture was unloaded in the rooms over Gruetzmacher's store. Perhaps by the time you have read these sad lines he will have lead the blushing bride to the altar of matrimonial bliss and will have promised her to love and obey and not stay out late at nights. If you bachelors have any tears prepare to shed them now. Whose the next victim?

Something to Think About

By F. A. WALKER

SOME INFLUENCES

IN THESE days of doing big things, which cannot be done properly without putting into them the hardest kind of work, accompanied with undeviating concentration of thought, there is a disposition among certain classes of employees to allow disturbing influences to belittle their efficiency.

Trifling as these retarding breaks may seem to the young man or woman who is inclined to entertain them, if not overcome, they soon become formidable barriers in blocking the way to progress.

The thoughts of last night's rollicking play or gay dances, as they come trooping before you in the morning when you take your place at your desk, may unfit you for the day's work.

Under their influence your mind wanders, eludes control and places you at a positive disadvantage with the man or woman who is able to think clearly and make every stroke count.

Columns of figures refuse to prove themselves; words are misspelled; hands tremble and nerves tingle. In your dismay you wonder what has come over your usual placidity.

At the next desk is a worker twice as much in earnest and not one-quarter so flurried. This timidity of yours is proof of the presence of disturbing influences, which are digging pitfalls about your feet and leading you blindfolded to the brink.

The very flexibility and ease with which this is done, fail to arouse your suspicion until in some way or another you sense that you are standing on a precarious base, in imminent danger of toppling over.

And thousands of others like you, through disturbing influences, are standing helpless at the brink, disconcerted and miserable.

Yesterday you and they were certain of the future.

Today everything is in doubt, simply because of the lack of sufficient will-power to drive frivolous thoughts from the mind and to step down on the solid ground of common sense.

And these same disturbing influences have been fooling with mankind since the foundation of the world!

YOUR HAND

How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm.

THE FINGER NAILS

AS A general rule, when the nails are short, it is a sign of sharpness and quickness of intellect and the ability to learn easily. These indications must be confirmed, of course, by a study of the line of the head, which must be good; that is, clear and strong.

If the line of Apollo, which runs up into the finger of Apollo, the third finger, is also good, the short nails mean wit, and in some cases irony.

"Short-nailed subjects make the best journalists, by reason of their love of criticism and their readiness to engage in any dispute or contention," says Heron-Allen, a well known writer on palmistry. He holds also that in a good-natured and happy hand, or in a lazy hand, short nails denote a spirit of mockery and of good-humored sarcasm, frivolity, criticism and contradiction.

Of course, it must be understood that by "short nails" are meant those that are short from base to tip, not those that are shortened by the nervous habit of biting them. The latter is an indication of nervousness, melancholy, and worry, especially if the finger tips are spatulated.

(Copyright.)

POULTRY

INCREASING EGG PRODUCTION

Poultry Keepers Will Do Well to Keep in Touch With What Leaders Are Doing.

(Prepared by the United States Department of Agriculture.)

The methods favored by large poultrymen for increasing the productivity of their flocks are often applicable on the general farm or in the back-yard poultry plant. Every poultry keeper will, therefore, do well to keep in touch with what the leaders are doing to increase their profits, says the United States Department of Agriculture. Certain localities in California, for instance, have become famous for their poultry and egg production, and the study that is given to these problems by farmers, and the owners of big plants, has resulted in a great improvement in their practices.

Obtaining High-Class Breeding Stock Is Easier for the Small Poultryman When Sales Are Held.

The county extension organization in Alameda county, California, has taken steps through its poultry division to raise the standard of all poultry in the county by improving the quality of fowls used in breeding flocks. Owners of hatcheries in the county have entered into an agreement with the county extension organization to use eggs for incubation from selected breeding stock, excluding the incubation of eggs from the general run of fowls in the locality, with the understanding that the county extension organization shall furnish judges to pass on the desirability of birds selected for breeding.

This method of controlling the quality of the poultry in a county is expected to result in a rapid general improvement in the productivity of the flocks. It should also give the county a good reputation wherever hatching eggs or birds are sold.

Promising development that is being encouraged in the famous Petaluma poultry district is the consignment sale of cockerels. In this the poultry breeders have been following the lead of other growers of high-class live stock. Cattle breeders have been holding bull sales for a number of years; sheep breeders have ram sales; hog breeders have sales of boars and of bred sows. In the case of cockerels no pedigree papers are supplied, as they are with other kinds of purebred live stock, but sworn affidavits as to breeding go with each bird.

A White Leghorn cockerel sale was held in Sonoma county (the Petaluma district) October 15. The 14 Pacific coast breeders who consigned birds gave sworn statements as to their breeding. According to the county agent, who was instrumental in putting on this sale, most of the 52 cockerels consigned represented unusually high breeding, many of them having pedigrees extending back eight or nine generations with trap-nest records. Most of them had inheritance records of more than 275 eggs in a year and some more than 300. The fact that 1,000 catalogues were issued shows the importance given to the first sale of this kind.

These two methods of flock improvement ought to be popular among poultry raisers in all parts of the country. They are practical, say the poultrymen of the United States Department of Agriculture, and they help to make good stock available to the average poultry raiser who in the past has had no assurance, other than the breeder's word, that he was getting birds of superior performance merit. Few dairymen, hog growers or beef-cattle raisers are also good live-stock breeders, but methods have been developed that make it possible for any good farmer to build up an excellent herd. It should be just as easy for a poultry raiser to improve his flock.

PREVENT SPREAD OF DISEASE

Roup and Other Contagious Ailments Are Difficult to Control—Separate Sick Birds.

Cold, damp, poorly lighted and ventilated poultry quarters favor the spread of such diseases as roup. Such contagious diseases as these are difficult and sometimes impossible to control unless given attention in the early stages. Wherever preventive measures fail, separate sick birds from the flock as soon as there is evidence of disease and then obtain expert advice to effect a cure.

SCHOOL DAYS

Uncommon Sense

By JOHN BLAKE

SLOGAN OF FAILURE

"IF I had gone after that contract I would have landed it," said the manager of a business firm to one of his subordinates, who had returned empty-handed from a business trip.

"Sure you would," said the subordinate, cheerfully, and if I had your brains instead of you, I'd be sitting in your chair, and you would be out pulling boners on the road."

The foregoing is typical of a conversation which, in some form or other, takes place in every business institution of importance on an average of twenty times a week.

It may be that the bosses are overconfident in their own ability and over severe on the men under them.

But the excuse beginning "if I had your brains," which bosses and employers hear till they weary of it, is the most inexcusable excuse that there is in existence.

The man who admits that he has not the brains to succeed will, of a certainty, never succeed.

The man who is convinced that he can never do as well as the boss does has stopped trying, and when a man stops trying he begins to slide back down the hill.

Of all the futile unprofitable employments, that of envying another man's brains is the worst.

An employer who hires a man for a position of trust and responsibility has the right to expect him to do what he is told to do, and to act, when out of the office, as the employer would act.

If he fails, he fails. Nobody can expect 100 per cent performance. But he at least should not make the excuse that he has failed because he lacked the energy, the intelligence and the resourcefulness to succeed.

The employer who spoke the words we quoted above used to be an employee himself. He made failures, of course, but he never excused them.

When he was "called" for these failures he resolved not to make them again and sometimes to show the boss that he had as many brains as the average employee. That is how he got where he is, which is at the head of one of the most important concerns in America.

MOTHER'S COOK BOOK

by Nellie Maxwell

"The proof of the pudding is in the eating."

FAMILY DESSERTS

TAPIOCA is a dessert that may be used in many combinations and is always a wholesome dessert for children.

Peach Tapioca.

Drain a can of peaches from the liquor or juice, using a pint of the fruit if home canned; sprinkle the peaches with one-third of a cupful of powdered sugar and let stand an hour; soak one cupful of tapioca one hour in cold water to cover, add enough of the peach syrup to make three cupfuls, heat to the boiling point; add tapioca drained from the cold water, two-thirds of a cupful of sugar and one-half of a teaspoonful of salt; cook over hot water until the tapioca is clear. Line a pudding dish with the quartered peaches, turn in the tapioca and bake slowly in a moderate oven for 35 minutes. Serve hot or cold with cream.

Cracker Custard Pudding.

Soak three-fourths of a cupful of cracker crumbs in one quart of scalded milk; cool, add one-third of a cupful of sugar, one-fourth of a cupful of butter, two eggs slightly beaten, one-half teaspoonful of vanilla and the same of lemon, with salt to taste. Bake slowly one hour in a moderate oven, spread with a meringue, return to the oven and brown delicately; serve with vanilla sauce.

Coffee Jelly With Cream.

Soak two tablespoonfuls of gelatin in one-half cupful of cold water one-half hour, dissolve in one cupful of boiling water, strain and add two cupfuls of clear coffee, one-third of a cupful of sugar and stir until the sugar is dissolved. Turn into a ring mould, chill, unmould on a serving dish, fill the center with sweetened whipped cream, flavored with vanilla.

The Friendly Path

By WALTER I. ROBINSON

NO ONE IS PERFECT

"IF MEN are so wicked with religion, what would they be without it?" Those who are so free with criticism of what religious organizations are trying to do are seldom found helping whole-heartedly in making their work more effective.

It always is much easier to find fault than to offer helpful advice. In religious work or anything else of consequence there are always certain to be those who devote most of their time to criticising. In consequence, by fault-finding, without commendation or pointing the way to overcome the things to which exceptions are taken, the natural tendency is to disrupt, weaken and frequently destroy much of the good that otherwise would make the world better and its people more happy. Let those who are so free with their criticism of religious activities keep the lesson of the proverb that they'll get more joy every day, because they'll see some good even among the bad conditions they claim to deplore.

Those who become disheartened in doing good, because of the constant fault-finding, need a new estimate of the importance of the work in which they are engaged. Instead of being sensitive of criticism, it would be much more to their credit if they accepted fault-finding as something to be expected; then their efforts would likely be more effective in accomplishing the amount of good they set out to do.

On the whole, the influence of religious work, even though slow and disappointing at times, is responsible for the high moral code under which virtually all the civilized world operates. There may be evasions of the true course which is generally accepted as the pathway everyone should tread. But, nevertheless, as a rule people don't side-step very often without experiencing a pang of regret and without lowering their estimates of themselves.

It is always disappointing when those who teach others stray from the proper course themselves. But, it is well to remember that no one is perfect.

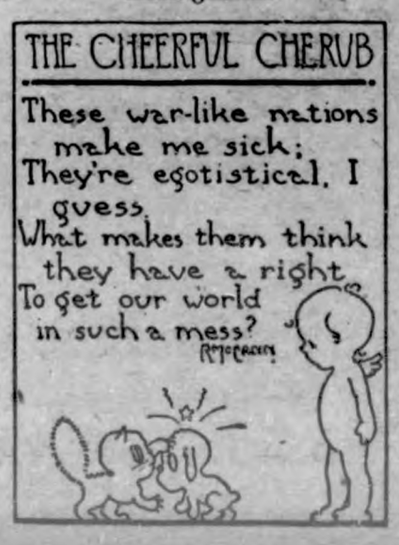
South African Locust Plague.

Locusts in immense swarms which covered the permanent way and brought the engine to a standstill held up a train on the Groaff Reinet line, South Africa, for two hours. Passengers and officials, by sweeping steadily with improvised brooms for two hours, continued partially to clear the line to allow the journey being resumed. The insects were a couple of feet deep in places.



She Knew.

A capable housewife was trying to impress upon her maid the need of system in her work.

After carefully explaining her own methods in her work, she asked: "Now, Olga, just what do I mean by system? Do you understand what system means?"

"Ja, ja," giggled Olga; "seesteem means doin' theengs the hardest way."—Pittsburgh Chronicle-Telegraph.

Never borrow trouble for the purpose of lending it to others.

Take Yeast Vitamon Tablets To Get Job-Winning "Pep"

Easy and Economical—Results Quick.

Thin, run-down folks who find that business is bad and employment is scarce should try taking two of Mastin's tiny yeast VITAMON Tablets with their meals for a short time and watch how their physical and financial conditions improve.

Mastin's VITAMON Tablets supply in highly concentrated form true yeast-vitamines combined with the other health-giving vitamines which Science says you must have to be strong, well and fully developed. If you are weak, thin, pale, generally run-down, or feel lacking in brain power and ambition, and want that firm flesh "pep" which gets the money, you surely need some of these precious vitamines in your system at once. Mastin's VITAMON mixes with your food, helps it to digest and supplies just what your body needs to feed and nourish the shrunken tissues, the worn-out nerves, the thin blood and the starved brain. Pimples, boils and skin eruptions seem to vanish like magic under this healthful influence. Mastin's VITAMON Tablets will not cause gas and they help to correct constipation. They are easy and economical to take. Be sure to remember the name—Mastin's VI-TA-MON. You can get Mastin's VITAMON Tablets at all good druggists.

Why not be a strong, well-built fellow—with plenty of "Pep," energy and a clear skin glowing with ruddy health and vigor? Just take Mastin's Yeast VITAMON Tablets for a short time and watch the truly amazing results.

A SWEET LITTLE BABY BOY

Makes a Bright Spot in Every Home. A Comfort in Years to Come

Park Rapids, Minnesota.—"I have taken your medicine — Lydia E. Pinkham's Vegetable Compound — when I was a girl for pains and before and after my marriage. I now have a sweet little baby boy and will send you his picture if you wish to publish it. My sisters also take your medicine and find it a great help, and I recommend it to those who suffer before their babies are born." — Mrs. WM. JOHNSON, Box 155, Park Rapids, Minn.

To marry and arrive at middle age without children is a great disappointment to many women. Think of the joy and comfort other women have in their children as they grow older.

Lydia E. Pinkham's Vegetable Compound has helped to bring great happiness to many families by restoring women to health. Often the childless home is due to a run down condition of the wife, which may be helped by Lydia E. Pinkham's Vegetable Compound. It brought health and happiness into the home of Mrs. Johnson. Why not to yours?

SQUEEZED TO DEATH

When the body begins to stiffen and movement becomes painful it is usually an indication that the kidneys are out of order. Keep these organs healthy by taking

GOLD MEDAL HAARLEM OIL CAPSULES

Cuticura Talcum is Fragrant and Very Healthful

Soap 25c, Ointment 25 and 50c, Talcum 25c.

for that COUGH! **KEMP'S BALSAM**

Pleasant to take Children like it.

Galvanizing Brass and Copper.

Copper and brass may be coated with metallic zinc in the following manner: Place finely divided zinc in a nonmetallic vessel, and cover it with a concentrated solution of sal ammoniac. This is heated to the boiling point, and the copper or brass articles are introduced. A few minutes in the boiling bath will suffice to produce a firm and brilliant covering over the surface of the work. The zinc can be reduced to the requisite fineness by pouring the melted metal into an iron mortar and pounding it with an iron pestle until the solid mass has been granulated to the desired fineness.—Popular Mechanics Magazine.

Leave It to Her.

Suitor—I will admit I haven't always lived as I should, but I do love your daughter sincerely, and if ever I should make her unhappy, I hope I will be made to suffer for it.

Father—Don't let that worry you; she'll attend to that.

Back Bad Since the Grip?

Has a cold or grip sapped your strength? Do you suffer constant backache, feel nervous and depressed? Then look to your kidneys! Many cases of kidney trouble are the result of infectious disease. The kidneys have broken down under the strain of filtering disease-created poisons from the blood. That's why a cold or grip often leaves backache, headaches, dizzy spells and irregular kidney action. Help your weakened kidneys with *Doan's Kidney Pills*. *Doan's* have helped thousands and should help you. *Ask your neighbor!*

An Iowa Case

John Hepp, carpenter, 209 N. Washington St., Audubon, Iowa, says: "When I took cold it went to my back and kidneys. My back would become weak and felt as if it would break, and sharp pains would shoot through my kidneys. My kidneys acted irregularly and the secretions were highly colored. A couple boxes of Doan's Kidney Pills gave me a lasting cure."

FOSTER-MILBURN CO., BUFFALO, N. Y.

ROOT CROPS ARE MOST IMPORTANT

Beets and Carrots Stand at Head of List From Standpoint of Food Value.

RADISHES NEED SMALL SPACE

Rich, Well-Prepared Soil Is Essential and Good Seed Should Be Used—Parsnips and Salsify Deserve Attention.

(Prepared by the United States Department of Agriculture.)

Root crops most commonly grown in home gardens are radishes, beets, carrots, parsnips, salsify, and turnips. Of these beets and carrots stand at the head of the list from the standpoint of food value from a given area of land, but it would be difficult to state which of the root crops really is the most important, say garden specialists of the United States Department of Agriculture.

Radishes are among the first garden crops to be planted in spring, and a very small space is required to produce all that is needed by the average family. The soil should be loose, mellow, and very rich, so the radishes will grow quickly and be crisp and tender. Radish seeds should be planted in a shallow furrow and covered about one-half inch deep. Two or three varieties should be planted in order to have a continuous supply. French Breakfast and Scarlet Globe Turnip are among those which mature in the shortest period, while Long Scarlet Short-Top and Long White Vienna or Lady Finger are good to follow the extra early varieties.

Plant Beets Early.

Garden beets can be planted almost as soon as the soil can be worked in the spring. Rich soil that is well prepared is essential. Commercial fertilizers and well-rotted manures are best to supply plant food, but should be very thoroughly mixed with the soil. Egyptian and Detroit Dark Red are among the leading varieties. Sow the seed in a shallow drill, 1 ounce of seed to 50 feet of drill, and cover about 1 inch deep. When the plants have become well established thin so they do not crowd. A little later thin a second time, leaving the plants standing 4 to 5 inches apart in the row. Use the thinnings as greens. The round or turnip type of beets mature in 60 to 70 days, while the longer ones require 100 to 120 days to complete their growth.

It is an old saying, "Carrots for beauty and beets for strength," and while this can not be taken literally it has a great amount of truth in it. From the standpoint of health, carrots are very important in the diet, and their culture is so simple that any gardener can grow them. Rich, well-

Radishes Are Among the First Garden Crops to Be Planted.

prepared soil is the first essential. Good seed is important, and the seed should always be that which was saved the previous year. Oxheart and Chantenay are the varieties most commonly planted. Space the rows 15 to 18 inches apart. One ounce of the seed is sufficient for 100 feet of row. Cover the seeds one-half inch deep and keep the crust slightly broken over the seeds until they come up. Thin twice, finally leaving the plants three to five inches apart in the row, those pulled during the second thinning being used as "baby" carrots on the table.

Parsnips and Salsify.

Throughout the northern sections parsnips and salsify are important as root crops for the garden. Their culture is very much the same, and they require a deep, rich soil, so the long roots will have a chance to develop. Plant the seed early, so the plants will get well started before the heat of summer comes, and keep them growing the entire season. The rows should be 15 to 18 inches apart and the plants thinned to stand four inches apart in the row. Parsnips and salsify may remain in the ground all winter until wanted for use. Hollow Crown is the leading variety of parsnip, while Mammoth Sandwich Island is the best known variety of salsify.

TO PRODUCE QUALITY FRUIT

Soil Must Have Most Careful Attention Where Trees Are Planted Close Together.

Close planted trees are going to need every favor possible in the way the soil is handled in order to continue to produce quality fruit. This means, for the most part, that intercropping is to be discouraged unless the soil is unusually rich or constant application of the proper fertilizers is made.

MANY WAYS IN WHICH PEANUTS ARE USEFUL

During Cold Weather Goobers Are Drug on Market.

Increased Consumption and Higher Prices Looked for With Coming of Spring—Fed to Hogs in Southern States.

(Prepared by the United States Department of Agriculture.)

Peanuts are a drug on the market just now. That's because they are not eaten largely in cold weather, but with the coming of the robin, which is a harbinger of spring, circuses and the opening of summer resorts, peanut shippers look for increased consumption, which may mean higher prices. In round figures, 900,000,000 pounds of peanuts are grown in the United States every year and 100,000,000 pounds were imported from Asia last year. About 5,000,000 pounds of roasted peanuts are consumed annually, say

A Good Peanut Plant.

marketing experts of the bureau of markets, United States Department of Agriculture.

Few of the fond papas and mammas who buy Johnnie or Mary a bag of peanuts at the circus know that more than 100 different methods of utilizing peanuts, including the making of fancy dyes and wood stains, peanut milk, coffee, and ice cream have been devised, although few of these products are sold commercially. But peanut oil, peanut candy, peanut butter, salted peanuts, peanut cookies, roasted peanuts, and peanuts in a number of other forms run up the annual American per capita consumption to three and one-half pounds. Every time certain soaps are used the consumer is partaking of his three and one-half pounds.

Fully half of the peanuts grown in the Southern states are fed to hogs. Large quantities of peanuts are exported also, 1,074,007 pounds having gone out of the country during the month of January alone. Of this quantity, 78 per cent went to Canada, where the peanut enjoys copopularity with the clove. Cuba took 14 per cent, Jamaica 2 per cent, and Bermuda 1 per cent.

FEEDING VALUE OF GARBAGE

Affords Hogs Well-Balanced Ration and Supplementary Feeds Are Not Necessary.

Most garbage is of such variety that it enables a hog to balance its ration so that supplementary feeds are not required. In some cases, however, the animals are finished off on corn, barley, wheat middlings, and similar feed just before they are marketed. The feeding value of garbage, however, especially carefully selected garbage, is such that it is seldom economical to use any additional grain supplement. However, when grain is low in price, good results might be obtained by feeding garbage alone during the summer months, when ordinarily there is a large production, and finishing the hogs on grain. Greater gains per day can be made with a grain supplement, but at greater cost than when garbage is fed alone.

CAUSE OF SORE SHOULDERS

Sweat and Dirt Chafing Skin, Making It Tender, Is Reason—Trouble Is Preventable.

During the first spring work many horses suffer from sore shoulders. Great care should be taken that these do not get a start.

Good collars and good care of them are essential. See that the collars are thoroughly scraped, and then rubbed clean and dusted with talcum powder or powdered borax. Rub the horses' shoulders with the hands, and, for the first few days of heavy work, bathe them each evening with cold salt water. Afterwards, bathe once or twice a week. Sore shoulders are first caused by sweat and dirt chafing the skin and making it tender.

This is an instance where an ounce of prevention is worth several pounds of cure.

BEST ORCHARD CULTIVATION

If Intercropping Is Practiced It Is Better to Grow Some Crop Like Strawberries.

The orchard should be kept clean. The best practice is to cultivate, not deep but shallow, in order not to disturb the roots, and not too close to the trees, for the same reason. If intercropping is to be practiced it is far better to grow some crop like strawberries between the trees, or small bush fruits, and keep the remainder of the ground cultivated, than to permit grass sod or weeds to get a start.

Taste is a matter of tobacco quality

DYED HER DRAPERIES, SKIRT AND A SWEATER WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run. So easy to use.—advertisement.

TURKEYS ALWAYS TOO FAT

New York Butcher Declared His Customers Were "Stagonized" by the Size of Birds.

The fat butcher was busy arranging Christmas decorations at the back of his counter when a woman asked him what he thought would be the price of Christmas turkeys this year.

"Well, now, you know," he said "that is something I can't tell. It's just according to the demand.

"But say, you should see the people who come in here, strangers, you know, not regular customers, and they say they want a turkey, and I pick one out. They say it is too big, and I say to them: 'Now how heavy a turkey would you like?' They say: 'I don't know, but I'll take that one.'

"I take that down and it weighs within a few ounces of what the first one weighed, and then they just mutter something and go out again.

"I tell you what it is, madam, they are fair stagonized—stagonized they be."

True, the word is a new one, but it seemed to be adequately expressive of agony and amazement over the staggering price of the festive bird.—New York Sun.

Since Women Smoke.

CONCERN WAS FOR MOTHER

Of Course Little Frank Was Not the Least Bit Afraid of the Darkness.

The family has moved from a gas-lighted house to one where there is electricity, and baby Frank, standing on tip toe, can just reach the two push buttons inside the rooms. They are a source of great amusement and he never fails to press them whenever he passes.

A few nights ago his mother came from the upper rooms and announced bedtime. Little Florence ran upstairs immediately. Frank, up to his usual tricks, pushed the button, and off went the light. The overwhelming darkness frightened the little fellow. After a minute he asked: "Mother, are you there?" "Yes, dear," said his amused mother. Another pause. "Mother, are you 'fraid?"

"No, dear, are you?"

"No, I ain't 'fraid, but you better put the light on. I'm 'fraid you will be 'fraid."

Fast World.

Children tinkering with wireless telephony and toy moving picture outfits, make us grown-ups realize that we'll have to double our steps to keep pace with the world.

Some nursery movie films are sold as low as a cent a foot. The price ranges up to ten cents a foot for films that can't catch fire or explode.

Do you remember the first movie you saw—how it thrilled you? The scientific marvel of yesterday is the toy of today.

If it keeps on we'll be getting old-fashioned every 24 hours.—Chicago Post.

Our Textbook Age.

"If I only knew what to do with the baby!" "Didn't you get a book of instructions with it, mother?"

Easily Figured.

Nip—What's the difference between a dance and a dawnce?

Tuck—About four bucks.

Cuticura for Sore Hands.

Soak hands on retiring in the hot suds of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Advertisement.

UNUSED TO EVENING DINNER

Grownup Recalls Embarrassing Incident Which Occurred in Her Childhood Days.

As a child in our family I was accustomed to having dinner at noon and a light supper in the evening, because there were several of us, and my mother considered it too harmful to have a heavy meal at night.

We had as a friend a woman who lived several blocks away. One day she called to me as I was returning from school and asked my two brothers and me to come to dinner the next day.

The following day the three of us went to her house at noon. She looked a little surprised as we came, but said nothing. After about a half an hour we wondered when we were to have dinner. She asked me why we were back from school so early that noon.

"We came to dinner," I said.

She smiled and said, "My dear, we have dinner this evening."

I called to my two brothers, and fled in embarrassment.—Exchange.

And Each a Day's Work.

Young Housekeeper—"And these eggs, are they real country eggs?" Grocer—"Yes'm; genuine hen-made."

Winners never have any fault to find with referees' decisions.

To win a race a Jockey doesn't put extra weight on the horse that helps him succeed

No man or woman who wants to succeed in the race of life can afford the handicap of headaches, insomnia, indigestion and debility. Nor can they afford to take anything that may keep up a continual irritation of the nervous system.

Yet this is what many people do who drink excessive amounts of tea or coffee. For tea and coffee contain caffeine, a substance that is sometimes very injurious. Many doctors say that caffeine raises the blood pressure, irritates the kidneys, and over-stimulates the entire nervous system. Also that it is especially bad for growing children, or for any one who has any tendency to nervousness or insomnia.

If you want to avoid a possible cause of headache, insomnia, or nervousness, it might be well to stop taking tea and coffee for awhile, and drink rich, satisfying Postum, instead.

Postum is a delicately-roasted, pure cereal beverage—delicious and wholesome.

Order Postum from your grocer today. Drink this fragrant, healthful beverage for awhile, and see if you will not feel brighter, more active, and more resistant to fatigue—as so many thousands of others have felt.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

Postum *for* Health—"There's a Reason"

Made by Postum Cereal Co., Inc., Battle Creek, Mich.

ABOUT KLEMME PEOPLE

Mr. Frank Schultz was down from Garner last Friday on business.

Henry Church was down from the town of Garner last Friday.

C. W. Wiles left Tuesday on a business trip of a few days to Fort Dodge.

Harry Brooks went to Belmond Monday night on business.

Mr. Ray Calkins, of Swaledale, was a Klemme business caller Monday.

Elmer Fuller was over at Garner on business Tuesday morning.

Clark Bredbonner is holding his big sale today.

Phone or bring your news items to the Times.

The Married People's Dancing club held their semi-monthly dance at the Idle Hour last Thursday evening.

Miss Marian Luick, of Belmond, came last Friday for a visit at the home of Mrs. Mille Smith.

Mrs. Henry Maitland and Mrs. Lindorf were visiting at Belmond one day last week.

Mrs. Will Kirkwood was over from Goodell last Friday visiting with her manp Klemme friends.

Mr. and Mrs. Louis Strieby and children of Garner, were visitors at the Henry Lewis home here Sunday.

Mr. and Mrs. Curtis Luick and sons from Goodell were Klemme visitors Monday.

Ed. G. Ell drove to Garner and Mason City on business yesterday morning.

Adolf Trampell from Kammar, Ia., came Tuesday for a visit with Klemme relatives and friends.

Mrs. Parsons came over from Belmond yesterday afternoon for a visit at the Dr. Missman home.

Mr. White of the Northern Lbr. Co headquarters came down from Estherville yesterday to look after business matters here.

Wm. Bell and daughter, Myrtle, returned Saturday from Illinois where they went to attend the funeral of Mr. Bell's father.

Mr. and Mrs. Harold Leitzinger of Garner were visiting Klemme relatives over Sunday. Mrs. Leitzinger was formerly Miss Wille of this cty.

Mrs. Stearnes, Mable and Verl, went to Belmond Saturday for an over Sunday visit with relatives and friends. They returned Monday.

Ray White went to Forest City Saturday for an over Sunday vist with his family. He intends to move to Klemme soon.

Sheriff E. P. Hanson was here on official business Tuesday. We did not learn of how many hootch mills he captured here.

Emil Lau's pure bred and cholera immune Duroc Jersey bred sow sale will be held at his farm tomorrow. See his adv in this issue.

Mrs. Schroeder returned yesterday from her visit of several weeks in Chicago at the home of her son, Henry and family.

It is reported that Lavina Swartz and Ben Goll are to be married today sometime. We hope to give full particulars in the next issue of the Times.

A number of Klemme young men got up a "Valentine" dance at the Idle Hour Tuesday evening. The orchestra from Britt furnished the music. A good time was had.

Miss Emma Sampson has been missed from her usual place behind the counters at the Day store the past week. She has been taking care of Mrs. Leonard Sampson, in the country, who is suffering with an attack of Grippe.

"Stub" Lewis returned Thursday evening from Hayfield, Minn., where he had been visiting for several weeks at the home of his brother Verner, and family.

Mr. and Mrs. Howard Doyle went to Alta Vista, Iowa, Monday for a visit with Howard's folks. Howard is also working in that vicinity at the present time.

All who are indebted to me will please come and settle up before March 1st, or action will be taken to have the accounts collected. F. H. Ridder. 1wc

It was rather cold yesterday morning. Two sun dogs could be plainly seen in a sort of circle around the sun, which is usually considered an indication of colder weather.

Oscar Swanson attended several pure bred Chester White hog sales last week and he bought four bred sows of a very good pedigree to add to his excellent herd of Chester Whites.

Mr. Henry Medaus was taken to a Mason City hospital one day last week and returned Thursday after an examination there. Henry has not enjoyed the best of health for some time.

"Happy" Johnson officially began his duties at the Larsen meat market Monday moring. He exercised around a short time Saturday during the rush. Happy has been on a vacation for a couple of months.

There will be a great deal of moving about both in town and in the country now. We hope to have a complete list in an early issue of the Times so you will know where to find your old neighbor.

C. C. Mayne, who lives between Goodell and Kanawha, will hold a closing out sale on his farm next Tuesday. See his sale ad in this issue of the Times. Chris will move to Klemme soon now and will live in the house now rented by Paul Grange. Chris bought the property sometime ago from W. H. Trafford.

We had Homer Butcher and family all booked to take a trip to Caro, Michigan this week but "Butch" says not to mention it as he had not decided whether or not to make the trip at the present time. Now perhaps it was Caro, Egypt that he was going perhaps to see where Caro syrup is made. We will let you know next week.

"It's your move" is an expression heard a great deal of late in Klemme. Checkers seem to be the great game at present here and there are several boards in full swing at various places of business all day long. Henry Lau has even quit horse shoe pitching in the snow banks to sit beside the board thinking out the next move.

Ben Katter who quit farming this fall on account of poor health has purchased the agency in the Community Filling Station on Main St. at Garner and has taken over the entire business from Ed. Rhodes. who was the former agent for the concern Ben will be able to work at that as he has recovered to some extent but was not able to do heavy farm wark. We wish him a lot of success.

About Caskets--

Once, and only once, I sold a man his Caske before he died.

It was several years ago, that an Old Gentleman, whom we all respected very highly, sent word to me through one of our Pastors that he wanted to see me at once.

"Arthur," he said when I called, "I am nearing the end of Life's Journey and I will soon pass to the Great Beyond. "I felt sorry at first," he said, "as life has seemed rather short, but my sadness lasted only a few hours, then I realized that it was right and proper that I should go, and now I am satisfied and willing to go when my Lord calls."

At the request of this Old Gentleman I Showed him pictures of the Caskets which we had in stock, from which he selected one of a better grade.

Then he asked all about the process and the purpose of Embalming and he decided that I should attend to that too.

It is unusual for a man to buy his own Casket; ordinarily the buying of Funeral Furnishings is attended to after death by near relatives.

We carry a Stock of from ten to fifteen adult Caskets, and a full assortment of Childrens Caskets.

To each Casket is attached a price ticket, and when the Relatives call to select a Casket we show them **all** of our Caskets and let them read the ticket, or in other words, we don't **sell** them a Casket, but they **buy** it. We don't know many undertaking establishments in the State of Iowa who mark their goods in plain figures.

We do not carry high priced Metalic Caskets for a thousand dollars or more, but we do carry the largest and most complete stock of Cloth Covered Caskets in Northern Iowa.

Our cheapest adult Casket is $65.00 and our most expensive Casket is $400.00, all Casket prices are 25 per cent less than during the war.

Our beautiful Casket Room, here at the Store, is open to the Public for inspection, any time; we are glad to show you through this department, and are proud of the good Service we can rended in the Care and Handling of the dead.

THE KLEMME TIMES

Twenty-sixth Year—Number 24 | Klemme, Iowa, Thursday Afternoon, February 23, 1922 | $2.00 In Advance—$2.50 Outside of Count

Doings of the Week Reported By the Klemme Schools

Donald Stille was absent Tuesday afternoon and Wednesday.

Blanche Medaus hkas quit school, we wonder why?

Mapbelle Johnson has been absent Monday, Tuesday and Wednesday.

Glenna Gruetzmacher was absent Tuesday and Wednesday on account of a cold.

Marie Blank was absent Tuesday and Wednesday.

Klemme High School Breaks Even

Last Friday night Crystal Lake played basket ball with our boys and girls. Both games were fast and interesting, but the Crystal Lake girls were a little too much for our girls. Our girls got beat by 13 to 18. Our boys done a little better than the Crystal Lake boys, but it was very close and interesting, neither side scored many points and the score is almost like a base-ball game. Our boys won by 10 to 9. Basket ball will be continued as we have a game to play with Rowan the 3rd of Mar. on our floor. We may have a game with Belmond and Garner as it is not certain. Two games have been scheduled with Ventura. The 28th of February on their floor and the 10th of March here.

spelling contest was held Wednesday during the last period between the Grammar room and the High School to celebrate Washington's birthday.

The school nurse was here again this week.

Alan Klotzboch was absent last week on accountof sickness.

The children of the two lower rooms celebrated St. Valentine's day by giving valentines to their friends at school.

Doris and Celia Heginger have quit the Klemme school because of moving out of town.

Burdett Butcher also quit school because he is going to move to Michigan.

The play Mnoday night was a big success and was largely due to the excellent coach, Miss McKahan, who always makes a success of the plays she coaches.

Leona Lau has been absent this week on account of sickness.

Admiral of the Navy.

The position of the admiral of the navy has never been held by any one except Admiral Dewey, according to the navy department. At the present time no one holds the permanent rank of admiral. The rank of admiral is held during tenure of their respective positions by Robert E. Koontz, chief of naval operations; Hugh Rodman, in command of the Pacific fleet; Henry B. Wilson, in command of the Atlantic fleet; and James Strauss, in command of the Asiatic fleet. It is a rule of the navy that an officer holding any of these positions must have the rank of admiral during his tenure of office.

Asked For.

During a dinner party the conversation turned to good looking people. One lady said: "I think all the good looking men have stayed from this dinner party."

The gentleman to whom this remark had been made said: "Well, I think all the good looking ladies are with us tonight."

Then the lady thinking a compliment had been paid her added: "Of course, I should have said 'present company excepted.'"

Whereupon the gentleman said: "Oh, of course that's what I meant to say!"—London Telegraph.

Pecan Crop in Mexico.

The pecan crop of the Nuevo Laredo district of Mexico for the 1921 season is estimated roughly at between 250 and 300 short tons, as against 600 short tons in 1920. A marked falling off in value, as well as production, is also expected, due to the large crops in Texas. The Texas crop will be drawn on first, no doubt, before the Mexican production is touched.

FIRST METHODIST CHURCH

It was very gratifying to note the interest taken in the different activies of our church. Both services here. as also in Liberty township, were well attended last Sunday. We trust that with the coming of milder weather and more favorable roads the attendance will be still greater and more regular, until all Christian pepople will show their love and their loyalty to our Christ and His Kingdom by their regular presence in the house of God. Get the habit of meeting with the Christian people every Sunday in one of te three of our churches. Those not obligated elsewhere will find a most cordial welcome to all the meetings at the First Methodist church.

Services every Sunday as follows:
Sermon at 10 o'clock.
Sunday school at 11 o'clock.
Epworth League 7:00 P. M.
Sermon 8:00 P. M.

Next Sunday evening Prof. Wilson will deliver the message. I am very sure you will be pleased to hear him.

Prayer service every Thursday evening in some private home as announced from the pulpit.

The beautiful home of Mr. and Mrs C. A. Arnold was thrown open to the Loyal Workers Class for their monthly social on St. VaVlentine's evening and the rooms were decorated profusely with hearts bearing out the symbols of St. Valentine's day. The fore part of the evening was spent in the routine of class business after which the evening was spent in a social way appropriate for the occasion, closing with a sumptious feast of ice cream and cake served by Mr. and Mrs. C. A. Arnold. Everyone had a profitable and most enjoyable time.

—W. C. Bergmann.

BRIDE SET ON EXHIBITION

In Morocco, Girl About to Be Wed Is Compelled to Pass Seven Long Monotonous Days.

It is a curious thing that in a land so careful in the public appearance of women as in Morocco, a girl should be compelled to sit in private exhibition for her women friends for seven long days before she departs to the home of the man who is to be her husband, writes Temple Manning in the Cleveland Plain Dealer.

In one very important detail of the Moroccan marriage customs, however, is evidenced the complete separation of the sexes which is so much a part of Moroccan life. Not even the bridegroom is in the home of the bride when the marriage party is given there. Nor is the bride present at the celebration given at the bridegroom's home. Both bride and bridegroom entertain their friends of their own sex in their own homes.

For seven days the marriage rejoicings go on, to the accompaniment of the beating of drums and the blowing of pipes and flutes. But while the bridegroom joins his friends in celebrating the event, the bride must sit motionless, with downcast eyes, on a throne of cushions in the center of the chief room in her own house. She is not supposed even to see the various persons about her. But she knows they are all her own girlhood friends or the women friends of her mother.

Each of the principal guests is costumed and "adorned" much as is the bride. Their faces are painted red, their eyelids and the skin under their eyes, their under-lips, the palms of their hands and the fingers up to the first joint are stained brown. Thumb rings and anklets, as well as many bracelets, are prominent. The feet of these guests are dyed the color of iodine and gaudy with multi-colored slippers.

It is the seventh day that the bride says farewell to her parents and the home from which she may never before have stirred.

A CORRECTION

To those who attended the basket social at Liberty No. 8 school. The auctioneer announced that the money raised from same was to be used to pay for the Victrola. This is a mistake as the Victrola used in this school is owned by the teacher and she is not asking for any compensation whatever for its use. The auctioneer made the announcement in good faith, it was only a misunderstanding; mistakes will happen.

Times' Weekly Short Story

SAY IT WITH FLOUR

GWENDOLYN G. ROBINSON

©, 1921, by McClure Newspaper Syndicate.

The little town of Maplewood had almost given up watching for Betty to do something "queer" and unexpected. Not that Betty was ever given to acting "queer." There were the Spofford girls, who, coming home from college, indulged in barefoot dances on the dewy grass. As an eye-witness put it, "both them gals was out in the wet grass a-chasin' each other round, and neither of them had much of anything on but some muskeeter nettin'; and that was hangin' all in tatters. All of a sudden Nance lit on a broken bottle, and the way she screeched! You'd thought it was the fire department comin' down Main street!"

Then there was Julia Arbuck. The Arbuck residence was one of those solid substantial homes, furnished according to the best ideas in the mail order catalogues.

Betty Ross kept busy and happy on her father's ranch, getting an insight into his business. Farmer Ross was a grower of wheat, and had 160 acres under cultivation.

Betty drove out to the mill with a load of wheat with her father one brisk autumn day.

"I want to see the boss," she said after the wheat had been unloaded and weighed. A tall, dusty-looking young man came forward shyly.

"Why, this can't be my old schoolmate Jim," cried Betty.

Jim was very shy where women were concerned. He fumbled awkwardly with her hand.

"I wanted to ask you some questions about the flour we've been getting. Wasn't that last lot different from the rest?"

"Yes'm, it was. That's my new brand, sifted five times more than any other brand. Do you like it?" queried Jim, anxiously.

"I do. I noticed right away it was different." Jim brightened up at once, and lost half his shyness. (Betty perceived it.) "It makes so much better bread and cake that I want to be sure to get it right along," said Betty.

"Do you—make bread?" asked Jim, taking in the dainty figure before him.

"I've made on an average of a dozen loaves a week for the past year. I've kept the Burns family supplied with bread since their mother died, and twelve-year-old Anna tries to do their cooking. Come over some night—"

"Oh, I couldn't—" began Jim, in an agony of embarrassment.

"I'd show you a loaf of bread made with the old flour, and one with the new," said Betty, taking no notice of his refusal. "You ought to advertise that new brand of flour."

"If I only could," said Jim. "Father never did any advertising, and that's why we never get ahead."

"A good, snappy ad and some testimonials from users, ought to be in every sack of flour you send out. That way it doesn't cost anything to bring it before just the right people."

"I'll come up tomorrow night, if you'll let me, and talk it over," said Jim. And so it was arranged.

The following day was a busy one for Betty. She got up quite early. Parker house rolls, to be right, must be molded and raised twice, then the crust ought to be on the ice several hours before it is used if you want to make a peach pie with a really crisp crust. A chocolate layer cake, and surprise cookies, with fig filling, also take time when one follows the recipes exactly. Betty looked at the array on the pantry shelves. "Say it with flour," said Betty to herself.

Jim arrived promptly at six, very red about the collar, and almost speechless with embarrassment. Betty paid no attention to this, but led him right out into the kitchen to show him the relative merits of the two loaves of bread. They looked exactly alike, but Betty claimed that she used a whole cup of flour with the new brand loaf. Jim forgot to be shy, talking of his precious new flour.

Then Betty served supper (they still call it supper in Maplewood), and Betty's cooking spoke for her eloquently. Jim got in the habit of dropping in quite regularly, much to the chagrin of the other nineteen young ladies in town (for they considered Jim the hardest of the eligible five to land, and they didn't know Betty's system).

Betty had the local photographer snap her as she was lifting two mammoth loaves of bread from the oven. Jim had a cut of it made up into an ad, and it took with the trade. Whether it was the testimonials from the eight Burnses, all works of art and signed by various noms de plume (Pa Burns had an active imagination), or whether it was the real home atmosphere of the picture in which Betty smiled over the mammoth loaves there was such a demand for Jim's new flour that an addition to the flour mills had to be built and new machinery installed.

One momentous evening Jim told Betty he had saved out two barrels of the new milling. "What for?" asked Betty in the most unsuspecting way.

"For us," said Jim boldly, and followed it up by the usual business in the most approved manner.

"This is so sudden," said Betty weakly.

"You darling," said the lordly male.

To Know How to Wait.

To know how to wait is the great secret of success.—De Maistre.

The Chords of Harmony.

There's many kinds of fiddles in the human music hall, where the players do their purtiest to carry on the ball—while our appetite for music is increasin' every day, we got to pay attention to the instruments they play.

Sometimes you hear the feller with an animated gourd, which there's only one conclusion—it's the best he can afford—but there ain't a speck of beauty in the agony he slings from the wuthless imitation that is speakin' through the strings.

An' so it is with poems from the everlastin' muse—the harmony is fittin' with the instrument we use. . . . You can't derive the makin's of a heartenin' refrain from a patent-leather capsule that's supposed to be a brain.

I love my Stradivarius as I press her to my cheek—for she never disapp'ints me with a wiggle or a squeak—I draw my bow across her, and the sweetness starts to roll, till the honey dew is drippin' from the cornice of my soul.—Excelsior Springs Standard.

MRS. LUCINDA CARPENTER

Mrs. Lucinda Carpenter died at the home of her son, Alf Carpenter, Tuesday morning, February 21st, at the age of 84 years. Mrs. Carpenter was born in Van Buren county, Mich. later moving to this county where she lived in Avery township for 44 years.

Funeral services were held at the U. B. church at Goodell today and she was laid at rest beside her husband in the Goodell cemetery. Mr. Wellemeper of this city had charge of the funeral.

Her death was caused from apoplexy.

About The Cream Business And Co-Operation

PAUL STILLE BUYS BAACK IMPLEMENT

A deal was closed the latter part of the week whereby Paul Stille became the owner of the W. M. Baack Implement business here.

Mr. Baack has been ill for some time and was unable to give the business his personal attention and this is perhaps the reason the implement business changed hands at this time. The new proprietor, Paul Stille, is an energetic young man who has been farming until now. Paul takes full possession and will be ready to open the business on the 15th of the coming month. He purchased both the building and the stock of farm machinery and implements.

EMIL LAU HAS GOOD SALE

Emil Lau's pure bred Duroc Jersey bred sow sale which he held at his farm last Friday was a decided success from every standpoint. The animals brought good prices, the bidding was lively and the sale went over with a bang. This s Emi's second annual bred sow sale. He is one of the wide awake Duroc Jersey breeders in northern Iowa and has some mighty good stock. We will publsh the lst of buyers next week as Emil was too busy shippng out hogs this week to make up the list.

Of Course Not.

Illustrative of the time, Amos W. Butler, secretary of the board of state charities, tells the following story of an occurrence in a certain Indiana county not so very long ago:

There was a poor family in a township. The father was a wanderer and of not much account. There were six children and the mother was left most of the time to provide for them. The township trustee had been helping the family out of the township poor fund.

One day a son in the family got into trouble. The sheriff and agent for the county board of guardians drove to the home. The boy was away. The mother seemed anxious to see that the law should have its course with the son, and to avoid an extra trip and expense the sheriff suggested:

"Well, then, I'll not come out after him when he comes back, but you bring him in."

"Why, I can't bring him in now," explained the woman, "our machine's broke."—Indianapolis News.

Statue of Christ as Peace Symbol.

Archbishop Glennon, of St. Louis, in a sermon the other day, said that the Christian people of the world should construct a huge statue of Christ, using material from scrapped battleships and cannons, and place it upon a mountain top to stand as a symbol of lasting peace. "The nations of Christendom," he said, "should at this time when the armament conference at Washington is attempting to prevent future wars, express their unanimous longing for peace by planning the erection of the statue to the Prince of Peace."

Brilliant Sign Has Few Lights.

An electric sign recently tried out with success replaces the individual lamps in the rim of the letter with small mirror reflectors, according to Popular Mechanics Magazine. These reflect the light supplied by two 25-watt lamps, placed near the center of the letter and fitted with opaque caps so as to be invisible from the front. An arrangement of this kind will effect a considerable saving in lamp renewal and current consumption.

BASKET SOCIAL A SUCCESS

The basket social held at Liberty school No. 8 Tuesday evening was well attended, considering the weather.

The house was filled to the doors. The play, "His Uncle John," given by the 8th grade was well renered and the close attention given by the audience showed their nterest during the entire program.

The basket sale was conducted by Col. J. A. Young in a very able manner; the biddng was lvely and the baskets sold at an average of $2.07 each. Buns, cake and coffee were served.

The total receipts for the evening were $43.60. This s to be used for the betterment of this school in the way of play ground equipment, etc.

The patrons of the district wish to thank all those who gave their assistance and assure them it was surely appreciated.

When Klemme was a very young town some twenty five years ago, we had a Creamery, which stood near where the Gram & Schultz garage now stands; the older members of our community will remember what a fight it was to keep it going, the writer was farming and at that time sold some cream to this Klemme Creamery. It seemed in those days it was the style to kick about the test, and kick about the weights and kick about everything else connecct-ed with the Creamery, and it seemed to do some good too, for the worst kickers received the highest test, and then came a day when the majority were kicking and because the majority kicked the rest felt peeved which was the same as kicking.

The Creamery got sick and was near death's door, it would close for awhile and then we would all subscribe money and start the thing to going again, but finally it was kicked to death by the combined kick of all the patrons. It is co-operation too when evryone in a community kicks.

Then for several years Klemme had no creamery, Garner, Goodell and Kanawha all had good creameries, but everyone felt that the farmers in the Klemme territorp were the wrong sort and a creamery at Klemme was considered an impossibility.

During these years, our local merchants bought cream, but a cream station can never be as satisfactory as a home creamery.

So in the year 1913 the Farmers and Business People of this territory organized the Klemme Co-Operative Creamery, and the new brick building was built and equiped.

This Creamery is now the largest and Best Co-operative Creamery in the State of Iowa, thep are not a noisy company but they have been fair dealers and have made a steady improvement and growth up to their present high positon.

Does the public know that the success of this Creamery is due in part to the friendly co-operation of the Business People? When our new Creamery opened it's doors for business, the Merchants of Klemme had an understanding one with another, that no one should buy cream in Klemme but the Creamery, ad it was further understood that all stores would handle only Klemme Butter.

For nine pears the Business People have extended this friendly co-operation toward the Creamery, and the Creamery especially owes a vote of thanks to Henry Lewis, who is in the Poultry & Egg Business here, and out of courtesy he has refrained from buying cream, although it is regularly a part of the Poultry business.

Now then, Mr. Farmer, would pou rather sell your cream direct to a good Creamery, or would you rather have every store in town start to buying cream?

This Community s too small for both cream buyers and a Creamery to prosper.

You have the chance right now to decide. I know you appreciate the co-operation which the business men of Klemme have given you thus far, and I know that you will also co-operate fr the good of your Creamery.

There are interests, however, that would like nothing better than to see our Creamery "Bust-up" but there is no danger until, Mr. Farmer, you forget your best interests and sell your cream to the wrong place.

Remember, that every time you seem to gain a penny bp sending your cream away, you will some day loose a dollar for your foolishness.

Klemme doesn't need any cream buyers, we have a Better thing for us all in the Klemme Co-Operative Creamery.

—Arthur Wellemeyer.

The rain fell so hard Tuesday and Wednesday that the water rose over the river's bankr and travelers are experiencing some diffculty in crossing over the grades in many places. One farmer reported to us this morning that the ice in the creek was mashing against the bridges in a bad manner and that there might be danger of some of the weaker bridges going out.

Animals Hoard Winter Stocks

Many Different Ways in Which They Provide Against Long Cold Season.

MAN USES HABITS OF BEES

Earthworms Drag Leaves Into Their Burrows to Provide Food and Comfort for Winter—Why Honey Is Stored.

New York.—There are many different ways in which animals meet the winter. Many go into winter quarters and, reducing their expenditure to a minimum, lie low until the spring calls them again to action. Others, like the wolves, continue to live dangerously, simply sharpening their wits and increasing the keenness of their hunting. Some, like the ermine and the ptarmigan, don a white dress, which is both safe and comfortable.

Others solve the problem by a change in habitat—notably the migratory birds. There are several other solutions of the problem, and one of these is to lay up stores, to hoard, to save. Many animals do this inside their bodies.

Habit Is Acquisitive.

A beginning of storing may be looked for perhaps in activities like those of earthworms, which collect leaves and drag them down into their burrows, at once making them more comfortable and providing a supply of food for a rainy day. It is surely the acquisitive habit that they have, these earthworms, for more than fourscore leaflets were taken from one burrow.

With insects we find an inclined plane of storing that leads up to the climax illustrated by hive bees and by some of the ants. Among the solitary bees the mother makes a store for the brood which she never survives to see; among humble bees the store is begun by the mother, but continued by her worker children, and in some kinds at least a part of the society survives the winter; in some tropical bees there are permanent societies and imperfect combs; in the hive bees there are permanent societies and perfect combs.

The elaborate storing of hive bees, carried to such perfection under men's care, is, to begin with, connected with surviving the winter—i. e., with permanence, and with the survival of the mothers ere their offspring grow up, i. e., with the possibility of social tradition.

It is impossible to think of storing without a vision of Solomon's ant, "which, having no guide, overseer, or ruler provideth her meat in the summer and gathereth her food in the harvest." And, as among bees, we find all grades among ants from those that do not store at all to those that make a fine art of it.

According to recent studies of the common Mediterranean harvesting ant, the seeds which are collected are kept for a time dry and are eventually put out in the rain to germinate. This has the advantage of bursting the hard seed coats and in some cases of starting processes of fermentation.

At a certain stage, however, the ants kill the embryo plant by biting at it, and the seeds are dried again in the sun. The dried seeds of some cloverlike plants, for instance, are then taken back into the nest and chewed into dough. This is dried once again in the sun in the form of little biscuits, which are eventually put into the cupboard.

Culture for Molds.

It is likely that different kinds of seeds receive different treatment and in some cases it seems that the stored material is not eaten at all, but is used as a culture for molds of which the ants are very fond. It is an interesting fact that the use of molds—reminding us of man's mushroom beds—is practiced by a number of quite unrelated animals—namely, certain ants, termites, beetles and mites.

Among backboned animals it is difficult to find convincing instances of storing until we come to birds and mammals. Apart from the numerous birds that store food in their crops, sometimes so exuberantly that they can not fly, there are some that may be said to lay up nutritive savings out side of themselves.

In the burrow of the hamster several store chambers are made and grain as well as hay is accumulated in considerable quantity. The little snow mouse that thrives all the year round at a high altitude on the Alps makes stores of chopped grass and gentian roots. There are many other examples of storing, but these examples show that the thrifty habit has taken firm hold in many different corners of the animal kingdom.

READY FOR THE SOUP

The largest turtle within the memory of old timers at the Fulton fish market, New York, is this 250-pound reptile from Costa Rica. Thomas Gillane, holding him up, is caring for the turtle now. But very soon the soup kettle will get him.

Round Up Gang of Shoplifters

"Dashing Dora" Leader of Notorious Band of Fashionable Berlin Robbers.

LOOT OVER MILLION DOLLARS

Every Step of Police Investigation of Gang Results in Fresh Sensational Disclosures—Eight Are in Custody.

Berlin.—White slave traffic, the morphia habit and the practice of blackmail were joined to theft, fraud and kleptomania in the "Danse Macabre" of the band of Berlin shoplifters led by "Dashing Dora."

Every step of the police investigation of the activities of this gang, eight of whom are in custody, results in fresh sensational disclosures.

Several members of the band plead that they are addicted to the drug habit and are not responsible for their acts. Mrs. Foerster, one of Dora's "dashing" daughters, is in the hospital, suffering from morphia poison. Her husband was arrested as he was in the act of concealing stolen property valued at several thousand pounds.

Louise Morvilius, her sister, has been released from custody in order that she may go to her sick child, but not before she had confessed to the police that for years she has been a white slave for her husband, Frank Morvilius, who is director of the German disposal board.

Further raids have been made by the police on the luxurious homes of "Dashing Dora" and her accomplices, and the enormous pile of stolen goods at Charlottenberg police station has received considerable addition.

Confiscate Bank Accounts.

The bank accounts of the gang, which amount to many thousands of pounds, have been confiscated.

Morvilius has pleaded that his mother-in-law is the victim of kleptomania.

It has been alleged against Morvilius that he heavily bribed the police in order to avoid arrest.

Members of the gang, who were caught with $200,000 worth of stolen goods in their possession, have terrorized the largest Berlin luxury stores for many years, and their depredations are estimated to exceed $1,000,000 in value. Most of the property was disposed of in Holland, though a considerable quantity is believed to have found its way to Britain, France and America.

Charlottenburg police station resembled a great warehouse. There were piles of china and leather goods, jewels and other valuable articles, which were taken chiefly from a luxurious six-room apartment occupied by "Dashing Dora." This woman now forty-four, who has been twice divorced, is married to a youth of twenty.

"Dashing Dora's" home was raided by policemen just as the seven criminals were discussing a New Year's present for "the firm," consisting of two limousines with a liveried chauffeur and footmen to assist them in their "profession." Dora and her woman accomplices, who lived like princesses, mixed in the highest society. She is considered the most brazen and cleverest of light-fingered crooks on record.

The list of booty carried off by her gang includes a priceless antique porcelain set of 178 pieces which was lifted piecemeal from an Unter den Linden shop in four visits. An easy job for them was a gold coffee set of thirty-two pieces valued at $5,000. This was carried off in one visit.

Special Belts Used.

Dora and her friends were equipped with specially constructed leather belts fitted with innumerable hooks to which they attached valuables as they passed through the shops.

The incident which led to the raid on Dora's home illustrates the gang's audacity. They fell under the suspicion of a salesgirl at one Berlin luxury shop, but they bluffed the manager into an humble apology.

The next day the husbands of the two women visited the shops, indignation personified, and, flashing 1,000 mark notes in the face of the manager, they insisted on a written apology from the salesgirl and the manager himself. This was given, but the manager was afterward struck with the youth of the husbands as compared with their wives. He telephoned for the police, and the gang were arrested.

249 CHILEAN QUAKES IN 1920

Occur 35 Hours Apart on Average, Reports Seismological Service.

Santiago.—Two hundred and forty-nine earthquake shocks were recorded in Chile in 1920, according to a report just published by the national seismological service. The average interval between shocks was 35 hours, while in the year previous a shock was registered every 28 hours.

The greatest seismic activity in 1920 was the area embracing the Aconcagua and Maipo valleys, in which the principal cities are located. The most pronounced schock was recorded on July 26, the center of which was in the Aconcagua valley.

Spanish Ambulance in Morocco War

Two chairs adjusted to a pack-saddle on a mule, form this queer ambulance, used by the Spanish army in Morocco to transport soldier wounded in the fighting against the insurgent Moors.

Moonshine Makes Rabbits Defy the Whole World

Pasco, Wash.—Officers investigating a story sent by a Pasco correspondent concerning the prevalence of rabies among rabbits have found that the police in making a raid just outside the city, dumped several barrels of corn mash out on the sagebrush covered prairie.

The embryo moonshine at once became the diet of hundreds of rabbits. Crazed bunnies ran pellmell into standing automobiles, frantically gnawed at telephone posts and did some dancing.

Many people concluded that the rabbits had rabies.

MINERS REFUSE TO TAKE PAY CUT

Scale Committee Urges Strike If Present Wage Is Not Maintained.

PLAN TO WALK OUT APRIL 1

Report Given Special Convention at Indianapolis Says Body Is Opposed to Any Reduction in Prices and Present Wage Must Stand.

Indianapolis, Feb. 16.—Continuance of present wages for soft coal miners and an increase of 20 per cent for the anthracite workers, backed up with a threat of a general strike in all fields on April 1, was the wage policy recommended to the special convention of the United Mine Workers of America by its scale committee, composed of the 27 district presidents.

Under the discussion of policy, the committee recommended a general suspension of mining if no agreement is reached by April 1, such action to be subject to a referendum vote of the union before March 31. It was also recommended that any wage scale agreement must be submitted to a referendum vote of the district affected.

The committee also recommended that the convention ratify the demands of the anthracite miners for a 20 per cent increase in tonnage rates and a $1 a day scale for day men.

The committee also declared for adjustment of "unequal differentials" which would result in small increases in various fields.

Other recommendations were that all new agreements be based upon an eight-hour day underground, with time and one-half for overtime and for Sundays and holidays; that weekly pay days be instituted; that the practice of fining miners for certain breaches of contracts be eliminated and that the soft-coal wage agreement be made for two years extending from April 1 next.

The committee, making the demand for retention of the present basic wages, said a reduction would lower the standard of living among all miners and cause poverty and suffering throughout the coal fields.

"The largest gathering in the world that is ruled by parliamentary law" is the description of the miners' convention by Mr. Lewis. A roll call on any question requires more than one day's session.

BANK OF ENGLAND RATE CUT

Discount Charge of 4½ Per Cent Is Lowest Since Outbreak of World War.

London, Feb. 17.—The Bank of England reduced its rate of discount to 4½ per cent.

The discount rate of the Bank of England has been 5 per cent since Nov. 3 last, when it was reduced from the 5½ per cent rate established on the preceding July 21. The highest rate was reached in August, 1914, after the outbreak of the World war, when it was set at 10 per cent, which had been equaled only on two previous occasions—during the panics of 1857 and 1866. Since then the rate has fluctuated, but the figure just set is the lowest since the outbreak of the war.

SAYS MELLON BREAKS LAW

Senator Watson Declares Secretary of Treasury Is Prohibited Engaging in Business.

Washington, Feb. 17.—Secretary Mellon is holding the office of secretary of the treasury in violation of the law and can be arrested for retaining the place if anyone sees fit to swear out a warrant charging him with the offense, Senator Watson (Dem.), Georgia, declared in the senate. The law which Mr. Mellon is violating, Senator Watson said, prohibits the secretary of the treasury from engaging in any kind of business or commerce.

FORD WON'T ALTER HIS OFFER

House Military Committee Is Notified That Muscle Shoals Terms Must Stand.

Washington, Feb. 15.—W. B. Mayo, chief engineer officer for Henry Ford, notified the house military committee that the Detroit manufacturer would decline to modify his proposal for the lease and purchase of the government's properties at Muscle Shoals, Ala..

J. F. Pershing Appointed Dry Agent.

New York, Feb. 17.—Appointment of James F. Pershing, Jr., nephew of General Pershing, as assistant federal prohibition director in New York state to succeed Col. Herbert G. Catrow, was announced by Dr. Ralph A. Day.

John S. Miller Passes Away.

Chicago, Feb. 18.—John Stocker Miller, for nearly half a century a resident of Chicago and one of the city's leading attorneys and business men, died at his home here. Mr. Miller had been ill for two weeks.

106 Years, Goes on a Spree.

Jacksonville, Fla., Feb. 18.—James Monroe, one hundred and six years old, arrested on a charge of being drunk and disorderly, was given a suspended sentence by Municipal Judge Breckham.

SAVES DAD FROM HORNS OF BULL

Seventeen-Year-Old Boy Is Fined by Court for Being Brutal to Animal.

New York.—If a bull attacks a man and the man's son, in order to save his father's life, stabs the bull in the eye with a pitchfork, is the man guilty of cruelty to animals and subject to fine, or is the bull guilty and should the man sue the bull's owner for damages? This question must be decided by the Superior court of Connecticut.

Mrs. E. Trowbridge Lord of Greenwich, Conn., breeder of prize stock, is the owner of a valuable champion Guernsey bull, eighteen months old. Recently the bull attacked Ernest Luther, superintendent on Mrs. Lord's large estate on King street, pinning him against a barn with horns locked around Luther's body.

Luther's son, seventeen, went to the rescue with a pitchfork, but wounded the animal so badly that it may lose

Saves Father From Bull.

the sight of one eye. Young Luther was arraigned in court charged by Mrs. Lord with cruelty and was fined $25 and costs by Judge James R. Mead. Judge Frederick A. Hubbard, counsel for Luther, appealed the case and bond was fixed at $100.

E. Trowbridge Lord, retired lawyer, who is engaged in scientific and industrial investigations, recently gave notice to Luther, father and son, that their wages were to be reduced and they gave notice of intention to quit his employ. The bull, Mrs. Lord said, is a great pet and has won prizes in the West. She curries him herself and is now nursing his wound.

Luther's injuries were not serious.

BURGLAR USES POISON GAS

Blows Drug Through Speaking Tube and Then Robs Home of Unconscious Victim.

Chicago.—Chicago's latest is the speaking tube burglars. Summoning an intended victim to the tube, he blows poisoned gas into his or her face. He then loots the apartment at his leisure. Police are investigating several complaints of this kind.

"The doorbell rang one afternoon," says Mrs. Frederick Weiland, the first victim to report to the police. "A man answered the speaking tube, and told me he had an important matter to discuss with me. Before I could answer I heard a swishing in the tube.

"A gust of wind from the tube struck me in the face. The wind had a sweetish odor, and I inhaled it. There was nothing to indicate, however, that the man had blown powder up through the tube. It must have been a gas of some kind.

"I became dizzy at once. I groped my way to a window and shouted for help. The man escaped."

KILLS SISTER TO KEEP HUBBY

Wife Shoots Girl as She Sleeps and Calmly Surrenders to Police.

Long Branch, N. J.—Mrs. Hermione Rentzman, thirty, arrested in her home, calmly confessed to the police that she had shot and killed her sister, Germine Wessels, twenty-seven, as she lay sleeping, because she feared the younger woman was stealing the love of her husband. Next night she wrote to her husband, who was in New York, telling of the tragedy and adding that she was about to kill their 14-month-old child and herself. Rentzman notified the police.

Rode Miles to Beat Up Telephone Operator

Angered because he could not get a number on the telephone, Ed Smith of Omaha, Ga., rode 12 miles and beat up the operator at Norman Park, according to an indictment returned by the grand jury at Moultrie against Smith. The prisoner was released on bail.

DOES LAUNDRY WORK AND HOUSEWORK TOO

Surprised to Find Herself Feeling So Well

Taunton, Mass.—"I used to have pains in my back and legs so badly, with other troubles that women sometimes have, that my doctor ordered me to stay in bed a week in every month. It didn't do me much good, so one day I was talking with a friend who took Lydia E. Pinkham's Vegetable Compound and about the same troubles I had, I thought I would try it. I find that I can work in the laundry through the time and do my housework too. Last month I was so surprised myself to be up and around and feeling so good while before I used to feel completely lifeless. I have told some of the girls who work with me and have had troubles to try Lydia E. Pinkham's Vegetable Compound, and I tell them how it has helped me. You can use my testimonial for the good of others."—Mrs. BLANCHE SILVIA, 59 Grant St., Taunton, Mass.

It's the same story—one friend telling another of the value of Lydia E. Pinkham's Vegetable Compound.

Laxatives Replaced

By the Use of Nujol

Nujol is a lubricant—not a medicine or laxative—so cannot gripe.

When you are constipated, there is not enough lubricant produced by your system to keep the food waste soft. Doctors prescribe Nujol because its action is so close to this natural lubricant. Try it today.

Nujol

For Constipation

PISO'S

SAFE AND SANE for Coughs & Colds

This syrup is different from all others. Quick relief. No opiates. 35c everywhere

If You Need a Medicine You Should Have the

Have you ever stopped to reason it is that so many products that tensively advertised, all at once of sight and are soon forgotten? reason is plain—the article did not the promises of the manufacturer applies more particularly to a A medicinal preparation that curative value almost sells itself, an endless chain system the recommended by those who have benefited, to those who are in need.

A prominent druggist says "Take example Dr. Kilmer's Swamp-Root preparation I have sold for many and never hesitate to recommend, almost every case it shows excellent sults, as many of my customers No other kidney remedy has so sale."

According to sworn statements verified testimony of thousands who used the preparation, the success Kilmer's Swamp-Root is due to the so many people claim, that it fulfills most every wish in overcoming liver and bladder ailments; correcting nary troubles and neutralizes the acid which causes rheumatism.

You may receive a sample bottle Swamp-Root by Parcels Post. Address Dr. Kilmer & Co., Binghamton, N. and enclose ten cents; also mention paper. Large and medium size bottles for sale at all drug stores. Advertisement.

There is joy in anticipation but reason remains silent.

Important to Mothers

Examine carefully every bottle CASTORIA, that famous old remedy for infants and children, and see that

Bears the Signature of *Chas. H. Fletcher*

In Use for Over 30 Years.

Children Cry for Fletcher's Castoria

A blush also is not beautiful cause it overdoes it.

How's Your Liver?

Health is Your Most Valuable Asset—Here is How to Take Care of It

Superior, Nebr.—"Some years ago I was troubled greatly with liver trouble. I would become dizzy and dark spots would appear before my eyes. I took Dr. Pierce's Golden Medical Discovery and one bottle cured me. I have never had a return of this ailment but have always had good health since. I am glad indeed to be able to recommend such a good medicine."—Mrs. Frank Wentz, 141 So. Bloom St.

Obtain the Discovery in tablet or liquid at your nearest drug store or send 10c to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial pkg., and write for free medical advice.

AMENT OF THE PENCIL

I DECLARE I am tired to death," said the Pencil as it was dropped o a tray beside the pen and other sk folks.

'Why didn' t you stay at home as I d?" said the Penholder. "You have en gone all day. Where have you en?"

"You may be sure I did not choose go away," was the answer. "Didn't u see that I was taken out of the y this morning when no one was oking? I was carried off to a place frielled school and there I was made to the hardest sort of work. Just ok at me; an inch shorter than I was d worn to a stubby point as well. am sure I have walked miles since I t saw ycu all."

'Do tell us about it," urged the ountain Pen, who was always keen hear the latest news, as it was ally more up to date than any of its mpanions. "Do you mean that some c used you instead of a pen?"

"That is just what I do mean," said e Pencil. "The one who carried me f first dropped me on the floor and oke off my nice, sharp point, then sharpened me with a funny cap-aped thing, and off came a piece of y wooden coat; but at last I was ven another point and then my trou-es began.

"I was made to walk up and down, across and over miles of white paper, and, oh, you should have seen the dreadful spelling and the untidy figures that I was forced to make!

"You all know that the one who usually sits at this desk uses us in the most artistic manner and never do we have to make mistakes or make crooked figures or letters."

"No, never," said all the desk folks; "poor Pencil, how you must have suffered."

"But that is only a part of the tragedy," continued the Pencil. "I was sometimes put in the mouth of the one who made me work so hard and that made me feel very uncomfortable.

"Some One Stepped on Me."

Besides that his teeth would sometimes almost bite off my point.

"Then he dropped me on the floor again and some one stepped on me, although I was fortunate that time in not having a sharp point, so I was not injured, though my feelings were certainly hurt.

"But at last my troubles were at an end and I was brought back to my home, which I never expected to see again, and I am so tired I cannot say another word."

Then over rolled the poor, tired Pencil sound asleep, while the Penholder and the Fountain Pen and the big blue pencil looked sadly at their misused companion and sighed.

"This goes to prove what I have always thought," said the Fountain Pen; "children should never use things that do not belong to them. Poor Pencil will never recover from the hard treatment he has received today and I hope we will all be fortunate enough to escape his sad fate."

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

INVITATIONS

And I'll request your presence.—Shakespeare.

HERE is a nice little problem in etiquette that may perplex some of the brides who are making plans for spring weddings.

Suppose, for instance, that a woman of mature years and independent position in life who possessed no near relatives is about to be married, and suppose because of the fact that she is without family ties she herself must make all those arrangements for the wedding that would usually devolve upon the bride's mother or aunt or other woman relative. It may be that she is to be married at church and that she wants to invite her friends and her husband-elect's friends to the ceremony and to a wedding breakfast or supper following the ceremony at her own home where she has lived with no other companion save an old and trusted servant, or it may be that she and her bridegroom want to entertain their small wedding party at a hotel wedding breakfast following the ceremony. Who then should send out the invitations?

The old time idea was that a woman should never send out her own wedding invitations even though she had been married before and really possessed no one who stood to her in the place of a parent or guardian. But good usage now permits a woman to issue her own wedding invitations when there is no one who would conveniently do this for her. To be sure, a young woman would seldom do this, but the privilege is not restricted to women who have been married before. However, when this is done the bride does not have the invitations worded thus: "Miss Jane Smith requests the honor of your presence at her marriage to Mr. John Brown, but instead she uses this wording: "The honor of your presence is requested at the marriage of Miss Jane Smith to Mr. John Brown on the afternoon, etc."

In the event that the bride has both or either parents, their names would most emphatically be used either in the invitations or announcement of a marriage. If a bride is motherless, then the invitations or announcements are sent out in the name of the father. However, if a motherless bride is to be married at the home of an aunt, then the invitations are sent out in the name of the aunt and her husband. It would be perfectly correct for a father, if he had no convenient home of his own, to have his daughter married from a sister's home, when the invitations would run:

Mr. John Brown
requests the honor of your presence
at the marrige of his daughter
Jane Louise
to
Mr. William Smith
Thursday afternoon April twenty-first
at half past three
at the residence of
Mr. and Mrs. Henry Brown
225 Fifth Avenue.

Avoid "Smoker's Throat."

It is often said that you do not get oil of tobacco in cigars. This is a mistake. The oil is there and is no more burnt away or evaporated than in a pipe. It is drawn to and condensed in the end of the cigar between the lips of the smoker. For this reason cigars should never be smoked to the last inch. Certain connoisseurs will never smoke a cigar more than three-quarters of the way through. Smoking cigars to the bitter end produces "smoker's throat." As soon as a cigar begins to taste bitter, throw it away.

"What's in a Name?"

Facts about your name: its history, meaning, whence it was derived, significance, your lucky day and lucky jewel

By MILDRED MARSHALL

LUCRETIA

THOUGH Lucretia was the name borne by the notorious daughter of the Borgia, it is one of the quaintest and most old-fashioned of names in this country. It is a far cry from ancient Rome to modern New England, but the name has completed the transition with very few changes to mark the stages of its evolution.

There are two theories among etymologists in regard to the original source of Lucretia. Some contend that it comes from the Latin word lucrum, meaning "gain," and, for that reason, Lucretia is said to signify gain. On the other hand, there is much evidence to prove that its real source was in the Latin word for light, lux. Many feminine names have been derived from this root and the same word has supplied surnames without number.

It is believed, therefore, that the noted old gens Lucretius, from which Lucretia is directly descended, was only another of the derivatives of lux. "Lucrece, combing the fleece under the midnight lamp," the famous old Roman tale, inspired Shakespeare to write one of his earliest poems.

France has a Lucrece which is popular, and England imported Lucretia in the Eighteenth century.

Lucretia's talismanic stone is the red-hearted ruby. It has the power to bring her strength of body, an invincible spirit and success in every undertaking. Tuesday is her lucky day and 6 her lucky number.

VIBRATIONS

By IDA W. GOULD

© 1922, by McClure Newspaper Syndicate.

Melissa Day heard the clang of the brass knocker on her front door. Alone, remote from neighbors, no fear impeded her quick progress to the door; she switched on the electric light and threw its full glare into the inquirer's face.

"Jeffrey!" she exclaimed, the door wide open.

"Come in, right in there," pointing to a small room opening from the hall.

The man had white hair, yet a young face, the face of a man about forty-five. He obeyed the wave of her hand and in a moment was standing before the open fire, awaiting her invitation to be seated.

Melissa closed the outside door; then smiling at the undecided expression which her visitor could not conceal, came quickly forward and grasped his extended hand with both of hers.

"So it was true," she murmured dreamily. "The power of my thought was strong enough. I did not believe it.

"I'm so glad to see you, Jeffrey; I wanted to see you again before we both took the Great Adventure."

It was not very cold, yet the man realized how cold the hands were which grasped his.

"Sit down, Jeffrey; your appearance is so unexpected I trust you understand me. I will explain my surprise at once."

By this time the man's face showed deep color, whether of emotion or confusion he alone knew.

Melissa Day commenced jerkily to explain herself, while the man watched her closely.

"I met someone a few days ago who told me if I sent enough power forth in my desires they would compel a response. I said to her, 'There is someone I parted from years ago. I desire to see him.' She said, 'You will before long.'"

The man's face was now very much flushed.

"How many years is it, Melissa?"

"Ages in fancy, only thirty years in reality," answered Melissa.

She continued rapidly to question him concerning his life and the reason of his sudden appearance, although she still had an intuition that he was not quite frank on the subject.

"Jeffrey," she persisted, "how did you know I lived here?"

"I took a chance, Melissa; the directory did the rest. Your hair is just as it was; look at mine."

"Then, you have felt a strong urge recently to see me, Jeffrey?"

"Yes."

"That woman got two dollars from me. I suppose it could have been saved had I wished much harder."

Jeffrey smiled sympathetically and looked around the room, noted its coziness, and asked, "You live here all alone all the year?"

"Oh, no; my nieces are often here, and in winter I live in town. Why have you never called on me, Jeffrey?"

"I lived out West until a year ago. Business brought me to Boston. Some one wrote me you had married. I was surprised enough to find you in the directory as Melissa Day."

"What a wonderful power there is in thought," mused the woman, looking steadily into the blazing log fire. A silence fell as they both reviewed mentally early scenes in which they had been closely associated.

The man was first to speak.

"How young you look, Melissa!"

"I suppose outdoor life and much dancing helped."

"You dance?" exclaimed the man.

"Certainly. Why not? Are you disappointed, Jeffrey? Did you expect to find me wailing and unhappy because I did not attain the usual prize, a husband?"

"No—I thought you would be different, that's all."

"Now, Jeffrey—be frank with me, has—oh—no—she never would have dared; has that woman communicated with you—oh—I believe she did——"

By this time Melissa was crying bitter tears of humiliation.

"Melissa, don't reproach any one. I should have come to find you if—if the woman had not asked me to do so."

"Oh—Jeffrey—I am so sorry I told that horrid woman about my dearie. Oh—you surely believe me—when I tell you I imagined your coming here was of your own volition."

"Of course I believe you, Melissa. What a blessing it is that I've found out (no matter how) that you did wish to see me."

"I don't agree with you, Jeffrey. The means employed should have been that you had an overwhelming desire to see me, and that is what you did not have. No—I can never look you in the face again."

Jeffrey manfully put his arms around Melissa and looked into her tear-bedewed face.

"Melissa, I'm going to ask you a question, and you'll have to be frank with me. Ready, dear?

"I ask you if your desire to see me is only an occasional vibration or a permanent one? If permanent, kiss me."

Melissa's face wore a very happy expression a few moments later, when the lovers sat hand in hand and saw glowing visions in the fire. Visions—dreamy, intangible, happy precursors of the remainder of the days which they were to spend together.

Home Town Helps

NEW IDEA IN HOUSE BUILDING

Claim Made That by This Method Unskilled Labor Can Be Put to Practical Use.

Axel Wedberg, Floral Park, L. I., has made an invention that is said to be of great importance in house building, says Foreign Language Information Service.

Mr. Wedberg's idea is to build houses with cast concrete walls made in molds, which can easily be joined by means of hooks and props. The concrete blocks are then put together in the corners by dovetailing. The roof and the sidewalls are joined in the same way.

One outstanding advantage in this method is that houses can be built by almost unskilled laborers, as most of the cast concrete blocks are made to fit exactly where they belong before being erected.

Another feature is the easy way a damaged building can be repaired, the defective block only being replaced by a new one. Wall paper and paint are easily applied. The blocks are not solid, but are provided with a four-inch air and insulating hole.

The inventor came over to this country in 1903, and has since been studying and working. For the last twelve years he has been connected with several house-building concerns.

HAVING SHOP WINDOWS CLEAR

No Need to Lose Effect of Display Because Jack Frost Raises Seemingly Effective Barrier.

During cold weather many retail merchants lose the effect of their window display by allowing their shop-windows to become covered with frost.

The covering of frost is due to the change in temperature in the window space. The remedy lies in having the space inside the windows cold all day. Back windows which partition the window space from the store itself help, but are not sufficient.

Several small holes should be drilled in the top and floor of the window

The Ventilators Should Be Hooded to Shed Rain and Snow.

space to connect it with the outside. About three holes, each one inch in diameter, are sufficient for a window of average size. These holes allow the outside cold to penetrate, and equalize inside and outside temperatures.—Popular Science Monthly.

Few New Yorkers Own Homes.

Fewer New Yorkers own their own homes than do inhabitants of any large city in America. There are 1,278,341 homes in New York and only one-eighth are owned by the occupants. This is revealed in a study made by the division of building and housing of the federal bureau of standards, which included cities of the United States having a population of over one hundred thousand. Des Moines, Ia., with over half, or 51.1 per cent of its 31,644 homes owned by their occupants, has the best record.

Obnoxious Advertising Signs.

Eliminating the signs from state roads should provide a good example for other roads, and in time it should have its effect upon the cities, where the citizens are obliged to wage a continuous battle to keep obnoxious advertising signs from parks and boulevards. The argument that in some cases the signs are better than the unimproved tracts of land which they hide carries some weight, but it merely invites attention to bad housekeeping methods.—Exchange.

Home Ownership.

The more home and farm owners the country has the better. Men who own their homes are likely to be good citizens. They respect property rights. They take an interest in government because they have something at stake. They increase the production of wealth. They bear responsibilities.

The Days Gone By.

"Don't you long for the good, old-fashioned days?"

"Sometimes," replied Miss Cayenne, "when I see pictures of gowns that cover the knees. But never when I think of a man with side whiskers."

That's Not a Sure Sign.

Dadd—Why do you say that Mr. Hypp is not a good man? He goes to church more often than any man I know.

Keane—Yes; he devotes all his religion to going to church.—Answers.

It's too late when--

The wet season starts in

The little shower the other day should be a reminder to us that Spring is drawing near.

Roofs in general have been neglected the past two years on account of the high cost of shingles and roofing.

We will have our share of wet days in the next two months and now would be a good time to take a good look at the old roof and see if repairs are needed. Don't put it off because delay means more expense.

We carry a complete line of Roofings, Asphalt Shingles and Red Cedars.

Look our over and get that roof in shape before the spring rains set in.

NOTICE OF ASSESSMENTS OF BENEFITS DRAINAGE DISTRICT NO. 111.

To Charles Medaus, Daniel Webner, Peter Markle, Wm. J. Schlawin, and to the County Board of Supervisors.

You and each of you are hereby notified that the Commissioners appointed by the Board of Supervisors of Hancock County, Iowa, to view and classify the lands in Drainage District No. 111, and to apportion to the said lands and tracts, the total cost of said Drainage District, have made and filed their report in the Office of the County Auditor as required by law which report follows:—

Names	Description	Sec.	Twp.	Acres	Amt.	Class
Charles Medaus,	NW¼ SE¼	26	95—23	26	$410.00	44.40
Charles Medaus,	SW¼ SE¼	26	95—23	16	$484.00	52.40
Charles Medaus,	SE¼ SW¼	26	95—23	39	$923.00	100.00
Daniel Webner,	NE¼ SW¼	26	95—23	5	$ 24.00	2.60
Daniel Webner,	SW¼ SW¼	26	95—23	9.5	$ 87.00	9.42
Peter Markle,	NW¼ NE¼	35	95—23	2.58	$ 21.00	2.27
Wm. J. Schlawin,	NE¼ NW¼	35	95—23	16	$253.00	27.40
Wm. J. Schlawin,	NW¼ NW¼	35	95—23	3.5	$ 37.00	4.00
County Road,					$470.00	
			TOTAL		$2,709.00	

You are further notified that the 3rd day of April, 1922, has been fixed as the date for final hearing on said assessment and all objections hereto must be made in writing and filed with the County Auditor on or before noon of said date.

WITNESS my hand and official seal this 11th day of February, A. D. 1922.

CHRIS JACOBS,
County Auditor of Hancock County, Iowa.

Painting Time Again

House cleaning time will soon be here and with it comes painting and varnishing time also—now would be a good time to do some of that painting and varnishing about the house.

FLAT WALL PAINT—
We carry a full line of flat wall paint in a full assortment of colors.

FLOOR VARNISH—
Our floor varnish is only the best and costs no more than others.

LINOLEUM VARNISH—
If you have not been in the habit of varnishing your linoleum it will pay to start now, you will be pleased with the result and your linoleum will look better, easier to keep clean and wear longer if given a coat of our varnish.

INTERIOR VARNISH—

INSIDE PAINT—

WHITE ENAMEL—

SHELLAC—

FLOOR WAX—
We handle Johnson's Floor Wax in both the liquid nd the paste forms.

WE also carry a full line of paint and varnish brushes, oils, turpentine, sand paper, steel wool, etc., in fact everything needed for the whole job.

Jacobs & Son

Some Aspects of the Farmers' Problems

By BERNARD M. BARUCH

(Reprinted from Atlantic Monthly)

I

e whole rural world is in a fer- of unrest, and there is an un- leled volume and intensity of de- ned, if not angry, protest, and an ous swarming of occupational con- ces, interest groupings, political ments and propaganda. Such a oil cannot but arrest our atten- Indeed, it demands our careful and examination. It is not like- at six million aloof and ruggedly endent men have come together banded themselves into active s, societies, farm bureaus, and so , for no sufficient cause.

vestigation of the subject conclu- y proves that, while there is much statement of grievances and mis- eption of remedies, the farmers right in complaining of wrongs endured, and right in holding that feasible to relieve their ills with it to the rest of the community. being the case of an industry contributes, in the raw material alone, about one-third of the na- l annual wealth production and e means of livelihood of about 49 cent of the population, it is ob- s that the subject is one of grave ern. Not only do the farmers e up one-half of the nation, but well-being of the other half de- s upon them.

long as we have nations, a wise cial economy will aim at a large ee of national self-sufficiency and containment. Rome fell when the supply was too far removed from belly. Like her, we shall destroy own agriculture and extend our ces of food distantly and precari- y, if we do not see to it that our ers are well and fairly paid for services. The farm gives the n men as well as food. Cities e their vitality and are forever wed from the country, but an im- rished countryside exports intelli- e and retains unintelligence. the lower grades of mentality character will remain on, or seek, farm, unless agriculture is capable eing pursued with contentment and uate compensation. Hence, to em- r and impoverish the farmer is to up and contaminate the vital ces of the nation.

e war showed convincingly how ndent the nation is on the full uctivity of the farms. Despite ulean efforts, agricultural produc- kept only a few weeks or months d of consumption, and that only ncreasing the acreage of certain e crops at the cost of reducing of others. We ought not to for- that lesson when we ponder on farmer's problems. They are truly mon problems, and there should o attempt to deal with them as ey were purely selfish demands clear-cut group, antagonistic to rest of the community. Rather ld we consider agriculture in the of broad national policy, just we consider oil, coal, steel, dye- s, and so forth, as sinews of na- l strength. Our growing popula- and a higher standard of living nd increasing food supplies, and wool, cotton, hides, and the rest. the disappearance of free or p fertile land, additional acreage increased yields can come only costly effort. This we need not ct from an impoverished or un- y rural population.

will not do to take a narrow view he rural discontent, or to appraise rom the standpoint of yesterday. is peculiarly an age of flux and ge and new deals. Because a always has been so no longer ns that it is righteous, or always l be so. More, perhaps, than ever re, there is a widespread feeling all human relations can be im- ed by taking thought, and that it ot becoming for the reasoning ani- to leave his destiny largely to nce and natural incidence.

rudent and orderly adjustment of duction and distribution in accord- with consumption is recognized wise management in every business that of farming. Yet, I venture ay, there is no other industry in ch it is so important to the pub- to the city-dweller—that produc- should be sure, steady, and in- sing, and that distribution should n proportion to the need. The un- nized farmers naturally act blind- and impulsively and, in conse- nce, surfeit and dearth, accompa- by disconcerting price-variations, ss the consumer. One year pota- rot in the fields because of excess duction, and there is a scarcity of things that have been displaced make way the expansion of the to acreage; next year the punish- farmers mass their fields on some r crop, and potatoes enter the s of luxuries; and so on.

griculture is the greatest and fun- mentally the most important of our erican industries. The cities are the branches of the tree of na- al life, the roots of which go deep into the land. We all flourish or ine with the farmer. So, when we the cities read of the present uni- sal distress of the farmers, of a mp of six billion dollars in the farm ue of their crops in a single year, of their inability to meet mortgages or to pay current bills, and how, seeking relief from their ills, they are planning to form pools, inaugurate farmers' strikes, and demand legislation abolishing grain exchanges, private cattle markets, and the like, we ought not hastily to brand them as economic heretics and highwaymen, and hurl at them the charge of being seekers of special privilege. Rather, we should ask if their trouble is not ours, and see what can be done to improve the situation. Purely from self-interest, if for no higher motive, we should help them. All of us want to get back permanently to "normalcy;" but is it reasonable to hope for that condition unless our greatest and most basic industry can be put on a sound and solid permanent foundation? The farmers are not entitled to special privileges; but are they not right in demanding that they be placed on an equal footing with the buyers of their products and with other industries?

II

Let us, then, consider some of the farmer's grievances, and see how far they are real. In doing so, we should remember that, while there have been, and still are, instances of purposeful abuse, the subject should not be approached with any general imputation to existing distributive agencies of deliberately intentional oppression, but rather with the conception that the marketing of farm products has not been modernized.

An ancient evil, and a persistent one, is the undergrading of farm products, with the result that what the farmers sell as of one quality is resold as of a higher. That this sort of chicanery should persist on any important scale in these days of business integrity would seem almost incredible, but there is much evidence that it does so persist. Even as I write, the newspapers announce the suspension of several firms from the New York Produce Exchange for exporting to Germany as No. 2 wheat a whole shipload of grossly inferior wheat mixed with oats, chaff and the like.

Another evil is that of inaccurate weighing of farm products, which, it is charged, is sometimes a matter of dishonest intention and sometimes of protective policy on the part of the local buyer, who fears that he may "weigh out" more than he "weighs in."

A greater grievance is that at present the field farmer has little or no control over the time and conditions of marketing his products, with the result that he is often underpaid for his products and usually overcharged for marketing service. The difference between what the farmer receives and what the consumer pays often exceeds all possibility of justification. To cite a single illustration: Last year, according to figures attested by the railways and the growers, Georgia watermelon-raisers received on the average 7.5 cents for a melon, the railroads got 12.7 cents for carrying it to Baltimore and the consumer paid one dollar, leaving 79.8 cents for the service of marketing and its risks, as against 20.2 cents for growing and transporting. The hard annals of farm-life are replete with such commentaries on the crudeness of present practices.

Nature prescribes that the farmer's "goods" must be finished within two or three months of the year, while financial and storage limitations generally compel him to sell them at the same time. As a rule, other industries are in a continuous process of finishing goods for the markets; they distribute as they produce, and they can curtail production without too great injury to themselves or the community; but if the farmer restricts his output, it is with disastrous consequences, both to himself and to the community.

The average farmer is busy with production for the major part of the year, and has nothing to sell. The bulk of his output comes on the market at once. Because of lack of storage facilities and of financial support, the farmer cannot carry his goods through the year and dispose of them as they are currently needed. In the great majority of cases, farmers have to entrust storage—in warehouses and elevators—and the financial carrying of their products to others.

Farm products are generally marketed at a time when there is a congestion of both transportation and finance—when cars and money are scarce. The outcome, in many instances, is that the farmers not only sell under pressure, and therefore at a disadvantage, but are compelled to take further reductions in net returns, in order to meet the charges for the service of storing, transporting, financing, and ultimate marketing—which charges they claim, are often excessive, bear heavily on both consumer and producer, and are under the control of those performing the services. It is true that they are relieved of the risks of a changing market by selling at once; but they are quite willing to take the unfavorable chance, if the favorable one also is theirs and they can retain for themselves a part of the service charges that are uniform, in good years and bad, with high prices and low.

While, in the main, the farmer must sell, regardless of market conditions, at the time of the maturity of crops, he cannot suspend production in toto. He must go on producing if he is to go on living, and if the world is to exist. The most he can do is to curtail production a little or alter its form, and that—because he is in the dark as to the probable demand for his goods—may be only to jump from the frying pan into the fire, taking the consumer with him.

Even the dairy farmers, whose output is not seasonal, complain that they find themselves at a disadvantage in the marketing of their productions, especially raw milk, because of the high costs of distribution, which they must ultimately bear.

III

Now that the farmers are stirring, thinking, and uniting as never before to eradicate these inequalities, they are subjected to stern economic lectures, and are met with the accusation that they are demanding, and are the recipients of, special privileges. Let us see what privileges the government has conferred on the farmers. Much has been made of Section 6 of the Clayton Anti-Trust Act, which purported to permit them to combine with immunity, under certain conditions. Admitting that, nominally, this exemption was in the nature of a special privilege,—though I think it was so in appearance rather than in fact,—we find that the courts have nullified it by judicial interpretation. Why should not the farmers be permitted to accomplish by co-operative methods what other businesses are already doing by co-operation in the form of incorporation? If it be proper for men to form, by fusion of existing corporations, or otherwise, a corporation that controls the entire production of a commodity or a large part of it, why is it not proper for a group of farmers to unite for the marketing of their common products, either in one or in several selling agencies? Why should it be right for a hundred thousand corporate shareholders to direct 25 or 30 or 40 per cent of an industry, and wrong for a hundred thousand co-operative farmers to control a no larger proportion of the wheat crop, or cotton, or any other product?

The Department of Agriculture is often spoken of as a special concession to the farmers, but in its commercial results, it is of as much benefit to the buyers and consumers of agricultural products as to the producers, or even more. I do not suppose that anyone opposes the benefits that the farmers derive from the educational and research work of the department, or the help that it gives them in working out improved cultural methods and practices, in developing better yielding varieties through breeding and selection, in introducing new varieties from remote parts of the world and adapting them to our climate and economic condition, and in devising practical measures for the elimination or control of dangerous and destructive animal and plant diseases, insect pests, and the like. All these things manifestly tend to stimulate and enlarge production, and their general beneficial effects are obvious.

It is complained that, whereas the law restricts Federal Reserve banks to three months' time for commercial paper, the farmer is allowed six months on his notes. This is not a special privilege, but merely such a recognition of business conditions as makes it possible for country banks to do business with country people. The crop farmer has only one turnover a year, while the merchant and manufacturer have many. Incidentally, I note that the Federal Reserve Board has just authorized the Federal Reserve banks to discount export paper for a period of six months, to conform to the nature of the business.

The Farm Loan banks are pointed to as an instance of special government favor for farmers. Are they not rather the outcome of laudable efforts to equalize rural and urban conditions? And about all the government does there is to help set up an administrative organization and lend a little credit at the start. Eventually the farmers will provide all the capital and carry all the liabilities themselves. It is true that Farm Loan bonds are tax exempt; but so are bonds of municipal light and traction plants, and new housing is to be exempt from taxation, in New York, for ten years.

On the other hand, the farmer reads of plans for municipal housing projects that run into the billions, of hundreds of millions annually spent on the merchant marine; he reads that the railways are being favored with increased rates and virtual guaranties of earnings by the government, with the result to him of an increased toll on all that he sells and all that he buys. He hears of many manifestations of governmental concern for particular industries and interests. Rescuing the railways from insolvency is undoubtedly for the benefit of the country as a whole, but what can be of more general benefit than encouragement of ample production of the principal necessaries of life and their even flow from contented producers to satisfied consumers?

While it may be conceded that special governmental aid may be necessary in the general interest, we must all agree that it is difficult to see why agriculture and the production and distribution of farm products are not accorded the same opportunities that are provided for other businesses; especially as the enjoyment by the farmer of such opportunities would appear to be even more contributory to the general good than in the case of other industries. The spirit of American democracy is unalterably opposed, alike to enacted special privilege and to the special privilege of unequal opportunity that arises automatically from the failure to correct glaring economic inequalities. I am opposed to the injection of government into business, but I do believe that it is an essential function of democratic government to equalize opportunity so far as it is within its power to do so, whether by the repeal of archaic statutes or the enactment of modern ones. If the anti-trust laws keep the farmers from endeavoring scientifically to integrate their industry while other industries find a way to meet modern conditions without violating such statutes, then it would seem reasonable to find a way for the farmers to meet them under the same conditions. The law should operate equally in fact. Repairing the economic structure on one side is no injustice to the other side, which is in good repair.

We have traveled a long way from the old conception of government as merely a defensive and policing agency; and regulative, corrective, or equalizing legislation, which apparently is of a special nature, is often of the most general beneficial consequences. Even the First Congress passed a tariff act that was avowedly for the protection of manufacturers; but a protective tariff always has been defended as a means of promoting the general good through a particular approach; and the statute books are filled with acts for the benefit of shipping, commerce, and labor.

IV

Now, what is the farmer asking? Without trying to catalogue the remedial measures that have been suggested in his behalf, the principal proposals that bear directly on the improvement of his distributing and marketing relations may be summarized as follows:—

First: storage warehouses for cotton, wool, and tobacco, and elevators for grain, of sufficient capacity to meet the maximum demand on them at the peak of the marketing period. The farmer thinks that either private capital must furnish these facilities, or the state must erect and own the elevators and warehouses.

Second: weighing and grading of agricultural products, and certification thereof, to be done by impartial and disinterested public inspectors (this is already accomplished to some extent by the federal licensing of weighers and graders), to eliminate underpaying, overcharging, and unfair grading, and to facilitate the utilization of the stored products as the basis of credit.

Third: a certainty of credit sufficient to enable the marketing of products in an orderly manner.

Fourth: the Department of Agriculture should collect, tabulate, summarize, and regularly and frequently publish and distribute to the farmers, full information from all the markets of the world, so that they shall be as well informed of their selling position as buyers now are of their buying position.

Fifth: freedom to integrate the business of agriculture by means of consolidated selling agencies, co-ordinating and co-operating in such way as to put the farmer on an equal footing with the large buyers of his products and with commercial relations in other industries.

When a business requires specialized talent, it has to buy it. So will the farmers; and perhaps the best way for them to get it would be to utilize some of the present machinery of the largest established agencies dealing in farm products. Of course, if he wishes, the farmer may go further and engage in flour-milling and other manufactures of food products. In my opinion, however, he would be wise to stop short of that. Public interest may be opposed to all great integrations; but in justice, should they be forbidden to the farmer and permitted to others? The corporate form of association can not now be wholly adapted to his objects and conditions. The looser co-operative form seems more generally suitable. Therefore, he wishes to be free, if he finds it desirable and feasible, to resort to co-operation with his fellows and neighbors, without running afoul of the law. To urge that the farmers should have the same liberty to consolidate and co-ordinate their peculiar economic functions which other industries in their fields enjoy, is not, however, to concede that any business integration should have legislative sanction to exercise monopolistic power. The American people are as firmly opposed to industrial as to political autocracy, whether attempted by rural or by urban industry.

For lack of united effort the farmers as a whole are still marketing their crops by antiquated methods, or by no methods at all, but they are surrounded by a business world that has been modernized to the last minute and is tirelessly striving for efficiency. This efficiency is due in large measure to big business, to united business, to integrated business. The farmers now seek the benefits of such largeness, union and integration.

The American farmer is a modern of the moderns in the use of labor saving machinery, and he has made vast strides in recent years in scientific tillage and efficient farm management, but as a business in contact with other businesses agriculture is a "one horse shay" in competition with high power automobiles. The American farmer is the greatest and most intractable of individualists. While industrial production and all phases of the huge commercial mechanism and its myriad accessories have articulated and co-ordinated themselves all the way from natural raw materials to retail sales, the business of agriculture has gone on in much the one man fashion of the backwoods of the first part of the nineteenth century, when the farmer was self sufficient and did not depend upon, or care very much, what the great world was doing. The result is that the agricultural group is almost as much at a disadvantage in dealing with other economic groups as the lay farmer of the funny pages in the hands of sleek urban confidence men, who sell him acreage in Central Park or the Chicago city hall. The leaders of the farmers thoroughly understand this, and they are intelligently striving to integrate their industry so that it will be on an equal footing with other businesses.

As an example of integration, take the steel industry, in which the model is the United States Steel Corporation, with its iron mines, its coal mines, its lake and rail transportation, its ocean vessels, its by-product coke ovens, its blast furnaces, its open hearth and Bessemer furnaces, its rolling mills, its tube mills and other manufacturing processes that are carried to the highest degree of finished production compatible with the large trade it has built up. All this is generally conceded to be to the advantage of the consumer. Nor does the steel corporation inconsiderately dump its products on the market. On the contrary, it so acts that it is frequently a stabilizing influence, as is often the case with other large organizations. It is master of its distribution as well as of its production. If prices are not satisfactory the products are held back or production is reduced or suspended. It is not compelled to send a year's work to the market at one time and take whatever it can get under such circumstances. It has one selling policy and its own export department. Neither are the grades and qualities of steel determined at the caprice of the buyer, nor does the latter hold the scales. In this single integration of the steel corporation is represented about 40 per cent of the steel production of America. The rest is mostly in the hands of a few large companies. In ordinary times the steel corporation, by example, stabilizes all steel prices. If this is permissible (it is even desirable, because stable and fair prices are essential to solid and continued prosperity) why would it be wrong for the farmers to utilize central agencies that would have similar effects on agricultural products? Something like that is what they are aiming at.

Some farmers favored by regional compactness and contiguity, such as the citrus-fruit-raisers of California, already have found a way legally to merge and sell their products integrally and in accordance with seasonal and local demand, thus improving their position and rendering the consumer a reliable service of ensured quality, certain supply, and reasonable and relatively steady prices. They have not found it necessary to resort to any special privilege, or to claim any exemption under the anti-trust legislation of the state or nation. Without removing local control, they have built up a very efficient marketing agency. The grain, cotton, and tobacco farmers, and the producers of hides and wool, because of their numbers and the vastness of their regions and for other reasons, have found integration a more difficult task; though there are now some thousands of farmer's co-operative elevators, warehouses, creameries, and other enterprises of one sort and another, with a turn-over of a billion dollers a year. They are giving the farmers business experience and training, and, so far as they go, they meet the need of honest weighing and fair grading; but they do not meet the requirements of rationally adjusted marketing in any large and fundamental way.

The next step, which will be a pattern for other groups, is now being prepared by the grain-raisers through the establishment of sales media which shall handle grain separately or collectively, as the individual farmer may elect. It is this step—the plan of the Committee of Seventeen—which has created so much opposition and is thought by some to be in conflict with the anti-trust laws. Though there is now before congress a measure designed to clear up doubt on this point, the grain-producers are not relying on any immunity from anti-trust legislation. They desire, and they are entitled, to co-ordinate their efforts just as effectively as the large business interests of the country have done. In connection with the selling organizations the United States Grain Growers Incorporated is drafting a scheme of financing instrumentalities and auxiliary agencies which are indispensable to the successful utilization of modern business methods.

It is essential that the farmers should proceed gradually with these plans, and aim to avoid the error of scrapping the existing marketing machinery, which has been so laboriously built up by long experience, before they have a tried and proved substitute or supplementary mechanism. They must be careful not to become enmeshed in their own reforms and lose the perspective of their place in the national system. They must guard against fanatical devotion to new doctrines, and should seek articulation with the general economic system rather than its reckless destruction as it relates to them.

V

To take a tolerant and sympathetic view of the farmers' strivings for better things is not to give a blanket endorsement to any specific plan, and still less to applaud the vagaries of some of their leaders and groups. Neither should we, on the other hand, allow the froth of bitter agitation, false economics, and mistaken radicalism to conceal the facts of the farmers' disadvantages, and the practicability of eliminating them by well-considered measures. It may be that the farmers will not show the business sagacity and develop the wise leadership to carry through sound plans; but that possibility does not justify the obstruction of their upward efforts. We, as city people, see in high and speculatively manipulated prices, spoilage, waste, scarcity, the results of defective distribution of farm products. Should it not occur to us that we have a common interest with the farmer in his attempts to attain a degree of efficiency in distribution corresponding to his efficiency in production? Do not the recent fluctuations in the May wheat option, apparently unrelated to normal interaction of supply and demand, offer a timely proof of the need of some such stabilizing agency as the grain growers have in contemplation?

It is contended that, if their proposed organizations be perfected and operated, the farmers will have in their hands an instrument that will be capable of dangerous abuse. We are told that it will be possible to pervert it to arbitrary and oppressive price-fixing from its legitimate use of ordering and stabilizing the flow of farm products to the market, to the mutual benefit of producer and consumer. I have no apprehensions on this point.

In the first place, a loose organization, such as any union of farmers must be at best, cannot be so arbitrarily and promptly controlled as a great corporation. The one is a lumbering democracy and the other an agile autocracy. In the second place, with all possible power of organization, the farmers cannot succeed to any great extent, or for any considerable length of time, in fixing prices. The great law of supply and demand works in various and surprising ways, to the undoing of the best laid plans that attempt to foil it. In the third place, their power will avail the farmers nothing if it be abused. In our time and country power is of value to its possessor only so long as it is not abused. It is fair to say that I have seen no signs in responsible quarters of a disposition to dictate prices. There seems, on the contrary, to be a commonly beneficial purpose to realize a stability that will give an orderly and abundant flow of farm products to the consumer and ensure reasonable and dependable returns to the producer.

In view of the supreme importance to the national well-being of a prosperous and contented agricultural population, we should be prepared to go a long way in assisting the farmers to get an equitable share of the wealth they produce, through the inauguration of reforms that will procure a continuous and increasing stream of farm products. They are far from getting a fair share now. Considering his capital and the long hours of labor put in by the average farmer and his family, he is remunerated less than any other occupational class, with the possible exception of teachers, religious and lay. Though we know that the present general distress of the farmers is exceptional and is linked with the inevitable economic readjustment following the war, it must be remembered that, although representing one-third of the industrial product and half the total population of the nation, the rural communities ordinarily enjoy but a fifth to a quarter of the net annual national gain. Notwithstanding the taste of prosperity that the farmers had during the war, there is today a lower standard of living among the cotton farmers of the South than in any other pursuit in the country.

In conclusion, it seems to me that the farmers are chiefly striving for a generally beneficial integration of their business, of the same kind and character that other business enjoys. If it should be found on examination that the attainment of this end requires methods different from those which other activities have followed for the same purpose should we not sympathetically consider the plea for the right to co-operate, if only from our own enlightened self interest, in obtaining an abundant and steady flow of farm products?

In examining the agricultural situation with a view to its improvement, we shall be most helpful if we maintain a detached and judicial viewpoint, remembering that existing wrongs may be chiefly an accident of unsymmetrical economic growth instead of a creation of malevolent design and conspiracy. We Americans are prone, as Professor David Friday well says in his admirable book, "Profits, Wages and Prices," to seek a "criminal intent behind every difficult and undesirable economic situation." I can positively assert from my contact with men of large affairs, including bankers, that, as a whole, they are endeavoring to fulfill as they see them the obligations that go with their power. Preoccupied with the grave problems and heavy tasks of their own immediate affairs, they have not turned their thoughtful personal attention or their constructive abilities to the deficiencies of agricultural business organization. Agriculture, it may be said, suffers from their preoccupation and neglect rather than from any purposeful exploitation by them. They ought now to begin to respond to the farmers' difficulties, which they must realize are their own.

On the other hand, my contacts with the farmers have filled me with respect for them—for their sanity, their patience, their balance. Within the last year, and particularly at a meeting called by the Kansas State Board of Agriculture and at another called by the Committee of Seventeen, I have met many of the leaders of the new farm movement, and I testify in all sincerity that they are endeavoring to deal with their problems, not as promoters of a narrow class interest, not as exploiters of the hapless consumer, not as merciless monopolists, but as honest men bent on the improvement of the common weal.

We can and must meet such men and such a cause half way. Their business is our business—the nation's business.

Something to Think About

By F. A. WALKER

UNIFORM CIVILITY

TO BID welcome to the world when everything seems to be going against you, is to exhibit the right sort of courage and to show yourself capable of overriding difficulties.

Though firebrands may be thrown across your pathway and backbiting tongues assail you, if you still remain amiable and courteous, you will emerge from the ordeal unscathed.

* * *

Civility and all that it implies gives you the staying strength to surmount obstacles and to press forward in all kinds of weather.

Scowls, frowns and short answers very frequently make of the talented and gifted, sorrowful toilers, while, on the other hand, urbanity and suavity elevate men and women of moderate attainments to power and affluence.

Civility commends itself to people who know not its name, but recognize it when they see it. The crabbed old boor and the proud youth are now and again arrested by its soft answer and smiling face, and even the rude vagabond will stop a moment when it crosses his path and stare at it in open-eyed wonderment.

In some subtle way civility touches hearts and knits mankind closer together, yet, despite this fact, it has a long way to go and a great deal of hard work to do before it can overtake the masses and make them understand its true worth.

To those who are just starting careers, and especially to the young, good manners are as essential to their success as good commendations.

Indeed, politeness may be said to be the better thing of the two, for the reason that it builds character, and makes it imposing in the eyes of others.

* * *

There is no time in one's life that courtesy of behavior in the treatment of others fails to win recognition.

The employee who is uniformly civil, considerate of his or her employer, and thoughtful of associates as well, is usually the first to win promotion.

If you will think back, study cause and effect, you will find as you reflect that the greater number of failures in life had their beginning in incivility, and that those who today are conspicuously successful in the arts, professions and industries were in their beginning, and are now, habitually courteous in words and acts.

The Friendly Path

By WALTER I. ROBINSON

SELFISHNESS

THINK of your tasks and not of yourself.

Most of those who find their daily work monotonous and imagine they could get much greater enjoyment out of other employment would not be likely to make any greater headway or find greater pleasure in doing any other job under the sun, unless they first had a change in their own viewpoint.

Usually it is not what one may be doing, but the spirit in which it is done which makes work pleasant or undesirable. When people are constantly thinking of self and placing themselves above the importance of the duty at hand, the task will seem distasteful and inconsequential, regardless of how much its successful accomplishment means to the world.

The story is told of a school teacher who hated her work and was extremely anxious to become a nurse. She complained that there was nothing to her life but a mile-long trip between two ugly fences twice a day and the intervening hours spent in teaching the same monotonous lessons over and over again. So she thought it would be so very lovely to don a white cap and apron and devote the remainder of her life to caring for the sick.

Fortunately she stated her opinion to a clear-headed and broad-minded physician and asked him to aid her in finding employment as a student in a hospital. When this man heard why she wished to give up teaching as a profession, he kindly told her that she was temperamentally unfitted to be a nurse, for nursing meant extreme self-sacrifice. If she thought so much of herself that she couldn't find enjoyment in the work of making good and able Americans through teaching, due to her constant thoughts of self, he contended that she would have even a smaller chance of getting enjoyment out of the nursing profession, which demanded more devotion to others' welfare.

The young woman was intelligent enough to know that what the physician told her was true. Hour after hour she battled with herself to get the right viewpoint, and finally she won her battle over selfishness. Then her work became enjoyable and she did it so well that its influence for good was reflected in her life and her smiles.

No work will make one happy if he thinks more of himself than his job.

KIDDIES SIX

By Will M. Maupin

AT EVENTIDE

TWO little shoes, run-down and worn,
Tossed in the corner over there;
Two little stockings, soiled and torn,
Lying beneath the rocking chair.
One little sweater, one little cap,
Little knee pants, a shirt once white—
All in a heap, and in my lap
One little lad, his eyes shut tight.

Two little arms that 'round me twine;
Two sturdy legs worn out with play;
One little heart that beats 'gainst mine,
Full of joy at the close of day.
One little nightie donned at last,
Ready the lad for slumber deep;
One more day with its joytime past—
One little moment—then asleep.

Sleep, little boy, till the morning breaks;
Dreamless sleep till the stars shall fade,
And the rising sun ev'ry songbird wakes
And music rings in the leafy glade.
Sleep, little boy, and watch the ward
O'er thy cot may the angels keep.
Safe in the arms of the children's Lord—
Sleep, little laddie—sleep, sleep, sleep!

SCHOOL DAYS

Uncommon Sense

By JOHN BLAKE

ONE JOB IS ENOUGH

A YOUNG reader has asked us if he can study law and the violin at the same time. He can. He also asks if he can be a great lawyer and a great violinist. He cannot.

A man who wants to be a great lawyer is not going to have time to master any musical instrument more complicated than the penny whistle.

The law requires time and thought. The violin requires time and practice.

Kubelik spent about eight hours a day with his fiddle. At the end of that eight hours his tired brain would refuse admission to a single page of Blackstone, even were his fingers not too weary to hold the book.

No boy should study the violin with a view to making it a profession unless his talent is such that he never could be contented with anything else.

Of all the instruments in the world it is the hardest to master, and none but geniuses ever can prosper as well by playing it as can any fairly successful lawyer by following his profession.

A very great illustrator, known to the writer, discovered when he was twenty-one years old that he would have to stop trying to be a concert singer.

He had a good voice and good musical ability. But he found that cultivating one or either of these would take the time he needed for the study of drawing. Because he quit the music he became rich and famous.

Had he kept at it he might have become a choir singer, or sung small parts in musical pieces. But he never would have got any further—a fact he found out before it was too late.

Very few men can do any two things very well. Nobody ever born can do two things supremely well. Music is a fine accomplishment and brings much pleasure to people in other lines of endeavor if they follow it with moderation. But only musical geniuses should specialize in it.

OPAL

By JACK LAWTON

Copyright, 1922, Western Newspaper Union.

"I wish," said Terry glancing smilingly down his cigar, "that you could meet Opal and give her a lesson."

"If she is the champion little heartbreaker that you describe," his friend replied, "I'm afraid I'd be taking the lesson instead of giving it. I'm not invulnerable, Terry."

"Well, you're at least a lady killer," Terry retorted. "All the fellows in college conceded that, and Opal is altogether too indifferent to the pain she inflicts. It is evident that I have been one of her victims—and am eager for retaliation, which, I, myself, cannot give. The girl laughs at my sufferings, for there is no denying that I still care. Great guns! but she did lead me a merry dance—and I enjoyed it; it only ended too briefly." Terry sighed. "Some jolt!" he exclaimed, "when that new Travers fellow came along."

"Pretty girl?" asked the friend Thomas Campbell.

"Pretty?" Terry considered. "Well, I don't know. Of course as howlingly in love as I am, I ought to rave over her beauty."

"Willing to believe all you say," Thomas agreed doubtfully, "and I'll turn on my fascination. Lead me to the young lady."

Terry hesitated. "It's rash I am," he said forlornly. "But my case sure can't be worsted, so go in and win. But when you have won—I beg of you—snub the girl hard. Don't yield like the rest of us."

It was Terry's married sister who did finally bring about the meeting which ended unexpectedly for all. She was giving a party in her suburban home, and Terry and Thomas, Opal Reid and others were guests. Thomas had watched expectantly the dancing throng, where Terry, the broken-hearted, was also disporting cheerfully. In turn, Thomas decided that first this pretty girl, and then that, must be the dangerous Opal; at last in despair he went to his hostess.

"Terry wanted me to meet Miss Opal Reid," he said, "but he's too busy enjoying himself to present me. Will you tell where I may find her?"

Mrs. Moore smiled. "Of course you would want to meet her," she said, "they all do. Well, I'll tell you a romantic way; she is out in the lantern-lit garden, away back under the arbor tree. You may tell her that I sent you with a wrap, if you choose." "Here," finished Mrs. Moore, "is the wrap." She slipped a scarf from her shoulders.

The silent garden was a fairyland bower. Thomas stepped lightly across grass and into the arbor. A white-clad figure awaited him. He presented the scarf with his explanation, and the little blue-eyed girl allowed him to drape it about her shoulders. Then she sat down on the circular bench, and Thomas sat down, too.

Miss Reid did respond in friendly conversation. But she was, as Terry had said, unusual.

He found himself watching for the fleeting smile that showed a fetching laughing dimple; a dimple much in contrast to the gravity of the shy blue eyes. She certainly was all unconscious of her attractiveness—this sweet little Miss Reid.

But Thomas forgot the party. Forgot that he was expected to take Miss Sturtevant in to supper—forgot indeed that such an institution as refreshment existed; he wanted only to tell the interested young woman at his side, of all past and present experiences which concerned himself. The motor trip through the mountains, the business deal which he had landed skillfully, the lonely fishing cabin where he thought out things and wrote in a shabby diary, he promised eagerly that he would show her the diary.

The hours were slipping, but Thomas was not tired—neither was his listener.

"I must see you tomorrow," he insisted at parting, and Miss Reid agreed that he must.

Thomas drew up suddenly on his homeward walk. He recollected that he had not gone into Mrs. Moore's home to make his adieus. He reflected that Terry had exacted of him that Opal Reid was to be snubbed hard.

Thomas swung about and retraced his steps. The little white figure was still in the arbor. Miss Reid jumped up at his approach.

"I didn't feel like going gack to the rest of them—after you," she explained confusedly.

"I love you," he said recklessly, "I admit it. It was love at first sight, and I shall never care about anything else in the world again, but yourself. And if you are going to treat me as you have your other victims, Opal Reid, then I'd better say good-by right here—and now."

The white figure came close to him, the grave eyes were reproachful, but the dimple danced.

"Why Tom, the conquerer!" laughed Nancy Reid, "I do believe that you've been taking me for my flirtatious sister. You—are the very first victim I ever had in my life."

Lightweight Citizen.

"Just to look at Mr. Pompleigh, you'd think the world couldn't wag without him."

"Maybe so," said Mr. Grumpson, "but after hearing him talk for five minutes you'd realize that he wouldn't be indispensable to a town of only 500 inhabitants."—Birmingham Age-Herald.

WRIGLEY'S

AFTER EVERY MEAL

Select your food wisely, chew it well, and—use WRIGLEY'S after *every* meal.

Your stomach will thank you.

It is both a benefit and a treat—good, and *good for you.*

And, best of all, the cost is small.

Sugar jacket "melts in your mouth" and gum center remains to give you all the usual Wrigley's benefits.

MOTHER'S COOK BOOK

by Nellie Maxwell

"Don't bring worries to the table,
Don't bring anger, hate or scowls;
Banish everything unpleasant,
Talk and eat with smiling jowls.
It will aid your own digestion,
If you wear a smiling face;
It will jolly up the others,
If you only set the pace.
Knowing something funny, tell it;
Something sad, forget to knell it
Something hateful, quick dispel it
At the table."

GOOD THINGS WE ALL ENJOY

CHICKEN cooked as a pot roast is much superior to the ordinary fried dish, as it is moist and juicy. Cut it up as for frying, place in a tight kettle with a little fat, stir until hot, add a very little water to keep it from burning and cook closely covered. Usually no more water will be needed, but add very little, a tablespoonful or two at a time. Season and cook very slowly for two or three hours. Longer is better.

Fruit Salad.

Place halves of stewed pears on crisp lettuce leaves. Remove the pits from white cherries and arrange around the pears. Serve with cooked salad dressing.

Potato Soup.

Boil four medium-sized potatoes in salted water and when soft put through a ricer. Slice one onion and scald with one quart of milk. Remove the onion. Add the milk to the potato, season with a teaspoonful of salt, one-fourth of a teaspoonful of celery seed, two teaspoonfuls of chopped parsley and a dash of white pepper. Melt three tablespoonfuls of fat in a saucepan, add two tablespoonfuls of flour and when well cooked, stir in the milk and potato. Sprinkle with the parsley and serve.

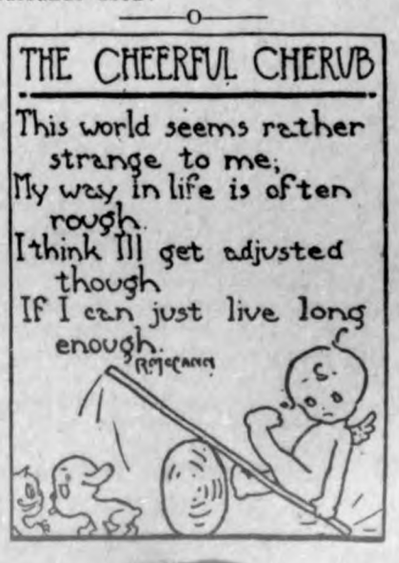
The Old Story.

Mrs. Wabash—I thought when I married you that you were original.

Mr. Wabash—And am I not?

"No; you're using the same excuses for staying out late that all my other husbands used!"



The honeymoon often ends with the groom's last quarter.

DYED HER SKIRT, DRESS, SWEATER AND DRAPERIES WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.—advertisement.

Keep a "secret" sorrow secret.

Unkind Supposition.

Jud Tunkins says the man who started the story about George Washington not being able to tell a falsehood was probably looking for some kind of an appointment under Washington's administration.

Cuticura Soothes Baby Rashes

That itch and burn, by hot baths of Cuticura Soap followed by gentle anointings of Cuticura Ointment. Nothing better, purer, sweeter, especially if a little of the fragrant Cuticura Talcum is dusted on at the finish. 25c each.—Advertisement.

It is usually the alimony a man has to pay that makes him figure in a divorce suit.

Growing Children

are often troubled with Feverishness, Constipation, Headache, Stomach troubles, Teething disorders and Worms. At such times thousands of Mothers use

MOTHER GRAY'S SWEET POWDERS for CHILDREN

and find they give certain relief. They tend to break up colds. Cleanse the stomach, act on the liver and bowels and give healthful sleep. Easy to give and pleasant to take.

Used by Mothers for over 30 years.

Do Not Accept Any Substitute for MOTHER GRAY'S SWEET POWDERS.

DAIRY FACTS

NECESSARY FOR DAIRY

ase of 7½ Per Cent Made on Missouri Farm by Feeding Cows on Silage.

man who is milking a herd of zen or more cows can ever hope ake maximum returns from his without a silo, according to E. armon, dairy extension specialist the Missouri College of Agricul- This statement was proved by Missouri Cow Testing associations g the past year, as shown in the wing results:

ws receiving silage produced an ge of 5,798 pounds of milk, 266.8 ds of fat and a profit above feed of $108.60 per cow. Cows with- silage averaged 5,189 pounds of , 252.7 pounds of fat and a profit 101.02 per cow. The difference 609 pounds of milk, 13.9 pounds t and $7.58 cents per cow in one

his means an increase of 7½ per in profit due to the silo. The rage man would go a long way to ket his wheat for 7½ per cent e. It is worth that much to build lo and we must have a lot more of n before we will reach the economy should in butterfat production.

G VALUE OF COW-TESTING

ne Convincing Comparisons of Best and Poorest Herd Brought Out by Expert.

epared by the United States Department of Agriculture.)

With figures from a Virginia cow- ting association as the basis for his culations a representative of the ited States Department of Agricul- e has made some convincing com- risons of the best herd and the poor- herd, that bring out with unusual phasis the value of testing.

There were 511 cows owned by mem- rs of the association. The best herd nsisted of 16 cows, with an average 306 pounds of butter fat in a year. e poorest herd had 91 cows, aver- ing 155 pounds of butter fat in a ar. The first herd made an average come of $75 per cow over the cost feed consumed; the latter made an erage return over feed cost of only cents per cow.

The introduction of a few variations these figures will help to show just w far apart were these cows in the o herds. The average cow in the st herd produced more income above

Good Sire Is the Beginning of a Good Herd; a Bad One Is the End of Any Herd.

he cost of feed than all of the 91 ows in the other herd. It would re- uire 117 cows like the average in the oor herd to equal in profit production ne of the cows in the top herd. To qual the herd of 16 good cows a armer would have to keep 1,872 ani- nals like the average cow in this poor erd.

COWS DURING COLD WEATHER

Few Pounds of Corn Chop Will Help to Provide Body Heat and Keep Up Milk Flow.

During cold weather, dairy cows should be fed a little more grain than during milder weather. A few pounds of corn chop each day during the coldest days will help to provide more body heat and enable the cow to keep up her milk flow even in the coldest weather. It is of course necessary that the cow have shelter and not be exposed to the cold winds. On real cold days a blanket will assist in keeping the cow comfortable.

COWS LIKE NICE WARM DRINK

Animals Will Not Consume Needed Amount of Water When It Is Bitterly Cold.

Do not permit your cows to drink ice water, is the admonition of E. A. Hanson, dairy extension specialist at University farm. "Cows will not drink the needed amount of water when it is cold," says Mr. Hanson. "If the stalls are not provided with water buckets, place a tank heater in your tank. It is far cheaper to heat the water with coal and corn cobs in the tank heater than with corn fed to the cows."

Winter Dairying Profitable.

Winter dairying is profitable with good care and good cows. Better test your cows, weighing the milk night and morning for a week or so, and using the Babcock test to find out how rich the milk is.

Will "Dry Off" in Hurry.

A cow that is in good condition will keep up her milk flow for a time even though she is under-fed; but gradually her system will be robbed of its surplus flesh, and she will "dry off" in a hurry.

EARLY CABBAGES NEED RICH SOIL

Start Seed in Hotbed in February and in Open Ground as Soon as Possible.

CULTURE OF RELATED CROPS

Cauliflower Thrives Best Under Irrigation, and Brussels Sprouts May Be Grown in Same Manner—Collards Are Tender.

(Prepared by the United States Department of Agriculture.)

When set in the spring, cabbage seed should be started in a hotbed or greenhouse in February and in the open ground as soon as the soil can be worked. For a late crop in the North, plant the seeds in a bed in the open ground in May or June, and transplant in the garden in July. Early cabbages require a rich, warm soil in order that they may mature early. For late cabbages, the soil should be heavier and more retentive of moisture and not so rich as for the early crop, as the heads are liable to burst. Cabbages should be set in rows 30 to 36 inches apart and 14 to 18 inches apart in the row. Early cabbages must be used soon after they have formed solid heads, as they will not keep during hot weather. They can, however, be used for making sauerkraut.

Cauliflower.

Cauliflower requires a rich, moist soil, and thrives best under irrigation. It will not withstand as much frost as cabbage. The culture is the same as for cabbage, and the heads begin to develop, after which the leaves may be tied together over the heads in order to exclude the light and keep the heads white.

Brussels Sprouts.

Brussels sprouts are closely related to cabbage and cauliflower, and may be grown in the same manner. Instead of a single head, brussels sprouts form a large number of small heads in the axis of the leaves. As the heads begin to crowd the leaves should be broken from the stem of the plant, to give them more room. A few leaves should be left at the top of the stem, where the new heads are being formed. Brussels sprouts are more hardy than cabbage, and in mild climates may remain in the open ground all winter, the heads being removed as desired. For winter use in cold localities, take up plants that are well laden with heads and set them close together in a pit, coldframe or cellar, with a little soil around the roots.

The uses of brussels sprouts are similar to those of cabbage, but they are considered of a superior flavor.

Collards.

The culture and uses of collards are the same as for cabbage and kale. Collards withstand the heat better than either cabbage or kale, and a type known as Georgia collards is

A Solid Head of Cabbage.

highly esteemed in the Southern states. Collards do not form a true head, but instead a loose rosette of leaves, which, when blanched, are very tender and of delicate flavor.

Kohl-Rabi.

Kohl-rabi belongs to the same class as cabbage and cauliflower, but presents a marked variation from either. The edible portion consists of the swollen stem of the plant. For an early crop, plant and cultivate the same as for early cabbage. For a late crop the seed may be sown in drills where the crop is grown and thinned to about eight inches apart in the row. The rows should be from 18 to 36 inches apart, according to the kind of cultivation employed. The fleshy stems should be used while they are young and quite tender.

PLANTING ONIONS IN GARDEN

Greater Part of Commercial Crop Is Grown From Seeds—Sets May Be Planted Early.

Onions may be grown either from sets or from seed. The greater part of the commercial onion crop is grown from seed, but the usual method of planting onions in the garden is by use of sets. One quart of sets will plant from 75 to 125 feet of row with the plants 4 inches apart in the row; this depends, however, upon the size of the sets. Onion sets should be placed in a small furrow, root-end downward, and covered to a depth of about 1½ inches unless the soil is extremely heavy, in which case they should not be covered so deeply. Onion sets may be planted just as early in the spring as the ground can be cultivated.—United States Department of Agriculture.

STAKE TOMATO PLANT TO OBTAIN QUALITY

Adapted to Every Garden, Whether Large or Small.

Plants Should Be Started Indoors and Gradually Hardened to Outside Conditions—Two Methods for Home Garden.

(Prepared by the United States Department of Agriculture.)

Tomatoes are adapted to growing in every garden, whether large or small. To have a supply early in the season, the seed should be sown under cover four to six weeks before the weather becomes warm outdoors, and the plants should be transplanted once or twice before setting them in the open ground. Two dozen plants can usually be purchased at the seed store cheaper than they can be grown. Pot-grown plants are usually the best if they can be secured.

Indoor plants should be gradually hardened to outside conditions. This can be done by placing the boxes or

Tomatoes Staked.

pots in which they are planted outdoors for several hours each day when the weather is warm. They may be left out all night when there is no danger of frost. Plants for the main or late crop can be started outdoors after the ground has become warm.

Two methods are in vogue for growing tomatoes in home gardens. In the small garden the plants may be set two feet apart in each direction and then pruned to a single stem and tied to stakes. Where plenty of land is available the plants may be set three to four feet apart and allowed to grow naturally upon the ground. It should be borne in mind, however, that by trimming and tying the plants to stakes a better quality of fruit is obtained, and that the fruit will ripen earlier than when they are not trimmed and trained. From twenty-five to fifty tomato plants will be sufficient for growing in the home garden, and this number should furnish plenty of tomatoes for summer use and for canning.—United States Department of Agriculture.

START OKRA IN BERRY BOXES

After All Danger of Frost Is Past Transplant Young Plants in the Open Garden.

Sow the seeds of okra in the open after the ground has become quite warm, or start the plants in berry boxes in a hotbed and transplant them to the garden after all danger of frost is past. The rows should be 4 feet apart for the dwarf sorts and 5 feet apart for the tall kinds, with the plants 2 feet apart in the row. Okra does best in rather rich land and requires frequent shallow cultivation until the plants cover the ground.

The young pods are the part used, and these are employed principally in soups, to which they impart a pleasant flavor and mucilaginous consistency. If the pods are removed from the plants and none allowed to ripen, the plants will continue to produce pods until killed by frost, but the best pods are grown on young plants. Okra pods can be dried or canned for winter use. —United States Department of Agriculture.

LIME BENEFITS CLAY SOILS

Application Has Effect of Pulverizing and Loosening, and Corrects Sourness.

An application of about 10 ordinary 10-quart pailfuls of hydrated or air-slaked lime to a plot of ground 30 by 60 feet in size will generally prove beneficial. Lime has the effect of loosening and pulverizing any heavy clay soil, and of binding loose, sandy soils. Lime also corrects any sourness in the soil due to lack of drainage, but in a case of this kind proper drainage should be secured. Lime should always be applied to the surface, and in no case should it be put on the land at the same time as commerical fertilizer. The proper method would be to spread the lime upon the land just after plowing and before harrowing; then apply the commercial fertilizer one week later. Under no circumstances should lime be mixed with commercial fertilizer or manure, as it liberates the nitrogen from them.

STANDS OFF A LOT OF DOCTOR BILLS

Recommends Pe-ru-na for Catarrh of the Stomach, Colds and Grip

"I have used Pe-ru-na for several years and can heartily recommend for catarrh of the stomach or entire system. I always get benefit from it for colds and grip. It stands off lots of doctor bills and makes one feel like a new person."

R. F. SUTTLES,
R. F. D. No. 3, Box 51, Waynesburg, Kentucky.

It is wise to keep a bottle of Pe-ru-na in the house for emergencies. Coughs and colds may usually be relieved by a few doses of Pe-ru-na taken in time. Nasal catarrh, indigestion, constipation, diarrhoea, rheumatism or other troubles due to a catarrhal condition of the mucous membranes all call for Pe-ru-na as the successful treatment. The health building, strength restoring qualities of this well known remedy are especially marked after a protracted sickness, the grip or Spanish Flu.

PE-RU-NA is justly proud of its record of fifty years as health protector for the whole family.

TABLETS OR LIQUID — SOLD EVERYWHERE

SPOHN'S DISTEMPER COMPOUND
is indispensable in treating
Influenza, Distemper, Coughs and Colds

so prevalent among horses and mules at this season of the year. For nearly thirty years "SPOHN'S" has been given to prevent these diseases, as well as to relieve and cure them. An occasional dose "conditions" your horse and keeps disease away. As a remedy for cases actually suffering, "SPOHN'S" is quick and certain. 60 cents and $1.20 per bottle at drug stores.

SPOHN MEDICAL COMPANY — GOSHEN, INDIANA

Trims Him.

"Trim little craft, that wife of yours, old man." "Craft? Well, she's a revenue cutter, anyway."

MOTHER, QUICK! GIVE CALIFORNIA FIG SYRUP FOR CHILD'S BOWELS

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, a teaspoonful will never fail to open the bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste from the tender, little bowels and gives you a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

MERELY MONKEYS, AFTER ALL

Scientists Unduly Agitated Over the Reported Discovery of New Human Race in India.

Recently there was announced the discovery of a new human race in the Himalaya mountains. They were the "abominable men of the snows," particularly hideous, haired ferocious beings, of whom an explorer had revealed traces.

Well, these abominable men, says the Petit Parisien, are no men at all, but big monkeys, already known by science. One of them can be seen in the galleries of the museum. To tell the truth this langur (such is its name) is stuffed, which, however, does not prevent its having been alive and its having come from the regions of the Himalayas, where its fellows are living in numerous troops.

This revelation, so unpleasant for the manufacturers of prodigious adventures, comes from Mr. Goodwin-Austin, who has given in La Nature the most complete details about this monkey of Tibet, which for a moment was promoted to the superior rank of man.—New York Tribune.

Hard Luck.

"I took my wife to the opera last night."

"Did she enjoy it?"

"She wanted me to demand my money back. Half the people whose names were on the program as boxholders were not there at all."—Exchange.

Slow Process.

"Does your wife practice economy?"

"Oh, yes, she practices it. But she doesn't seem to learn very fast!"—Judge.

ABSORBINE

will reduce inflamed, swollen Joints, Sprains, Bruises, Soft Bunches; Heals Boils, Poll Evil, Quitter, Fistula and infected sores quickly as it is a positive antiseptic and germicide. Smokestack Quickly Wrecked.

Five workmen recently brought a 148-foot smokestack to the ground in 55 minutes, by a new method. This stack, on Staten Island, N. Y., measured 47 feet in diameter at the base and weighed 350 tons. Three openings were made at the base, and wooden blocks, 4 feet high, 4 inches in diameter, were inserted as shorings. A gap, 4 feet high, was then made in more than half of the circumference by removing the bricks. Two of the shoring blocks were removed and the center block, soaked with kerosene, was burned out. The stack crashed with such force that some of the bricks were buried 2 feet in the ground, but most of them remained intact and can be used again.—Popular Mechanics Magazine.

Had the Chance, All Right.

"It's lucky dar wasn' no submarines when Noah sailed de ark," said Uncle Eben. "If dey wuz some o' dem wicked neighbors would have sent one out an' blowed up de intire animal kingdom."

On Her Dignity.

Sir Peter O'Brien, a lord chief justice of Ireland, was going as a commissioner of assizes on the Munster circuit, on which he had been for years a leader. A somewhat litigious female witness of the peasant class, with whom the chief just when practicing at the bar had been professionally acquainted, was giving evidence.

The chief justice interfered with a question, and commenced thus: "Now, Peggy, tell me ——" The witness, with a ludicrous expression of offended dignity, thus rebuked his lordship's familiarity of manner: "Mrs. Moriarty, Pether, if you plaze."

Explaining.

Getting in at 3 a. m. he wandered into the parlor.

His wife came to the head of the stairs.

"What are you doing up at this hour?" she demanded.

"Just considering having the house wired for wireless," was his happy thought.

Save the bird in hand—
The others may be hard to catch

With enough money, enough time and enough luck, a man may get back the health he has lost—or part of it.

It takes patience, too.

And then there may be no success, or only a little.

It's better to save what you have than hunt for what you've lost—as the most successful health-restorers will tell you.

Much of the loss of health is due to faulty, careless diet. Wrong meals at all times and right meals at wrong times load the long-suffering digestive organs with elements of destruction, or starve the tissues and glands of needed elements.

Grape-Nuts is a delicious cereal food which has the qualities of scientific nutrition. It supplies the full richness of those splendid food grains, wheat and malted barley, together with the vital mineral elements, so often lacking from foods. Served with cream or good milk, Grape-Nuts gives full nourishment without over-loading the stomach.

A splendid thought for breakfast or lunch, for those who would keep health—

Grape Nuts—the Body Builder

ABOUT KLEMME PEOPLE

Fred Lynch, of Belmond, was a business caller here Friday.

Mr. and Mrs. Walter Lau drove to Mason City last Friday.

Claude Thayer was up from Belmond Friday on business here.

Will Waddingham returned Tuesday from an out of town visit.

Patronize home industry, keep Klemme on the map.

Sheriff Peck Hanson came over on official business Monday.

Mrs. Tom Hake, of Belmond, was a Klemme visitor Monday afternoon.

FOR SALE—A 150 Egg Cypress Incubator, in excellent condition. Inquire at the Times Office. tfp

Mrs. Charles Luick and little son were passengers to Belmond last Friday.

Mr. and Mrs. J. Jorgenson came down from Garner last Thursday for a visit at the R. A. Jorgenson home.

Mrs. Ben Katter and children, of Garner, were Klemme visitors Friday.

Miss Arlene Ell was a week end visitor with Miss Lois Trafford at Belmond last week.

Will Trafford and family of Belmond were visitors at the E. G. Ell home last Friday evening.

A. D. Gimer and son Thomas were business callers at Garner Monday afternoon.

E. J. Salling is the owner of a new truck whihch he uses on his cream route for the local creamery.

Mr. and Mrs. Andrew Hanson of Kanawha were Klemme visitors on Friday last.

Mrs. Lloyd Cline and little boy of Gheen, Minnesota,, came last week for a visit with Klemme friends.

Mr. and Mrs. Brouwer were down from Garner Saturday for a vist with Klemme relatives.

Mrs. Ross Farmer, o Clarion, was a Klemme vistor Saturday. She is a sister of Mrs. LuVerne Smith.

Mrs. George Johnson, of Belmond was a Klemme vistor a couple of days this week.

Mr. and Mrs. Henry Wille were at Garner Tuesday for a vist with their daughter.

Tanlac now has the largest sale of any medicine in the world. There is a reason. E. S. D. Kahrs.

Mrs. W. F. Missman and son Byrnes, went to Belmond Monday evening to help Mrs. Missman's mother celebrate her birthday.

E. G. Ell and A. H. Yahnke made a business trip to Mankato, Minn., last Thursday and Friday. They drove through in Mr. Ell's car.

Mrs. W. F. Missman entertained the Dr. L. R. Parsons family of Belmond at a birthday supper last Wednesday evening.

Mrs. Henry Lewis went to Clear Lake last week Thursday and remained until Sunday, visitng at the home of her sister, Mrs. Brooks.

The High School students treated the Crystal Lake basket ball team to an oyster supper after the game last Friday evening.

Mrs. H. Glave entertained the Ladies of the Reform church last Wednesday at the home of Mrs. H. Buseman.

Mrs. F. Sandry, who has been quite sick, is improving nicely by this writing, which is pleasant news to her many friends.

Tanlac has made life worth living for millions of people who had almost given up hope. It will do the same for you. E. S. D. Kahrs.

Mrs. Hod Lawhorn came down from Garner Saturday for an over Sunday visit with Klemme relatives and friends.

Tony Bohler and Elmer Kienenberger came over from Goodell Monday to buy a span of mules from Mr. Bredbenner.

Mrs. Charles Luick and son, Lee, of near Ventura, were visintors at the home of Mrs. J. W. Brooks over Saturday. Charlie came in Sunday and took them home.

A number of neighbors gathered at the Art Knoke home Friday night and had a birthday surprise on Mrs. Knoke. Refreshments were served and a general good time was enjoyed by all.

If the ground hog had stayed in his hole Tuesday and Wednesday he might have gotten awful wet as we had a regular spring rain which then turned into sleet.

Will the party who took a map from the hardware department of Kluckhohn's store. by mistake, please return the same to the store as owner needs it. adv

No, the good people of Klemme did not have sore feet nor were they full of hootch on Tuesday and Wednesday. The sleet storm made the walks very slippery and navigatng was a regular out-door sport.

John Heginger and family have moved onto a farm and will now get their mail on Garner route three. Raymond White and family have moved into the Heginger hhouse in the north west part of town.

Keep Klemme dollars in Klemme; they will return to your pocket.

The scrap between the farmers and the Belmond Telephone Company at Belmond has been settled. The price remains $1.50 per month. with a discount of 25 cents per mo. if paid six months in advance. This makes the price $1.25 per month if paid in advance, which applies to the rural phones only.

"Tanlac made me feel younger." "It put me back on the payroll." "I can eat whatever I want now." "I no longer suffer from indigestion." "I gained weight rapidly." These and many more expressions are now heard daily as people tell of their experience with Tanlac. E. S. D. Kahrs.

The Ladies Aid Society of the M. E. Church held a farewell party on Mrs. Homer Butcher at the A. D. Gimer home Saturday evening. Mrs. Butcher was formerly their president. All report a good time.

Mr. and Mrs. Dan Palmby, of Owasa, Iowa. were Klemme visitors on Wednesday and Thursday of last week.

What might have terminated in a serious or fatal accident took place Monday. Albert Schmidt's two year old son walked out onto theh railroad track just as the train came along. Quick work by the engineer in applying the brakes brought the train to a stop a few feet from where the little fellow stood, not at all frightened.

Home Made Products

Dill Pickles, per dozen	40c

Still many good bargains on our 5 and 10c counter—look them over and take advantage.

J. P. Larsen & Sons

The Klemme Meat Market

The Telephone--

Once every five minutes our Store Phone rings; this is the average use we make of the phone during the busy part of each day, and a few of these calls are over the phone lines of other towns and other systems and because of this frequent outside talking we feel that we know something about the phone service of other towns.

And say—the more we talk over out-of-town systems, the better we like Our Home Town Phones.

The Koerner Telephone System is large, they ring nearly 400 families, this is a great help to the Business Men and Professional People of our city and helps us to give our community the best of Service and helps in no small measure to make your town and our town "Klemme, the Best Town on the Map."

We it know it to be a fact that the Koerner Hello Girls are more prompt and more obliging than most Central Girls. Prompt and obliging service makes talking a pleasure.

Lets be glad that our Community is so well served an dlets encourage Mr. Koerner to make the service still better.

The Telephone is a great saver of Time; the use of the 400 phones on the Klemme System probably saves more time than the labor of ten men could accomplish each day; and then just think what Phone Service means in case of sickness or accident, no doubt a few lives are saved in this community each year who would be lostwere it not for the good service of our phones.

Now just suppose we all got hostile and kicked out the Koerner Phone System, what would we have—Either a Farmers Company or a Big Outside Corporation, and judging from rates charged and service rendered in other towns we would be "stung" if either of these things came to pass.

Lets not jump from the frying pan into the fire, the Service and Rates of the Koerner Telephone Co. suit us fine.

eral services of the late Mrs. Brockway was held at the U. rch at Garner Tuesday after- t 2:30 o'clock. Services were ted by Rev. S. M. McConnell, nmouth, Illinois and former of the deceased.

Brockway was the widow of Brockway, who died some ago, and who was the first in this county and whom the residents of this community well.

LUICK—SMITH

A marriage which has been look- ed for to aake place for some time finally took place last Thursday, on February 23rd, at Mason City, Iowa, when Miss Marian Luick, daughter of Mr. and Mrs. L. L. Luick, of Bel- mond was united in marriage to Mr. LuVerne Smith, son of Mrs. Mille Smith of this city. The ceremony was performed at the parsonage of the Methodist church at Mason City. Rev. Wilkinson, the pastor, "tieing the knot" which bound these young people together in the Holy bonds of Matrimony. After a short wedd- ing trip the happy couple returned to Klemme Monday morning and im- mediately went to housekeeping in the rooms over Frank Gruetzmach- er's store, which they had prepared. Both of the young people are well known here and are popular with the young set of the town. The Bride is a very charming young lady and comes from one of Belmond's best families, and grew to womanhood in that locality. She possesses all those good qualities which go to making an ideal home maker and help mate. LuVerne is a graduate of ahe 1914 Class of the Belmond high school and is also a graduate of the C. C. C. College at Des Moines and is now, and has been for some time, employ- ed at the Wellemeyer Department Store of this city as a book keeper. The many Klemme friends of ahe young couple wish them all theh jops and happiness of married life.

DR. REUBER LOCATES AT SHEF- FIELD

Dr. R. N. Reuber, who has been associated here with Dr. Geo. Zinn for the past two years has gone to Sheffield, Iowa, where he will pract- ice medicine in the future.

Dr. Reuber is an energetic young man and made many friends during his stay here who will regret his leaving but he feels that he wanted to enaer a larger field for his work and Sheffield seemed to be a good opening for a young doctor.

Dr. and Mrs. Reuber are both ex- cellent young people and will be mis- sed from the social activities of this city, but what is destined to be a loss to this community will be a gain for Sheffield. We wish Dr. and Mrs. Reuber much success and also happi- ness in their new location.

IS CANDIDATE FOR SHERIFF

This week we are running the an- nouncement of William Vescelius, of Britt who is running for the office of sheriff. We know very little of the gentleman as we are not person- ally acquainted with him, but he has been marshall aa Britt at one time for a term of two years and has been a resident of thke county since 1898. He is also a veteran of the Spanish- American war. This is the first time he has seeked an elective office in the county. Peck Hanson of Garner is also running for sheriff and seeks a second term.

About This Time of Year

Activities of the Farm Bureau And Other Farm News

DUROC JERSEY MEN MEET

The second meeting of the pure bred Duroc Jersey breeders of Han- cock County was held at Garner, on February 25th. The county organ- ization was completed, and plans for the Pure Bred Sow and Litter Club were formulated. Twenty-five ap- plications have already been made for the pig club, and prospects are good for one of the most interesting clubs that has been promoted by this county. The association pledged ap- proximately $100 as cash prizes for this club. Every Duroc Jersey breed- er is behind this movement and is willing to give the boys some help.

By-laws were adopted for the or- ganization, and a membership fee of $5.00 per year was established. The breeders who have joined this new organization are Ray Durant, Garn- er; W. M. Kester, Garner; Christian Rasmussen, Garner; Chas. Steiner, Britt; A. M. Rosendahl, Garner; B. Hood, Goodell; F. H. Schuldt, Good- ell; Emil Lau. Klemme; J. G. An- derson, Garner; L. B. Oleson, For- est City. There are a number of other pure bred breeders in the coun- ty who no doubt will join and help promote this organization and any wanting more iformation should get in touch with the President, Ray Durant, Garner; or the County A- gent.

DEMONSTRATION APIARIES ESTABLISHED

The Hancock County Farm Bur- eau, in co-operation with the Bee Keeping Department of the Iowa State College, established two dem- onstration apiaries in Hancock coun- ty The first meetings were held February 21st. One apiary was es- tablished at S. A. Barber's, west of Kanawha, and the other at A. L. Irish's at Britt.

Mr. N. I. Lyle was here to make arrangements for the demonstration apiaries and to get them started. The purpose of the demonstration apiaries is to prove that the methods advocated by the Extension service will make more pounds of honey as compared with the other bees of the owners which are handled by their own particular methods.

Five colonies are managed by the state specialists and the rest of the colonies in the apiary are handled by the owner. Five visits will be made to these demonstrations. Meetings will be held in connection with each visit in order that tose interested may learn how they are taken care of. The colonies will be managed according to the best ideas of hand- ling bees on the farm for the most efficient honey production. It is es- timated that this method has increas- ed te income for single colonies from three to sixteen dollars. The great- est increase last year was $18.50 per colony. While this locality does no' have a very large number of bee keep ers, there are a lot of farms that have a few colonies that should be better managed.

Te dates of these meetings will be announced a short time before each one so that those interested may at- tend.

ORCHARD AND POULTRY DEM- STRATIONS

The Hancock County Farm Bur- eau will conduct six Orchard and Poultry demonstrations on March 9, 10, and 11. Two specialists will be here from the Extension Department, one for the orchard work and one for the poultry work, including the spraying, pruning, management, and will also discuss the varieties and starting new orchards.

The poultry man will take up all lines of poultry work, feeding and management, diseases, and take up a general discussion of any questions that may be asked.

The demonstrations will be held at the following places:—

Thursday, March 9th:
Garfield Township, 10:00 A. M. County Home.
Ell township, 1:30 P. M., Oscar Swanson, Klemme.

Friday, March 10:
Boone township, 10:00 A. M. Man- dus Christensen, Britt.
Magor township, 1:30 P. M., L. W. Escher, Corwith.

Saturday, March 11:
Britt township, 10:00 A. M., E. A. Fischer. Britt.
Madison township, 1:30 P. M., E. E. Bonar, Forest City.

Did Your Neighbor Move? This List Tells His New Location

KLEMME'S "BOY PROBLEM"

Practically every town has a so called "boy problem," or at least some of them think they have and Klemme is no exception to the rule.

Where it is thought there is a "boy problem" it can usually be traced to the fact that there is really no "boy problem" present at all but imply a lack of proper gathering places where the boys can amuse themselves in a better way. It is a "man's" problem; the boys will take care of themselves if given the prop- er surroundings.

Now, there are a certain few, who show themselves to be narrow mind- ed, who have been circulating petit- ions against this thing, and that in this town of Klemme.

Now it may be that the young men of the town should not frequent this kind of place of amusement, but in- stead of going around and knocking why do't these men take a broader minded view of the cituation here in Klemme and if they do not want the young men to spend their idle time evenings at these places they ca do much better work by spending as much time boosting and soliciting funds for a Y. M. C. A., a communi- ty hall, a library and reading room, a gymnasium, etc. There would be some sense to that. Men, bury your hammer, quit knocking on what we do have, get in the harness and if you want to see a better town boost for something better.

Just ask yourself this question: "What has Klemme done to furnish healthful and uplifting amusement to the young men and women of this community this winter?"

Are you bettering it any?

—T—

MESERVEY MAN INVENTS DEVICE FOR MAIL SERVICE

MESERVEY, March 1.—M. N. Smith, carrier of route 1 here, has received a patent on a receptacle to be put in mail boxes in which to deposit letters, coins, stamps, etc. The invention will be a boon for rur- a, carriers in northern climates es- pecially.

All mail left for collection by pa- trons can be lifted to the carrier's satchel, released by a spring, and save taking off mittens to pick up the contents of the mail boxes. The department at Washington has com- plimented Mr. Smith on his simple device and steps will be taken in the near future to manufacture and put the device on the market.

No doubt in time all the rural mail boxes will be equipped with the de- vice as they can be placed at the disposal of the patrons at a nominal sum. The patrons as well as the carriers will see at once the advan- tage of placing all the stamps, coin, letters, etc., intact in the device un- til the mail is collected or delivered as thke case may be.

BIG FIGHT ON "GERMAN" AS NAME OF TOWNSHIP

GARNER, Feb. 27.—Red-hot ar- guments are on and a fight to a fin- ish is scheduled between Legionaires of this, Hancock county, and res- dents of German blood of Liberty township over the move to chang the name of the township from "Lib erty" back to "German." The town ship was named "German" before the war. During the war the name "Liberty" was taken. Now 87 of the 102 male voters in the townshi have signed a petition filed with the board of supervisors asking that the old name be returned. All of the county's Legion posts,Garner, Britt, Crystal Lake, Corwith, Kanawha and Goodell, have adopted resolutions of protest.

Hearing set by the board for April 17.—Mason City Globe-Gazette.

COUNTY TEACHERS' MEETING

A County Teachers' meeting will be held at the High School building in Garner, March 4, 1922. A spendid meeting was held at Britt, Jan. 21. More than one hundred teachers were in attendance. This will be the last county meeting of the school year. A teacher's professional spir- it and interest in her work is largely determined by her attitude toward educational meetings. Grade and rural teachers, and students in high school normal training classes are earnestly requested to be present.

WHERE THEY ARE MOVING TO

It is rather a hard matter to find where everybody are moving to this year as there are so many canges and we hardly know where to begin first. The following will perhaps be quite a correct list and if we have missed any we will be glad to have our read- ers give us the correct changes:

Ed. Ell and family moved out of their home and left for Mankato, Minnesota, A. D. Gimer moved into the Ell house, John Sanderfelt came in from the farm and moved into the ouse vacated by Gimer and Jon's son moved on the farm. That completes one cirle.

Paul Grange moved out of the former Trafford house now owned by Chris Mayne who moved up fro Twin Lake twnship. Grange moved into Tom Nelson's ouse and Tom then moved ito the Henry Schlicting place and the latter mved onto a farm near Mason City. Second circle complete.

John Heginger moved on a farm and Ray White and family moved in his house, coming from Forest City.

Fred Sclichting moved on the Hen- ry Ludeke place near ton wich he bought and Henry moved some time ago onto his new farm where he had put up new buildings. Lester Stille moves into the Schlichting house and Harve Stille moves on the farm va- cated by Lester..

LuVerne Smith has moved into the rooms over Gruetzmachers store.

Dr. Reuber has moved to Shehf- field but nobody has yet moved into the rooms vacated by him in the Mrs. Leo Wilkins house.

August Baack has moved into the rooms over their new building, hav- ing rented his house to a Mr. Jen- sens from Clarion.

Elmer Fuller will move to Garner and R. W. Elder family will move in- o the house vacated by them, W. C. Schmidt will move in from the fram and live in the Elder house and Mr. Schmidt's son will remain on the farm.

John Spitler and wife are moved to Belmond on a farm and William Keraus and family will move into their house here, and C. F. Keraus will occupy the house that Billy va- cates.

Homer Butcher and family having moved to Wisconsin the hou vacated has been rented Stille who comes in from the fa

Thhat about completes the mov- ing around here in town.

There are a great many changes in the country also but we did not get but a few of the changes.

Alfred Merkel moves onto the farm formerly occupied by Mr. Pan- hoff, the latter goes on the farm that E. C. Buentenbach was on and he goes on the Sanderfelt place.

Clint Mann, who was on the Wiles farm went to Boone, Iowa and one of the Merkel boys will go o that farm.

Bert Dutton moved to Minnesota and Ed Bachman moved onto the farm vacated by him.

Mr. Treese moves on to the Henry Church farm, as also does Burr Church. Mrs. Treese is a daughter of Henry Church and Burr is a son.

There are, of course, many other changes but they are hard to get at this time, but the above will perhaps elp you locate your neighbor.

—T—

37 GET 8th GRADE CERTIFICATE

Out of 235 eighth grade pupils who wrote the state examinations in Hancock county, 37 have been grant- ed diplomas whch enttle them to free tuiton n any accredted hgh school n the state. Only a comparative fefw wrote on all the subjects as they have another chance in May. The early examination s gven to al- low ambitous boys, who must quit school in March, a chance to get the required certifcate to continue their studies n a high school.

—T—

KENYON TO BECOME JUDGE THIS WEEK

ST. LOUIS, Mo., Mar. 1.—William S. Kenyon of Fort Dodge, Iowa, who recently resigned from the United States senate to accept appointment as a judge of the United States cir- cuit court of appeals, Eighth District arrived here today. He will proba- bly be conducted into the judgeship here the middle of the week.

Mexia Typical Mushroom City

Texas Town Grows From Sleepy Place of 3,000 to 30,000 Inhabitants Over Night.

OIL BOOM IS RESPONSIBLE

Hundreds Are Forced to Sleep Out-Doors and There Is but One Bathhouse in the Place—Prices Are High.

Mexia, Texas.—Mexia, which has come into so much notoriety through the sending of state troops here to put an end to outlawry, the sale of illicit booze and restore order, is a typical mushroom city.

Overnight a tented city arose. From an apparently sleepy little town of 3,000 population in October, 1921, where old settlers farmed for a living and eked out a bare existence from their lands to a bustling city of 30,000 people, and all in a few months, this is the recent record of Mexia, an old-time Texas town, which is feeling the effects of one of the numerous oil developments in the Southwest.

The population now consists of an assortment of oil field followers and thousands of men and women seeking employment. Consequently because of the exhorbitant prices charged for a room, if one were lucky enough to secure one, hundreds of men, favored by the long continued mild winter, are sleeping on the grass along railroad tracks, public parking places and, in fact, anywhere they can.

Beds in Tents Costly.

Overnight a bed in a tent marked "A place to flop" soared from 50 cents a night to $3. A night in a crude plank structure where one didn't know his bed-fellow or the hundreds of others in the single room cost $5.

Rail traffic jumped hundreds of per cent. There are two trunk lines, the Houston & Texas Central and the Trinity & Brazos Valley, leading through here, and passenger traffic is very heavy, while freight trains are frequently seen running three abreast, so heavy is the demand for oil machinery. One road is said to have spent $600,000 in enlarging its facilities.

The water situation is not altogether what could be desired. Getting a bath here is quite an experience, if indeed not a task. The old saying, "If you want to do something big—wash an elephant," certainly has found parallel in Mexia.

But One Bathhouse.

This luxury may be found, outside the woodland creeks, only in a downtown barber shop. The bathhouse is a stall in a wooden-floored, planked-in inclosure. The plain, pine planks are slippery, but the proprietors of the house have found that it is not necessary to maintain first-aid kits because the board floors are warped enough to allow the bather a foothold.

But as for oil. There are a solid six miles of new derricks, drillers, outfits, tents, wooden buildings and people where once there was the open prairie. A survey of all local lumber men shows that buildings completed or contracted for since October 1 total between $3,500,000 and $5,000,000.

Gambling and drinking halls filled with dancing girls are open every night, and one may buy openly "red" and "corn" whisky at 50 cents a drink. Fortunes are lost overnight at the dice and roulette tables.

FLOOD BENEFIT TO FARMERS

Water Left Fine Silt of Good Earth on Impoverished Lands in Washington.

Sedro Woolley, Wash.—A fine silt of very fertile earth layer from two to five inches deep was left on the inundated farm lands when the flooded Skagit river subsided to its regular channel.

The layer of silt had added great value to the valley lands, according to owners. The flood, which was the most extensive known here since the early homestead days, lasted from December 10 until the middle of January.

The rise of the river was attributed to torrential downpours in the foothills and mountains through which the Skagit flows. The heavy rain washed immense amounts of rich top soil from the hills into the flood and all this material was carried into the valley and deposited.

Long Ride on Wheels.

Sunbury, Pa.—To travel 900 miles to Florida on a bicycle without mishap was the experience of William Burell, aged sixteen, of Sunbury, whose parents received word recently that he had arrived safely. Young Burell is a mechanical genius and found no trouble in finding work at garages along the route. He will leave soon on the second leg of his journey to California. He intends to ride his wheel the whole way.

AMERICAN FOXES WILL BE RAISED IN GERMANY

Berlin.—American silver foxes and skunks will be cultivated on a large scale by a German stock company on a farm in the Austrian Tyrol, under the direction of Professor de Mill of the natural history department of the Munich university. In Germany, where the prices of the higher grade of furs have risen enormously in the last few months, a perfect specimen of silver fox costs 100,000 marks.

Love Mellows Prize Fighter

Girl Brings Desire for Education to Former Terror of the Boxing Ring.

IS SEEKING ANOTHER DEGREE

"Kid" Wedge, at 41, Enters Harvard Almost Penniless, to Obtain Ph.D. Degree—Left Lumber Camps to Be Pugilist.

Boston.—A story of great love, of a career of hard battles in the ring, and of a winning fight against tuberculosis came to light at Harvard university a few days ago when Frederick "Kid" Wedge, forty-one years old, of Arizona registered in the Harvard graduate school of education, where he is to study for his Ph. D. degree.

Fifteen years ago the name of "Kid" Wedge was one to be feared in the timber lands of the Middle West. For years he had fought in the rings of that region. At twenty he left the woods, where he worked with lumbering crews, and took up the fighting game for his profession. In the next six years he fought 68 battles and won 65 of them.

Romance Entered Life.

Then, when he was twenty-six, came his romance. He met the daughter of a Wisconsin doctor. She was a graduate of a Nebraska college, and far removed from Wedge's station in life, but they were married. Then he realized the great difference in their intellectual standards, so he gave up the ring to secure an education with the money he had earned as a prize-fighter. For six years he attended a preparatory school, where he did 12 years of elementary work to prepare for college.

He entered the University of Nebraska, but the war interrupted his work. He went to Camp Grant as a boxing instructor, and there another obstacle appeared. The doctors pronounced him an incurable victim of tuberculosis, with but six months to live. He went to El Paso, Tex., to begin a different battle, and in a year he was a well man.

Won Degree of A. B.

Then he entered the University of Arizona and finished the work he had begun at the University of Nebraska. He was given his degree of A. B. He was forty years old then, and became principal of the high schol at Benson, Ariz. That was the position he held until the end of last year, when he resigned to go East and continue his studies.

He made the trip of thousands of miles in freight cars and "on the rods." He started with $10 traveling expenses, and reached Cambridge with 65 cents in his pockets. When the next semester opens at Harvard, after the mid-year examinations, "Kid" Wedge, former boxer, former lumberman, former hobo, and former flying consumptive, will open up the books that will make him a doctor of philosophy.

BLINDNESS DECREASES IN U. S.

Cases Drop From 57,272 in 1910 to 52,617 in 1920, Say Census Figures.

Washington, D. C.—The number of blind persons in the United States decreased from 57,272 in 1910 to 52,617 in 1920, according to figures for the last census announced by the census bureau. The decrease was attributed in part to advanced methods for treatment in blindness and also to education of the public in preventing blindness.

FIND A NEW USE FOR PIGEONS

Forest Fire Fighters Find Them Efficient Assistants.

As Means of Quick Communication Between Ranger on Fire Line and Headquarters Carrier Pigeon Has No Equal.

(Prepared by the United States Department of Agriculture.)

The carrier pigeon has found a place for itself in the fire-fighting forces of the forest service. It demonstrated its worth this year in the Idaho national forest, and will be installed next year at all protective camps in that district. As a means of quick and certain communication between the ranger out on the fire line and headquarters, the carrier pigeon has no competition, reports from Idaho to the Department of Agriculture state.

One bird, after a preliminary course of training, was taken a rough trip by pack horse, kept overnight at its destination, and released the next day. This carrier was back at its coop, at headquarters, 30 minutes after it was released, having covered 18 miles, air line, and flown over a high mountain. Its mate equaled the performance. Another, released at dusk from the bottom of a canyon, rose abruptly, crossed two high ranges and was at its coop before dark. A third, carried in a back pack into high peaks of the Buckhorn country, flew home within an hour, covering in that time a good day's journey for a man on horseback.

In the face of fire, this performance was equaled. The ranger took two birds to the spot where smoke had been located. The first bird carried instructions to send help. Not long thereafter the fire-fighters at the front had brought the blaze under control. The second bird was released, countermanding the first order. It reached headquarters just as the summoned assistance was about to start for the fire, and the message it carried not only gave welcome assurance of victory over the red peril, but saved a number of men from making a long and tedious trip through the forest.

URGES BRITISH EMPIRE RADIO

Wireless Commission Advocates Building of Stations in Colonies and in China.

London.—The wireless telegraph commission has recommended to the government the construction of stations in England, Canada, Australia, South Africa, India, Egypt, East Africa, Singapore and Hongkong. A year was devoted to study of the question.

The average cost of the stations is estimated at not more than £160,000, normal value $800,000, but those in England, Egypt, Singapore and Hongkong would aggregate about £853,000, or $4,265,000. Recommendation is made that two wave lengths be fixed for each transmitting station, and that each center be equipped for receiving from several stations in the chain simultaneously.

NEWS REVIEW OF CURRENT EVENTS

Airship Roma, Bought in Italy, Is Destroyed With Loss of Thirty-Four Lives.

PROBABLY WAS DEFECTIVE

Senate Reservationists Busy With the Four-Power Treaty—Movement to Postpone Soldiers' Bonus Legislation—Irish Factions in Three Months' Truce.

By EDWARD W. PICKARD

THIRTY-FOUR more lives have been sacrificed to America's infatuation for foreign-built airships. If we must have these craft, is it not about time we relied on our own designers and constructors for them? Unless the information available at this writing is misleading, the disaster that befell the Roma near Hampton Roads last week will be found to be, in its causes, comparable to that of the ZR-2 in England last August. In both cases, apparently, there were vital defects in construction of which the builders were cognizant.

So far as investigation has revealed, the fall of the Roma was due to the breaking of the controls that regulated the altitude of the airship. Despite the heroic efforts of her navigators and the frantic casting overboard of all ballast by the crew, the huge balloon plunged downward from a height of about 400 feet. As she crashed against the ground she broke some high tension electric wires and at the same moment the big gasoline tanks burst. In the resulting explosion and fire most of the victims met a mercifully instant death. Even if the Roma had not struck the wires, say army air service officials, the men caught under the vessel's gas bag and steel frame would have burned to death, for the gasoline from the broken tanks would have ignited from the engines. This fact may avert possible blame for the using of ordinary field gas in the Roma instead of the noninflammable helium gas, developed by the air service. All the helium in the country was in the Roma's bag when she was given a trial trip late in December, but as this was wanted for a contemplated long tour over the country next summer, it was drawn out and the ordinary gas substituted.

Although General Mitchell, head of the United States air service, now in Berlin, says the Roma was perfect, there is reason to believe that he is mistaken. Last summer Kenneth L. Roberts witnessed a demonstration flight of the balloon in Italy shortly after she had been sold to America, and he wrote for the Saturday Evening Post a story of that flight in which he brought out these points: That the gas bags were old and leaky; that the Italians wanted a calm day for the trip; that they refused to sail the ship over Mount Vesuvius, apparently fearing the heat of the crater; that they preferred sailing over the ocean, the air being more quiet there; that the ship reared, bucked, jumped, and was buffeted about like a feather in a cyclone; that the ship had a tendency to nose downward at a high rate of speed.

It may be this new disaster will result in the cancellation of the order for a Zeppelin for America to be built in Germany. General Mitchell says this craft is not under way, "because of the numerous difficulties between America, the entente and Germany. These difficulties center on whether America shall get the latest type or an old style. If America wants the latest, the entente must permit Germany to build airships, which the Versailles treaty forbids."

PRESIDENT HARDING informed the senate that he could not comply with its request for the records, minutes, conversations, etc., relating to the four-power treaty, because most of the conversations and discussions were quite outside the conference and were without record. He added: "I do not believe it to be compatible with public interests or consistent with the amenities of international negotiations to attempt to reveal information and confidential conversations or discussions of which no record was kept, or to submit tentative suggestions or informal proposals, without which the arrival at desirable international understandings would be rendered unlikely if not impossible."

Mr. Harding, however, emphatically assured the senate that there were no concealed understandings and no secret exchanges of notes. But the "irreconcilable" senators are not satisfied and insist that ratification must be hedged about with considerable reservation. Although President Harding adhered to his position that no reservation was necessary, the foreign relations committee was informed that he would not object to the one offered by Senator Brandegee if it was deemed best thus to facilitate ratification. This reservation reads:

"The United States understands that it assumes no obligation either legal or moral, to maintain the rights in relation to the insular possessions or insular dominions of any of the other high contracting parties and that the consent of the congress of the United States shall be necessary to any adjustments or understandings under articles one and two by which the United States is to be bound in any way, and that there is no obligation either legal or moral to give such consent."

Naturally, Senator Johnson of California was not satisfied even with this, and he offered another more drastic reservation. But the administration senators said the Brandegee resolution was as far as they would consent to go, and the "stalwarts," like Kellogg and New, didn't want to make any concessions at all. Then Senator Lodge, after conferring with the President, offered a substitute reservation safeguarding congressional authority over the use of armed force. This was not liked by the more radical members.

CONSIDERATION of a sales tax for financing the soldiers' bonus was given consideration by a subcommittee of the house ways and means committee, but no conclusions have been reached. Secretary of the Treasury Mellon was called on for further advice and said he still believes bonus legislation should be postponed, but that if a bill is to be passed he would prefer some form of tax as against the issuance of bonds. He said that a sales tax would mean 2,000 additional employees, but that it could be administered.

Petitions in opposition to a sales tax were circulated in the house last week and were signed by at least seventy members. It was asserted that fully one hundred could be counted on to vote against such a tax. Meanwhile a movement is gaining headway to postpone bonus legislation altogether until the newly appointed foreign debt commission has ascertained the chances for the payment of interest by foreign nations and decided concerning the funding of foreign debts into long term securities. A number of well known men have asked the National Republican club to oppose the granting of a federal bonus "to any soldier who cannot show a wound or who was not disabled in the service."

THE foreign debt commission mentioned above, as named by President Harding, is made up of Secretary of State Hughes, Secretary of the Treasury Mellon, Secretary of Commerce Hoover, Senator Reed Smoot of Utah and Representative Burton of Ohio. The fact that all five are Republicans has aroused the ire of the Democrats and the latter in the senate declared they would not vote for the confirmation of the appointments of Smoot and Burton.

NEW pay scales for the army, navy, marine corps, coast guard, coast and geodetic survey and public health service have been arranged by the joint congressional service pay commission and a bill providing for them ordered favorably reported to house and senate. For the fiscal year 1923 the new rate of pay for those six services will save the government about $13,000,000, and ultimately, it is estimated, the saving will be $28,000,000 annually. The proposed rate is below the present basis, which was fixed in 1920, but considerably above that established in 1908.

The house appropriations committee, in one of its economical spasms reduced the estimates of the Department of Commerce to the extent $3,080,891, and those of the Department of Labor by $1,227,712.

PREMIERS LLOYD GEORGE AND POINCARE met privately in France Sunday for the purpose of arranging the agenda for the Genoa conference on the economic and financial regeneration of Europe. There are reports that the conference may be postponed for several weeks. Of course the European nations are exceedingly desirous that the United States shall take part in the meeting, but this grows more unlikely as time passes. Secretary Hoover, in a Washington birthday address in Chicago, gave what might be considered an unofficial expression of the administration's views on this matter. Without becoming too specific, he made it plain that the United States could not be expected to lend assistance to the nations of Europe until they had worked out some of their present pressing problems, including "unbalanced budgets, overtaxed peoples, large armies and an unbearable debt, both domestic and external—all bearing their fruit of inflation and instability."

Mr. Hoover added: "We find ourselves much torn between an earnest desire to be of service and a rightful desire to keep ourselves free from matters to which we are not a party and which we cannot remedy; participation in which, nevertheless, would undermine our strength, our influence and our ability to render real service in the future."

TRUCE has been agreed upon by the quarreling Irish—Free State supporters on one side and republicans on the other. Ard Fheis, the convention of the Sinn Fein, on Wednesday adjourned for three months, at the end of which period the people of the island will be called on to vote on the constitution, and also on acceptance of the treaty with England. No election is to be held until after that referendum. Michael Collins announced he would resign the chairmanship of the provisional government if in the three months the opposition gained control of the Dail Eireann. His majority now is exceedingly slender. One thousand members of the Sinn Fein met with De Valera and formally organized the republican party, and plans were laid for a campaign in every county against the Free State and the proposed constitution.

THE resignation of Judge Kenesaw M. Landis from the federal bench of the northern Illinois district was cause for sincere regret, except perhaps on the part of baseball fans. Though often spectacular in method and speech, Judge Landis was always fearless, just and impeccably honest, and he had an uncanny ability to get at the truth and a commendable tendency to ignore unimportant technicalities. If these latter qualities were shared by the lesser judiciary in the region where Judge Landis has been exercising his activities there would be less cause to complain of the prevalence of crime there and of miscarriages of justice.

REPRESENTATIVES of 16 railway unions and of the United Mine Workers of America met in Chicago and entered into a defensive alliance, but there will be no sympathetic railroad strike on April 1, when the coal miners are expected to quit work. The agreement, moreover, does not become operative until it has been ratified by all the organizations. If any of the labor unions embraced in the agreement is made the victim of unwarranted attacks, or its integrity is jeopardized, ways and means will be considered any action to be approved by each of the 17 organizations. An executive committee, composer of the chief executives of all the unions, will make the necessary recommendations.

WHAT may develop into a new political party was born in Chicago last week when several hundred farmers, Socialists, union labor leaders and others started a movement for the election to congress of men and women of the working class. At present the participants in this movement are pledged to nonpartisan political action. Radicals of many types and degrees, were present at the conference but I. W. W.'s were not admitted.

omething to Think About

By F. A. WALKER

YES" AND "NO"

SE two little words, yes and with which men have been g for ages, are vocables of us meaning, capable of settling simple and complex problems when used with utmost wisdom ewise with utmost caution.

ashington, the statesmen who bating and adjusting the ques- f limited armament found lt at times to apply "yes" and o the interrogations which y arose in the discussion, and h the whole world is vitally in-

• • •

se these monosyllables at the me and in the proper place is nest wish of every fair-minded woman who would have "peace od-will on earth."

o do so in trtuh and mercy, ssension is rife and righteous- ems to be tumbling noisily like ns in an earthquake, requires dom of Solomon and the pa- f Job, accompanied with divine e.

many lives of promising young d women have been blighted ndiscriminate playing of "yes" "?

many nations have gone to war the utterance in anger of a "yes" when a complacent "no" tatively spoken, might have millions of precious lives, un- rrows and inestimable treas-

she who makes merry with small words without giving to the immensity of their pow- create or destroy, is risking ng in this life, and possibly life to come.

h these words may seem but mere pigmies in the world's vocabulary, they are really veritable giants, terrible in their wrath, but cheering, consoling and inspiring in their love.

* * *

It matters not how exalted or lowly you are, or whether you be rich or poor, strong or weak, you cannot at any time in your dealings with others afford to summon up "yes" or "no" without first giving serious thought of what may likely follow.

In all circumstances it will be found advisable to use neither word until you are absolutely sure of your ground and know your own heart.

Do that in all sincerity, and "yes" and "no" will be found faithful friends.

Uncommon Sense

By JOHN BLAKE

GLOOM IS CATCHING

EVEN though we are reasonably sure that the sun is still in the sky, a cloudy day depresses us. Most of us suffer from a feeling of foreboding even on a clear day, when a cloud comes between us and the distant fire that lights and warms the world.

We are similarly sensitive to all the little troubles of our lives—to anything that disturbs our regularly ordered existence.

A temporary illness—a suspicion that there are some kind of business breakers ahead—these things plunge us into gloom.

And we, in our turn, pass the gloom along. For our friends, seeing the black and foreboding faces that we wear, grow gloomy too.

One sullen-faced man in an office will sometimes spoil the day for the entire working force.

One croaker on board a ship in a storm may send the whole passenger list into something very like a panic.

Nobody loves a gloomy man—but everybody listens to him—and looks at him.

The prophet of evil is never without an audience.

Poe, in his remarkable poem shows how the raven, by croaking the word "nevermore" was able to drive a luckless poet almost to the verge of insanity.

Continual gloom is not good for the soul, any more than continual shadow would be good for the green and blossoming things upon the surface of the earth.

We all need sunshine and a great deal of it.

It is not necessary to go about continually telling people how happy we are, like Pollyanna, but we can at least keep our trouble to ourself, and not look as if we were limping along toward the grave or the gallows.

The gloomy man or woman in a home destroys the happiness of an entire family—and usually drives the children out on the streets, where at least there is air and sunshine, and maybe now and then a hurdy-gurdy.

The reason the jazz is popular, that the comic supplement sells by the million copies, and that the comedian gets a thousand dollars a week is because we will do anything to get rid of gloom.

It is a burden on life, a menace to human happiness. If you are a gloom addict, change your mode of thought. You are as much of a menace to the community in which you move as was "Typhoid Mary" to hers.

SCHOOL DAYS

KIDDIES SIX

By Will M. Maupin

THREE O' MINE

EYES-O'-BROWN and Sunny Hair,
And Dickey-Winktum-Wee,
Two beside my easy chair
And one upon my knee.
Thus the evenings come and go
Till Mr. Sandman's call
Sets three wee heads to nodding low
And tired eyelids fall.
"This is the way to Sleepytown—
Jump into bed and cuddle down!"

Eyes-o'-Brown wants "an'mal tales,"
Of bears and woolly things;
While Sunny Hair most loudly wails
For whirr of fairy wings.
But Dickey-Winktum-Wee just winks
His laughing eyes at me—
I wonder what the young man thinks
Perched there upon my knee?
"So sing hey ho for Sleepytown—
Jump into bed and cuddle down!"

"Once there was a big black bear"—
Two pairs of eyes grow bright;
Two forms press closer to my chair
As if to banish fright.
"And once there was a brave young boy"—
Then dimpled faces shine,
While I with fairy lore add joy
To those sweet tots of mine.
But Dickey-Winktum-Wee just crows
Till off to Sleepytown he goes.

"Now I lay me down to sleep"—
The good-night prayers are said.
The fleecy clouds of slumber creep
Above each little head.
Eyes-o'-Brown and Sunny Hair,
And Dickey-Winktum-Wee—
God guard and keep from ev'ry care
My little ones for me.
Safe in the shades of Sleepytown—
Tucked in bed and the light turned down.

Songs and Laws.

"Let me write the songs of a nation and I care not who makes the laws."

"Well, at that some of the songs have more sense to them than some of the laws."

THE COTTAGE GARDENER

RHUBARB ONE OF BEST PRODUCERS

Early Spring Vegetable Responds to Liberal Supply of Best Soil Available

PLANT IN OUT-OF-WAY PLACE

Along Garden Fence Where Roots Will Not Be Injured in Cultivation of Rest of Garden Is Good Location.

Rhubarb, or "pieplant," as it is sometimes called, cannot be grown universally, but is limited to certain definite sections. Information as to whether rhubarb will or will not grow in a given locality can be obtained from the local seedsmen or from neighbors who have had experience in growing it.

Rhubarb is propagated by planting pieces of the roots secured by dividing older hills, and six to ten hills will usually supply plenty of rhubarb for the average family, states the United States Department of Agriculture.

Rhubarb should be planted exactly the same way as asparagus, that is, the roots or crowns should be covered four or five inches in deeply spaded

Rhubarb a Generous Producer.

and well enriched soil; there is little danger of having the soil too rich for rhubarb. The hills should be three and a half to four feet apart, if more than one row is planted.

This wonderful staple of the family garden can generally be planted along the fence where it will be out of the way of cultivation.

The thick leaf stems are the part used, and none should be pulled from the plants the first year after seeding, but a large supply will be available the second season, and the hills will, as a rule, continue to produce satisfactory crops of stems for several years, after which they should be divided and reset.

Rhubarb should receive the same attention and treatment during winter as asparagus, and the plants should never be allowed to ripen and seed. The roots may be brought into the greenhouse, pit, coldframe, or cellar during the winter and forced.

By placing a barrel over a rhubarb plant much longer and tender stalks may be grown.

This is one plant that does not thrive in warm climates. It is most popular, especially in the sections where it is grown, in the early part of the spring.

The use of rhubarb is principally for making pies and sauces, and many housewives can the stems for winter use.

CHICKEN FENCE WIRE HANDY

Small Gardeners Will Find the Woven Two-Inch Mesh Valuable—Takes Place of Stakes.

Many vegetable and flowering vines can be successfully grown on chicken fence wire. In the fall the wire can be taken down and used for succeeding years for similar purposes. It will enable the small gardener to raise more vegetables and flowers than if they were allowed to lie on the ground and spread out over valuable space.

Cucumbers, lima and climbing string beans, nasturtiums and numerous other vegetables of spreading variety, as well as almost any vine-flowering plants can be successfully trained on the wire trellis permitting of the use of the ground space ordinarily covered by vines being used for something else. Give the vine plants plenty of air and sunshine, and water when needed, and they will give an excellent accounting of themselves on the wire.

TO GROW EARLY CABBAGE

Cabbage is one of the most desirable of our early green or leaf crops and should be included in every home garden. The seeds should be sown indoors and the plants set in the garden about the time that danger of frost is past, or a few plants can be purchased from the seed store. Cabbage requires a rich soil, and the plants of the smaller early sorts should be set 18 inches apart in each direction for hand cultivation. It is a good plan to pour a little water around the roots of each plant as it is being set in the garden.

TOOLS THE BUSY GARDENER NEEDS

Hoe, Rake and Spade, the Combination Soil Tillers Find Absolutely Necessary.

WHEEL HOE IS LABOR SAVER

Little Implement Suitable for Small or Large Garden; Trowels Are Handy; Spraying Outfits Are Essential.

With the first warm days of spring sounding the earth call, there is a hasty scurrying around for the tools of the gardening cult. A gardener can get along fairly well with four, a spade or spading fork, a hoe, a rake, and a trowel. It is even possible to get along without the last, but who wants to?

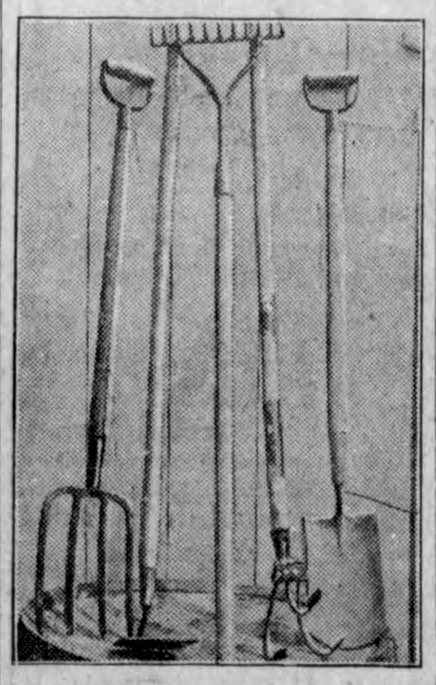
The art of gardening is reaching such a point of special development that there are tools for almost everything and the wise gardener by a careful selection will ease his work as much as possible by securing appropriate working implements.

The greatest labor saver for gardens of any extent is a little wheel hoe. This saves many a headache, does the work thoroughly, and has appliances for various purposes which are interchangeable from a little plow share to cultivators of various kinds. It can be used in the smallest garden.

There are numerous hoes of various types and designed for different purposes. The pointed hoe for making rows is a convenient tool. The hoe with rake teeth on the back of the blade is one of the very handiest all-around garden tools for light work there is. It is particularly well adapted for women gardeners. Three toothed cultivator hoes do a fine job of stirring the soil. Scuffle or shove hoes as they are sometimes called that can be pushed instead of pulled, permit hoeing rows which are too close to walk between conveniently.

Trowels of various shapes to suit various plants are now on the market, stiff, sharply angled small bladed trowels are ideal for splitting off pieces from perennials which have grown so large they need dividing for their best growth. They are fine to set under a recalcitrant carrot or parsnip whose leaves are so tender they part company from the root, leaving it in the ground.

Long bladed trowels are especially adapted for digging holes for gladiolus or other bulbs in the spring and tulips and fall bulbs later in the season and equally useful in digging them up.



Necessary Garden Tools.

There are little hand rakes which are just the thing for hand cultivation among plants which need special care and the earth kept stirred.

Sprinkling cans and sprays must be added to every well regulated garden outfit, especially a spray.

While looking over spraying outfits get in a supply of poison for the pests that devour and for the fungus that blights. The seedsman will tell you what to get. Bordeaux mixture for fungus pests, paris green or some other arsenical poison for those that eat the leaves, and a tobacco poison of some kind for plant lice are standard. Often they can be bought in combination.—National Garden Bureau.

FRESH VEGETABLES EVERY DAY

What is a back yard good for? It may be made to supply the average family with fresh vegetables through the growing season.

VALENTINE TRAIL

By RUBY DOUGLAS

©, 1922, by McClure Newspaper Syndicate.

"Oh, I'm so tired of lace paper hearts and Cupids made of chocolate, and boxes of violets that have been taken out of the ice-box! I almost wish there were no such day as Valentine's day."

The girl who made the remark had bobbed hair and a one-piece frock.

"What would you suggest, Jane?" asked her chum. "What is there left?"

Jane did not reply at once. "That's just it; I don't know what I want. All I know is that I don't want a lace paper heart!"

"Perhaps a real human heart, served up on a platter as in ancient barbaric days, would please you more, dear?"

"N—no. I think I just want to find some one original enough to give me something different," Jane explained.

The chum made audible signs of surprise. "Oh, Jane, you are funny, you, trying to get out of the conventional calf path!"

Neither of the girls knew that, as they sat talking thus over their little tabourette and tea table before the big log fire in the country club house a man had been sitting close by constantly reading a sporting paper.

"I think I'll be a sport myself," he concluded quickly. "I like that girl's voice. I like her looks. I think I'd like her philosophy."

Thereupon he set out to find out who she was, where she lived. He then set his brains to work to originate an idea for a valentine.

His mind had created a thought. "It depends on the snowfall, but I'm just sport enough to think that Cupid—though not of chocolate—will implore the gods to see that I have a snowy setting for February 14!"

Jane Hall lived in the community adjoining the country club at which she was having a tea the afternoon that Tom Hayes overheard her petulant remark about St. Valentine and his customs.

"The big idea," Tom decided, "is to let the girl guess who is her Valentine.

On the night of February 13 a wonderful carpet of white snow covered the ground.

Tom, feeling like a cut-throat or second-story operator, stole noiselessly through the virgin snow to the Halls' garden.

He had a garden trowel, a package of large red hearts cut from paper, some red fluid that looked like paint.

Underneath the window of Jane he dug out a heart-shaped hole and placed within it a great red paper heart. Then he walked on through the garden, dropping drops of red in the snow and every few feet adding another heart. The trail wended off down into the woods in the rear of the Hall home and disappeared into space.

"If she's anything of a sport she'll follow this trail, and it leads straight to my heart," he said triumphantly. "I'll make her notice me, anyway," he thought, by way of excusing himself.

When Jane put up her shades to look out at the weather on the morning of St. Valentine's day she rubbed her eyes to see if they told her the truth.

Her heart thumped wildly as she dressed and went out of doors without waking the family. She had put on her rubbers and sport clothes, so she followed the trail of hearts to the woods. At the end she found a note hung to the limb of a tree.

"If you want to find your Valentine play golf in the snow this afternoon. The red golf ball I have placed beneath the last heart in the trail. I'll be waiting for you at the seventh hole, and when I see the red ball driven from the sixth I shall know that you are on your way."

Jane did not know at first what to do. Her conversation with her chum, Grace, at the country club, came to her mind with the natural association of ideas. At first she accused Grace of the idea, and then she knew that Grace would never have had either the energy or the originality to think of it.

"I shall go, anyway," she decided.

After lunch she surprised the family by announcing that she was going to the club for a game of golf.

"You're nutty, sis," said her brother. And off she went to the golf course, the red ball hidden in her pocket. She kept her golf clubs in her locker.

Her cheeks were the color of the ball she was playing with when she reached the sixth hole and told her caddy to go on ahead of her.

As she approached the seventh hole across the wonderful white fairway that led to it she saw a man in golf clothes awaiting her. Her excitement almost choked her, her daring somewhat stunned her.

"I'm afraid I'm not as pretty as a lace heart," the man began, extending his hand and himself a little embarrassed as he looked into the beautiful eyes of Jane.

Jane would have blushed if she had not already gathered sufficient color to be becoming. "You—heard my silly conversation?"

He nodded. "Yes—and I know your name and mine is Hayes—Tom Hayes. Please let me be your valentine, Miss Jane.

Jane liked him; she knew she liked him. "All right; you shall begin by being my valentine and—"

"Leave the end to me," he said. "The game's the thing now."

A Car Load of

Seed Potatoes -

Just Arrived!

Rural New York-

A LATE WHITE POTATO. We wish our customers would get acquainted with this heavy yielding late potato.

Kings-

A vigorous growing, heavy yielding late variety. Skin reddish tint; flesh cooks to a beautiful white, and mealy. Shape round to oblong.

Red River Early Ohios

This stock is very fine, and in our opinion there is no better Seed Potato to be had.

Bliss Triumps-

Eagle Valley Triumps have a reputation in keeping with the great Potato District in which they are grown. We consider them the best strain of Triumps money can buy. Clean, fresh, plump, vigorous, fully matured stock that have strong, robust seed life.

Irish Cobblers-

As a variety the Irish Cobbler is one of the most prominent types. It reaches a stage of maturity earlier than most others.

Eating Potatoes-

WE ALSO CARRY A BIG STOCK OF GOOD EATING POTATOES—

G. W. Kluckhohn & Sons

Time To Paint And Paper--

House cleaning time is close at hand, or you will want to clean up after moving into the new house. Come in and look over our brand new line of—

WALL PAPER IN ALL DESIGNS

Our new Wall Paper is here and we can show you a big f paper, in plain oat-meal or decorated designs at any wish to pay.

BRIGHTEN UP WITH PAINT—ALABASTINE

We carry a full line of Flat Wall Paint, Inside Paint, erior Paint, Alabastine Sanitary Wall oCvering in all and shades—Varnishes and Stains, brushes, etc.

Time to use Dr. Hess' Poutry and Stock Tonics

Get your stock and poultry in the very best of condition now by using Dr. Hess' Stock and Poultry Tonic and other remedies.

Druggist — Klemme, Iowa

NOTICE OF ASSESSMENTS OF BENEFITS DRAINAGE DISTRICT NO. 111.

To Charles Medaus, Daniel Webner, Peter Markle. Wm. J. Schlawin, and to the County Board of Supervisors.

You and each of you are hereby notified that the Commissioners appointed by the Board of Supervisors of Hancock County, Iowa, to view and classify the lands in Drainage District No. 111, and to apportion to said lands and tracts, the total cost of said Drainage District, have made and filed their report in the Office of the County Auditor as required by law which report follows:—

Names	Description	Sec.	Twp.	Acres	Amt.	Class
Charles Medaus,	NW¼ SE¼	26	95—23	26	$410.00	44.40
Charles Medaus,	SW¼ SE¼	26	95—23	16	$484.00	52.40
Charles Medaus,	SE¼ SW¼	26	95—23	39	$923.00	100.00
Daniel Webner,	NE¼ SW¼	26	95—23	5	$ 24.00	2.60
Daniel Webner,	SW¼ SW¼	26	95—23	9.5	$ 87.00	9.42
Peter Markle,	NW¼ NE¼	35	95—23	2.58	$ 21.00	2.27
Wm. J. Schlawin.	NE¼ NW¼	35	95—23	16	$253.00	27.40
Wm. J. Schlawin,	NW¼ NW¼	35	95—23	3.5	$ 37.00	4.00
County Road,					$470.00	
			TOTAL		$2,709.00	

You are further notified that the 3rd day of April, 1922, has been fixed as the date for final hearing on said assessment and all objections thereto must be made in writing and filed with the County Auditor on or before noon of said date.

WITNESS my hand and official seal this 11th day of February, A. D. 1922.

CHRIS JACOBS,
County Auditor of Hancock County, Iowa.

(SEAL) Pub. F. 16-23

GRAND JURY

The following Grand Jurors were drawn for the year 1922, and are required to report for the March term of Court whhich convenes on Marchc 20ah. The Grand Jurors will report on Tuesday, March 21st, at 10 o'clock A. M.

W. F. Cunningham, Avery township.
V. P. Casperson, Ellington township.
Dave Duncan, Amsterdam township.
John Deibler, Erin township.
Ed. Frey, Boone township.
W. S. Hickok, Madison township.
C. V. McCullough, Concord township
Mign Mayne, Magor township.
L. M. Naser, Brita township.
Frank Nemetz, Garfield township.
Wm. Schlichting, Twin Lake twp.
George Ulrich, Liberty township.

Petit Jury

The following Petit Jurors were drawn for the March term of court which convenes on March 20th, 1922. The jurors will report at 10 o'clock A. M. March 21st,

Mrs. Etta Braley, Britt township.
Jesse Brooker, Madison township.
W. J. Burdick, Britt township.
C. D. Buseman, Ell township.
Geor. Baldridge, Amsterdam twp.
Ritch Basman, Concord tofnship.
Claus Eden, Bingham township.
Ole Gjerde, Bingham township.
Dush Gabrelson, Crystal Lake.
Stephen Goffe, Bingham township.
Guy Geddes, Madison township.
Henry Holck, Britt township.
Hilda Hanson, Britt township.
T. M. Hamilton, Avery township.

Rhoda Okrueg, Twin Lake twp.
Howard Rose, Crystal township.
W. J. Schuldt, Ell township.
Bertha Shafer, Britt township.
Geo. Seifert, Britt township.
Frank Steinhoff, Britt township.
C. B. Steinmetz, Madison twp.

LEVY TAX TO SUPPORT BAND

We notice in one of our exchanges that at Terril, Iowa, a petition has been circulated around to bring the question of levying a two mill tax for band support before the voters. The last state legislature passed a law permitting a town to levy such a tax when approved by the taxpayers, which question can be brought up on a ballot at an election. Many towns have taken advantage of the Two mills in the ordinary small town like Klemme will bring in from perhaps $200 to $300 per year for the support of a band, which is a very nominal sum for that purpose.

It is a good law for it takes the burden of the support of the band from the shoulders of a few public spirited businessmen and shifts it over the town so that all have a hand in giving a small sum toward the support of a band.

A community which wants a band ought to support one and general taxation is the only fair and honest way to do it. If the people of Klemme decide to support the band the right way they can vote a two mill tax for that purpose as they are doing in other towns.

Klemme ought to have a band this year and now is the time to get together so that the boys can get a director and get in shape for the summer concerts.

A town without a band is considered among the dead towns. Klemme has always been considered a live town, so lets not fall down on the band this year but get it started now and get some money together for the boys so they can hire a leader now.

Avery Township News

Edgar Buss visited over Saturday night at the home of William Bell.

Will Waddingham and family were Sunday visitors at the Johhn Bachman home.

Mrs. H. H. Meinderts and daughter, Jennie, spent the week at the Andrew Nelson home.

Tommy Nelson was a visitor at the home of his son, Andrew Nelson, over Sunday.

Mr. and Mrs. August Trampell are the proud parents of a baby boy since last Tuesday night.

Misses Geraldine and Caroline Smid, Misses Sylvia and Goldie Moberly were Sunday visitors at the Bert Dutton home.

Quite a few of this vicinity attended the farewell party given at the hall last Friday night in honor of E. G. Ell and family.

Goodell News

Mrs. Letch has been quite sick.

Martin Grover, of Leland, Illinois, is here calling on friends.

J. W. Griggs went to Ventura Tuesday.

A party was held at the Boren home Tuesday night.

Lots of moving is going on these days.

Fred Bachman had the misfortune to fall and break his arm.

Ed. Bachman is moving onto the place vacated by Bert Dutton.

Mae Griggs was the guest of Adelaide Engeseth Monday night.

Mr. and Mrs. J. J. Cook were Belmond callers Tuesday.

Ethel Thompson of Belmond was a High School visitor Monday.

Mr. and Mrs. Harm Viekant will work for Virgil Cook's this season. They will occupy the tenant house.

The graduates of the H. S. have received their class rings; they certainly are very nice.

An old time dance was held at the Rank Buss home Monday nite. All present report a good time.

Fernon Griggs was thrown from a load of hay and badly bruised up; lucky no serious results from the fall.

Mrs. Fred Chase was called to McGregor last week by the death of an aunt, but owing to the wash-outs on the Milwaukee railroad was unable to attend the funeral.

—T—

A Regrettable Fever.

About a year ago when Mr. and Mrs. Elmer N. Powell returned from a party late one night to their home in the Knickerbocker apartments, Mr. Powell discovered he had failed to take along his house keys. After failing in every effort to open a door or window, he was finally driven to the extremity of breaking a window pane in order to unfasten the night latch. As the glass tinkled he gave vent to vocal comment on the general cussedness of things that had made such action necessary.

As he spoke the voice of Judge Kimbrough Stone came from the window of the next apartment:

"I am mighty glad you spoke, Powell. I had my gun leveled at you and was just about to shoot."

One day last week Mr. Powell found himself on the same street car bound downtown, with the Judge and Mrs. Stone. Mrs. Stone explained that she was taking her husband with her to help select Christmas gifts, and Mr. Powell suggested that she should keep the judge with her long enough to sign the checks.

"Now, Powell," said Judge Stone, "after that you make me almost sorry I didn't succeed in shooting you last winter."—Kansas City Star.

Forest Monarch Gone.

The Rainier National forest has lost a king. A giant spruce tree whose age is estimated at 4,000 years, has fallen a victim to the recent northwest storm. This specimen of the earliest of Pacific coast trees measured 19 feet thick at the place where it was broken. Forest rangers will attempt to count its rings to determine definitely its age. The tree stood near the road leading to Mount Rainier and has been viewed by thousands of tourists. At Raymond, near here, several cedar trees, long revered by the forest denizens as monarchs, were blown down. One was 11 feet in diameter at stump height and the other about ten feet. Not for years have so many gigantic trees fallen in storms as during the recent sleet and snow hurricane.

Cleanliness.

"I can stand fer most anythin' 'cept a feller bein' dirty," remarked Lew Corntassel to the bunch gathered around the cracker barrel in the general store. "There's old Abe Scroggins, fer instance, who's so derned ornery he only takes a bath twict a year. I ain't much fer braggin', but as fer back as I kin remember I ain't never missed takin' a bath on the first Friday of every month, summer an' winter."—The Leatherneck.

Children's Hospitals.

Five hospitals for crippled children are about to be established by the Shriners in five widely separated cities—the first in St. Louis, the others in San Francisco, Shreveport, La., Montreal, St. Paul and Minneapolis. The first will have 80 beds and the others 50 beds each.

Quebec Opposes Women at Bar.

The province of Quebec has gone on record as opposed to the admission of women to the bar.

Important!

You will save money and you will profit by reading the buying information which we give you each week in the Times; therefore, it is Important that you read the "adds" each week.

Shoes

We have decided to discontinue the handling of Shoes, and are busy this week remarking the stock and will have a BIG SHOE SALE during March, or until all the Shoes are sold—Our LOW PRICES will move this stock quick.

Millinery

We have moved all the Shoes down from the balcony and are re-fitting this space for a good, strong Millinery Department.

Mrs. Ava Hake, of Belmond, an experienced Milliner, will head this new department.

We will be ready for business in about two weeks. I know that our customers will like this addition to our store and will help us to build it up—with your help we will make it a Good Place to Buy Hats.

PAY TRIBUTE TO THE LOST

Primitive Japanese Have Ritual for the Souls of Wild Geese That Never Will Return.

A most charming bath custom observed every spring, even to this day, in the fishing villages on the shores of the Pacific ocean, the Soto Ga Hama, the "outside shores" as the Japanese call them, is the ganburo.

These village people tell how the geese which come flying across the seas to winter in the land of the rising sun always carry in their bills a small piece of wood. When they are worn out from flying, the long lines of the migrating birds are halted by their leaders and then they settle in the sea for a rest before continuing their flight. This piece of wood is carried to serve them as a rest to float on while they refresh their wearied wings. When the geese reach the outer shores of Japan they no longer need these wood floats and they drop them just where they land. Now the good village folk know that these visiting geese need these floats again, and they never burn or use them in any way all the cold winter long. In the spring when it is time for the geese to make their way home to the north again they all flock to the shores where they landed and each goose picking up the float he brought with him takes to the air and flies home over the seas.

But there are many geese which never live to take the homeward path again and when all the living geese are gone away there still remains a sad, pathetic pile of floats which no geese will ever come to claim again.

The fishing folk are a simple folk and their hearts are clean and kind. Here on the "outside shores" they gather all the floats no geese have come to take, and carrying them to the nearby temples prepare a mighty fire beneath a huge kettle filled with water from the temple well. Then while the fire burns the priests pray for the souls of the geese who will never return. All the villagers then enter the great kettle and bathe in the water heated by the burning floats. For it is proper and good when masses are said for the souls of the dead that a present should be given to all who attend the sacred ceremony. And this bath, heated with the little legacy the geese have left behind, is the present the villagers who so simply and kindheartedly offer prayers, receive for their thoughtful regard for the dead geese's souls.—Exchange.

Spring Is Here

IS YOUR CAR PREPAIRED?

Spring is now very close at hand and you will want to use your car, but have you had it over-hauled for this season?

Better bring it in today and let us work on it for we will be very busy now in a few weeks when the spring work begins.

We guarantee our work to be first class and satisfactory in every way.

ACCESSORIES—TIRES

Remember, we carry a full line of accessories and repairs. A full line of Fisk Tires and Tubes. Best grades of auto oil, greases, gasoline, etc.

YOURS FOR AUTO SERVICE

Gram & Schultz

Please Settle Up!

FARMERS; You have received good prices for your hogs, cattle and corn now for some time.

We have been very lenient and extended liberal credit while low prices existed but now that prices are more in favor of the farmer we expect an early settlement of all accounts which are due.

We aim to keep our accounts within the 90 day credit limit, which is very liberal. If your account has reached that limit it is then due and we ask you to please call and settle.

Farmers Lumber Co.

GREAT BARE FACTS

THE Great Trees in the forest stood naked and bare, for Old Winter had come and taken away their beautiful colored dresses that Mistress Fall had given them in place of their pretty summer clothes.

But the evergreen trees were still dressed and they cried "Shame!" to the tall bare trees as they shivered in the winter winds.

At first the Great Trees did not notice the evergreens and held their poor naked heads high with pride above their green-gowned neighbors, but it was no use pretending, for, as the days went by, the evergreens became

more scornful and at last the great trees had to acknowledge to each other that they were a sorry sight.

"It is no use looking for Summer. She went to sleep long ago," said one tall tree, "and Mistress Fall is too far away now to hear our call, and Old Winter has no pity in his cold, hard heart for us."

"We might ask the help of the Forest Goblins," said another tree. "They come out on moonlight nights before the snow comes and they may know of some one who will help us if they cannot."

"I cannot understand why the evergreens should be so disagreeable. They have never been so before," spoke up another tree.

"Why, I can tell you, brother," replied a very tall tree. "Those evergreens have just grown up and they are so proud that they can see more than they did last year that they are talking about everything they see."

The first moonlight night that the Forest Goblins appeared the Great Trees told them their troubles, and, though the Goblins said they could not help them, they promised to see the Elves, whose queen was a friend of the Queen of the Fairies.

This seemed a round-about way to the Great Trees to get help, but there was nothing else to be done and so they had to wait.

The Great Trees had about given up hope and the evergreens grew more scornful every day, but one night, when all was still and the wind was cold and blustering, a little fairy alighted on the topmost branch a great bare tree. She had ridden to the forest on the tail of Blustering Wind without his knowing a thing about it and as he passed along off she jumped.

"I have a message for you from my queen," she whispered to Great Tree. "The Fairy Queen will help you and she gives you her promise that soon you shall all outshine in splendor the evergreens that scorn you."

As Old Blustering Wind passed again the fairy caught at his trailing tail and off she went, but the Great Trees felt happier and they waited and watched.

Then one moonlight night, when the evergreens looked up at the great bare trees, their cries of "Shame!" froze before they left their branches. For instead of being naked and bare, the Great Trees were clothed in gorgeous splendor such as the evergreen had never beheld.

The Fairy Queen had sent the snow fairies and Jack Frost to dress the Great Trees. They wore diamonds and their long branches were powdered with sparkling frost, and there they stood like great kings dressed in white and silver.

The evergreens were certain that the next day, when the sun came out, the Great Trees would be naked again, but they were more wonderful in their splendor as the sunlight fell upon them.

And no more did the evergreens cry "Shame!" to the Great Trees, for all through the winter did the Fairy Queen keep them dressed in their sparkling clothes.

Mildred June

Winsome Mildred June of "movie" stardom soon is to become a bride, according to an announcement issued by her parents, Mr. and Mrs. Maurice June of Los Angeles, Cal. Miss June was born in St. Louis December 23, 1902, and has lived in Los Angeles the past four years. She has been featured in many screen comedies.

FEED FURNACE DURING WINTER TO CONSERVE SUPPLY OF FUEL

Of Much Importance That Heating Plant Be Thoroughly Understood.

(Prepared by the United States Department of Agriculture.)

The Average house owner burns too much coal, principally because he does not know how to regulate his heater, say engineers of the United States Department of Agriculture in Farmers' Bulletin 1194, "Operating Home-Heating Plant," published by the department. Many rural homes are now provided with furnaces, and the publication was prepared as a guide to their efficient operation, particularly in getting the most heat out of the fuel used and in making the home as healthful as possible.

The satisfactory and efficient heating of homes, according to the bulletin, requires that the chimney flue be of proper size and in the proper place, that the proper heating equipment be installed correctly, that the plant be understood thoroughly and operated so that it gives the most heat from the fuel consumed, that the house be constructed so that the heat is held in, that the air be kept moist, and that enough fresh air be admitted either continuously or from time to time to avoid the discomfort or unhealthful conditions due to accumulation of carbonic-acid gas. In selecting fuel, the bulletin suggests that different kinds and sizes of coal should be tried out.

Should Be Properly Installed.

The best and highest-priced heater improperly installed may give less satisfaction than the poorest and cheapest put in correctly, says the bulletin. For this reason a man known to understand his business should install the plant. In selecting the furnace, consult owners of homes who have had experience in operating furnaces of different types.

Practically all heating plants have four dampers. A draft damper in the door of the ash pit is opened to admit air through the fire, which causes it to burn rapidly. A check damper located in the smoke pipe is opened to admit cold air into the flue, thus interfering with the draft and retarding the burning of fuel in the heater. The damper located in the feed door is used for the same purpose. Through it cold air is admitted directly over the fire, and if opened wide it acts as a check. When regulated properly it admits just sufficient air to supplement that admitted through the draft damper and causes more perfect combustion of the fuel. The smokepipe damper is located between the furnace and the check draft and can be used to control the draft above the fuel in windy weather or at night.

Ashes should not be permitted to accumulate in the ash pit, as this retards the draft and the heat causes the grate bars to become warped and bent. As a rule it is not necessary to shake down the ashes more than once or twice a day, except in very cold weather, and shaking should be stopped as soon as live sparks begin to fall into the ash pit. In mild weather coal can be saved by permitting an accumulation of ashes in the grate.

Sealing Cracks Saves Heat.

It is economy to seal the cracks about doors and windows with weather strips, and where the weather is unusually cold, storm sash is recommended. With a wind velocity of 15 miles an hour a crack of three-thirty-seconds of an inch, which is much less than the average for doors and windows, permits the passage of about 1½ cubic feet of air a minute for every lineal foot. An ordinary double-sash window (36 inches wide and 72 inches high) would thus admit 30 cubic feet of air a minute. In a room 10 feet wide by 20 feet long, having two windows of this kind, there would be required approximately 80 per cent more heat units to heat it properly than if the entrance of the air was controlled and a complete change allowed once every hour.

In addition to maintaining a proper temperature, the moisture present in the air is a great factor in heating homes. The water pan in the furnace should always be kept filled, and other means provided for the evaporation of water in the living room. Not only are rooms in which the air has a high percentage of moisture more economically heated, but living conditions are more healthful.

Copies of the bulletin may be had upon request of the United States Department of Agriculture at Washington, D. C.

HIS AWFUL HEIR

By EDNA BARNES

©, 1922, by McClure Newspaper Syndicate.

Sylvester Pelam, in the parlance of his fellow-townsmen, was a rich old crab. He surely was rich, even as fortunes are reckoned nowadays; he was old, if one considers three score and 13 as such. As to being a crab—well, it might be said that he walked backward, at least as far as his ideas were concerned.

But everyone has one inconsistency, and old Sylvester's pet hobby was the point of its being an obsession. He was forever having to explain to his acquaintances that chirography was not the care of the feet, but a science by which one can read character in handwriting. Let him get hold of a neighbor's writing, and he advertised the poor unfortunate's faults all over the town. Never did he have anything commendable to report.

So far did old Syl's hobby possess him that rumor had it that he had willed that his entire estate be used to establish an institute to promulgate the truths of the science (as interpreted by Sylvester Pelam) to the end of dispersing a universal knowledge of chirography.

Now, there was none to dispute the will. His only son was dead—really dead—although to old Syl he had been dead from the moment he announced his intention of marrying Edith Melville. She was an actress. Old Syl wouldn't even see her. Thus, for 2 years, old Syl had heard of his son only twice—once recently when he died, and on another occasion when his wife died at the birth of their little son, Melville.

Old Syl might have softened toward the child, had he not been branded with his mother's name. He had almost forgotten the existence of "the brat," when out of a clear sky came a letter from the youngster, now aged twenty-one. It was an ordinary enough letter, typewritten on the letterhead of a well-known brokerage concern in New York. Melville was applying for a life insurance policy and he wanted to know what his maternal grandmother died of.

Old Syl might not have read the missive but for the signature. Never had he run across such a specimen. It was clear-cut and bold, with just enough slant to denote ambition, but with no trace of unpleasant aggressiveness. So he was interested in life insurance—more prudent than his father, old Syl reflected.

Old Syl went to the phone. Finally came the report that Melville was not yet in. Old Syl retired to brood over the wonderful signature, assured by the operator that he would be summoned as soon as his "party" could be located.

It was nearly 9:30. The "party" was in a tawdry New York boarding house, leisurely attiring himself for the day. He emerged looking like an advertisement for a haberdashery, whistling nonchalantly and feeling quite positive that his lateness this morning would be the last straw. The manager would surely stand for no more. He was a rotten bookkeeper anyway—he was clever enough to know that. However, he didn't care. Something would turn up. Something always did.

The reason for today's lateness was the usual one—up until all hours the night before dancing with Kathleen, the pearl of all womanhood.

Kathleen talked to Pel-Mel frankly. Let him get a decent income and she would consider matrimony.

Pel-Mel Pelam's conjecture was right; his doom was already sealed when he reached office. The manager was prepared to deal the blow. "Yes, sir," was all Pel-Mel had to say when told his services would be dispensed with. He hardly had a chance to realize he now belonged to the vast army of unemployed when Boston called again.

Pel-Mel emerged from the booth ten minutes later, warm and dazed. The gist of it all was that his grandfather—his mysterious old grandfather of whom his parents had told him almost nothing—was arranging for $100,000 to be placed to his credit in a New York bank that very day. "Don't want you to have to wait till I'm dead to be glad you have a grandfather," Old Syl had explained.

A more curious person than Pel-Mel Pelam might have wondered at this sudden interest, but Pel-Mel's mind was occupied only with the jingle of money. Why, $100,000 would buy Kathleen's consent, with some change left over!

Pel-Mel grabbed his hat and started to Kathleen. "Pel-Mel" was the right name for him, thought many a clerk, as he dashed through the office. The accommodating stenographer with the big, serious eyes, sat near the door.

"O, Mr. Pelam," she called to him, and then she gave him a prosy message. Awfully decent of her, of course, thought Pel-Mel, but why stop him, even for a moment? Couldn't she see he was in a hurry? All she had said to him was: "You were gone last night when I finished that letter to your grandfather, so I just signed it myself. I hope you don't mind?"

In All Humility.

"You sometimes discuss subjects you don't understand," remarked the censorious friend.

"Yes," replied Senator Sorghum; "but in all humility, I'm perfectly willing to keep the conversation going so that the other fellow will have a chance to explain 'em to me."

E'es da hat where I leeve upstairs ees one guy wot I tink ees no gonna leeve ver long. He gotta feedle and every night when I try maka da sleep he try maka da music.

Now I no care so mooch eef he could play somating. But he play dat feedle jusa lika play da footaball game—meex everything up. He getta so far from da tune eef he gotta pay carfare back he go broke weeth hundreed buck.

Eef I no lika da music so mooch mebbe I no wanta shoota dat guy. When he maka noise on dat ting I no gotta trouble stay awake. He queeta play other night and a streeta car weeth a flat wheel go by. Dat sounda lika sweeta music and I go to sleep.

Somatime he try singa da song, too. And he gotta voice lika dog and a cat wot's no been acquaint ver long een da fight.

But hees papa tink he can play dat feedle greata style. Other day he tella me hees keed gonna play a piece een "A minor."

Nexa day I tella da man wot owna da place I am gonna move. After I heara dat piece een "A minor," I tella da landlord we wanta leetle peace een "A flat." And eef I no getta da peace een a flat dat keed and hees feedle ees gonna "B flat."

I tink I know leetle somating bouta music, too.

Wot you tink?

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

R. S. V. P.

Wilt thou not answer, man?—Shakespeare.

FEW persons need to be told that the initials R. S. V. P. stand for the French, "Repondez s'il vous plait," —that is, "reply if you please." But apparently there are a good many persons who do need to be told that when those initials are on an invitation it is imperative that either regrets or acceptances be sent wihin a day or two of the receipt of the invitation. The fact that there are such people is quite obvious to any one who has sent out formal invitations with this formal request for an answer, for there are always plenty of invited guests who come without signifying their intention to do so and even more who remain away without sending their regrets. Some persons really seem to think that "it is all a matter of form." They receive an invitation to a large wedding reception, for instance, and notice the letters R. S. V. P. but as they are uncertain as to whether they really wish to go or will be able they delay sending a reply. "It is just a matter of form," they say. "In a big affair like that it doesn't make any difference. One guest more or less will not matter."

But it does most emphatically matter. The hostess who does much entertaining makes a practice of keeping lists of all invited guests and as replies come she checks them off so that she can tell how many persons to make plans for. As her orders ought to be in at the caterer's several days in advance of the entertainment, it is really essential that the replies should be sent in within a short time after the receipt of the invitation.

Whether or not the letters are added to certain invitations, a reply should be sent; for instance, to an entertainment where substantial refreshments are to be served. Thus, a wedding reception or breakfast calls for a reply, as does, of course, a dinner or supper invitation. However, an invitation to a tea, where the refreshments do not have to be specially prepared for each guest, does not call for a reply. Good form in that case demands either your presence or a card sent so that it will reach the hostess on the day of the reception or tea.

There are times where it may not seem to you that a reply is necessary where for some reason or other your hostess really wishes one. It may be that she is sending out invitations to a drawing room reading or musical and that her seats are limited. She adds R. S. V. P. to the invitations because she wishes to know quite definitely how many to expect. If you refuse it may be that some one else may be invited. Not to answer and not to answer very promptly then would be a real rudeness.

There are some persons who protest against these letters R. S. V. P. They say that it is much better to use plain English and so they use this expression: "The favor of an answer is requested." This has the obivous advantage of being in English but the other form has the advantage of being extremely brief, and as every one knows the significance of the letters or can quite easily learn it, and as it is the time-honored form to use under the circumstances, there is no very good objection to its use.

Fear.

One woman at a hotel in the interior of Ontario the other night asked the clerk for a key to her room. "Key," said the bold proprietor, as if she had asked for the crown jewels. "Why, we never lock our doors around here. The last man who had a key to that room took it away with him 15 years ago." "Er-r-r-r," said the persistent woman, "you don't think, perhaps he might come back with it tonight."

"What's in a Name?"

Facts about your name: its history, meaning, whence it was derived, significance, your lucky day and lucky jewel

By MILDRED MARSHALL

VIOLET

THE origin of the fragrant and poetic name of Violet is shrouded in mystery. The name Violante appeared in the south of France and north of Spain and Italy early in history, but there was no clue to its origin and apparently, like Topsy, "it just grew." Etymologists with a fanciful turn of mind have identified it with the lovely golden violet which was the prize of troubadours of old in the courts of love; other authorities believe that it may have been a form of some old Latin name such as Valentine. The Latin name for the little purple flower that lifts its modest head in the spring is "Viola."

Violante was popular as a feminine name in Spain, but France changed her to Yolande or Yolette. An old English form was Joletta. Scotland however, reached out and appropriated the name, changing it to Violet. It is thought that this latest version came through a connection of the Archers of the Royal Guard, or perhaps through Queen Mary's friend, Violet Forbes. Certainly, the name spread in popularity in England and Scotland, where Violets were almost as numerous as the Marys of the Catholic communities of today.

Perhaps the most famous Violet of history was LaVioletta, the young dancer, so called by Maria Theresa, who become the wife of David Garrick, the brilliant English tragedian. Viola was the form preserved by Italy and it still reigns in undisputed popularity there. It gradually penetrated England and was elevated to favoritism through Shakspere's lovely heroine of "A Winter's Tale."

Violet's flower is of course her fragrant and modest namesake, the violet. It signifies modesty. Her talismanic gem is the bloodstone, which promises her bodily health, guards her from deception and distressing news, and preserves her faculities. If the stone is given to her by a lover, it will insure lasting and sincere devotion. Thursday is her lucky day and 5 her lucky number.

CALORIMETER SHOWS HARDEST HOME WORK

Washing, Sweeping and Scrubbing Most Laborious.

Series of Experiments Made on Energy Expended by Woman in Performance of Household Tasks —Ways of Lightening.

(Prepared by the United States Department of Agriculture.)

It does not require a laboratory experiment to convince any woman that washing and scrubbing are about the hardest work she has to do; but it will be interesting to many housekeepers to know the order in which their tasks rank when tested under laboratory conditions. For this purpose a specially designed respiration calorimeter was used by the United States Department of Agriculture. The results were measured in calories, for a series of 53 experiments on energy expenditure in the performance of household tasks.

It was found that such light tasks as sewing, crocheting, knitting, darning, and embroidering required an average expenditure of nine calories per hour more than that when the same subject was sitting quietly in a chair. Washing, sweeping, and scrubbing floors caused an increased energy expenditure of about fifty calories per hour over the expenditure at rest. Ironing, dressing a child, and dishwashing each required about twenty-four calories per hour.

Ways of lightening the labor of various household tasks were also studied. It was found, for example, that when the height of the dishwashing table was varied the energy expenditure varied. If the subject worked in a comfortable position the expenditure of energy was 21 calories an hour. It was 25 calories when the wash pan was set too high so that her arms were raised during work, and 30 calories when she was obliged to bend over.

INCREASE SEATING CAPACITY

Extension May Be Added to One or Both Ends of Kitchen Table—Illustration Explains.

An ordinary kitchen table may have an extension at one or both ends that will greatly increase its seating capacity. When not required, the extension is easily removed. Use the same thickness of board from which the table is made for the extension. Cut the

Addition to Kitchen Table.

exact width of the table and as wide as required—about one foot is practicable.

Cut two strips of wood four inches wide, seven-eighths inch thick and two and one-half feet long. Screw the strips to the under side of the extension so they will just come inside the framework of the table. Well fitting slots are cut in the sides of the table through which the strips are pushed to hold the extension securely.

hen all is said and done, the bull e mainspring of success or failure.

DAIRY THE

GAIN OF BULL ASSOCIATIONS

Increase Attributed to Fact That Farmers Are Beginning to Realize Value of Quality.

(Prepared by the United States Department of Agriculture.)

A gain of 35 co-operative bull associations during the past fiscal year indicates that dairy farmers are beginning to appreciate the value of such organizations. According to the dairy division of the United States Department of Agriculture there were 158 of such associations, as compared with 123 a year ago. This is an increase of 28 per cent, a very satisfactory gain in view of the comparative newness of the plan.

This increase is attributed by the department to the fact that farmers are beginning to become acquainted with the benefits which other farmers have derived from this form of co-operative breeding. Both federal and state workers have found that mem-

Use of Purebred Sires as Improvers of Productive Capacity of Cows Is Rapidly Gaining Favor.

bers are being benefited by such co operative associations even more than the organizers had anticipated.

Some form of co-operative breeding is essential to the proper growth of the dairy industry in many sections of the country, for the reason that the average herd at present is so small that the owner cannot afford to buy a good purebred bull, and it is certain that the herds of the future will not be large enough to change this condition materially. The movement to get more people living on farms and in villages to keep family cows tends to diminish the average size of the herd, for the one or two cows kept by each family are really a herd in themselves, but owners of small herds cannot afford to keep a bull. They, therefore, depend upon neighboring bulls, and the co-operative association is one means of providing for such cows the service of high-class bulls.

The dairy extension men in South Carolina, for example, realizing the importance of the co-operative bull association, have made it a part of their campaign for "two cows to each rural family," and they have set as a goal the organization in their state of 114 co-operative bull associations.

BEST PACKAGES FOR CHEESE

Boxes Are Subjected to Rough Treatment in Handling and Should Be Good and Strong.

Certain characteristics of American cheese, most valuable for export purposes, in addition to good flavor, include firm, close-bodied texture, clean and sound rind, and strong, well-made packages. The favored export style is the large so-called "cheddar," weighing from 60 to 80 pounds, although of later years a good many "twins" have been exported. "Twins" weigh about 35 pounds each, and are packed two in a box.

The matter of the package is very important, as the boxes are subjected to rough handling in loading and unloading. The most satisfactory boxes are sufficiently large for the entire cheese, for with a cheese higher than the box, the pressure of other boxes piled on top destroys the shape of the cheese and injures the rind.

It is common in the United States to paraffin most of the cheese marketed a week or ten days after the cheese is made, which permits free moisture to escape and allows for the usual shrinkage. During the spring, summer, and autumn, the use of refrigerator cars, where a temperature of 35 degrees to 40 degrees F. may be maintained, is important in shipping. It has been found as a result of experiments conducted by the United States Department of Agriculture.

Feed Balanced Ration.

It is extremely difficult to feed a ration which will cause a starved cow to increase her milk flow. The safest rule is to feed a balanced ration from the beginning, and to provide adequate feed to meet her requirements.

Satisfactory Flow of Milk.

Where no effort is made to give cows good care, it is difficult to make them pay their way. They may give a satisfactory flow of milk for a few weeks; but later on they fail to keep the pails filled.

TEMPERATURE OF MILK IMPORTANT

Results of Experiments Obtained by Dairy Experts Explain Why Product Sours.

SURFACE COOLER IS FAVORED

Coldest Water Obtainable Should Be Used and Cans Set in Well Insulated Tank—Protection Needed in Shipping.

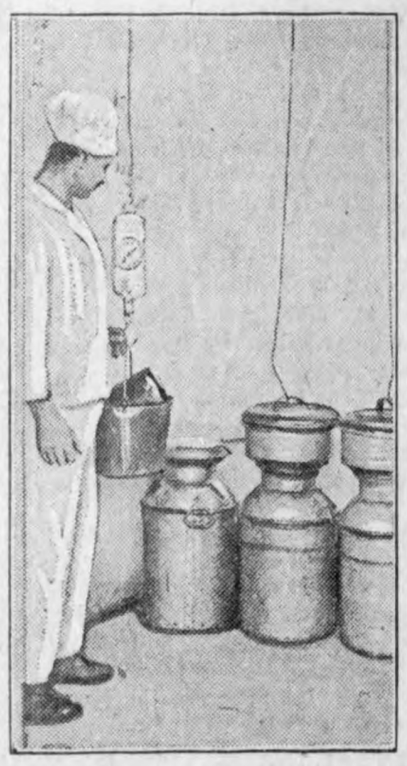
(Prepared by the United States Department of Agriculture.)

Milk of ordinary quality held at 75 degrees Fahrenheit, a temperature not uncommon in the summer, soured in 36 hours, while the same quality of milk held at 55 degrees kept sweet for 80 hours, and at 40 degrees for 180 hours. These results were obtained in an experiment carried on by the dairy division, United States Department of Agriculture, to determine the effect of temperature on the milk; and the results explain in a large measure why milk which has not been cooled on the farm—and kept cold—often is sour when it arrives at its destination.

The best and quickest way to cool milk to 50 degrees Fahrenheit is over a surface cooler. Use the coldest water available, and then set the cans of milk in a well-insulated tank filled with water below 40 degrees Fahrenheit. A 10-gallon can of milk precooled with water at 55 degrees Fahrenheit and set in a tank of ice water at 37 degrees Fahrenheit was cooled at 50 degrees in 20 minutes.

The use of a surface cooler is especially necessary when the time between milking and shipping is short. If warm milk is run over a surface cooler, and then set in a tank of water cooled with ice to 40 degrees Fahrenheit or below, it should not be difficult to cool milk to 50 degrees within an hour after it leaves the cow. Because precooling with a surface cooler is not practiced and ice is not put into the cooling tank before the milk, much milk reaches the shipping station in summer at so high a temperature that it sours on the way to the city.

On many farms the water used for cooling milk comes from the general storage tank or from a spring. The temperature of such water when it reaches the cooling tank is much higher than when it leaves the well or spring. Well or spring water that has a temperature of from 50 degrees to 55 degrees Fahrenheit frequently is warmed up to 70 degrees or 75 degrees



Milk Should Be Cooled Immediately After It Is Drawn.

Fahrenheit before it reaches the cooling tank.

Even under the best conditions, milk transported during hot weather usually is several degrees warmer by the time it reaches the railroad station.

To show the importance of protecting milk in transit during hot weather, four ten-gallon cans of milk cooled to 44 degrees Fahrenheit were hauled 13 miles from a farm to the railroad station. Can No. 1 was an insulated type; No. 2 was an ordinary can covered with a one-inch felt jacket; No. 3 was covered with a half-inch felt jacket, and No. 4 was an ordinary, unprotected can. During the trip, with the air temperature at 80 degrees Fahrenheit, the milk in the insulated can rose one degree in temperature, the milk in the cans protected with jackets rose six degrees, and the milk in the unprotected can rose 20 degrees. The cans were then shipped by rail in an ordinary baggage car for more than 1,000 miles at an average air temperature of about 80 degrees Fahrenheit, to study the effect on the milk. In the unprotected can the milk had reached a temperature of 60 degrees Fahrenheit in two hours, or after it had traveled about ten miles from the farm (before reaching the railroad); the milk in the can covered with the half-inch jacket reached 60 degrees Fahrenheit only after 11¼ hours, or about 268 miles of travel; the can covered with the one-inch jacket traveled for 13 hours, or about 332 miles, before reaching 60 degrees Fahrenheit, and the milk in the insulated can did not reach 60 degrees Fahrenheit until after 25 hours, or 650 miles of travel.

Use of Ham or Shoulder Often Results in Infection.

Department of Agriculture Urges Veterinarians to Avoid Possibility of Injury by Selection of Some Other Place.

(Prepared by the United States Department of Agriculture.)

Complaints from packers indicate that there are still many veterinarians and farmers who persist in immunizing hogs against cholera by making injections in the ham or shoulder, a practice that often results in infection and the formation of deep abscesses in the hams and shoulders where the serum and virus were injected. The United States Department of Agriculture has long advised against using those parts as points of injection, and the department veterinarians are instructed to avoid the possibility of such injury by selecting some other place.

The ham has been favored as a place for making the injections because they can be made more rapidly and easily

Injecting Hog in the Flank.

at this point, but they can be made with equal success in less valuable parts, such as the flank or auxiliary space, where there is loose connective tissue that readily absorbs the serum. In making an auxiliary injection the front legs should be spread apart so as to stretch the superficial muscles between the legs, and the needle should be directed so as to avoid the muscles of the shoulder.

It is desirable to make the injections at a point that will make drainage easy should an abscess form. Serum should never be injected into a mass of fatty tissue, as it is not sufficiently absorptive. Although the serous membrane lining in the abdominal cavity takes up serum readily, abdominal injections are not recommended because of the danger of puncturing the internal organs with the needle or of carrying infection into the cavity.

Small pigs and shotes up to 80 pounds in weight may be held up by the hind legs, with the forefeet resting on the ground, and the injection made into the loose tissue of the flank. A pig so held is in a good position for the taking of temperature, cleansing the area of operation, and making the injection. Farmers' Bulletin 834, which has been recently reprinted, contains full information regarding hog cholera and the methods of control.

ILLINOIS LEADS IN BUILDING

State Constructed 341 Miles of Permanent Hard Roads in 1920, Setting New Record.

One of the most interesting developments of the last ten or fifteen years has been the complete rehabilitation of the road, in its age-long role as one of the chief means of communication. The years that intervened between the coming of the railway and the coming of the motorcar saw a great silence and a great quiet settle down over vast numbers of the world's highways, says Christian Science Monitor. The motorcar, however, has changed all that, and today states and countries are vying with one another in the matter of road building, as to both quantity and quality. All honor, therefore to the state of Illinois with its 341 miles of new permanent hard roads, last year, "a record for such construction in any state in the Union prior to 1920."

COW WILL INCREASE INCOME

Animal Is Most Efficient Money Maker on Farm and Is Entitled to Good Treatment.

E. A. Hanson, dairy extension specialist at University farm, renews the inquiry, "Are you keeping cows or are they keeping you," in a collection of feeding suggestions recently issued by him.

"Put the cow to work," he says, "and she is the most efficient money maker on the farm today. A cow producing 25 pounds of 4 per cent milk daily makes one pound of butterfat a day, worth about 50 cents. This cow needs rations and hay and silage which should not cost more than 15 cents daily, leaving 35 cents daily above the cost of her feed. Where can you invest your time and efforts to better advantage? Give your cows a chance. They are all capable of doing better when properly fed."

POULTRY

TURKEY HEN IS BEST MOTHER

She Knows Wants of Poults and Can Talk to Them in Language They Soon Learn.

(Prepared by the United States Department of Agriculture.)

For poults the turkey hen is the best mother that can be found. She knows their needs and can talk to them in a language they soon learn to understand. At the approach of any danger she gives a low, warning note that sends them scurrying in every direction for a weed or patch of green grass where then can lie flat on the ground safely hidden from view. While on free range, she keeps her brood together by talking continuously in a contented, purring tone, so that the poults always know where she is.

When her poults become widely separated, or if some become lost, and she hears their "peep, peep," she calls them with the characteristic yelp heard so frequently during the laying season. Now and then, while the poults are but a few days old, she catches a grasshopper or other insect and calls the poults to come and get it. They soon learn to find their own feed, however, and range out ahead of the mother hen in search of whatever they can find.

Young turkeys usually remain with the mother hen until about October or November, when the males ordinarily separate from the females and range by themselves. When two turkey hens with broods of about the same age are turned out on free range together they will remain in one flock, and as this makes it easier to hunt them up

The Turkey Hen Takes Good Care of Her Young.

and care for them, it is advisable to turn out two or three hens with their broods together when they are given free range. It is not a good plan to have more than this number of young poults in one flock, say poultry specialists in the United States Department of Agriculture, as they may all try to crowd under one or two hens to be hovered.

GOSLINGS READY TO MARKET

Advisable to Avoid Use of Young Stock in Raising Fowls—Old Birds Are Preferred.

Geese are birds of long life, sometimes living fifteen to twenty years, and ganders are at their best at three, four or five years. The use of immatured young stock should be avoided, especially for the renewal of breeding geese, but for the production of early goslings for market, it is often the custom among breeders to use eggs from young geese, as these usually begin to lay earlier than older birds. Such a practice is perfectly proper, but for breeding stock, experienced breeders prefer older or well matured geese and ganders.

BIG IMPORTANCE OF ROOSTER

Impossible to Get Best Results Without Use of Good Male—Is Half the Flock.

The male is half the flock. Without a good male it is impossible to get good results. It is more dangerous, however, to use a poor male than it is a poor female, for the reason that from one male bird a greater number of chicks carrying his blood will be hatched than where a poor female is allowed to remain in the flock.

MALES FOR BREEDING STOCK

Not Advisable to Wait Until Last Minute to Select Fowls to Head Poultry Flock.

Don't wait until the last minute to buy males for your poultry breeding pens. If you do, the best will be gone and you'll have to take what's left. A breeder sells by process of elimination, disposing of the best first. So, the earlier you buy, the better will be the stock you get.

LEGS ARE QUITE IMPORTANT

Not Only Necessary as Means of Locomotion, but They Help Appearance of Fowls.

The legs of fowls are important not only as a means of locomotion, but also in regard to the appearance of the fowls. Therefore, the legs deserve proper care and attention from every poultry raiser.

HOME TOWN HELPS

CITY SHOULD BE BEAUTY SPOT

Traveler Singles Out Atlanta, Georgia, as Ideal Residence Town, for Variety of Reasons.

The importance of insisting upon making our city a cleaner, more attractive city and one of which we may be proud, was brought home to the writer while attending a national advertising convention at Atlanta, Ga.

After making a tour of the residence and suburban districts, as well as the downtown business portion of Atlanta, I was very favorably impressed. It was quite evident that the citizens there are making every effort to have their city known, not only as a progressive and up-to-date center, but as one of the beauty spots of the South as well.

In our own Kansas City should we not take more seriously the suggestions of a just and successful newspaper and give more thought and attention to the cleaning up, painting and beautifying of our downtown districts? To my mind, the present is the critical period in the life of our great city, and we should be careful not to allow our interest in its financial welfare to overshadow our desire to be known in the future as the city beautiful.

Advertising is one of the biggest factors in business, but before we can take advantage of that means we must get our business, or our community, in such a condition that we are justified in offering it to the public. —Kansas City Star.

WORK FOR CITY'S INTEREST

Best Kind of Business Man Recognizes the Duty Which All Owe to the Community.

What does a business man owe to the city in which his business is located besides the payment of taxes? Nothing, some close-fisted and tight-lipped business men will say. But they are not the biggest success, nor are they the kind of business men who get the most out of life. The business men who make the biggest successes and who get the most out of life are the kind who believe they owe something more to the city in which their business is located than the payment of taxes, who believe they owe it what they can contribute of active aid in solving the problems that confront it, social, political or commercial. Fortunately for the cities of this country, there are many able business men who, disregarding the advice of the kind of business men who say that it may cause them to lose some trade if they take sides in a city's affairs, are devoting considerable of their time and their talents to doing something for the general good of their city. And the number of such good business men is growing.—Lawrence (Kan.) Telegram.

Plant Trees.

There is no question about the need, the value, the absolute necessity of planting trees in America. Any small argument against it is overcome by big arguments by people who know the tree subject.

There is but one question left—how many trees will you plant? You don't have to do the actual work. Pay your money to the American Legion. The boy scouts of the country have offered to take orders from the legion and plant trees, and giving money is the least of the task.

If there is anything you want to know that you haven't been told about trees, you are welcome to write the American Forestry association at Washington, and you will be sure of a courteous reply, and a quick one.

Home Owning.

If home owning is promoted the profit to the country eventually will be greater than any outlay so far suggested. It is an investment in practical patriotism. It means more young men growing up in the country with an intense practical loyalty to the nation and its institutions. It means unity and strength based upon appreciation of service rather than disaffection and weakness due to apparent contempt for such service.

Road Improvement.

The time is near when all main roads will be paved and lined with trees and shrubbery. This beautification movement is well along already, thanks to the splendid memorial tree campaign which will plant a tree for every American soldier who served in the World war. We're now in the era of road building, and we soon will lead the world in permanent, connected highways.

His One Chance.

Mr. Constant Knagg—You don't mean to tell me your wife allows you to interrupt her lectures?

Mr. Henry N. Peck—Along toward the finish she gives me a slight chance while she gathers her breath for the last word.—Houston Post.

Some Time Ago.

"When we were first married you were only too glad to wipe the dishes."

"I know, but that was when we only had two dishes."

ABOUT KLEMME PEOPLE

Mrs. Tom Hake, of Belmond, was a Klemme shopper Monday.

C. C. Tessier, of Garner, was in Klemme on business Saturday.

The Ed. Ell family were visiting with Mason City relatives Saturday.

Miss Esther Jante spent Sunday with her parents at Garner.

Ray Nelson, of Garner, was in this ciay Tuesday.

SEWING WANTED—Mrs. Gilbera Schafer. 2tf

Mrs. Tony Ahrenkeil, of Goodell, was visiting hkere Wednesday.

C. E. Barnes, of Garner was a business caller in Klemme Friday.

Mr. Greene left for Des Moines on Monday.

The Rebeccas held their regular meeting at the hall last Tuesday nigt.

Mr. and Mrs. Caroles went to New Hartford Wednesday to attend the funeral of a niece.

Clarence Gram came Wednesday. He will work for John Woods this year.

Mrs. Tony Boller of Goodell was shopping in Klemme Tuesday morning.

Miss Emma Sampson was on the sick lisa a few days last week suffering from an attack of tonsilitis.

A fine baby girl arrived at the home of Mr. and Mrs. Elmer Arnold this (Thursday) morning.

A baby boy arrived at the home of Mr. and Mrs. Aug. Trampell last Friday.

FOR SALE—A 150 Egg Cypress Incubator, in excellent condition. Inquire at the Times Office. tfp

George Gruetzmacher left for the city of Minneapolis on business Monday.

W. H. Trafford was up from Belmond yesterday elping the new minister get settled.

Verner Lewis, wife and baby of Hayffield, Minnesota, came Tuesday for a visit with Klemme relatives and friends.

Mrs. Harry Brooks returned Monday from several days visit with her relatives and friends aa Belmond and Goodell.

The married people's dancing club held their dance at the Idle Hour on last Thursday evening. All enjoyed a good time.

A party was given on Mr. and Mrs. John Spitler Saturday night. They are moving on a farm just west of Belmond.

Mr. and Mrs. R. A. Jorgenson entertained a number of friends at a bid whist party Monday evening. All report a good time.

Wellemeyer has moved his shoe stock to the main floor and will have a millinery department on the balcony second floor in the near future.

Clarence Baahman left for Des Moines Monday where he will be for some time attending a barber's college.

Mr. Jenkens' wife and three boys came from Clarion Monday to join him. They have moved into the Aug Baack residence.

FARM WANTED—I want to hear from party having farm for sale. Give price and description. G. B. Louden, Champaign, Illinois. 1wc

FARM WANTED–Wanted to hear from owner of a farm for sale, for Fall delivery. Give lowest price. L. Jones, Box 551. Olney, Ill. 1wp

A. Wellemeyer delivered a bill of furniture in Belmond yesterday. The Klemme merchants have a knack of reaching out far for business.

Mrs. A. Kirkwood, of Goodell came up Saturday and remained until Monday evening visiting with her many Klemme friends.

Fred Bachman broke his arm last week as a result of the sleet saorm. He slipped and fell on the ice out at Hamo Beek's and now carries the injured member in a sling.

Mrs. Ivan Lowenberg of Goodell was a Klemme shopper Tuesday.

Mrs. Baack came from Woden on Monday for a visit at the Charlie Medaus home.

Mrs. John Brouwer, of Minnesota came last Thursday for a visit wiah her many Klemme relatives and old friends. She also spent a few days at Garner visiting old friends.

Mrs. Blandin, who has been visiting here wiah her daughter, Mrs. Greene for a few weeks left for her home at Orchard, Iowa. last Friday accompanied by Mrs. Greene and the children.

The electric service was in rather bad shape last week following the heavy rains which were said to impair the plant at Iowa Falls and caused some damage when water entered ahe plant from the over flowing bank of the river.

Rev. A. B. Gedye, wife and two little girls arrived in Klemme Monday, coming direct to Klemme from England where they have been visiting relatives for about four months. Rev. Gedye will be the pastor of the Methodist Episcopal church here. His last charge. before going to England was at Whittemore, Iowa. We welcome the family to our little city.

Dan Webner's little one year old boy suffered a raaher peculiar accident the other day. The little fellow swallowed a nickel and it was with some difficulty that physicians removed the coin. He is getting along well after the experience of swallowing the coin "the wrong way" down.

A church social and farewell party was given at the Idle Hour last Friday evening in honor of the Ed. G. Ell family who are leaving for Minnesota. The members of the English Methodist chuch presented Mr. and Mrs. Ell wit a beautiful caserole in token of their appreciation of ahe interest the Ell's have always taken in church work here. The family will be greatly missed from curch and social activities of the town.

Liberty Township News

Mr. and Mrs. Lester Stille moved to Klemme the fore part of the week.

A surprise party was given on Mildred Anderson last week Wednesday evening at her home.

Miss Celia Brouwer boarded the south bound train last Friday evening and returned Sunday.

Emil Bloomer purchased a new span of mules. He already had one span; looks as thought the mules are prefered to tractors.

The young people of this community, as well as a certain number from east of town, congregated at the J. Spitler home in town last Saturday evening for a surprise on John, Jr. A large number was present and all enjoyed themselves [illegible] hour.

Spring Goods are Here

KANAWHA IN FIGHT FOR BETTER RAIL SERVICE

Railroad Commission Will Hold Hear ing at Algona Today to Air Problem

The people of Kanawha and citizens of other towns on the Algona-Hampton branch of the M. & St. L. railroad are elated that the state railroad commission has tendered them an opportunity to voice their protests against the service on this branch before that body at Algona today.

Recently the M. & St. L. discontinued their passenger service. leaving the branch towns with but two trains a day, one each way. The trains are acombination of both a passenger and a freight and as a consequence the towns complain as they get service from neither with any satisfactino. For to properly handle the passengers the freight is then delayed, it is claimed, and if the freight gives service then the pas senger service is hampered and it is impossible to leave town by rail for any point and get back again the same day. Likewise the mail service is also bad, arriving about noon ffrom one direction and going the opposite direction shortly after noon which makes it impossible for the business man to receive letters and get off mail in time. Likewise the rural delivery is twenty-four hours behind time unless the carriers wait until noon before they start with the mail.

The Commercial Club at Kanawha is back of the move as are also the business men and people of the other towns served by the road.

The outcome of the hearing will be watched with interest by all the towns in this section of the state.

—T—

TO TALK LOWER ELECTRIC RATES

Last week's Belmond Independent carries te following interesting bit of ews:

"Mayor Barry is in receipt of a letter from Mr. Reid, of the Iowa Falls Electric company, in which Mr. Reid states that he will be in Belmond in the near future to take up the proposition of lowering the electric light and power rates in Belmond. Several citizens had spoken to Mayor Barry regarding the rates being paid here for service, and the Mayor had passed the information on to the gentleman named. The outcome of the coming conference will be awaited with interest.

—T—

WIRELESS PHONE PLANT COMING TO CLARION

The Northern Iowa Gas & Electric Co. is going to install a wireless telephone equipment at its office in Clarion within a short time and it will be exhibited as a part of the company's appliances, and at the same time Clarion folks will have the opportunity of listening in on the various entertainments which are beig wafted o wireless wings the country over. We will yet be able to hear musical numbers and speeches made as far away as New York right in Clarion. There are several people in Clarion who will investigate the wireless phone equipment with a view to buying. Dozens of the boys of the town are saving up money to buy a wireless outfit. Hurry up. Jones, and invite us all to hear the world's newest wonder. We're sure excited about it.—Clarion News.

—T—

A NARROW ESCAPE

Chester Ingham barely escaped with his life last Sunday evening. He went on horse back to bring in the cows from a stalkfield. In passing over a barbed wire fence that had the wire lowered for that purpose, the horse caught a shoe on a wire and surged back. then forward, throwing the boy over its head, then turned a complete summersault over him. The boy escaped with a slight bruise and the horse escaped with no injury. The only wonder is that the horse did not light on the boy and crush him to death.—Corwith Hustler.

Miss Mildred Johnson was on the sick lst the past week.

Activities of the Farm Bureau And Other Farm News

DAIRY FEEDING AND MANAGEMENT SCHOOL

Days of Valuable Instruction For Hancock County Farmers

The Farm Bureau has secured the services of Mr. H. R. Searles and Mr. C. B. Finlay to lecture on the feeding and management of dairy cattle. They will be in the county three days —March 13, 14, and 15th. The meetings will be held at Britt, Garner and Crystal Lake.

These men will take up in lecture form many things pertaining to the dairy herd. They will show what has been done in the experimental work and make suggestions as to better rations, and show how to figure balanced rations. There is a great need of better feeding and management of our milk cows. According to the last estimate, Iowa had 1,405,000 cows with an average production of only 122,240 pounds of butter fat per year. This can be greatly increased by proper feeding and management, and it was proven by an experiment of the Iowa State College on scrub cows that were brought from the live stock section of Arkansas. They have been able to make an average production higher than the average Iowa cow by proper feeding and management.

This work will be given at Crystal Lake Monday, March 13th; at Garner Tuesday. March 14th; and at Britt Wednesday, March 15th. Lectures will begin at 10:00 A. M., and the same program will be followed at each place which is as follows:—

10:00 A. M. Feed requirements of dairy cattle.
11:00 A. M. Examination of rough age and concentrates.
12:00 Dinner.
1:00 P. M. Requirements of dairy rations.
2:00 P. M. Figuring the balanced ration.
3:00 P. M. Care and management of the dairy herd.

FARM BUREAU PICNIC TO BE HELD IN JUNE

Farmers to Have Another Big Day At Camp Grounds June 1

The Board of Directors of the Farm Bureau has voted to hold the annual Farm Bureau picnic Thursday, June 1st, at the Camp Grounds at Garner. The picnic last year was a big success, and was attended by at least 5,000 people.

C. W. Hunt, President of the Iowa Bureau Federation, has been secured to give the principal address. An attempt is being made to secure some good lady speaker.

The committee who has charge of the preparation of the picnic has already been appointed, and expects to put in some hard work to perfect a better program than last year. The committee is composed of T. R. Riehm. Chairman, W. J. Elling, Fred Katter, Chas. Grau, and Chris Nelson.

Mrs. John Baumgartner was at Garner Saturday between trains.

NEW BOB SLED LAW EFFECTIVE I NYEAR 1923

There are many radical changes brought about by the increasing use of roads in winter, and summer as well, by the automobile, the latest being an invasion of the domain of the "bob-sled." The narrow tread of sleds has for years been detrimental to the use of roads by wagons or autos, and in the 39th general assembly a bill was introduced relative to the width of sleighs. The committee on agriculture sponsored the bill at its passage. The bill was first introduced by Representative Ingersoll of Tama county but was defeated. The bill was reintroduced in the house by motion to reconsider. and then given the approval of the committee on agriculture. The law provides that after January 1, 1923, no new, first hand bob-seld or "draft sleigh" shall be sold for use in Iowa or used on the public highways of the state unless the opposite runners are fou rfeet and eight inches apart. To guarantee observation of the law there is a maximum penalty of $25 fine for violation. The bills passed both house and senate by almost unanimous consent.

HORSE KILLED AND TWO CHILDREN STUNNED IN ELECTRICAL STORM

Algona Advance.—During the electrical storm Tuesday, a horse on the Morriss Parsons farm was killed by lightning, and two children, Meryl and Isola, in the Parsons family, had a narrow escape from death. As it was, the children were temporarily stunned and suffered light burns, but they were reported almost fully recovered yesterday.

—T—

NOTICE

Arrangements have been made with the Des Moines Electric Meter Company—one of the largest and most reliable concerns of its kind in the country—specializing in all the branches of electrical measurements, for the inspection and testing of all electric meters in Klemme. The work will be conducted by Messrs. Paulsen and Scoonover, both men being experts in their line of work and carry cards of identification signed by Mr. E. A. Steelsmith, Consulting Engineer of the Company and under whose supervision all work is conducted.
adv M 9-16c.

Annual School Election Will Be Held Here Monday

KLEMME SCHOOL NOTES

Klemme High Loses Two Games

(Special to the Times)

Last week Wednesday night the Boys' Team of the Klemme high school went to Ventura to meet that quintet in a fast game of basket ball. Ventura has the reputation of being a fast team and they lived up to their standard that evening and gave our boys a most merry chase, the score ending the game was 27 to 7 in favor of Ventura. However, the Klemme boys must be given credit for the good scrap they put up and it was no disgrace for them to be defeated by a good team like the Ventura school has. The Klemme Girls' Team was also invited to play the Ventura girls but a misunderstanding of the invitation prevented them from going; they were rather disappointed when they learned that VVentura had expected them.

The Klemme H. S. Boys' Basket ball team played Kanawha on their floor last Thursday evening. This game was fast and close, as the score will show, ending 10 to 14 in favor of Kanawha. The boys on both the teams played some excellent basket ball and coach Weigmann's work is begnnng to show up some fine points which he has taught the boys. The Klemme boys were somewat handicapped in this game. In the first place they had just played a game with Ventura the night before and the second place they were not accustomed to Kanawha's floor. They put up a real scrap and showed excellent team work through-out the game.

Baseball to Open this Month

The Klemme high school are going into baseball early this year. The first game is scheduled with the Belmond high school to be played here on March 31st. The team will be as good, or better this year than it has for some time, although three good men are not in this school this year on account of te lact of twelve grades. Adolph Lauritzen will be the man behind the bat again this year and Howard Wiles will do the major portion of the twirlng for the K. H. S. and the general dope seems to be that Harl Gimer and George Bergman will act as substitute pitchers for the team. The second game with Belmond will be played there on April 7th.

Some of the baseball boys have ordered their shoes. The boys will also have new baseball uniforms this year.

Examinations were held last week. There were some who failed, while others received high grades.

The 10th grade will start studying Julius Ceasar next Monday.

The Freshman class will begin to study the Merchant of Venice next Monday.

The Johnson girls were absent on Wednesday.

George Bergman was absent Tuesday.

Adolph Lauritzen has been on the sick list this week.

Neota Ridder was absent Wednesday.

The basket ball season is practicaly over unless games are played here with Rowan.

STEIHLS AND KUCK TO BE HOME THE LATTER PAR etaoin cm SOON

Traveled 130 Miles Without Seeing A House or Town

Pecos, Texas.
March 3, 1922.

Friend Jergie:—

As up to this present time we are all still alive and feeling well, so I hope this card will find you and all Klemme people the same. Up until tonight we have traveled 1270 miles from Long Beach; but Boy! must say one thing, the roads are some thing awful—3 miles per hour lots of time and we even made 130 miles without seeing a house or town and 60 or 75 miles is very common. We sleep quite often out with the coyotes, can hear them howling now. I expect to be home arount the 20th of March.

Your friend,
A. H. KUCK.

SCHOOL ELECTION WILL BE HELD MONDAY

Monday will be school election day in Klemme at which time two directors will be chosen, each for a three year term. The men going out this year are F. A. Arnold and P. M. Griesemer. Nomination papers were circulated and their frienls put them back on the ballott and they are the only two names which appear. If you desire to vote for another party it will be neccessary to write in the names.

Both of these men have given the town good service as directors and should be given another term.

Ia is very doubtful if many will turn out to vote as the men have no opposition. However, this should be a good opportunity for the ladies to practice marking the ballt.

TEACHERS' MEETING AT FORT DODGE, MAR. 16-18

The first annual meeting of the North Central Division of the Iowa State eachers' Association will meet in Fort Dodge, Iowa, March 16-17-18, 1922. The North Central Division consists of the following counties; Winnebago, Hancock, Wright, Kossuth, Humboldt, Webster, Emmet, Palo Alto. Pocohontas, Calhoun, Clay and Dickinson. Supt. J. F. Ovrmeyer, of Algona, is president of he association.

MEDAUS-JOHNSON

A very pretty and quiet home wedling took place at the Joe Johnson ome yesterday moring at 11:30 o lock (Wednesday March 8, 1922) vhen Miss Blanche Helen Medaus, laughter of Mr. and Mrs. Henry Melaus of this city, was united in marriage to Mr. George J. Johnson, son of Mr. and Mrs. Joe Johnson. Rev. W. C. Bergman, pastor of the First Methodist Church of this city officiated at the ceremony which was witnessed by a large gathering of relatives and close friends of the couple.

Shortly after the ceremony the guests were seated at the table which was beautifully decorated and also fairly groaning under the burden of a sumptious wedding feast which had been prepared by the mothers of he Bride and Groom and who know just how a feast is best prepared.

The Bride and Groom left shortly after on a honey-moon trip for a few days after which they will return to Klemme and will go to house keeping on the Johnson farm east of Klemme.

These happy young people both come from the best families of this little city. The Bride is a young lady of a sweet disposition and is just such a girl who will make an ideal home maker and a help mate. Until recently she has been a student at the Klemme High School. The Groom is an industrious young man who has taken up farming as his vocation and has followed that business for the last couple of years. To quote George's friends we can sum up his good qualities by saying "he is a good scout."

The Times staff joins with the many friends of this happy union in wishing them life's best and may they enjoy a long and pleasant voyage in the bark of love over a smooth matrimonial sea of happiness.

—T—

BABE BREAKS NECK IN 15 INCH FALL

LOS ANGELES, March 8.—Phhysicians today predicted the recovery of 14 months old Barbara Jean Stratford, whose neck was broken when she fell 15 inches from a sofa to the floor. The baby's neck is in a plaster cast. She is the daughter of Mr. and Mrs. W. G. Stratford of Glendale, a suburb.

—T—

We very much appreciate the many friends who so considerately inform us of their little social events, and those whom they entertain in their homes. We thank you sincerely, for it is only by giving us te news that we can publish a real newsy home paper.

Raisuli Wants to Die in Peace

Moorish Leader, Now Object of Spanish Attack, Once Drew United States Fire.

SAYS HE'S TOO FAT TO FIGHT

Seventeen Years Ago He Figured in Incident When Secretary Hay Demanded "Perdicaris Alive or Raisuli Dead."

Washington.—Raisuli, the Moorish bandit who has just again offered to surrender to the Spanish military forces which are pushing an active campaign against him in Morocco, is the man who once drew the United States into action in that vexed corner of the world.

He figured in that celebrated incident when Secretary of State John Hay demanded "Perdicaris alive or Raisuli dead."

That was 17 years ago, in 1904. Raisuli had captured Ion Perdicaris, a naturalized American citizen, and kept him prisoner. President Roosevelt sent a fleet of eight American war vessels stripped for action into the Tangier harbor while John Hay sent his famous message to the feeble sultan in nominal command there.

Grows Too Fat to Fight.

Raisuli, who now says he is "too fat to fight," had long been a leader of the wild tribesmen who have frequently swamped the trained battalions of a civilized power.

Perdicaris, a wealthy man, was president of the European commission administrating affairs in Tangier city in 1904. He has told the story of his capture and it was recounted some time ago in a National Geographic society bulletin. He was snatched out of his summer home by Raisuli's raiders, and borne off to a mountain stronghold.

From there the chieftain proceeded to open up negotiations with the sultan of Morocco, Perdicaris' family and eventually in indirect fashion with the American government, concerning the price to be paid for his captive. The United States cut short the chaffering in the fashion described. The sultan, panic-stricken, sent $70,000 in silver to Raisuli, appointed him governor of a district, turned loose some of his friends from Tangier jails and incarcerated some of Raisuli's enemies in their place. Perdicaris later returned to the United States to express his thanks.

Prosperity, however, came close to ruining his erstwhile captor, Raisuli. He got into a quarrel with the sultan about his governorship, was thrown out and promptly retaliated by bearing off for ransom Kaid Sir Henry McLean, British commander of the Moroccan army. He arrayed his tribesmen for battle and descended upon the coast, doing much damage to European interests, and in 1907 succeeded in setting all the hair-triggers in European diplomacy.

The French navy bombarded one of his captive towns, Casablanca, the now practically extinct Kaiser Wilhelm came to bat, sniffing undue French expansion in prospect, but the matter was straightened out in a council chamber instead of on a battlefield. Raisuli was chased back to his mountain fastness, but news dispatches every few years record another of his eruptions.

Captivated Captive.

"In many respects the man interested and attracted me in spite of all my natural motives for dislike," Perdicaris says of Raisuli in the Geographic society's report. "Raisuli was gracious and dignified, not only to us, but to his own wild adherents, who evidently idolized their chieftain, whose position among them seemed that of a head of a highland clan in olden times. He was quick to see the humorous aspect of a situation, while his repartee was as immediate and to the point as though he had been born in the County Galway.

"I found myself unconsciously accepting his contention that he was not a mere brigand or cattle lifter, but a patriot struggling to lift his Berber followers from the tyranny of corrupt officials. His charm of voice, the natural poise and dignity of his manner, his self-control under provocation, all betrayed a superior character."

Repentant Robber Is Given $5 by Victim

A repentant thief who returned to apologize after being put to flight with a revolver, was given $5 by Frank Harris, a tailor, of Freeport, Ill., who was attacked by the would-be burglar. Harris chased the man away and a half hour later the bandit reappeared, begging forgiveness and saying he was penniless. Harris gave him $5 to help him along.

TO BUILD CANAL FOR HOLY LAND

Zionist Organization Resurrects Plan Brought Out by Duke of Sutherland.

DIVIDED INTO TWO SECTIONS

Proposed Cut Would Open Trade Route by Way of Sea of Galilee and Jordan Valley—Would Increase Humidity.

Jerusalem.—The Zionist organization has resurrected the old plan of constructing a 250-mile canal through Palestine as a supplement to the Suez canal. This project was first brought out twenty-five years ago by the late duke of Sutherland, but was buried unceremoniously by Sultan Abdul Hamid because of his opposition to progress.

Traffic through the Suez canal has become so congested these days that it is claimed an alternate canal route is required. Zionist leaders have become convinced that the ever-expanding trade relations between continental Europe and the Far East have reached such dimensions that a canal in Palestine would fill an urgent need and reap untold commercial benefits for Palestine.

Canal in Two Sections.

As planned by F. A. Maier of Holland, its ardent supporter, the canal would be divided into two sections, one of which would extend from Haifa, on the Mediterranean, to Afuleh, on the Lake of Tiberias, or Sea of Galilee.

Then there would be an intervening part to be formed by a proposed Jordan lake to extend from the Lake of Tiberias toward the Dead sea. This would be filled with Mediterranean sea water. Having crossed the Dead sea the canal would begin again at Arabah, at the foot of the sea, and extend to Akabah, giving access to the Red sea.

While the building of such a canal would necessitate the submergence of a considerable tract of fertile land as well as a few towns and villages (along the Jordan), its champions claim that the advantages would far outbalance the loss.

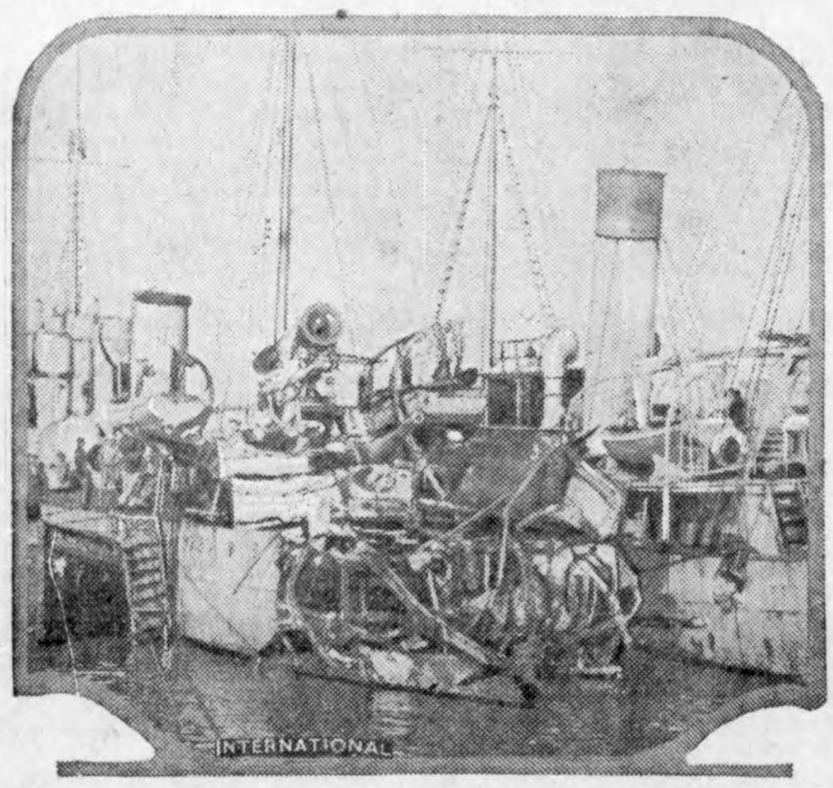
Would Increase Humidity.

It is claimed that the proposed Jordan lake would increase the humidity of all Palestine, which now suffers from excessive heat and dryness, thus improving the climate as well as the vegetation. Also, it is asserted, the Jordan valley and the desert lying to the east with the prairies south of Houran, owing to the increased area of water, would become great centers for colonization and development.

With these climatic benefits must be reckoned the commercial possibilities in the scheme. Haifa might become a second Port Said, a touching place to ships of all nations. Raw materials from Europe and America, so much needed for the building up of industrial enterprises in Palestine, and which now are being held back due to scarcity of calling ships, would begin to flow more freely.

Thus, it is claimed, there would be opened up to the residents of Palestine great industrial opportunities.

Greek Cruiser Wrecked by Mines



View of the Greek cruiser Leon after its destruction by the explosion of four submarine mines in the harbor of Piraeus. Thirty-five men were killed and scores injured.

SELLS CORN 5 CENTS KERNEL

Washington Farmer Develops Gigantic Type of Grain by Careful Selection.

Prosser, Wash.—J. D. Sutton, a well-known farmer residing near Byron, is selling seed corn at 5 cents per kernel. It is a species of huge growth developed within the confines of Sutton's farm.

Last fall in county fairs around the northwest, Sutton took first prizes with twenty-five stalks of this corn, most of which were between twenty-one and twenty-four feet high. Each stock, some as large as a man's forearm, maintained several huge ears of corn.

He received a letter from an eastern seed house asking for facts regarding his monster cornstalks. By correspondence he found it to be valuable and soon received an offer amounting to about 5 cents per kernel. Sutton developed the tall, heavy fodder corn by growing on rich bottom land and each season saving for seed only the earliest and largest specimens of ears.

BONUSES CAME FAR TOO EASY

Frenchman Quits Baking to Live on Soft Money.

Found That Regimental Accounts Were Behind and Collected 35,000 Francs Before Crooked Work Was Discovered.

Paris.—In prewar days there was a baker in Paris as honest as a baker could be. Then he went to the front and fought well, receiving two wounds and two mentions in army dispatches. When he came home he found work hard to get, but that would not have interfered with his honesty except for the good or bad luck of getting paid his demobilization bonus twice over. He kept both and began to think.

If two bonuses were sent to him there was no logical reason why three or four, or forty, might not equally well come his way, so he wrote to his former regiment complaining that he had not received his bonus, and because regimental accounts were not up to date, as has happened before, a third bonus was sent to him. He thought no more of baking bread.

He wrote to the appropriate department, saying that he had lost his military papers and might new identity papers be sent to him. They were. Then he wrote to other regiments—dozens of other regiments—complaining that his bonus had never been sent to him, and let them send it and be quick about it or the ministry of war would hear about it.

Some regimental accounts were properly kept and up to date. These took no notice or wrote in reply that he had mistaken his regiment. Others, with less clear consciences, sent the bonus by return. In two years the hero "crook" baker made no less than 35,000 francs out of the fears of quartermaster sergeants and the like. Then the crash came, and now he is in prison awaiting his fate.

ITALY ROAD WORK AIDS IDLE

Government Appropriation of $53,600,000 Provides Jobs for Unemployed.

Rome.—Financial depression has increased unemployment in Italy. To relieve the situation, the government has allotted 268,000,000 lire, equivalent at par to $53,600,000, for public works. This is in addition to relief works undertaken by local government bodies.

The government fund will be used in hydraulic works, harbor improvements, dredging channels, coast protection works and similar enterprises.

The last official figures showed 492,368 unemployed and 45,626 on part time in Italy.

Poles Bar Shimmy and Trot.

Warsaw.—The "shimmy," the "scandal" and even the fox trot are under ban of the Polish government. All American dances, with the exception of the one-step, were prohibited by official order at the recent annual military ball.

HARDING IN PLEA FOR SHIP SUBSIDY

Reads Message to Congress Urging Adoption of Plan for Merchant Marine.

TO COST $125,000,000 A YEAR

Ten Per Cent of Customs Receipts to Pay American Ship Owners—Officers and Men of Merchant Marine to Enlist in Naval Reserve.

Washington, March 1.—President Harding urged a joint session of congress to grant a subsidy to an American merchant marine. To do so, he said, would end the government's costly experiment in the shipping business and would create a strong second line naval defense for the nation. With his recommendation the President offered a plan for the subsidy.

Its main points are: Liberalization of restrictive marine laws.

Shipping board to sell remaining government ships, not by competitive bidding, but by prices to be fixed by it.

Establishment of $125,000,000 loan fund, from which ship builders can borrow money at 2 per cent.

Reduction of income taxes on shipping corporations equal to 5 per cent of value of goods shipped under the American flag.

Government to waive all such income taxes when the amount of taxes is to be applied to half the cost of new ship construction.

Establishment of regulations compelling 50 per cent of all immigrants coming to America to travel on American ships.

Establishment of a merchant marine reserve comprised of sea-faring Americans in merchant marine service.

All government transportation to be done in American ships, including army and navy transportation.

Extension of coastwise shipping laws to include the Philippine islands.

Direct government aid to be withheld when companies are earning more than 10 per cent profit, or, when government aid has been extended, all over 10 per cent to be turned back to the government.

Ten per cent of all customs duties to be devoted to a revolving fund (about $30,000,000 annually) to provide means of extending aid.

Tonnage taxes (amounting to about $2,000,000 annually) to be paid into same fund.

Second Defense Line.

"The relativity of strength (naval) among the powers would be wholly one of disappointing theory," he said, "if ours is to be a merchant marine inadequate for the future. I do not care to stress it as a means of defense. The war and our enforced outlay have already stressed that point.

"The merchant marine is universally recognized as the second line of naval defense. It is indispensable in time of great national emergency."

The President reviewed at length the history of America's costly shipping enterprise during the war.

"The outstanding lesson learned," he said, "is that the government cannot profitably manage our merchant shipping. The most fortunate changes in the personnel of management would still leave us struggling with a policy fundamentally wrong and practically impossible.

"Having failed at such enormous cost, I bring you a proposal which contemplates the return to individual initiative and private enterprise."

Those who oppose his plan, the President observed, ought "in all fairness" to propose something better.

$15,000,000 Yearly Cost.

However costly the experiment has been, the President observed, "today we are possessed of a vast tonnage, and a conviction of failure," and he considered the proposal he laid down as the best way out of a bad bargain for the government. The cost of such a program as he suggested he estimated would be about $15,000,000 a year, with $30,000,000 the outside figure.

In his address, the President did not go deeply into the details of the plan proposed. He merely pointed out its main features—10 per cent of customs duties to go into a revolving fund, the establishment or conversion of a $125,000,000 fund to lend shipping enterprises, and a compensation scheme based on speed and tonnage.

This latter provision, the President emphasized, would make impossible the enrichment of any special interest at public expense, put an end to government assumption of all losses and leave to private enterprise the prospective profits of successful management.

Substitutes for Rubber.

Combinations of linseed, peanut, rape or mustard oil with sulphur form rubberlike substances, which are said to be used to a considerable extent in the manufacture of india rubber compounds. Pure, unvulcanized india rubber will float, nearly submerged, in water, while the oil substitutes, being slightly heavier in proportion to their bulk, sink.

Decidedly Blue.

The blue and the gray—a woman with her first white hair.

KING'S DAUGHTER WEDS VISCOUNT

Princess Mary of England Now Is Bride of Lord Lascelles, Son of an Earl.

LONDON HAS REAL GALA DAY

Marriage Ceremony Is Performed in Westminster Abbey, and Immense Crowds Gather to See the Processions of Notable Guests.

London, Feb. 28.—Under the happiest of auspices, Princess Mary, only daughter of the king and queen of England, was married today to Viscount Lascelles, who is the elder son of the earl of Harewood.

The ceremony began in Westminster abbey at 11:30 a. m. and soon thereafter the couple were pronounced man and wife while the chimes of Westminster rang out the happy message and vast crowds gave tumultuous greetings.

Rain had fallen throughout the night, seeming to bear out the gloomy forecasts of the weather experts, but the morning broke brightly, and the heavy rainclouds scurried across the sky before a strong west wind.

The sun shone brilliantly as the various sections of the wedding procession started for the abbey.

Soon after their return to Buckingham palace, Princess Mary and her husband appeared on the balcony over the central arch of the palace, to the delight of the crowd gathered there, which cheered the pair for several minutes and waved hats and handkerchiefs.

As they smilingly bowed repeatedly in acknowledgment of the demonstration the couple were joined by King George, Queen Mary and Queen Mother Alexandra, upon which the cheering broke out afresh.

Hundreds of Americans.

The scene of the ceremony within the historic walls of the abbey was one of impressive grandeur, with the king and queen and the entire royal household participating and with all ranks represented in the brilliant assemblage, while outside the abbey enthusiastic popular homage was paid the bridal pair.

The long-awaited day found London crowded with excursionists from all parts of the isles and the continent. Americans also were in evidence, hundreds having made the voyage to gain a glimpse of the great state function.

All these, augmented by native Londoners, most of whom took the day off, crowded into every niche and space about Buckingham palace, along the Mall, in Trafalgar square, down Whitehall and in the precincts of the parliament buildings and the abbey. Many paid high prices for seats in stands or even standing room in windows flanking the way.

Arrival at the Abbey.

Three processions of carriages bearing members of the royal family made their way to the abbey and these personages entered and took their appointed places. Viscount Lascelles, accompanied by his groomsman, Maj. Sir Victor Audley Mackenzie, D. S. O., arrived at the poets' corner door of the abbey and was conducted to the seat reserved for him at the south side of the steps leading to the sacrarium by one of their majesties' gentleman ushers.

Meanwhile a storm of cheering outside proclaimed the arrival of the bride and the king. Mary stepped from her coach, truly a princess in her fairylike gown, combining the sheen of silver, the filmy down of tulle, the sparkle of beads, the dull sheen of pearls and the exquisite colorings of satin and old lace, against which contrasted the wonderful four-and-a-half-yard train, with its silk embroidery and crystal work.

The Wedding Ceremony.

"Lead Us, Heavenly Father," was played as the bridal procession moved up the nave, headed by household officials, the state chamberlain, the dean, canons and choir, comprising forty-four boys and twenty-two men. Then came the bride on the king's arm, followed by the bridemaids, the ladies-in-waitings and the king's suite.

It was about 11:30 a. m. when the solemn service, performed by the archbishop of Canterbury, assisted by the archbishop of York and the dean and preceptor of the abbey, began.

The Sixty-seventh psalm was chanted and the anthem "Beloved, Let Us Love One Another" was sung during the service.

During the ceremony the bride carried an exquisitely bound pink service book, a gift from the queen. The royal bridesmaids were:

Princess Maude, Lady Rachel Cavendish, Lady Mary Thynne, Lady Victoria, Mary Cambridge, Gordon Lennox, Bowes-Lyons, Cambridgeman and Lady May Cambridge.

Care of Paintings.

The pictures in a home are apt to suffer from the lack of attention which in time detracts from their appearance. Oil paintings should be lightly cleaned once a year, being wiped gently with a very fine sponge or chamois leather wet with clear water. Do not use soap or any other cleansing substance in the water. Immediately after sponging polish the surface lightly with a dry silk handkerchief. Gilt frames should be dusted frequently. A camel's hair paintbrush is effective for this. White of egg will remove fly marks.

BUSINESS STILL MAKING GAINS

Nearly Every Industry Shows Slow and Steady Improvement and Confidence.

INCREASED FARM PRICES AID

Reports Reaching the Department of Commerce Indicate Firms Dependent Upon Rural Patronage Are Feeling Improvement.

Washington, March 4.—On the whole the figures received by the "Survey of Current Business" during the past two weeks further emphasize the progress which business has made, compared with six months or a year ago, says a statement issued by the Department of Commerce, bureau of the census. Nearly every industry shows slow and steady improvement and returning confidence.

The increase in the price of farm products is having a far-reaching effect upon industry in general. Current reports reaching the Department of Commerce indicate that the trade of firms largely dependent upon rural patronage is already feeling this improvement.

Distributors continue to purchase cautiously and in small quantities, but in many lines these purchases are being made at more frequent intervals.

In the textile industry figures previously reported showed that both cotton and silk consumption increased in January, compared to the preceding month. Wool consumption, however, the figures for which have become available, shows a decrease from 64,200,000 pounds to 61,973,000 in January; nevertheless, this figure is still more than double the consumption in January last year.

Exports of iron and steel in January amounted to 157,000 tons, the largest since April of last year. Exports of copper totaled 53,130,000 pounds, which was a decrease of over 8,000,000 pounds from December. Imports of tin increased to 8,103,000 pounds and were larger than for any month since 1921.

Exports of both bituminous and anthracite coal declined; bituminous exports at 644,000 tons were only a little more than one-fourth as large as a year ago. The increased production is evidently going into stocks in anticipation of the threatened strikes.

Petroleum production in January reached a new high level of 43,326,000 barrels, which, accompanied by heavy imports and decreased consumption brought the amount in storage to 198,444,000 barrels, the largest so far recorded for any month.

Newsprint paper production declined slightly in January, but, with the exception of December, is the largest for any month since April, 1921. Exports of newsprint increased nearly 60 per cent, reaching a total of 5,073,000 pounds and exceeding any month since 1921. Contract prices showed a marked decline from a month ago and are about 40 per cent less than a year ago.

Contracts awarded for business and industrial building increased over December, both in floor space and value. All other classes of building showed a slight seasonal decline. Residential buildings contracted for in January total 18,083,000 square feet, valued at $75,728,000. This is by far the largest amount of residential building ever recorded for January. Indications point to a big increase in building operations this spring.

Exports of wheat, including flour and grain, amounted to 14,985,000 bushels in January, which is a further decline from preceding months. Exports of corn and corn meal, on the other hand, increased 9,000,000 bushels over January, reaching the exceptionally high total of 19,437,000 bushels.

Exports of both beef and pork remain on a distinctly lower level than a year ago, although pork exports increased to 127,623,000 pounds in January. Cold storage holding of all meats are far below the level of this season in previous years. Stocks of pork products at the end of January were 54,604,000 pounds, compared with 73,659,000 pounds at the same time a year ago. Beef and mutton stocks were proportionately very much less.

Cold storage stocks of creamery butter and of American cheese are also much lower than for the same month either last year or the year before.

With the exception of farm products price index numbers showed a tendency towards lower values in January. In most groups this was limited to one or two points. The Department of Labor's wholesale index for all commodities dropped from 149 to 148 in January.

Due to the heavy drop in retail food the cost of living index, compiled by the National Industrial Conference board, declined to 153, compared to 161 in December and the high point of 205 reached in July, 1920.

2,000,000 for Seed Grain.

Washington, March 6.—An appropriation of $2,000,000 to purchase seed grain for the farmers of the northwest who lost their crops because of the drought last year, was authorized by the house agriculture committee.

Kin of Redmond Slain.

Belfast, March 6.—Max S. Green, chairman of the Irish prison board, was shot and killed in Dublin, a Dublin message announces. Green was son-in-law of the late John Redmond, Irish Nationalist leader.

Something to Think About

By F. A. WALKER

PLEASING OTHERS

THE difficulty of human endeavor, whether it be of mental or physical character, is not work in a general sense, but the doing of work in a manner which shall prove wholly pleasing and satisfactory to the employer.

He wishes such work as he is paying you to do, to be done in his particular way, so that when it is finished it will fit in accurately with his rearranged plans, and produce the results he has in mind.

The man or woman who writes a book, if he or she hopes to make a success of it, must write it to amuse, instruct, entertain, and finally to please the readers.

If the book fails in this respect, the author fails.

* * *

All the difficulties of life are overcome by this art of pleasing.

And this art of pleasing others must be carried out from the highest flight of metaphysics, down to the grading of a dray or the digging of a post hole.

It is not easy to make some natures understand this. The art lies as unseizable to their dull wits as the solution of the fourth dimension.

The genius may be a very wonderful fellow, and do very many remarkable things, but if he be lacking in ability to make people understand, he may at some time or another in his career be lacking of food and raiment.

But, on the other hand, the simple plodder, sincere in his effort to please others, to present the truth pleasantly, in accordance with the accepted usage of common sense, will, through his sanely directed energy, climb to strategic heights.

* * *

The more you analyze success, the stronger will become the conviction that it consists primarily in yielding to those in authority the right of the highway.

The result is that the men and women who habitually do this, who listen to reason, who keep their feet on the ground, can open themselves more clearly to their employers, develop more easily their natural abilities and enjoy more of what makes life truly valuable, not only in the days of springtime, when character is pliant and easy to shape, but all along the days down to the final night of winter.

Kiddies Six

By Will M. Maupin

THE NAME

THEY figured first on Raymond,
Then Clarence, George and John;
They thought somewhat of Eugene,
But none could fix upon.
Some thought was given Edward,
And quite a bit to James;
In fact, they were quite worried
Among so many names.

One good friend wanted Arthur,
Another wanted Paul;
One uncle mentioned Asa,
Another said, "No, Saul."
Grandpa suggested William
And grandma Benjamin;
Then went the list together
And then began again.

They dwelt awhile on Peter,
On Matthew, Luke and Mark;
They argued from the morning
Until the day grew dark.
They argued long and loudly
Until one fateful day
They quickly got together
And named her Charlotte May.

Mother's Cook Book

Oh, wooded streams and silver lakes,
Beloved by moon and star—
For us how much of life and love,
And youth and home, you are!
—Elizabeth Mott.

PINEAPPLE DISHES

FOR dainty fruit dishes, pineapple is one of the most tempting of fruits.

Pineapple Sponge.

Heat three cupfuls of grated or crushed pineapple, add one-half of a package of gelatine soaked an hour in one-half cupful of cold water, take from the fire and set the pan in a dish of chipped ice. When partly cool add the well-beaten whites of four eggs and beat until the whole is spongy and thickened. Pour into a mold and set away to harden. Serve with whipped cream, sweetened and flavored, or with a custard, using the yolks of the eggs, a quart of milk and four tablespoonfuls of sugar.

Steamed Sponge Cake and Pineapple Sauce.

Take angel food, or any plain cake, cut in serving-sized pieces and steam until well heated and soft. Serve with:

Pineapple Hard Sauce.

Beat four tablespoonfuls of butter until creamy, add one-half cupful of powdered sugar gradually until the whole is white and light, flavor with a teaspoonful of vanilla and a cupful of crushed pineapple, drained from its juice.

Pineapple Drop Cookies.

Take one-third of a cupful of shortening, one-half cupful of sugar, one egg, one-fourth of a teaspoonful of soda, two tablespoonfuls of hot water, one-fourth of a cupful of grated pineapple and one cupful of flour. Mix as usual and drop by spoonfuls on a baking sheet. Bake in a hot oven.

SCHOOL DAYS

Uncommon Sense . . .

By JOHN BLAKE

DANGEROUS EXAMPLES

IF THERE were no unfairness, no injustice, no successful crookedness in the world, everybody would succeed without any trouble.

We should all tread the primrose path straight to paradise, with no one to bar our progress.

Incidentally our road would be made so smooth and easy that we would be a pretty poor crowd when we got to paradise, quite unworthy to partake of its delights, and utterly unfit for the society which we should expect to find there.

It happens, however, that the world is fairly well filled with injustice, and that crookedness is sufficiently prevalent to make it worth while to keep our eyes open.

Also men succeed who ought not to succeed, and by devices which would send them to the penitentiary.

Such instances are exceptional, but they occur often enough to be dangerous.

A man engaged in a business which interests almost everybody, recently commented thus on one of his colleagues:

"Nobody takes his word—nobody trusts him. He would cheat his own brother. Yet in spite of all that he makes nearly a million dollars a year, and his business is one of the biggest in the world."

Perhaps this man will meet the fate his merits in time. Perhaps he will not. There are a few rascals who live and die prosperous.

But that is not an argument in favor of rascality. It is not even proof that rascality pays.

For where one rascal prospers a thousand are the victims of their own crookedness.

In this world are far more crooks who could have succeeded had they been honest, than honest men who would have succeeded had they been crooks.

Do not be deceived by the success of a scoundrel. It is not his dishonesty that makes him prosper. It is some talent in him great enough to win success in spite of dishonesty.

In ninety-nine cases out of a hundred the crook will be "met up with" before he is done. Straight, open dealing, respecting and keeping your own word always pays best. The knaves who succeed could have succeeded on a far greater scale had they been honest.

Do not envy or imitate them. Do not be dazzled by their success. That sort of success is not worth having.

THE CHEERFUL CHERUB

By sympathy I live so much
Enjoying other people's pleasure,
And feeling all their grief as well
Though in a moderated measure.

R. McCann

The Friendly Path

By WALTER I. ROBINSON

THE MIDDLE COURSE

IT'S safest to take the middle course.

When one is uncertain which course is the right one when there are three paths ahead, anyone knows that the surest way to avoid a long detour is to take the one leading directly ahead.

The same rule applies to nearly everything one may set out to do in life.

There lies ahead of one in any endeavor three distinct pathways. One may take a conservative, a liberal or a radical way to accomplish his ends. Perhaps either one of the three may bring him to his goal without great difficulties or disappointments. But in this day the liberal course seems to hold the greatest assurances of success.

Certainly it always is best to make sure that one chooses the right path. Careful surveys are essential and one should be able to read the signs blazed along the charted route. But very often we cannot be positive of the right path until we have felt our way along the mountain's side.

With this thought well understood, it seems little less than absolute folly to start plodding along at a snail's gait through the conservative path or to stumble recklessly into the dangers of the radicals' unexplored trail.

Much of the happiness in life is missed by the large number who slowly make their way because of extreme conservation; more lose real enjoyment because they rush headlong into the dangers of radicalism. But it is refreshing to look about and witness the undisputed progress of so many who are neither too cowardly to take a reasonable chance nor still so reckless as to risk everything on a dangerous leap.

It's poor policy either to go too slow or too fast.

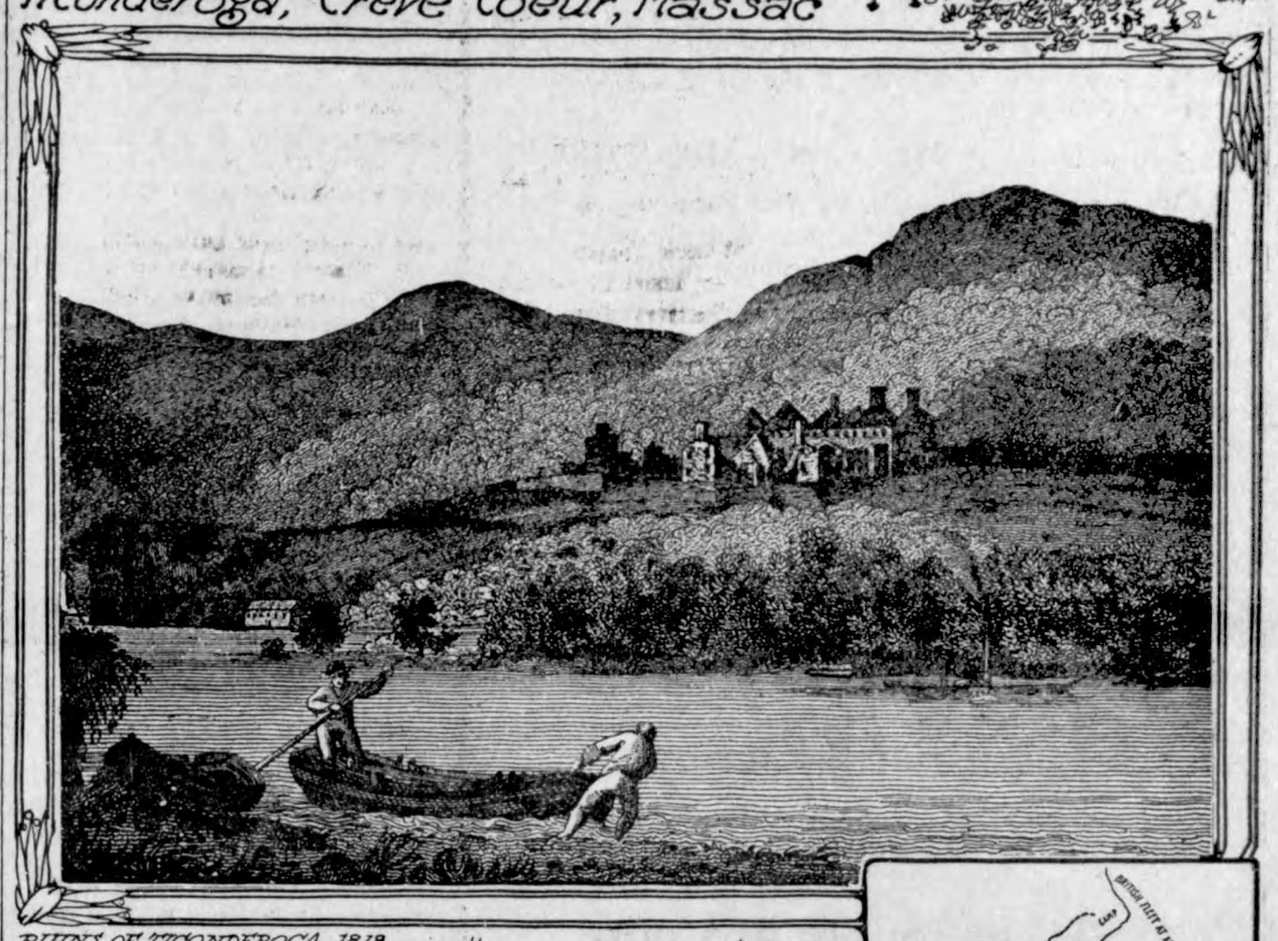
Three Famous American Forts

Ticonderoga, Creve Coeur, Massac



RUINS OF TICONDEROGA, 1818

THREE famous American forts are just now in the public eye. Fort Ticonderoga, on Lake Champlain, immortalized by Ethan Allen's capture, "in the name of the Great Jehova and the Continental Congress," is being restored. Fort Massac, in Illinois, the starting point of George Rogers Clark's wonderful campaign which fixed the western boundary of the United States at the Mississippi instead of at the Alleghenies after the Revolution, is pronounced undamaged by recent floods. The long disputed site of Fort Creve Coeur in Illinois, built by LaSalle in 1681, has been officially fixed.

Fort Ticonderoga is at the point where Lake Champlain receives the outlet of Lake George. It was the one supposedly invulnerable spot on the waterway from the St. Lawrence to the Hudson, "the Gateway of the Great War Trail." Its history is fascinating. It was here that Champlain found the Iroquois entrenched in a rude stockade in 1609. His firearms won victory—and turned the Iroquois Confederacy into the implacable foe of the French, and made this country English instead of French.

The French built the first fort in 1755, at the beginning of the French and Indian War, and called it Fort Carillon. In 1757 it was Montcalm's headquarters. In 1758 Abercrombie made his famous unsuccessful assault in which the noted Black Watch regiment, "who could not go forward and would not go back" was nearly wiped out. In 1759 Amherst forced its evacuation by the French.

In the Revolution it was taken, May 10, 1775, by Ethan Allen and his "Green Mountain Boys." July 5, 1777, it surrendered to Burgoyne. It was evacuated by the British in 1780 and abandoned. Fire devastated it. The settlers carried off its material for their buildings. After peace, Gen. DeWitt Clinton of New York deeded its site, containing 600 acres, to Columbia and Union colleges. Finally the Pell family of New York bought it and are now restoring it, with the co-operation of Col. Robert M. Thompson, father of Mrs. S. H. P. Pell, and of Alfred C. Blossom, architect.

Search of American, Canadian, British and French archives has been made and it is in accordance with the data gathered that the restoration is being made. Many relics have been collected into a museum. The hull of the Revolutionary schooner Revenge lies on the Pell estate.

Fort Massac Safe.

Fear that retaining walls constructed to protect the site of old Fort Massac from the flood waters of the Ohio river had been damaged by recent high water has been allayed by inspection of the walls, according to the state department of public works. Alarmed over reports that the site was in danger, the department caused its examination to be made as soon as the high water receded.

Marking the starting point of the exploits of George Rogers Clark in the Northwest territory, the site of Fort Massac near Metropolis has been under state supervision since 1903, when it was purchased through the instrumentality of the Daughters of the American Revolution. In a coming publication on Illinois' parks and memorials the state says this:

SKETCH FROM FRANQUELIN MAP OF 1682 (*Site of Fort Massac)

TICONDEROGA (1777)

"Fort Massac offered the opening wedge by which George Rogers Clark entered and conquered from the British the expansive Northwest territory, composing the present states of Illinois, Indiana, Ohio, Wisconsin and parts of Michigan and Minnesota.

"This intrepid explorer navigated down the Ohio to Fort Massac, captured the garrison and then proceeded overland many miles with a handful of hardy woodsmen, soldiers from Virginia, to Kaskaskia and Vincennes, wresting from the English those posts, and hoisted the American flag. "Historical accounts have it that the site was first visited by DeSoto in the year 1542, when it was used as a temporary fortress against the Indians. Aaron Burr also stopped at this point in 1805, while en route to the south to establish an empire which was to have absorbed the American republic, with Burr at its head.

"The fort itself was built by Capt. Charles Phillips Aubrey, sent into the Illinois country in 1756 from New Orleans, to care for French interests against encroachments of the British. Leaving Fort Chartres on May 10, 1757, Aubrey reached Massac the same year and drove the first stake on Ascension day; hence the stronghold first bore the name of Fort Ascension. The fort was recaptured in 1765 by the English, who held it thirteen years until its fall before George Rogers Clark. In 1794 the old blockhouse and palisades were rebuilt by order of President George Washington as a protection for American settlers who began pushing westward in great numbers.

The origin of the name, Fort Massac, has not been determined. A legend recounts a massacre by Indians during French occupancy and the taking of the name of Fort Massacre, which later was abbreviated to Fort Massac.

The park has been landscape-gardened, with roads and walks carefully laid out, and a custodian's cottage and recreation hall for the use of visitors have been built. To Clark and his brave men there has been erected a monument.

Fort Creve Coeur.

More than twenty years of investigation has been ended by the announcement at Springfield, Ill., that the historic site of Fort Creve Coeur, on a bluff across the Illinois river from Peoria, has been definitely decided. Fifteen acres surrounding the site has been given to the state, and an imposing marker has been made ready for the formal ceremony of designation. Announcement of the decision by the Illinois State Historical society was made by the state department of public works and buildings.

Contentions have been born, and have lived and died, while this controversy has gradually increased in interest and warmth. All actual remains of the fort, built 241 years ago by the French explorer, LaSalle, had been lost long ago. Many contenders still maintain their land holds the sacred remnants of this Illinois fort.

Owners of the land on which the marker will be placed are Mr. and Mrs. C. H. Wagner. They have deeded the land to the state. Among their most energetic contenders was the city of Peoria, which desired that the marker be put on the Peoria side of the river.

Maps from official archives of the French government at Paris put the fort on the Tazewell side. With that decided, the controversy was still warm. Land owners up and down the river laid their claims.

"The search for the truth as to the exact site," says an announcement by the department of public works and buildings, "was pursued over many years. An examination of all the Illinois histories, both translations and originals, of French writers on the subject and many other books have been made, in order to make the collection of opinions as complete as possible. The Illinois State Historial society finally selected as the actual location of the fort a spot situated on a beautiful bluff overlooking the Illinois river in Fond du Lac township, Tazewell county, south and east of Peoria. This is the site selected some years ago by the Peoria chapter of the Daughters of the American Revolution."

Twilight.

At the equator, where the sun's daily path is perpendicular to the horizon, the earth turns through this zone of twilight in about 1¼ hours. In the latitude of the United States, the average length of twilight exceeds 1½ hours, its duration being greatest in midsummer, when it is more than two hours. At the actual poles of the earth, twilight is about 2½ months in duration. If the earth had no atmosphere, there would be no twilight; the blackness of night would then immediately follow the setting sun.

FATHERS? NIX!

In the holiday seasons when the toy shop windows are glittering with all sorts of splendors, nothing is more pathetic than the group of middle-aged and white-headed folk who elbow the children aside to obtain a glimpse of the railways, the dolls, the boats and all the other delights of the world in miniature. The sentimentalist remarks, "Poor things, they are wishing they had enough money to buy that doll for little Annie or that pony cart for little Alec." Bosh! They are wishing they had enough courage to buy them for themselves and play with them brazenly before a whole family of amateur alienists!—Robert Hillyer in Harper's Magazine.

Umbrella Charm.

Like many other trades, the umbrella merchants have been under a cloud—metaphorically speaking—through the year, but every merchant now takes heart of grace and prays that all good people will soon begin carrying and losing their umbrellas in the old profitable way. Few take precautions against loss, but in a London club one umbrella is notorious for bearing on a gold label the strange device:

"Cursed be he
Who stealeth me."

Someone, attracted by the idea of such a deterrent charm, asked the man who carries this umbrella where he might buy a similar one. He received the somewhat shame-faced answer: "I—er—borowed it."

Time To Paint And Paper--

House cleaning time is close at hand, or you will want to clean up after moving into the new house. Come in and look over our brand new line of—

WALL PAPER IN ALL DESIGNS

Our new Wall Paper is here and we can show you a big line of paper, in plain oat-meal or decorated designs at any price you wish to pay.

All accounts are now due and MUST BE PAID before the

25 Day of March

All accounts not paid by said date will be turned for collection.

The Klemme Co-op Grain Co.

H. G. Miller, Manager

Spring Is Now In Sight

We have only a few more weeks until spring will be with us. When we get a whiff of the spring breezes we will forget the past and look forward to a better time. Hard times doesn't last forever, they never have; so let's all work harder and hard times will soon disappear.

Prices for this year's crop are bound to be on a paying basis for the farmer, and will permitt him of making needed improvements.

We are willing to help all and if the financial part is putting off your building a needed house barn, chicken house or hog house we are willing to talk the matter over with you and make terms that will permit you of building this needed improvement.

NORTHERN Lumber Compa n

MOTHER HOOTCH VERSE

Because she got frisky on bootegger's whiskey
The cow jumped over the moon;
"Wood alcohol" is the doctor's report
And the funeral's Saturday noon.

Sing a song of licker,
Prices very high,
Four-and-twenty jailbirds
Selling rotten rye!
When the rye was opened,
When the hootch was tried
Four-and-twenty customers
Took a drink and died.

Litale Jack Horner sat in te corner
Drinking some bootleg rye;
It made him feel glum,
When it got to his tum
And he took fifteen minutes to die!

Jack and Jill they built a still—
In mystery 'twas shrouded—
Synthetic gin they made therein;
Gosh, but the morgue is crowded!

There was a crooked man
And he had a crooked smile
And he made a crooked living
In a very crooked style.
For he sold a brand of hootch
Of which he was maker—
And ten went fifty-fifty
With the village undertaker.

—By Bert Braley.

HANCOCK COUNTY CLINIC

A County Diagnostic Health Clinic is to be held under the auspices of the Hancock County Medical Society, Friday March 10, 1922, from 9 in the morning until 5 o'clock in the afternoon at ahe court house at Garner.

Two noted specialists will be the examing physicians. Dr. John Peck, chests specialist from Des Moines, and Dr. Dyson Child specialist from Des Moines will conduct the clinic.

Similar clinics are being conducted throughout the state. It affords aan opportunity for anyone wishing to be examined. It frequently happes that a person is suffering with some complaint which he does not think suyiciently important to take to a physician and he discovers thru this general examination that it is more serious than he suspected.

The advice which the examining physician gives at the time serves a warning which enables the patiena to correct their condition in such a way as to avoid such same disease as Tuberculosis. Iactive cases may at any time be transferred to active cases by weakened physical condition, such as over work, on hanging colds, influenza, pneumonia, measles, pleurisy. in faca any disease thata materially weakens the system.

The noted doctor, Louis C. Boisiniere, says:

It is generally recognized that most adult persons are infected with tuberculosis in childhood or early youth, anyone may potentially become actively tuberculosis. The infection remains latent and is not dangerous in the great majority of persons.

Influenza, however, not only lowers our general resistance to disease but directly attacks all of the safe guards that atûre has provided against tuberculosis. It is a most poaent factor in the production of active tuberculosis. It is analogous to measles in children, as both frequently lead to tuberculosis.

In view of these facts, it is well to bear in mind that every case of influenza not followed by a complete restoration to previous health within a reasonable short time should be suspected of having active tuberculosis unless it can be proven otherwise.

Tuberculosis IS curable and preventable. Most often the infection of children comes from tuberculosis parents. This accounts for saying that consumption runs i families. T. B. is ever inherited. Special reasons for medical examination are:

If you had grippe, influenza, pneumonia.

If you have been exposed to tuberculosis.

If you have ever had tuberculosis or if you tirê easily.

If you catch colds easily.

If you cough or clear your throat often.

If your appetite is poor or "finicky."

If you are losing weight.

If you are nervous or irritable.

If you have afternoon fevers.

If you spit blood.

If you have pain in the chest.

No one of the above symptoms mean tuberculosis but any one or more of them should cause intelligent persons to seek the advice of a competent physician.

Miss Isabel Kelleman state nurse for the Iowa Tuberculosis association is here to conduct the preliminary work for the clinic.

Any one wishing to make an appointment or desiring further information phone 143 Garner. Miss Ferleman, Red Cross Nurse.

LIBERTY TOWNSHIP NEWS

Last Monday was scholl elecction day and we presume that all of the schools in the township elected directors. Our attention was especially drawn to the election which took place at School No. 8. Fourteen voters were present and ten voters cast their ballot for the present director. There was also a "side-show in connection, which we beleive the attendants will testify to, was equal to a first class vaudeville. It may not be amiss to mention the main character, was the individual living (censored by editor).... to the place mentioned. We beleive that everyone will agree that the public place is the wrong place to settle personal disputes.

A basket social was given in the basement of the church last Friday evening. There was a large crowd present. Quite a number were out from Klemme and in fact about half of the baskets that were sold came from there; now that surely isn't speaking very well for the Liberty township girls. There were at least a half a dozen girls there who should point at themselves the finger of scorn. About $11.00 was raised frfom the baskets and about $12.00 from the sale of sandwiches and coffee. Mr. Wellemeyer of Klemme sold the baskets.

Herman Paul returned from St. Louis last Friday after a couple of weeks absence.

Emery Schaefer made his weekly trip to Garner Saturday afternoon to take musical training.

There has not been much moving going on in this community this spring as there usually is.

GOODELL NEWS

The Goodell people gladly welcome the Thos. Cashman family back to their old home.

Muc moving has been done this week.

A number of friends of Adelaide nEgeseth assembled at her home Thursday night to help her celebrate her sixteenth birtday. Games and cards were played until 11:00 o'clock wen a sumptious lunch was served by the hostess' mother. All present thoroughly enjoyed themselves.

The Earl Clark family have moved into the rooms west of the hotel.

All present at the dance held at the Elmer Boren home report a good time.

Avis Wilson has been on the sick list this week.

Miss Quinn spent Saturday and Sunday with her parents at Britt.

Jay Griggs was a Garner caller on Friday.

Maud Griggs entertained her Sunday school at her home Friday evening.

Miss Thora Carpenter was a Belmond caller Friday.

The Hoot Owls enjoyed a party at the Rank Buss home Tuesday night.

A few from here attended the dance in Belmond Wednesday night.

Mrs. Jay Griggs has some real Easter Chicks that hatched last week.

Helen Dow spent Saturday and Sunday with her parents at Armstrong, returning Monda.y

Lloyd Carpenter is the proud owner of a new Ford Coupe.

Margaret Kearney spent Saturday with Myrtle Schoenwetter at Garner.

Father Eardley of Belmond was a Goodell caller Monday.

Leslie Johnson of Rake, is visiting at the Carl Engeseth home.

Goodell High School Notes

Wava Bachman was absent from school Friday.

The Seniors are now working on their class play.

Prof. Nelson was called to Rowan one day last week to judge the Declamatory Contest.

The Seniors received their class rings Monda. They are very pretty and have a large onyx set.

picture taken gHtul heo. h- erB

Te whole High School had their picture taken Monday—did we hear the camera crack? No!

Don Estelle and Francis McNulty were absent Monday.

Wava Bachman was absent Monday.

Mrs. Miller served as a substitute for Miss Dows Monday.

Nova Wilson was absent all of last week.

Thora Carpenter was absent Friday.

Thursday morning we discovered Harold Savogue behind a pair of dark goggles. What's the matter, eye sight failing.?

Mary Sullivan visited school on Thursday afternoon—visitors are always welcome.

How about it, have you any suggestions for the good of your community? Let us hear from you, you are welcome to use the columns of this paper to give expression to your ideas.

SEWING WANTED—Mrs. Gilbert Schafer. 2tf

Store News-

Carpenters have been atwork this week remodeling the Balcony for the New Millinery Department, and the New Hat Stock will be unpacked early of next week.

In addition to iMllinery, we will also do Dressmaking, Cleaning and Pressing in this new department. Bring us all of your work in this line; we guarantee satisfaction and will give all work prompt attention.

Heretofore the two Barber Shops of our city have taken in work for Cleaning and Pressing for out of town firms; today they have turned this work over to us, and all should be brought direct to our New ilMliner Department and not to the Barber Shops. We appreciate very much this friendly co-operation from our Home Town Barbers, as it will mean better service for our community to have Cleaning & Pressing done at home. The Barbers have also turned over to us the laundry work.

F. O. B. Detroit

The president of the Ford Motor Co.

Mr. Edsel B. Ford, Says:-

"We are taking advantage of every known economy in the manufacture of our products in order that we may give them to the public at the lowest possible price, and by so doing we feel that we are doing the one big thing which will help this country into more prosperous times. People are interested in prices, and are buying when the prices are right."

The enormous demand for Fords proves that Mr. Ford is right.

For reasonably prompt delivery, place your order now.

Terms if desired.

Olaf M. Twedt Company

Going out of Business

As we have sold our Implement Business to Paul Stille who will take possession March 15 at which time an invoice will be taken.

We Are Still in Business

We inviie all our old customers to call on us. If you are in need of machinery of any kind we will be there to give you service as in the past. Our machine line is complete and up-to-date.

We thank you for your pleasant business with us in the past and hope you will extend the same cordial relations to our successor.

Yours truly

W. M. Baack

Garner Buick Co.

Battery Repair Service

We pay transportation charges on all out of town Battery Repair Work. Send us your Battery for EXPERT REPAIRS.

Exide Storage Battery

EXIDE STORAGE BATTERIES—to replace the old one that is not worth repairing.

Welding and General Repairing

We also do WELDING and GENERAL REPAIRING. Every job is guaranteed.

Goodyear and Miller Tires

GOODYEAR and MILLER TIRES at prices lower than ever in the history of theh rubber companies.

Buick Cars and G. M. C. Trucks

Come in and ask us about the G. M. A. C. Financing Plan—Buy a Buick with a small payment down, and balance in onMhtly Installments at a low rate of interest.

Free Crank Case Service

Drain out that old oil and fill with MOBILOIL. We have the correct grade for your motor.

METHODIST EPISCOPAL CHURCH NOTES FOR THE WEEK

Time of Services Eack Week

Morning Worship .... 10:00 A. M
Sunday School ..... 11:00 A. M
Evening Worship ..... 7:30 P. M.

A cordial invitation is given you to attend our services.

Choir Re-organizing

Good singing has always been one of the pleasing features of the church and we try to make all our services bright and brotherly.

The choir is under process of re-organization. Choir practicce will be resumed this week.

Baptism—A Duty

We remind our people of the privi-ledge and duty of having their children baptised. This can be done at any service; please notify the pastor.

The Sunday School Invites You

There is a vacant place in the Sunday school waiting for you. The Superintendent and the Pastor will be glad to welcome you.

—Arthur B. Gedye, Pastor.

Miss Lena Bergmann, daughter of Rev. and Mrs. W. C. Bergmann, came fro Morningside College at Sioux City Tuesday morning, being called here by the serious illness of hehr sister, Edna. Mrs. Kate Thurow, sister of Mrs. Bergmann, and Mrs. Emily Siegrist, sister-in-law of Mrs. Bergmann and both of Charles City came Tuesday, being called here by the illness of Miss Edna Bergmann.

A few young people from Klemme jitnied out to Liberty township church last Friday evening to attend the Public Auction (basket social.) A fine program was given, and sandwiches and coffee were sold to those who had not bought baskets. Art Wellemeyer did the yelling for them and sold the baskets.

A contest started last Sunday evening in the Epworth league of the First Methodist church. As a little variation from the ordinary "Red and Blue" form of contest, the colors worn by the opposing sides are purple and pink. Miss Geneva Schuldt the 1st vice-present is the leader of the Purple side and Miss Glenna Gruetzmacher, the 2nd vice-president is the leader of the Pinks. At the end of the meeting Sunday evening, the score was 25 to 21 in favor of the Purples. Much enthusiasm s being shown by the opposing sides, for neither side cares to be the looser—which means that they will have to "feed" the winners at the end of the contest (in about two months.) Geoo. Bergman led the League meeting Sunday evening, which proved to be interesting and inspirational to the Leaguers. Glenna Gruetzmacher is the leader for March 12.

Gram & Schultz

Please Settle Up!

FARMERS; You have received good prices for your hogs, cattle and corn now for some time.

We have been very lenient and extended liberal credit while low prices existed but now that prices are more in favor of the farm ef we expect an early settlement of all accounts which are due.

We aim to keep our accounts within the 90 day credit limit, which is very liberal. If your account has reached that limit it is then due and we ask you to please call and settle.

Farmers Lumber Co.

JACK FROST

ONE clear, cold night Jack Frost looked out over the land from his home away up North. "I am going to keep out of sight tonight," said he. "I will go from tree to tree and house to house and I will go so softly that no one will suspect me and spoil my fun."

Jack Frost was in a mischievous mood and bent upon having what he was pleased to call a good time. "I guess people will open their eyes in the morning," he said, as he glided up the side of the mountain.

Jack Frost rolled in the snow until he was white and sparkling, not at all the glistening Jack he was usually when he went abroad. "Now for the fun," said naughty Jack; "I will begin with the little trees."

In a few minutes the trees were all frosty looking; then to the big trees he went and covered them, giving the tips of some of the branches a dash of his old-time brilliancy; and when the moon was up it looked as if some one had hung diamonds on them.

Jack could not help making things beautiful even when he was bent upon mischief, but the poor trees had not expected his visit and most of them were spoiled.

Then Jack crept along to a singing brook, rippling softly in the moonlight, and here the bad fellow threw over it an icy cover and stilled its voice, and the jolly little brook looked through its glassy roof wondering what happened when only a short time ago it was so happy.

"I think that will do for outside work tonight," said the mischief-maker. "Now I will look inside the houses, and see what I can find to do there," but he could not resist the temptation to paint his frost work pictures on the windows, temples and flowers and birds and tall trees.

Then through the rooms he crept and on a table in one room Jack spied a vase of flowers. He touched it softly and snap, snap, the pretty vase fell to pieces, but the flowers stood beautiful in the ice which had once been water.

"They will be surprised when they see that," said bad Jack Frost, "and now I know there must be something worth while spoiling in the dining room, but there in the fireplace was a log of wood which was still burning. Jack felt its warm breath and quickly ran into the kitchen.

"My, it is lucky I got out of there," said he. "I wouldn't live long in a place like that. Now I will take a look in the pantry; there must be something I can do in there.

"Ah, a pitcher of milk and I am thirsty." His frosty lips touched the milk and soon it was frozen solid, and when this was done Jack saw a basket of fruit on the floor close by the pantry door.

"They thought the fire would keep in the stove all night, but it didn't. They left the door open thinking I would not dare to come in," said Jack. "Won't they be surprised in the morning when they find this fruit hard as stone?"

He touched each with his frosty finger tips, and just as he was thinking the water pipes in the kitchen would be the next upon which to work his frosty tricks he heard a sound that made him tremble with fear.

It did not take him a second to run out of the house, for Jack knew the sound. It was the crackling and snapping of the new fire in the kitchen stove. He had been so intent upon doing mischief that he had overstayed his time and it was daylight. Jack Frost is a fearless fellow, but there is one thing from which he will always run, and that is a good hot fire, so he could not stay to see if every one was surprised by his visit, which served him right for spoiling so many things. Don't you think so?

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

THE BRIDE'S GIFTS

Thanks, good friend, for thy much goodness.—Shakespeare.

WHETHER a bride receives one present or several hundred, she must write a personal acknowledgment for each, and this must always take the form of a cordial note and must never be couched in formal or stereotyped phrases. This task of writing gratitude letters must never be delegated to another person, save in the case of illness, when a sister or other relative or close friend may write notes by way of acknowledgment; and even then the bride should, if possible, write a personal note of gratitude as soon as she is able to do so. The acknowledgments should never be by the bridegroom.

There is a growing feeling against the present custom of lavish gift-giving at weddings. It is not infrequently something of an embarrassment to the guests who feel that they must give expensive presents, and quite as embarrassing to the brides, who, if they issue many invitations to a large wedding, find themselves after their marriage the possessors of a collection of household articles, silver, bric-a-brac, crystal and miscellaneous possessions that are more of a burden than a satisfaction—things that do not correspond with the rest of their furnishings and things that they would never have selected had they themselves been consulted. The only way to avoid receiving a collection of presents is not to have a large wedding.

The custom of having a room set aside at the time of the wedding, and there having the gifts displayed with the cards of the givers attached, has come in for considerable criticism. It might prove embarrassing to the guest whose offering was very small to see it tagged beside the far more costly present of some one else whose real affection for the bride was considerably less than his own. If you do have the gifts on view, do not have them tagged. Many persons prefer not to have this sort of exhibition at all, but a day or so before the wedding to ask very close friends in to see the presents.

"What's in a Name?"

By MILDRED MARSHALL

FACTS about your name; it's history; meaning; whence it was derived; significance; your lucky day and lucky jewel

MINNIE

THE simple little name of Minnie has a most devious history. It originated away back in Teutonic mythology, where, according to the story, when creation began, the cow Andumbla licked out of the stones a man named Bur, who was the grandfather of three primeval gods, Odin, Wili and Ve, and it was these three who gave life to the first pair of human beings. Will was the Will of man. His name echoes down through the ages of Norse mythology in various combinations, which savor boldly of Valhall and prefaces many other names.

The Frank Queen Bilichilde was really Willihilda, meaning resolute battle. Her name was popular among Norse maidens and even had vogue in Teutonic countries. Willhelm was "made in Germany" and signified "resolute helmet." The feminine counterpart of this name was Wilhelmina. Always popular in Germany, it was adopted by England and penetrated Holland, where the most famous modern woman who bears the name is Queen Wilhelmina, beloved of the Dutch.

England found the name a trifle cumbersome in spite of its regality and it gradually changed under British influence to Wilmet, Wilmot, Mina and finally the popular diminutive Minnie. America has reached out and extracted Minnie from the numerous derivatives, discarding almost all others, with the occasional exception of Wilhelmina, which invariably changes to "Willie" or "Billie" under our preference for diminutive.

France makes the name even more ponderous by calling it Guillerume, Guillemette, Minette, Guilette, and Mimi. In Spain Guillemina is popular and in Italy, Guglielma. Wilhelmine is preserved in Germany, interchanged with Minna.

The regal diamond is quiet little Minnie's talismanic stone. It promises her fearlessness, invulnerability, and victory in any endeavor. To dream of it signifies victory over enemies, and to wear it on the left hand is said to enhance the love of a husband for his wife. Saturday is Minnie's lucky day and six her lucky number.

Elizabeth North

Handsome Elizabeth North, only seventeen years old, is a full-fledged "movie" star. She has become more popular recently because of playing the principal role in a well-known picture. Miss North has a mania for collecting daggers. At present, she is said to possess 300 swords and knives.

TAILLEUR IS BACK

Outfit Returns to Favor; Now Rivals the Coat Dress.

Question of Skirt Length Is an Individual Matter—Colors Promise to Continue Subdued.

The tailleur has won its way back to popularity and now rivals the coat dress. The hip-length jacket, straight, belted low and slightly bloused, has triumphed. Next in interest comes the straight sack coat, beltless, shorter and more youthful than the one just mentioned. Kasha and tweed are the dominant woolen materials, though the twills and serges will always have their place. It is interesting to note that tweed is as much seen today on Fifth avenue, New York, as in the country.

Capes are persistent and one cannot overlook the charm of the cape-completed dress, which is a means of emphasizing vivid color contrasts. For instance, dark gowns may be belted with red and have their capes lined with this color, or a softer note may be carried out in beige and brown. Most capes reach half way between the waist and knee, but some only touch the hip and are attached to the shoulder at the back.

The question of the length of skirts is, to a great extent, an individual matter, which should be decided first by the proportions of the figure and then by the type of gown. It is not to be denied that skirts are longer, though, in general, this lengthening has not been exaggerated. Women have been quick to recognize that there is no "fashionable" length, that one cannot give a definite measure of so many inches from the ground which will be invariable for all figures. Dressmakers agree that the revival of the really long skirt for street wear would be a mistake. For the tailleur, for the street frock, for the walking coat, skirts are about nine inches from the ground and for afternoon or house dresses five inches. Evening gowns, on the contrary, have all become long except for the very young woman.

Colors for street costumes will continue subdued. Black still holds first place, though brown is a close second, while, as the season advances, we will undoubtedly see the beige and gray shades predominate.

SMART THREE-PIECE OUTFIT

Quite stunning and serviceable is this three-piece outfit for summer wear. It will be noted that the Paris length skirts will prevail the coming season, if this model wins favor.

IT'S NOT STRAW—JUST WOOL

Wool hats are to be the rage among the young misses this spring. This model is trimmed with crocheted flowers, and promises to be popular.

TO WAR ON TRAINED DRESSES

Now Is Time to Band Together Against Long and Full Walking Skirt, Writer Asserts.

Now is the time to decide against trained street dresses, says a fashion writer in the Boston Globe. Now is the moment to band together against them. American women have already done an excellent work in loudly protesting against long and full walking skirts. I do not mean trained dresses, but those which pass the ankles and which must inevitably sweep up mud or dust unless they are held up. And is it possible that sensible women who value smart appearance can contemplate holding up their walking dresses?

A specially smart teagown recently seen on the Parisian stage had a draped, ankle-length dress made of midnight blue charmeuse, with very beautiful fichu draperies made of fine black lace.

The ends of these draperies were very long and they were crossed at the back, held down by moonlight-jet clasps and then allowed to trail on the ground. This was a specially simple and elegant dress and the fischu draperies might be arranged over any satin or crepe de chine gown one might have on hand.

Some of the trailing draperies or ribbons are finished off with ostrich feather plumes or with heavy silken tassels. I have seen feathery fringes of uncurled ostrich feather arranged as waist girdles and clusters of shaded tips appear, instead of flowers, at the breast and hip of dinner and tea gowns alike.

A winsome little indoor robe was made of ash-gray crepe de chine, closely plaited from neck to hem.

The waist line was very long and there was a beautiful silver girdle, which made the corsage pouch a little back and front. The sleeves were immensely wide and plaited like the dress. Then at either side there were waterfall frills of pinkish mauve double-face satin. The one touch of color in a very quiet and demure toilette.

VELVET GOWNS FOR EVENING

Delightfully Simple Models That Accentuate Charm of Youth Offered in Variety of Colors.

The vogue of the midwinter season is described through the medium of velvet evening gowns, and whether one is eighteen or fifty the demand seems to be the same. Delightfully simple models that accentuate all the charm of youth are offered in a wondrous variety of colors, black and other dark shades being favored by the matron. The style of the frock depends on the becoming lines selected rather than the trimming, and chiffon velvet is the favored fabric.

One of the best looking gowns of the season is cut from white chiffon velvet, and is simply a sleeveless slip-on dress with oval neck and rather large armholes. A silver girdle marks the low waistline, and silver grapes hang down the side. A broad silver ribbon girdle loops below the skirt. With this gown silver sandals and silver laurel leaves in the hair are worn.

The same model might also be copied in flame red velvet with girdle of the same material. Gold or flame slippers might be worn, with dull gold laurel leaves in the hair.

Black chiffon velvet with girdle of silver ribbon and grapes is most attractive, and one might wear silver sandals with this costume.

A smart frock that breathes of the Spanish influence is cut from chiffon velvet in sapphire blue, black or American beauty. A long, tight bodice, pointed on the stomach, is made with short puff sleeves that drop off the shoulders. This bodice is attached to a full skirt with distended hip line, wired to place. Velvet rosettes and trailing corsage ornament of morning glories lend much charm because of their contrasting colors.

Side Lights on Gingham.

Gingham is of more attractive patterns than ever with an increasing tendency to use it for draperies, casements and other household adornments. One comes gradually to the use of gingham in fine checks for lingerie. It makes its debut in pipings and bandings on white lingerie, but is expected soon to fashion whole garments. A new type of uniform is being worn by the pupils of a southern school. It consists of a gingham frock with a hem to the knee. Under this bloomers are worn in place of petticoats and an ideal costume for both study and play hours is the result.

Evening Gown.

A smart evening gown of white satin, made with draped but fitted waist and full gathered skirt, seen at a fashionable assemblage, had as its only touch of color a water lily caught at the waist line on one side, with a streamer of yellow tulle extending below the hem of the skirt.

Use Chain Stich in Darning.

Do not use darning stitches when the heels of your stockings become thin at the line of the top of your low shoes. Use a spool of silk and make parallel lines of fine chain stiches. This matches the stocking mesh so well that it can scarcely be detected.

DAIRY POINTS

ARE IN MARKETING BUTTER

Insure Delivery of Satisfactory Product to Consumer It Should Be Well Wrapped.

Successful parcel-post marketing of tter requires that exteme care be en to insure the delivery of a satactory product to the consumers, specialists of the United States partment of Agriculture. The folving are a few of the important siderations to be observed to mar- butter successfully by parcel post: t should be properly packed in neat d attractive packages.

The shipping container used should ply protect the butter from deterior- on and damage.

The packages should bear the adss of the sender and be properly dressed to the customer.

The most expeditious mail service m the mailing office should be used insure delivery in the best condin.

Postal regulations provide that but- will be accepted for mailing to all ces to which, in the ordinary rse of mail, it can be sent without illing when suitably wrapped or insed or when packed in crates, es, or other suitable containers to vent the escape of anything from package, and so constructed as properly protect the contents.

OW TESTER AIDS DAIRYMAN

sconsin Farmer Woke Up by Results of Expert Obtained in Working With His Cows.

repared by the United States Department of Agriculture.)

"I just wish to write a few words let the farmers in general know at I thought of cow-testing assotions a year ago and what I think them now," writes a Wisconsin ryman to a field agent of the dairy ision, United States Department of riculture. "About a year ago I was proached on the subject, and, after me talk, I said: 'Go ahead; if you n shoot in forty or fifty dollars I n, too.' So in April, 1920, we organd; and to top it they elected me cretary of the association. I did t think much more about it until tester came to my place the first ne, and when I saw him at work I mmenced to wake up.

"I had two cows that had freshened out three weeks before that, and h of them had heifer calves which ntended to sell for veal; but after

ying Feed for Boarder Cows Is Like Pouring Water Down a Rat Hole.

test was made I saw that those cows were making more butterfat the month than any of my other s. I decided to keep the calves, further took interest enough to gh the milk from each cow in my d; and now those two cows are the top of the list for the whole ociation.

"You may ask, what about those calves? Well, if you have $300 might get them; but not for less n that, even if they are grades. es testing pay? Well, I will say ; and if I can keep the association ng next year, you bet I will."

ALUE OF TEST ASSOCIATIONS

ormation Obtained by Members Enables Them to Weed Out Unprofitable Animals.

There is plenty of evidence on file the United States Department of riculture to convince anyone of the ue of cow-testing associations as a ans of developing profitable dairy rds. In all these associations recds are kept of the amount of milk oduced and feed consumed by each w, and with this information the mbers of the association are able weed out the poor producers of the rd to make room for the heifer ves of the cows that give the larg- production of milk and butterfat. is practice, together with the use purebred bulls, is the best and sur- way of building up the dairy herd, dairy specialists of the depart- nt.

300-Pound Cow Best.

t is much cheaper to milk and care one cow giving 300 pounds of butfat in a year than it is to milk and e for three cows giving 100 pounds butterfat each, and the 300-pound w will not eat as much as the three 0-pound cows.

Shelter for Dairy Cows.

t isn't difficult to put a barn or d in condition for dairy cows. The in essential is to provide a tight f, a dry floor, and to admit fresh

FARM LIVE STOCK

SWINE SANITATION BY FILM

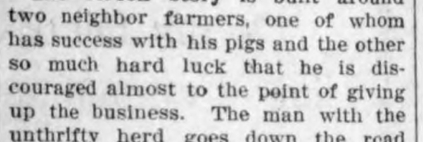
Roundworm Causes Great Losses Each Year to Hog Growers—Parasites Shown Growing.

(Prepared by the United States Department of Agriculture.)

The life and adventures of a worm would not seem to be promising material for a movie scenario, but a film recently issued by the United States Department of Agriculture proves that the doings of such a lowly organism as the roundworm that infests the intestines of swine may be absorbing. Ascaris lumbricoides is the scientific name for this parasite that causes great losses every year to swine growers, and the title of the educational picture is "Exit Ascaris."

The screen story is built around two neighbor farmers, one of whom has success with his pigs and the other so much hard luck that he is discouraged almost to the point of giving up the business. The man with the unthrifty herd goes down the road to see the successful hog raiser about his troubles and is told that roundworms are the probable cause of his failure. But he is skeptical and remains unconvinced until a federal veterinarian is called in to diagnose the case.

The veterinarian brings a high-power microscope and sets it up on a box in the hog yard where he shows the farmer and his neighbor that the soil of the lot is badly infested with the minute eggs of the roundworm. The eggs with the squirming young worms plainly visible within the walls are shown in the field of the microscope that is reproduced on the film. Then the entire life history of the worm is shown, from the time the egg is swallowed by the unwitting pig until the parasite is mature and one of hundreds in the intestines. The growing worms are shown to the owner right in his own sick pigs where there are plenty of specimens in various stages of development from the very



One Little Pig Had Worms, the Others Had None.

small, newly hatched forms up to those that are full grown and more than a foot in length.

This film, "Exit Ascaris," will be sent to extension workers and field men of the department and the state agricultural colleges and to farm bureaus. Other organizations that are interested in improving the swine industry may get reels when they are available, and prints of the film may be purchased at cost by anyone who cares to own it. Inquiries should be addressed to the United States Department of Agriculture, Washington, D. C.

MIXED INFECTION IN SWINE

Hog Industry Would Be Better Off if More Attention Given to Cholera, Says Expert.

Mixed infection in hogs is receiving too much notoriety. This name was invented by a biological house for the purpose of putting a new bacterin on the market. The new bacterin is supposed to prevent several of the complications of hog cholera, such as swine plague. From a scientific standpoint, the term "mixed infection" means nothing. If more attention were given to hog cholera and less to "mixed infection," the hog industry would be better off.—Dr. G. S. Weaver, South Dakota.

FEED FOR FATTENING LAMBS

Animals in a Dry-Lot Should Have Shelled Corn Twice Daily—Allow Plenty Salt.

To fatten feeder lambs in dry-lot allow them each a pound of shelled corn twice daily, two pounds of corn silage, with about one-sixth pound of oilmeal with the silage, and plenty of clover, alfalfa or soybean hay in the afternoon. Allow plenty of salt.

For growing lambs a good ration is made of equal parts of corn, oats, bran and oilmeal. Furnish plenty of good hay.

PROPER EXERCISE FOR EWES

Part of Roughage Should Be Fed in Field at Some Distance From the Barns.

Breeding ewes should get enough exercise. One of the causes of weak lambs is due to the fact that ewes have not adequate exercise. When it can be arranged, at least a part of the roughage should be fed in the field at some distance from the barns or the shed, and the ewes should be out every day that the weather is fair

STRAWBERRY ONE OF BEST FRUITS

Plants Are Easily Handled and Can Be Purchased at Small Cost From Nurseryman.

REQUIRE VERY LITTLE SPACE

May Be Grown in Hills or in Narrow or Wide-Matted Rows—Give Frequent Cultivation and Hoeing During Season.

(Prepared by the United States Department of Agriculture.)

Strawberries are so easily handled and require so little room, that if only one of the small fruits can be grown they should be the one selected. New plants may be purchased at small cost from a nurseryman, or perhaps may be obtained from a neighbor.

Strawberries may be grown in hills or in narrow or wide matted rows, says the United States Department of Agriculture. For very small areas, plants set in hills close together will no doubt produce the most and largest fruit, but will require more care than matted rows.

For hill growing, set the plants one foot apart in the row and have the rows just far enough apart to cultivate easily, say from two to three feet; or set rows a foot apart in double rows and have a space of two or three feet between the double rows. Keep all runners cut off and give good cultivation, so as to make extra strong plants. Some of the choicest varieties for hill culture are the Marshall and Chesapeake of the single crop kind and the Superb and Progressive of the everbearing varieties. The everbearing varieties will no doubt be most satisfactory for hill culture.

Starting for Matted Rows.

To start matted rows, set the plants 18 inches apart in rows from three to four feet apart. For a narrow matted row, train the first runners along the row, covering about a foot in width, and cut off all later runners. From four to six new plants from each plant set will make a narrow row. For wide matted rows, save enough new plants to make the row two feet wide, or more, as desired. Do not let the plants crowd each other; have them four to six inches apart.

Set strawberry plants early in the spring, if possible, so they will get the benefit of spring rains and make a strong early growth. Trim off the dead leaves and all but one or two of the live ones and cut the roots to about

Everbearing Varieties Are Most Satisfactory for Hill Culture.

four inches long. Spread the roots somewhat and set the plants just as deep as they were before they were dug. Be especially careful not to set them deeper and do not get earth over the growing tips, for this will probably kill the plants.

Give newly set strawberries frequent cultivation and hoeing during the entire season to keep down the weeds and make strong plants for fruiting the next year. Pick off all blossom buds which appear except in the case of fall-bearing varieties, on which blossoms may be left after August 1 to fruit in the fall. When the ground freezes cover the plants or the entire bed with about two inches of straw or other vegetable matter free from weed seeds. Coarse strawy manure, with the fine portions shaken out, is excellent for this purpose. The object of this winter covering is to keep the ground from freezing and thawing with each change in temperature, because this freezing and thawing will slowly lift the plants out of the ground.

Nitrate of Soda Helps.

In the spring when the plants begin to blossom spread nitrate of soda along each side of the row, using one pound to 80 feet of row. If the ground has not been mulched, cultivate and then mulch with vegetable matter between the rows, so as to conserve the moisture from the spring rains.

If the bed is to be saved for another year, rake off the mulch as soon as the crop is gathered, and hoe or pull out the older plants, leaving only enough of the younger ones to send out runners to make a new narrow or wide matted row, as desired.

Old beds may be cleaned up, as just mentioned, by hoeing or plowing the spaces between rows and leaving the youngest plants in the row. It is generally best, however, to start a new bed every second year.

LET TURNIPS FOLLOW SOME EARLIER CROP

Good Stand Depends on Weather and Soil Conditions.

Customary Method Is to Sow the Seed Broadcast and Trust to Luck for Good Yield—Store in Pits or a Cool Cellar.

(Prepared by the United States Department of Agriculture.)

Throughout the greater part of the North, the old settlers say, "Plant turnips the 25th of July whether wet or dry." While this is not absolutely true, it is customary to plant turnips the latter part of July on land from which an early crop of potatoes, beets, or some other early vegetable has been removed. The securing of a good stand of turnips depends, first, upon having the soil in excellent condition and, second, on weather conditions at the time of sowing the seed. Either extremely wet or prolonged dry weather will greatly interfere with getting a good stand of turnips.

The usual custom is to harrow the ground to a smooth, even surface, then sow the seed broadcast, trusting to

Turnips Can Be Planted After an Early Crop of Potatoes, Beets or Some Other Vegetable.

natural agencies to slightly cover it. If a light shower falls shortly after the seed is sown, this will not only cover the seed but give the plants a good start. Sometimes turnips are planted in rows with a seed drill and cultivated. This method is desirable, especially where the crop is grown in a small way, but the customary method is to sow the seed broadcast and trust to luck to bring a good crop.

Turnips may remain in the ground almost until it is cold enough to freeze the soil about them. If left too long, however, they become pithy. The usual method of saving turnips is to first pull them and throw them in piles, then with a sharp knife cut off the tops about one-fourth inch above the turnip. The turnips can then be stored in pits, being covered first with straw, then with earth, or placed in a cool cellar, the same as for Irish potatoes. Turnips in the pits will not be injured by moderate freezing, provided they are not disturbed while frozen. It is best, however, to place enough straw and soil over them to prevent them from freezing to any extent.

IN TAKING FARM INVENTORY

Miscellaneous Collection of All Kinds of Supplies Should be Listed Together.

On every farm at inventory time there will be found a miscellaneous collection of all kinds of supplies, such as purchased feeds, seed, fertilizer, twine, nails and lumber. These, together with the amount of manure on hand, are all listed under the heading "Supplies," according to inventory methods worked out by the United States Department of Agriculture. Nails, bolts, screws and the like can well be listed as one item, regardless of varying sizes and kinds, giving the approximate number of pounds. Where a definite system of carrying such shop supplies is in use, as is the case on some of the well-organized, large farms, the quantities of the different items of this nature are easily counted or weighed and appraised accurately.

This kind of property, like machinery and tools, has been bought by the farmer and should therefore be appraised at cost, plus any expense incurred in getting it to the farm. For example, if a ton of bran is bought for $44, $1.25 spent for freight on it, and 75 cents' worth of man and horse labor needed to haul it from the station to the farm, the appraisal should be made at the rate of $46 a ton.

IMPORTANT ORCHARD SPRAYS

Insecticides Are Made Use of for Killing Insects and Fungicides for Diseases.

Sprays for orchards are divided into two classes—insecticides and fungicides. Fungicide is the name denoting a spray used for diseases caused by fungi. Insecticides are divided into three classes, sprays being made to kill insects of different characteristics. Stomach poisons are for killing chewing insects, repellent sprays are to prevent insects from laying eggs, which hatch out detrimental larvae, contact sprays kill those insects that get their food by sucking. Bordeaux mixture and lime sulphur solution are the most important fungicide sprays. The most important insecticide sprays are arsenate of lead, paris green, tobacco, kerosene emulsion and soaps.

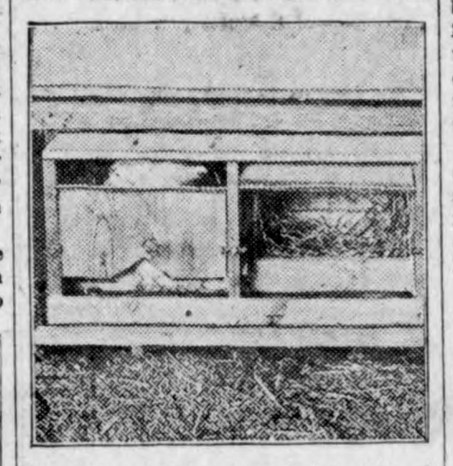
POULTRY FLOCKS

TRAP NESTS HELP BREEDERS

Enable Poultrymen to Find Profitable Layers by Selecting Late Molting Hens.

(Prepared by the United States Department of Agriculture.)

Trap-nesting hens to find the most profitable layers does not appeal to the average farmer and back-yard poultryman as being practical. Besides the original cost of making the nests there is the extra labor required of looking after the layers. However, some facts that have been



Profitable Layers Found by Use of Trap Nest.

learned as a result of using the trap nest may be applied in the improvement of the flock, say poultrymen of the United States Department of Agriculture. For instance, the trap nest has shown that the late molter is the most profitable bird in the flock. Now, with the use of the trap nest, a man may select the late molter and be sure that he is picking the cream of the flock. And it seems reasonable to believe that this characteristic breeds on from generation to generation.

AX IS BEST FOR EGG EATERS

Habit Spreads From One Fowl to Another and Unless Checked Affects Whole Flock.

(Prepared by the United States Department of Agriculture.)

Egg eating sometimes becomes a serious vice in a flock, the fowls becoming very fond of eggs when they have learned to eat them. The habit spreads from fowl to fowl and unless checked will often spread through the whole flock. Egg eating usually begins through accident by eggs being broken or frozen. See that the nests are properly supplied with straw or other nesting material and have them darkened, so that if an egg is accidentally broken the fowls will not be likely to discover it. Supply plenty of lime in the form of oyster shells, bone or similar substances to insure a firm shell. As soon as it is discovered that a fowl has formed the habit, the fowl should be removed to prevent the spread of the vice. Once formed, it is difficult to eradicate, and the safest remedy is the death penalty, say poultry specialists of the United States Department of Agriculture.

Fowls sometimes pluck feathers from themselves and from each other. This is often caused by too close confinement, by the presence of insect pests, or by improper feeding. When some of the fowls of a flock have formed the habit slightly, a wide range with a change of diet, including a plentiful supply of animal feed, and freedom from insect pests, will usually correct the evil. Above all, see that the fowls have plenty of inducement to exercise. If the habit becomes well formed it is very troublesome and may necessitate the killing of some of the fowls in order to stop it.

YEARLY EGG LAYING PERIOD

Increase Made at Massachusetts Experiment Station by Selection of Pullets.

Dr. H. D. Goodale, research biologist in poultry at the Massachusetts Experimental station, stated that the yearly egg-laying period of a flock of hens at that place had been increased by an average of 58 days by egg-selection from early-laying pullets. This, he said, had resulted in an increase in the number of winter eggs, raising the annual egg average from 121 to 185. Poultry breeders should aim to eliminate broody hens from breeding stock; also the birds idle longest in the winter months.

POULTRY NOTES

Keep house and yard clean.

* * *

Provide roosts and dropping boards.

* * *

Provide a nest for each four or five hens.

* * *

Save the manure. It is worth money if treated properly.

* * *

The early hatched chick becomes the early laying pullet next fall.

* * *

Make the house dry and free from drafts, but allow for ventilation.

* * *

Kill and eat the poorest hens in the fall when they begin to molt and cease to lay.

FULL MEASURE

By LILLIAN P. LEONARD

©, 1922, by McClure Newspaper Syndicate.

"You must know that a sad, dreamy-eyed type requires finesse and a resort to romantic methods to win. You don't know how to do it, that is all. Now watch me!"

This speech had been preceded by an ejaculation made by the younger of the two men, sitting at an adjacent desk in the pleasant office.

Partners in a business that seemed to give them plenty of spare time for dallying even in business hours, their favorite "indoor sport" being mild flirtations with those females who had become wise as to the depth of their intention and consequently rather tame pastime, it was with strenuous efforts they tried to capture the attention of any stranger or newcomer to their floor.

Innocent, possibly in intent, but nevertheless trivial and somewhat cheap, so thought a recent arrival in the next room—a sad, dreamy-eyed, well-preserved woman of mature years, who had opened a millinery shop next door.

The younger man had tried every means to become acquainted, but beyond a cool smile, nod, or passing greeting, he had made absolutely no headway.

So the elder man took a hand in this flippant pastime of capturing a passing fancy, and he tried the romantic, mysterious way, that his superior (?) wisdom mapped out.

A rosebud through her letter slot greeted her in the morning; a blank card, sometimes. A box of flowers delivered late in the afternoon, from a mysterious source. He had the satisfaction of seeing his flowers in water in a place of honor; but he did not know that the woman had heard that that was a habitual custom of his to try to soften the heart of the fair sex with the touching presentation of a flower, and she had no delusions as from whence these sudden attentions proceeded.

So it was an inwardly-amused woman who set the flowers where he could see, but no hint of her amusement looked from her sad eyes as they casually met in the hall. Her bow and greeting were, if anything, cooler.

Then one day a tall, blond man, somewhat younger than the woman, came along the hall. His step was faltering and there was a strange, groping movement in his hands, yet he went straight to the door marked "Maison, Hatter," where a cry of rapture greeted him. The door was quickly closed and only a continuous joyous murmur could be heard.

The shop was closed for the remainder of the day, and together they were lost to sight.

Though silent, uncommunicative and aloof in the time of trouble, hiding, Spartan-like, her exquisite torture of uncertainty through a most grilling ordeal; in the glow of this most certain joy the woman expanded and had to give out of her happiness and relief from a corroding anxiety.

So the news spread like wildfire through the building, for human nature, prone to gossip, is the same in an office building as elsewhere.

"Yes, my baby brother; we are all that is left of the family; was in France," she told a neighbor. "Had suffered a peculiar affliction; was struck totally blind while in action. Nothing could be done to relieve him. He was examined by noted specialists who diagnosed the case as paralysis of the optic nerve resulting from shock.

"Sometime he might regain sight, but they held out no certainty of hope.

"Oh, yes, a remarkable cure. Through the treatment of a noted psychologist, Dr. —— he had regained his sight, misty at first, but daily growing stronger."

On hearing this "the man next door," under his apparent lightness being a 100 per cent American, flushed a dark red from shame, but grew pale a moment after as a sudden realization that he loved this woman as a man loves only one woman in a lifetime, that his careless pursuit had led him into deep waters of emotion, and that his feeling now was akin to worship for this brave soul who so patiently had borne her sorrow in silence for so long.

Late in the afternoon next day he called at the hatter's and pleaded his suit. She laughed at first. The sad, dreamy eyes were sad no longer, but dancing wells of joy. But as she saw the man's depth of emotion she grew serious.

"I am sorry; but you see next month I am going to marry the psychologist who restored my brother's sight!"

A Humorous Speculator.

A speculator on the stock exchange was sitting in a friend's office and during the conversation, which was mostly about stocks and bonds, he informed his friend that he had picked up a cheap thing during the winter.

"It stood at thirty-three then, and yesterday it touched eighty-four!" he said.

"By jove! You are lucky. What is it?" asked his friend.

"A thermometer," was the reply—Pittsburgh Chronicle-Telegraph.

Studying Effect.

"Have you read the latest novel?"

"No," answered Miss Cayenne.

"Everybody is talking about it."

"That is why I like to say I haven't read it. It makes me seem so unusual."

Tuesday, March 14th

WILL BE

DE LAVAL SERVICE DAY

For the benefit of our many customers and users of De Laval Cream Separators we have established a ***De Laval Service Day.***

On this day we shall be glad to have any De Laval user bring his complete separator to our store for a thorough and careful inspection and adjustment, which will be made free of charge. Should any parts, due to unusual wear or accident, need to be replaced, this will be done, the only charge being for the price of the new parts used. *No charge* will be made for the service.

A De Laval representative will be with us to assist with this work. Bring in your De Laval Separator that day and receive the benefit of his advice on the care and operation of the machine, as well as the free service. It is our wish, and that of the De Laval Company, that every user of a De Laval Separator get the maximum of service at the minimum of cost, and we therefore urge you to avail yourself of this free and useful service.

ABOUT KLEMME PEOPLE

A little snow fell again Monday.

Mrs. J. D. G. Houghton, of Goodell was a Klemme visitor Monday.

Six Room House for sale, or rent. Inquire at the State Savings Bank. 2

R. W. Elder moved into the Fuller house Tuesday.

E. P. Hanson, of Garner, was a business caller in Klemme Friday.

Ed. Jacobs drove to Belmond on Friday on business.

Mrs. Hake and daughter were up from Belmond Saturday.

Mrs. Hempell has been reported on the sick list last week.

W. C. Gast. of Garner, was a business visitor in this city Saturday.

Walter Lau was at Mason City on business Thursday.

Dr. Reuber and wife left for their new home at Sheffield last Friday.

Mr. and Mrs. Elmer Fuller of Garner were Klemme visitors Saturday. Mavis returned with them.

Howard Doyle returned again Saturday from Alta Vista where he had business.

Wellemeyer has his shoe department nearly remodeled now for a millinery department.

Dr. George, of Dows, was here on Monday to hold a consultation with a local physician.

Miss Ida Larsen, of Forest City, was an over Sunday visitor at the Lew Lewis home.

WANTED—A hand power washing machine. Inquire at the Times Office.

Mrs. A. Kirkwood. of Goodell, and son Will, were business callers in this city Monday between trains.

Mr. Ellswort, of Goodell was a business vistor n this city Thursday of last week.

Mrs. Ely, of Belmond came Saturday for a few days vist wth her daughter, Mrs. Missman.

See Mary Reinhart in the "Circular Stair Case," at the Idle Hour Saturday night. adv

For the common everyday ills of mankind there is nothing to equal Tanlac. E. S. D. Kahrs. adv

A baby boy was born to Mr. and Mrs. Clarence Kluckhohn this morning. They now have two boys.

Miss Edna Bergman took suddenly ill Saturday and Monday her condition became alarming, but we are glad to report that she is improving at this writing.

Mrs. LuVerne Smith was a Belmond visitor between trains Saturday.

Harry Buss came over from Garner Saturday, he works in a garage there.

The Klemme teachers, both city and rural took in the county meeting at Garner Saturday.

Laundry basket leaves Wellemeyer's Store every Wednesday and gets back every Saturday.

Leonard Sampson returned from the hospital at Mason City Saturday. He is very much better.

Mrs. Meinderts of Meservey was visiting with her daughter, Mrs. Leo Wilkins Friday.

Mrs. Henry Maitland was at Belmond last week visiting her daughter Mrs. Trafford.

Bert Trumbell came from Des Doines Saturday for an over Sunday visit. He s taking a business course there.

Herman Stromer injured his hand Friday when he got it caught in a gas engine. We do not know how serious he is injured.

Tanlac is purely vegetable and is made from the most beneficial roots. herbs and barks known to science. E. S. D. Kahrs. adv

Banish that awful insomnia that worries you every night. Let your sleep be restful and refreshing. Tanlac does it. E. S. D. Kahrs. ad

Verner Lewis and family returned to their home at Hayfield, Minn., yesterday after a weeks visit with relatives and friends here.

Mrs. A. Kirkwood, of Goodell, will move back to Klemme again soon. We understand she has rented the August Baack residenee.

We understand that Hans Hansen will move back to his farm again this year and that he has rented his house in town.

Mr. and Mrs. Ralph Irving and the children, of Floyd, Iowa, were Sunday visitors at the C. M. Bredbenner home.

Harry Smith secured the aid of a Fordson and a buzz-saw last Saturday, and has a fine pile of stove wood (previously railroad ties) as the result.

Preaching services at the Methodist church Sunday were very much enjoyed by a good crowd. The new minister, Rev. Geyde, is a very fine speaker.

Mable Larsen and her brother Elmer. autoed to Klemme with Dr. C. B. Tice and family last Sunday for a visit with Fred Arnold. They returned quite early in the afternoon.

A fareweel surprise party was given by a number of friends on Mr. and Mrs. Elmer Fuller last Thursday evening. Cards were played and at a late hour the party disbanded after enjoying a big lunch.

Fred Bell's old lizzie refused to start last Sunday night when he had bid the fair lady goodnight. Fred spent something like two hours trying to coax lizzie to start; he gave it up as a bad job and hoofed it about five miles for home.

There was a large attendance ata the First Methodist church last Sunday morning, and also in the evening. The Sunday school is also enjoying a perod of prosperity whch s evidenced by the interest which the members take in their classes. Plans have already been made for a worthwhile Easter program.

There was nearly a big fire Tuesday evenin. The shingles on Rev. Geyde's house caught fire shortly after supper and were first notic-d by Doctor Missman who was on his way home. The alarm was turned in and the fire boys had the hose strung out in just a few minutes. However, the Boy Scouts beat them to it and had scaled the roof and put the fire out with a few buckets of water. The boys were right on the job. It was not necessary to throw any water with the hose but the fire company are due a lot of credit for te speed they showed in getting the hose to te fire in just a few minutes and over roughk roads at that. Rev. Gedye wishes to thank the fire man and all who were so prompt in offering help.

Spring Goods are Here

Spring is close at hand and it is time to do your Spring sewing--- Our sneives are fairly groaning with their load of new goods such as Tissue Ginghams in the newest patterns, Imported Organdies in all the lovely shades, Toile de Nords, Silks and Percales.

The combined second and third quarterly conference will be held next Thursday, March 23rd, in the church at 7:30 o'clock. Dr. Bushnell, our district superintendent will give an address and preside at the conference. All official members are urged to attend and an ivitation is extended to all interested in our church to be present at the preaching and conference. See program of Workers for Conference for today.

Our church is placed in this community for it's betterment. We want to serve and help you ot a better life. What we need is more of God and less of Self. Jesus said, "Come onto me and I will give you rest.", rest from sin, and the rest of peace in the soul. This is God's invitation, Come.

Arthur B. Gedye. Pastor.

PROGRAM OF WORKERS MEETINGS

To be held in the Methodist Episcopal Church, Klemme, Thurs. Mar. 23

Afternoon Session, Combined Womens Societies and Sunday Schoc Workers at 2:00 P M.

2:00 till 4:00 o'clock Ladies Aid and W. F. M. S. Devotions led by Dr. Bushnell. Ladies Aid to discuss

1—Might our general plan of organization be improved upon?

2—What are the purposes of our organization (a)Social (b)Financial (c)Spiritual.

Womens Foreign Missionary Societp

1 Are we growing or shrinking in membership?
2 Consider the attractiveness of our program?
3 How may we improve upon our study course?
4 How do our apportionments stand for the year?
5 Our auxilliary societies.

4:00 to 5:30 P. M. Sunday school Workers:

1 Is our Sunday school properly organized in its several departments?
2 Have we adequate literature?
3 Are we reaching our entire constituency?
4 Is our Sunday school functioning as a teaching force?
5 Are we bringing our membership into Fellowship with the church?
6 What practical suggestions might be made for our school?

Evening Session, 7:30 o'clock.

An all church meeting with all the official members present and all the church invited. Combined Second and Third Quarterly Conference.

Shall we discuss: "Has the church an adequate program?"

1 For the evangelization of this community.
2 For the molding of the community through social control.
3 For the financing of the interest of the "Kingdom."
4 For determining "Is Christ winning or losing in the community".
5 For co-operation with the church in general in following the command.

"Go ye unto all the world and preach the gospel to every creature."

NEWBERGER—HIPPEN

Mr. Albert Hippen was sentenced for life when a quiet wedding took place at the Methodist parsonage in Garner on Wednesday afternoon, March 8th, when Miss Cora Newberger, daughter of Mr. and Mrs. Lewis Newberger, became the bride off Mr. Albert Hippen. Rev. Webb officiated. Mrs. Garland Hoffman was the bridesmaid, while Mr. Garland Hoffman acted as best man. The Bride wore a suit of blue; the bridesmaid a suit of brown. The groom wore a suit of blue and the best man was attired in a dark brown suit. The Bride carried a bouquet of pink and white carnations.

The newlyweds left immediately where taoin mfwyp xzfiiff (((after the ceremony for Missouri where the Groom's father resides. They will be gone about a week after which they will go to house keeping on the Kale farm two miles north of Klemme. —Contributed.

On His Trail

EDITOR'S SISTER DIED LAST WEEK AT FT DODGE

On Friday, March 10 we were called to Fort Dodge by the serious illness of our sister, Mrs. Louis Mulroney. We were accompanied by our wife, and parents of Garner. We left in such a hurry that we could not make any business arrangements to take care of the paper so Ted Tierney of the Garner Leader printed extra papers and mailed them to our subscribers in place of the Times.

Mrs. Mulroney passed away on the afternoon of Wednesday, March 15. Funeral services were held at Fort Dodge Thursday morning and the remains were sent to Garner where services were held from the First Methodist church by Rev. Webb. Interment was made in the Concord Cemetery at Garner.

Mrs. Mulroney leaves to mourn her loss her husband of Fort Dodge, her parents Mr. and Mrs. J. Jorgenson at Garner and two brothers, John C. of Carter South Dakota and Ray A. of Klemme.

We are also rushed with work in the Times shop this week and to some extent we are forced to neglect some news items and other writeups so please do not be disappointed with this issue of the Times as we are doing the best we can under trying circumstances.. Editor R. A. Jorgenson.

PRIEBE—SCHMIDT

Mr. Fred Schmidt, son of Mr. and Mrs. W. C. Schmidt, and Miss Esther Priebe, daughter of Mr. and Mrs. Julius Priebe were joined in marriage at the home of the Bride's parents in Twin Lakes Township, on Monday morning, March 13 at 11:30 o'clock; Rev. A. A. Deppig of this city officiating.

After the wedding ceremony a big wedding dinner was served and the twenty, or so, guests were seated.

A rather peculiar coincidence marked this wedding. The wedding date was also the birthday anniversary of both the bride and the groom.

Both of the contracting parties are most excellent young people, they are from the best families of this community and have a large host of friends who wish them well in the journey through life.

They will go to house keeping on the groom's father's farm near this place where they will be at home to their many friends.

Cash for Cream

Bring us your cream to the Creamery when you come to town to trade. We are glad to weigh it and test it while you wait and pay you the ready CASH for it.

A little extra money comes in mighty handy in times like these, and we are glad to pay you the CASH for your CREAM.

Money Talks

For the last half of February the Klemme Co-Operative Creamery paid 40 **cents per pound for Butter Fat.** During the same period it is reported nearby Cream Stations paid as follows: Klemme 37c; Meservey 33c, Kanawha 32c, Goodell 30c, Belmond 29c.

Tests

We invite each of our patrons to call at the Creamery any time you happen in town, and let us test your cream before your eyes, we want you to see how we do it.

Honest Weight and Accurate Test, is our motto!

You should learn to know Mr. Gimer and Mr. Elder, they are working for YOUR best interests ALL THE TIME, and they are clean men too, always on the job to give you SATISFACTORY SERVICE.

Klemme Creamery

Weekly Report of the Doings Of The Klemme Schools

Maybelle Johnson and Adolph Lauritzen were absent this week.

The baseball practice has been retarded this last week on account of the last snow. It will be resumed as soon as possible as we have an early game scheduled.

Edna Bergmann was taken to the Sioux City hospital as she has been suffering from an attack of diabetes. We are sorry to lose her from our class and school and hope that she may have a speedy recovery.

An athletic emblem has been chosen with a dark green diamond and a white letter K on it. A small white basket ball and baseball will be placed on either side of the K after a certain number of games have been played.

Mrs. Immer from Charles City and Mrs. Bergmann of this city were welcome visitors in the intermediate room Wednesday.

Miss Kreig of Monona. Iowa, was a welcome visitor in all the rooms Monday.

Irene Johnson, Clarice Wellemeyer and Floyd, Ilo and Alan Klotzbach are confined to their homes on acount f sickness.

The Fifth Grade finished Asia and have started Africa.

At the 8th Grade Class meeting B. Square was chosen as their motto and Gold and Marroon as Class colors.

Last week's debate in the the Freshman Community Civics Class was, "Resolved, that courts are more o blame for the prevalence of present crime wave than is the police force." The affirmative was upheld by Adala Schroeder and Faith Ax; he Negative by Neota Ridder and Leona Lau. This was a hard fought debate. The negative came out victorious. The judges were Marie Blank, Bertha Johnson and Clarence Elder.

The Freshmen are taking Shakespeare's "Merchant of Venive" which s very interesting.

Last Friday many of the Freshmen got brain fever from trying to cram n some quotations from "The Merchant f Venice."

Maurine Hake was a visitor of the Freshman Class last Friday. She is a Freshman at Belmond this year.

The question for debate this week is, "Resolved, that persons who cause destructive fires by carelessness should be punished by fin eand imprisonment." Sylvanus Walker and Glenn Busch will uphold the affirmative and John Baumgartner and Andrew Wellemeyer the negative.

NOTICE—If cattle owners want cattle pastured this summer season then please call and see me before April 26th, 1922. No orders taken later. Good No. 1 Blue Grass pasture, plenty feed, salt, good well water furnished. Prices right. Call A. C. Lau at North Elevator. Klemme, Iowa. M23-30-A6-13-20

Rev. Bergman, accompanied by his daughters Lena and Edna, left for Sioux City Tuesday. Miss Edna recently recovered from a serious illness and expects to enter the Methodist hospital there for an operation to regain her health. Miss Lena had been here visiting and is a student at Morningside College.

CHARLES CITY BEATS CORWITH QUINTET FOR TITLE AT TOURA[illegible]NT

CHARLES CITY, Mar. 8 —The final game in the tournament held here Friday and Saturday was played Saturday evening between the Charles City team and the team from Corwith. Charles City was the winner with the score 48 to 25. Lowe of Charles City starred with 9 field baskets. At the end of the first half the two teams had a score that was very near even. The last eight minutes of the last half the second Charles City team played.

SCOTCH MARRIAGE IS LEGAL

Man's Attempt to Repdiate Wife of Thirty Years Is Balked by Edinburgh Court.

London.—"Now you are my wife," said William Winton, a lance corporal of the Royal Scots fusiliers. placing a ring on the finger of a girl of seventeen—Clara Wheeler—at Ayr.

That was in 1892. Recently the Edinburgh Court of Sessions decided this brief ceremony constituted a binding marriage.

It was, perhaps, the simplest marriage ever known. There was no ceremony by minister, register, or anything of the kind—just an agreement to marry and the purchase of a ring and the form of words above.

After this the parties had lived together in various parts of Scotland until two years ago, when the husband, then head greenkeeper at Milngavie, Glasgow, after a quarrel, repudiated his wife.

Giving judgment upholding the marriage, Lord Anderson said it was clearly established that, according to Scots law, the ceremony in 1892 was a valid one and that the fact of the marriage was adequately proved by habit, repute, and by the parties having lived together for over thirty years.

KILLED BY MOUNTAIN LIONS

Strange Fate of an Unidentified Man Who Rode Along a Trail in Oregon.

Bakersfield, Ore.—A mountain tragedy was revealed the other day when the dismembered body of an unidentified man, who had been attacked by mountain lions, was found on an old trail in the Santa Media range of mountains, eight miles southwest of Lebec on the Ridge route, by Robert Burton, a rancher.

Tracks in the snow told the story of the man's death. Albis Stanley, another rancher, who arrived in Bakersfield in the afternoon from the scene, said that the man had evidently fallen from his horse while riding along the trail and was probably rendered unconscious, being attacked by the animals while unable to defend himself.

The horse, the man was riding, has not been found. The tragedy happened late in the afternoon or at night, Stanley said, as the trail was traveled earlier in the day.

There is little to identify the victim beyond a few shreds of torn clothing, according to Sheriff D. Boone Newell, who went to Lebec.

HAS OLD CUP AND SAUCER

China Dishes Thought to Have Been Buried by Spaniards 150 Years Ago Found in Oklahoma.

Wetumpka, Ala.—John Howle, who has recently returned from a trip into Texas, Oklahoma, Louisiana, Arkansas and several other states, brings back an interesting story of excavations near Wilberton, Okla.

It is said that much treasure buried by the Spaniards 150 years ago to save it from Indian raids is being dug up.

Howle has a hand-painted china cup and saucer that is believed to be more than 150 years old. They were found buried in a copper kettle with other dishes and valuables.

Several different persons are said to have found thousands of dollars in gold, valuable jewelry, etc. Howle saw several of the places where the treasure was being dug up.

IT'S AN EAGLE, JUST THE SAME

Because Wings Were Folded Some Thought Bird on New Dollar a Dove.

Washington.—The bird on the new peace dollar is an eagle—not a dove—in case there be any ornithological dispute about it. Moreover, he is the only eagle with folded wings on an American coin with the exception of the bird on the $10 gold piece. Bird sharks have been horrified to hear the eagle described as a dove of peace on a mountain top. In truth, it took some digging among mint officials to find out what kind of a bird it really was. All the other eagles are spread eagles.

Paris Bans Extreme Dances.

Paris.—The latest edict of Paris society demands that moderation must be the motif of all the modern dance this year, including the "shimmy," the fox trot and tango. The latter is the most popular dance in the best Parisian society, but it has been reformed.

Science Aiming Blow at Death

Famous English Surgeon Predicts Perpetual Life and Brain Grafting.

NEW DISCOVERIES BY CARREL

Whole Kidney Successfully Grafted From One Animal Into Another of Same Species—Arteries Transplanted.

London.—"Not only may the brains of the illustrious be grafted on the living, but we may also be on the eve of the secret of perpetual life."

This astounding possibility, arising out of a story told in the Daily Express of Prof. Alexis Carrel's discovery, is revealed by Sir William Arbuthnot Lane, the famous surgeon, who worked with Professor Carrel before the war.

"Any tissue kept on a microscopic slide, at a suitable temperature, fed with the right material, and drained at frequent intervals, will grow and live forever," said Sir William.

"If this is applied not only to one or two tissues, but to all the tissues of a living body, then it follows that such a man would live forever.

Food Too Digestible.

"We pay for civilization by eating digestible food. We should in reality eat indigestible food as the savage does. The Hindu lives on corn ground between stones and the cake he makes is most imperfectly roasted. Therefore, he avoids all disease of the intestine, such as cancer, which is spreading in the civilized world with the most alarming rapidity.

"Professor Carrel has made astounding discoveries. He successfully grafted a whole kidney from one animal into another of the same species. He did the same with a leg and other members, transplanting arteries and veins at the same time. I have seen a black dog with a white leg that had been grafted on. The blood vessels joined up during the operation and worked successfully. Professor Carrel tried grafting a kidney on the organism of a living man, but it became calcareous. These experiments, however, are invaluable because they lead the way.

Overrun the Slides.

"The tissues Professor Carrel is experimenting with are mounted on slides and have to be kept at the same temperature as that of the human body. They are washed every day with saline water to dispose of by-products and they will never die as long as the treatment is continued. They grow just like a fungus, and in time overrun the slide. There is no such thing as death as long as there is perfect drainage.

"Professor Carrel has not yet been able to unite tissues and keep them growing. Until this can be done these fragments will have no thought, although they may possess feeling.

"This work gives doctors and scientists a great insight on what is going on in the human body. Small tissues of the brain, the liver, or the heart may all be treated in this way. If the fragments are fed with thyroid juice they will digest the food and, provided all by-products are washed away, their life is absolutely without limit."

WOMAN CAPTURES A WILDCAT

Beast Scratches Her Somewhat, but She Is Going to Raise It for a Pet.

Lead, S. D.—Mrs. Myra K. Peters, manager of the Sylvan Lake hotel at Sylvan lake, was the heroine of an exciting incident recently.

During her stay at the lake this winter, Mrs. Peters made friends with a small wildcat, and it became so friendly that it would eat out of her hand and even sit in her lap while eating.

The wildcat would come every morning for its morning meal, and Mrs. Peters became quite attached to it. While she was feeding it in her lap one morning she threw a robe over it and put it in a safe place to keep it. While doing so she was considerably scratched trying to hold it, but she now has the animal in captivity, and is going to tame and raise it for a pet.

TO MAKE IRISH STATUE

Friends of the Irish Free State in America plan to present to the Irish people a bronze statue commemorating the ratification of the peace treaty, to be erected on College Green, Dublin. Bobbie McLeary, here shown at work in her New York studio, has been selected to design the statue.

Man Paid Dog Fee, but Refused Wife's Poll Tax

Lon Staples, of Winsted, Conn., rebelled at paying his wife's poll tax, saying that because she was his wife had no bearing on the case, and that anyhow he could not afford it. Before leaving the town hall, however, he paid his dog license fee.

1—Former Postmaster General Will Hays leaving his last cabinet meeting to become motion picture arbiter; he's talking to Vice President Coolidge; left to right are Secretaries Mellon, Wallace, Davis, Fall, Hoover and Denby. 2—Mrs. P. To Circle Earth in 24 Hours

French Airplane Manufacturer Startles Science Society With His Predictions.

SEES REVOLUTION IN FLYING

Expert Says in This Generation All Passengers Will Go by Air, With Ships and Trains for Freight.

Paris.—The announcement before the French Association for the Advancement of Sciences that in the near future airplanes would travel at a speed of over 650 miles an hour startled the conservative Frenchmen so much that they charged M. Breguet, famous French airplane manufacturer, was more imaginative than Jules Verne.

Circle Earth in Twenty-Four Hours.

In his speech Breguet said that when certain improvements that he is working on are brought to perfection airplanes will travel at a height of over six miles, where air resistance is slight, make straight flights of thousands of miles without stopping, and furnish voyagers more comforts than any modern trans-Atlantic liner.

This great speed, which, he claims, will even be tripled some day, would be greater than the peripheric speed of the earth and would enable one to fly completely around the world in less than 24 hours. The improvements which will revolutionize flying in this manner are in the weight of the motor in proportion to its horsepower; the turbo-compressor, which he has just invented with M. Rateau, to enable motors to maintain their sea-level horsepower at great altitudes; perfections in construction metals, which will greatly reduce the weight of the planes, and the fineness of the planes. During the war the fineness of the wings was around 20 to 30 per cent; now it is about 10 per cent, while the ideal, that of the eagle, the hawk and other planing birds, is a trifle under 4 per cent.

Would Develop Speed.

M. Breguet called upon airplane manufacturers to devote themselves to the development of planes which can travel at least 2,000 miles without stopping, such as from Ireland to Newfoundland, or Bakar to Pernambuco; a minimum speed of over 200 miles an hour; every modern comfort, including Pullman accommodations so that passengers could sleep during long trips at night, and to have wireless installations to keep in constant touch with the earth and be directed by radiogonometry.

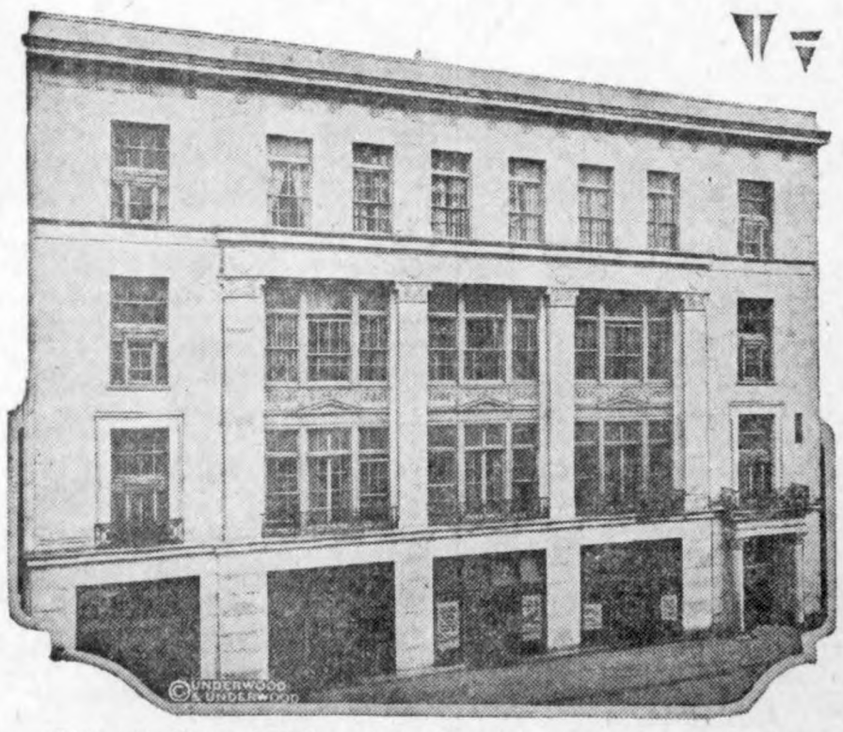
Log Yields 16,000 Feet.

Hoquiam, Wash.—An enormous spruce log, ten feet in diameter, believed the largest ever cut in this section, recently was sawed into 16,000 board feet of lumber here.

When first put on the saw the big log broke the mill machinery and was not cut until repairs were made.

Some time ago a larger log was brought here, but no mill would tackle it and it was placed in a Hoquiam park for exhibition purposes.

Washington City Club's New Home



This magnificent building of the City club of Washington, D. C., was opened recently. It is located in the heart of the business district and is the meeting place of numerous smaller clubs that have no home of their own.

GERMAN DEAD ARE TO STAY

Soldiers Buried in Foreign Soil May Not Be Moved.

Cost of Taking the Bodies Home From Belgium and France Is Considered Prohibitive—Graves Are Being Cared For.

Berlin.—German soldiers who died and were buried on Belgian and French battlefields probably will remain on foreign soil, on account of the cost entailed in bringing them home. This is indicated in statements by the official bureau intrusted with the work of helping relatives to identify the dead and arrange for the transportation of their bodies to Germany.

Although negotiations with France and Belgium for the removal of the bodies were concluded weeks ago, not one German soldier has been exhumed for the journey home, despite the fact that thousands of inquiries have been made by relatives.

Told that they must bear the cost of exhuming and transportation, which from France amounts to 30,000 marks, they turn away, for that sum is now a large fortune to the average German. Consequently, sentiment is growing to allow the German soldier dead to rest on the field where they were buried or in the French or Belgian cemeteries to which they have been transferred.

The information that the French are carefully tending these burial places and, where possible, marking the individual graves with crosses and names, also has tended to allay the feeling that these dead should not remain in a strange land.

Under the stipulations agreed upon, none of the three governments assumes responsibility for mistakes, and the relative must give a guarantee of identity before permission is granted for removal, which in the majority of cases is very difficult.

Even those relatives who can not or do not desire to bring the dead soldier back to the Fatherland are seeking to establish the identity of the fallen, and the bureaus opened in Prussia, Bavaria, Saxony and Wuerttemburg to help them, are swamped with inquiries.

Unearth Vases of Metal Age in Spain

Madrid.—A description of the recent discovery of archeological treasures near Granada is given by Simon Martin Delval. He asserts Archeologist Cable, the official inspector of the expedition, found a priceless collection of instruments and vases, running back to the commencement of the metal age. In addition to jewelry of various kinds, Mr. Cable discovered an artificial mound containing vestiges of peculiar rites, which it is thought will open a new line of archeological research.

NEWS REVIEW OF CURRENT EVENTS

Warren G. Harding Completes His First Year as President of United States.

FALL AND WALLACE IN CLASH

American Government Declines to Participate in Genoa Conference—Lloyd George's Threatened Resignation — Fourteenth Canadian Parliament Opened—Fiume Fumes Again.

By JOHN DICKINSON SHERMAN

WARREN G. HARDING at noon of March 4 completed his first year as President of the United States. He was asked for an expression regarding the accomplishments of his administration to date and authorized this statement:

"The record of the administration speaks for itself; it would be a poor administration that required the executive to speak for it."

At an entertainment by the National Press club in honor of the first official birthday the President said:

"The long step toward getting back toward normal ways of government would seem to me to have been the achievement of the year."

Representative Fess of Ohio, chairman of the Republican congressional committee, made in the house a speech setting forth in detail the accomplishments of the year from the Republican viewpoint. He dwelt on economies, actual and prospective. He said that the United States would be the only government in the world living within its revenues next year, if it could keep within the estimates outlined by the administration. Reviewing the work of the arms conference, he said: "I challenge the record to produce a greater achievement in the history of diplomacy."

Democratic members then proceeded to tear to pieces the Fess eulogy from their standpoint. Cordell Hull, chairman of the Democratic national committee, also took issue with the Fess statement. His general position is that while the Republican congress has enacted a multiplicity of unimportant laws and the arms conference provided for a limited program of naval reduction the Republican party has failed to carry out its major promises made in the campaign of 1920.

Now, in the house debate over the administration's statement of economies Fess talked exactly as if he believed everything he said and the Democrats talked back exactly as if they believed everything they said. And the taxpayer in the gallery knew that everybody couldn't be telling the truth, the whole truth and nothing but the truth. The upshot was that Representative Byrns of Tennessee, ranking Democratic member of the appropriations committee, secured the passage of a resolution calling upon the President to inform the house in what way the savings had been made, from what particular appropriations and in what specific amounts. Thereupon the President instructed General Dawes of the budget bureau to prepare a complete statement covering the entire situation. One thing at least stands out clearly: Nobody doubts that "H—l and Maria" Dawes will give the facts and figures as they are.

President and Mrs. Harding left Washington Wednesday evening by train for St. Augustine, Fla. The presidential party included Attorney General Daugherty, Speaker Gillett, Undersecretary of State Fletcher, Brigadier General Sawyer, his personal physician, and George B. Christian, his secretary. Mr. Christian said the President would occupy his time in "rest and recreation," in Florida for a week or so.

PITCHED battle between the Interior and Agricultural departments which has long been watched by official Washington with absorbing interest has now become "public" through a statement by Secretary Fall that he had protested to President Harding against the circulation of "vicious propaganda emanating from the Department of Agriculture." The battle, in brief, is over legislation, pending and prospective, which would transfer the forest service from the Agriculture department to the Interior department and practically turn over the development of the natural resources of Alaska to the Interior department, with responsibility to the President. This battle is not a petty quarrel between two departments. It is a real battle between two cabinet members. Some of the old-timers take it so seriously as to predict the resignation of one or the other of the secretaries. Moreover, the battle is significant as indicating the difficulties that lie in the way of the proposed reorganization of all the executive departments.

Until 1905 the Interior department controlled all the public lands. The national forests were then created for the application of scientific lumbering and grazing and the forest service was established to administer them. The Interior department retained control of the remaining public lands and the ten national parks, established for recreational purposes. In the national forests the Interior department is charged with the execution of all laws "relating to surveying, prospecting, locating, appropriating, entering, reconveying or patenting of public lands and to the granting of rights of way amounting to easements." The national forests now number 168 in 21 states and territories and contain about 242,200 square miles. The national parks now number 19 and contain 10,859 square miles.

The national park service was created in 1916 to administer the national parks under the secretary of the interior. The Agricultural department then began a campaign in print, and from the platform, for the transfer of the national park service to the Agricultural department. It also set up the national forests as recreational rivals of the national parks.

Then came the proposed reorganization of the executive departments, approved by the President. Under this reorganization, the Interior department would become practically a public works department. One contemplated transfer is that of the forest service from the Agricultural department.

On top of this came the concern about the plight of Alaska, which is not prospering. "Too much bureaucratic government" was one cry that was raised. It is now proposed to take Alaska out of the hands of the many bureaus and hand it over to the Interior department for administration and development. The secretary is already building the government Alaskan railroad and controls the oil and mineral deposits in the national forests. The two big national forests in Alaska are the Tongass and Chugac, containing 220,000 acres. Secretary Fall approves this disposition of Alaska. It has been announced that President Harding will visit Alaska this summer to get first-hand information. It was planned that Secretary Fall should be in the presidential party.

Naturally the Department of Agriculture is not pleased with this program. The American Forestry association has sent out much "literature" protesting against it. Some of it is pretty strong. The gist of it is that the transfer of the national forests means their exploitation by "private interests." Anyway, Secretary Fall says he is being held up to "execration, public abuse and private calumny."

THE United States has formally declined the invitation of the allied powers to participate in the European financial and economic conference which is now set for April 10 at Genoa. The declination runs from Secretary of State Hughes to the Italian ambassador, Senator Ricci. The document is a gem of purest ray serene. The language is friendly, the statements are plain, the meaning unmistakable. In diplomatic terms he says that the conference is not primarily economic but is rather a conference of a political character in which the United States cannot helpfully participate. "Nothing doing. See you later. Wishing you good luck, I remain, etc."—is about the way it would read in the vernacular. Of course Europe is disappointed. It is generally admitted that the absence of the United States will detract from the usefulness of the conference. But if Europe will hold the kind of conference in which the United States can helpfully participate, it must not expect us unnecessarily to become involved in European questions. Better luck next time, maybe, when things get down to brass tacks.

LLOYD GEORGE resigning the British premiership doesn't fit in with American notions of the little Welsh wizard. But either he had it seriously in mind—or he ran a gorgeous bluff. Anyway, he served an ultimatum on the Tory leaders of the coalition party that unless he could be assured of loyal support and co-operation he would resign. Whereupon Britain buzzed like a disturbed bee hive. Sir Arthur Balfour was named everywhere as the probable successor. But the coalition chiefs got busy at once. Sir George Younger, the unionist "die-hard" leader, was made to step back into the line; it was the speeches that had forced the issue. Other leaders publicly voiced their confidence in the premier. Balfour, as a conservative leader, put the finishing touch by declaring emphatically for a continuance of the coalition government and indorsing the leadership of Lloyd George, who he declared was incomparably the greatest figure of the greatest age in British history. So the crisis has apparently been passed—though possibly only for the present.

Sir Arthur, by the way, is very much in the British public eye just now. King George has bestowed upon him the knighthood of the Order of the Garter. His achievements at the Washington arms conference are universally acclaimed as regaining for Great Britain the world dominance lost during the World war. Anyhow, in declaring for Lloyd George he bowed himself out of the premiership.

CANADA'S fourteenth parliament was opened Wednesday by Governor-General Byng. W. L. Mackenzie King is the first liberal prime minister to hold the reins of government since Sir Wilfred Laurier was defeated ten years ago on his policy of reciprocity with the United States. Premier King is a veteran of the Laurier ministry of 1911, in which he served as minister of labor. Rodolphe Lemieux of Montreal, selected by Premier King, is speaker. The government commands about one-half of the members of parliament. The official opposition group, numbering about fifty in the house of 235 members, is led by Arthur Meighen, the defeated premier. T. A. Crerar leads an unofficial progressive group of about 65, who are expected to support the government in most of its policies, especially in the tariff. Both liberals and progressives believe in customs duties "for revenue only," as against the conservative policy of protection. Who said "reciprocity?"

FIUME is on the map again and seems to be trying to rival Vesuvius. The Fascisti and their adherents have chased out President Zanella of the Free City government set up under the treaty of Rapallo between Italy and Jugo-Slavia. Gabrielle d'Annunzio has sent word that he supports the "uprising." The Italian parties have chosen Giovanni Giolitti, former chief of the poet-warrior's cabinet, as head of another provisional government for the Free State. The Jugo-Slavs are rushing troops to the frontier, ostensibly to repel threatened raids by the Fascisti. They are insisting upon observance of the treaty of Rapallo. Italy apparently intends to restore order in Fiume and enforce the Rapallo treaty. She also has moved troops forward.

MAX says he isn't marrying Mathilde for her money. Mathilde began the romance at eleven by calling Max "Uncle." Max has taught Mathilde the "Swiss language." Let the wedding bells ring out and the Swiss navy fire a salute!

"Politics makes strange bedfellows"—which is to say that the new treaty gives Yap prohibition, with Americans exempted.

William Jennings Bryan, crusading against Darwinism, says nobody can make a monkey of him. Mr. Bryan is a self-made man.

Something to Think About

E REAL CONQUERORS

S not the general who takes a
y and leaves behind him a name
ilitary sagacity, who is the real
eror in life, but the unknown
te, who fights a single-handed
with self and finally triumphs.
is this lowly warrior who has
most to overcome. He goes to
e in silence, conscious of the over-
ming odds arrayed against him.
ere are no shrieking shells or
ng cannon to announce his com-
no bugle calls nor throbbing
s.
en he fights side by side with
sands who utter not a sound.
ce he awakes to some defect of
acter which threatens his ruin,
girds his armor and faces the

d if by valiant fighting he suc-
s in saving himself, he comes
from the fray a real conqueror.
s name is unpublished in the
, but it is sung among the angels!
has overcome and to him will
iven the reward promised in the
tures.

* * *

ssion, pride, selfishness, avarice,
edience and forgetfulness of the
en Rule are among the enemies
men fight alone.
ey are in every corner of the
, in our own homes, in our own
ts.
om them come our repinings and
, our fears and failures.
overcome these sulking foes
ought to be our paramount purpose, for, "what doth it profit a man if he gain the whole world and lose his own soul?"

* * *

In the world's news today you may read pathetic stories of men and women who have fallen from high estates through failure to conquer themselves.

Married pairs have broken their troth; bank clerks have pilfered, and all manner of men and women have blighted their lives and the lives of their families, simply because of forgetfulness of duty in a moment of weakness, when they were unable to control an evil spirit.

They lacked the power to conquer self, and in their impotence they deserted the front line of brave fighters, slunk back in dismay to the rear, humiliated and routed, lost in the whirl of Time and remembered no more.

WHY?

DOES A MAGNET LIFT THINGS

THE exact principle which causes a magnet to take hold of metals and cling to them with a force which overcomes the principle of gravity is, like electricity, one of the unsolved mysteries of nature. We merely know that a piece of iron which has been electrically treated will attract and hold various other metals. The force which it exerts we call "magnetism" and let it go at that—just as we speak of "electricity," "personality" and "radio-activity," all of which are forces which puzzle science and, up to this time, have defied a clear explanation. The most logical explanation would appear to be that an electrically-treated piece of iron gives off a force analogous to that given off by a piece of radium in that it will affect other pieces of metal without materially lessening its own power.

The name magnet is derived from the mineral "magnetite" and this, in turn, is so called because it was first discovered in Magnesia. Magnetite is a natural magnet, of which the loadstone is one of the best-known varieties.

SCHOOL DAYS

Uncommon Sense

By JOHN BLAKE

ROUGH WORK FIRST

HERE is nothing delightful about spading the earth to plant a gar-
But it has to be done before you enjoy the garden.
here is nothing pleasant, except to mathematical mind, about studying metry or algebra.
t even if you will never use these s in your business life they are ssary to teach you concentration, the faculty of reasoning. You'll both concentration and reasoning nd by.
tting rich across lots is possible, rare. Getting happiness across is impossible. There is no short o real success.
u have got to begin by doing vast unts of hard, uninteresting work re your life shows any results at

you advance, your work will be- more interesting—fascinating by by, if you are really making prog-

en it will be easy to do. It will ard for you to tear yourself away it. But that is a stage that is n the future.
the beginning it is all like spading rden—hard, wearisome drudgery, nothing at the end of the day's to reward you.
must be done, just the same, and ou will apply to every day's task rule that you must apply through of doing the rough part first, you will find that it makes for progress, and even ease.

If there is a certain amount of drudgery that must be got through today, tackle it right now, get it done, and you can turn with a clear conscience to something more interesting.

Don't be afraid of tiring yourself by the drudgery. Your brain can stand far more work than you are ever likely to give it without wearing out. And even if it is a little weary at the end of the day, a little relaxation and a good night's sleep will make it as fresh as ever in the morning.

Tackle the rough, dull job and get it out of the way. Leave the afternoon for pleasanter duties, and the afternoon of your life, which is meant for enjoyment, will be left also to more congenial and more satisfying tasks.

KIDDIES SIX

By Will M. Maupin

"DOOD MORNIN'."

EACH morning when the sun comes up
To tint the east with red;
When birds sing sweet the day to greet
In branches overhead,
'Tis then I fully realize
I'm rich beyond compare,
For sweet and clear a voice I hear:
"Dood mornin', pop! You dere?"

The cares of day may vest the night
With visions dark and strange;
And through my sleep dark phantoms creep
And dismal doubtings range.
But when the morning sunlight breaks—
Then farewell doubt and care,
For sweet and clear a voice I hear:
"Dood mornin', pop! You dere?"

The day dawns bright and hope revives.
The tasks it brings to me
Seem to be small if but the call
Comes fraught with childish glee.
And light of heart I face the day,
For on its morning air
Comes sweet music my ears to greet:
"Dood mornin', pop! You dere?"

When life is done, its task laid down;
When comes eternity;
I humbly pray the judgment day
Will bring one boon to me.
One boon I ask of Thee, dear Lord—
That in that city fair
My ears shall hear that greeting clear:
"Dood mornin', pop! You dere?"

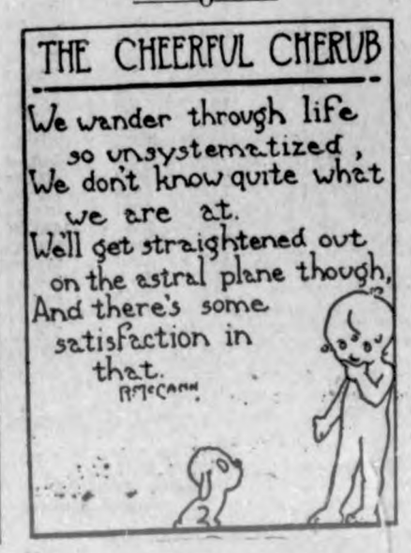
THE CHEERFUL CHERUB



Mother's Cook Book

r tokens must the bride's cake hold:
ilver shilling and a ring of gold,
rystal charm, good luck to symbol,
for the sewer's hand a thimble.

OOD FOOD FOR EVERY DAY

GOOD chowder for a chilly day is the following:

Onion Chowder.

ook two cupfuls of finely minced on in six tablespoonfuls of butter thirty minutes, or until the onion oft and yellow, not browned. Add t potatoes, pared and sliced, one spoonful of salt, one tablespoonful sage, marjoram and other herbs, one rt of water. Cook until the pota- s are tender; add three cupfuls of k and one cupful of cream. Let e to a boil and serve with pilot ckers.

Old-Fashioned Hard Gingerbread.

Take one cupful each of molasses, gar and shortening, and one cupful boiling water. Sift two tablespoons each of ginger and soda with one pful of flour and add to the mixture. x well; add flour to make a stiff ugh. Place in a cool place and the xt day roll out and cut in squares e-half inch thick and bake.

Round of Beef, Italian Style.

Take a slice of beef from the bottom the round, about three inches thick. ith a sharp, pointed knife make a mber of incisions through it and in- rt in each a slice of bacon, sprin- d with chopped onion and parsley; l into a tight roll. At least six rolls ould be thus inserted. Tie a string around the meat; chop some bacon, with onion and parsley and thyme and sweet marjoram to taste and spread the mixture in the bottom of a stewpan. Brown the meat on both sides and place over the bacon mixture in the saucepan. Pour over one quart of sifted tomato pulp and let stew slowly until the meat is done.

Soft Gingerbread.

Take one cupful each of sugar and molasses, one-half cupful of shortening, one egg, a teaspoonful of salt and three cupfuls of flour. Mix well, then add one cupful of boiling water, in which a teaspoonful of soda has been stirred. Pour into a large dripping pan and bake in a moderate oven.

For a pudding serve the following sauce with the hot gingerbread: Mix one cupful of sugar with one-quarter of a cupful of cornstarch; add one cupful of boiling water and cook until smooth. Flavor with orange rind and juice and, just before taking from the fire, add two tablespoonfuls of butter.

Pineapple Jelly Roll.

Prepare a sponge cake, bake in a large dripping pan. Trim the edges, spread lightly with butter, then cover with pineapple preserves; roll up in a towel and sprinkle the outside of the cake—before cutting—with powdered sugar.

Slices of canned pineapple, drained and cut in small pieces, are fine served in tea instead of lemon.

SILVIA DREAMS

By AGNES GRAHAM BROGAN

Copyright, 1922, Western Newspaper Union.

The violin stood in a corner of the shed where shabby sweaters and faded hats of men who worked, hung, near by. This outer kitchen was a place where Silvia pared potatoes in summer time—and dreamed her dreams.

Silvia was not a child; stored in her quiet head were wise philosophies and happy beliefs. These beliefs she intended by faith and effort to bring true. But the summer boarders who flocked yearly to Mrs. Haskins' cheery home were unaware of Silvia's wisdom; her dreams had long been a source of general amusement. Mrs. Haskins, good natured and indulgent loved to enlarge upon Silvia's visions.

"She sure is an odd piece," Mrs. Haskins would say, "and has been, ever since I took her out of the orphanage, six years ago. She was fourteen then, and land knows why I fancied that she'd be a help to me, but I did. And Silvia is a great help with all her notions; that's the strange part. They called her Ann, there, for want of a true name, but as soon as Miss Ann comes here she looks at me decided, out of her big black eyes and says: 'From now on, Mrs. Haskins, I am Silvia. I always did want a pretty name, and I guess I've as good a right to choose it as the asylum. Silvia is the kind of name my mother would have chosen.'"

"What," asked a boarder, "did the child know of her mother?" "Nothing," Mrs. Haskins replied, "except what they told us at the institution. Silvia had been rescued when a baby from a deserted tenement room, where her young dead father lay with his cold hand on her tiny warm body. Silvia's mother had died in the same room at the child's birth. The two young people had come there just before, and no one knew a thing about them—except, that the man played a violin.

"Then," asked a sympathetic young woman, "that is her father's violin, which Silvia keeps in the shed?"

"Bless you no!" laughed Mrs. Haskins. "her father's violin was taken for debt. The one Silvia has, was a premium offered by a grocery concern.

"Do you think," asked the interested young woman, "that Silvia would play for us? After the dinner dishes are out of the way, I mean?" "I am sure," responded the smiling hostess, "that she would not. Silvia goes far into the wood to play her music."

"She is then a queer little thing," agreed the guest.

Tears filled the elder woman's eyes. "And a dear little thing, too," she said.

Silvia slipped down from the stool where she had been polishing kitchen faucets, then from beneath a farm worker's hanging green sweater, she drew her violin; and far in the wood where shadows were deepest, she raised it lovingly to her chin.

A man in a cabin flung his book quickly aside, and hastening through the doorway came noiselessly toward the player. Close to her he halted, his eyes filled with wonder; breathlessly he listened. And then, as the last bird note echoed and echoed still again softly across the strings of Silvia's violin, the man faced her. She gazed startled. "I thought no one was near," she reproved him. "Are you so selfish with your music?" he asked.

The dark eyes were suddenly alight. "Is it then, music?" she asked eagerly, "real—music? And do you understand?"

The man sat down beside her.

"I understand music so well," he replied, "that I am out here in the woods nursing the disappointment of failure. For you see—I realize that all the skill I have will not compensate for lack of—genius. Your music is genius."

Silvia looked down at him sorrowfully.

"Without skill," she said.

"See here," asked the man sharply, "who are you, where do you come from? I have kept hidden in my shack for days, fearing that my presence might startle you away; yet your playing played upon my heart strings because it is such as I had hoped to create. Tell me—about yourself?"

So Silvia told him. He listened as others had not listened to her dreaming; understanding, believing.

"You are right," he said at last, "your father has bequeathed his gift to you. What are you going to do with it?"

"This," cried Silvia, and rose to her feet.

"This is the song that my father would have played when death called him."

Over the tree tops the enchanted melody rippled. Against the girl's round chin the violin sang wondrously of life, of joy, of sorrow. And when the song finished the man leaned tensely forward.

"You," he said, "must take that money which I intended to spend in study; you shall fulfill my—ambition."

And when later, a great ship started upon its voyage across the waters, little Silvia stood high on the deck waving her good-byes. She smiled cheerily into the rosy face of Mrs. Haskins; and then turned; that her last farewell might be to the man who watched her intently from shore. And into the eyes of Silvia flamed a sudden new dream. A dream of love come when both her purpose and this man's hope for her should be realized. And Silvia, has the faith of her dreaming.

Malabar and the Moplahs

Courtesy of Asia — Photo by Lewis S. Rose

Grinding Corn in an Indian Village.

(Prepared by the National Geographic Society, Washington, D. C.)

The Moplahs, whose revolt in India is one of the most serious the British have had to contend with in recent times, are operating in the portion of India—the Malabar coast—which was the first to be sighted by Europeans and the first with which trading was carried on. Yet it has been less known than any other part of the great peninsula empire. To the casual observer of maps this seems the front door to India, and the region which should be best known and most influenced by Europeans. For it is the coast facing toward Europe and lies just opposite the main water gateway to and from the west—the mouth of the Red sea.

But although it was natural enough that Vasco da Gama, after he had rounded Africa, should have his first Indian land-fall in Malabar, it is equally natural, when geographic conditions are taken into account, that most of the present-day argosies of trade shun this lower western coast of India and turn instead northward to Bombay or, doubling the point of the peninsula, anchor at India's "back doors," Madras and Calcutta. For the Malabar region is only a narrow strip 20 to 60 miles wide with rugged mountains, the Western Ghats, cutting it off from the rest of India almost as completely as would many miles of water.

Then, too, Malabar has no good ports. Calicut and Cochin did well enough for the light-draft caravels of the early explorers, but cannot well accommodate larger modern ocean-going craft. In the east India has no such continuous barrier as the Western Ghats, and so the wide portion of the peninsula to the east of those rugged mountains has become a familiar land to travelers and has to a degree become Europeanized, while the Malabar coast has been little known and has remained the best mirror of ancient India.

What the Region Is Like.

In few other places will the Westerner have his dreams of the East and of India come so nearly true as in Malabar. The climate is hot and the annual rainfall amounts to nearly ten feet. The coasts are fringed with millions of coconut palms. Just inland in many parts of the region are quiet lagoons and backwaters, connected by canals, on which picturesque Eastern "gondolas" ply. Along these inland shores are still more coconut and other palms, and in the waters are crocodiles. Everywhere brown natives swarm—mostly bare above the waist—little different in appearance and customs from the first Indians which the Portuguese found on those shores in 1498.

Back of the coastal lagoons are flat rice fields and in many sections these extend up the lower hillsides on terraces, irrigated from the countless monsoon-born streams that trickle down from the Ghats. Elsewhere the hill slopes are given up to gardens which even in the Fifteenth century were models of careful cultivation. In them are grown characteristic Eastern products, plantains, mangoes, pepper, cinnamon, ginger, coffee, tea and many vegetables.

Farther from the coast in the higher hills, are the luxuriant forests with their undergrowth of tree ferns, rhododendrons and reeds and their delicate and colorful orchids. And to complete the Westerner's dream-picture of the East, in the forests are tigers and leopards and wild elephants. This region is in fact the elephant country, par excellence, of India. In its small forest reserves in the Western Ghats the British Indian government makes a respectable amount of "pin money" by selling the elephants which it traps. Large herds, too, roam over the privately owned forest lands of the region and of Travancore, immediately to the south. These wooded mountains form a region of great beauty—precipitous peaks with dark-green ravines in which silver streams descend in numerous waterfalls and cascades.

Most of the People Are Hindus.

Though the Malabar coast is blessed with rich soil and luxuriant vegetation it is not as dependent on agriculture as most other portions of India. Fish abound in the sea and are caught in great quantities and eaten. The timber industry, too, is important and many natives are employed in it. Famines are practically unknown in this favored corner of India.

With nature so bountiful it might be expected that there would be general prosperity and peace in Malabar. Prosperity is fairly well distributed, but the motley of religions makes peace more difficult; and every now and then it brings about such turbulence as is known these days in other parts of India. The fierce fanaticism of the Mohammedan Moplahs and the stories of their bloody and furious outbreaks which reach the outside world may lead to the belief that this is as much a Mohammedan land as Arabia or Persia. The truth is that barely 30 per cent of the population are followers of the prophet, while about 68 per cent are votaries of Hinduism and some 2 per cent are Christians.

In prestige the Hindus are much the most important. The Nambudri Brahmans, at the very top of the caste scale, number only 20,000 in the total population of 3,000,000 of the Malabar district, but are looked up to with the greatest reverence. Nearly all of them are landholders, many of very large estates. They hold aloof from public affairs and scorn modern education, holding more tenaciously, probably, than their fellow religionists in any other part of India, to the ancient customs of their faith. The old conception of ceremonial pollution is a living thing in Malabar and is strictly adhered to except in the cities. There are varying distances within which the mere presence of a member of a lower caste is supposed to defile the Brahman. A high-caste man returning from his cleansing bath shouts out that he is approaching, and the low-caste members humbly retire to the roadside or into the fields until he has passed. Even many Mohammedans follow this custom lest economic pressure be brought to bear through boycotts or other means to destroy their livelihood.

The Mohammedans of Malabar—the Moplahs—differ greatly from other Indian Moslems. Many of them are descendants of Arab traders who came to the west coast in very early times, and they have retained all the fanaticism of the fiercest Mohammedans of the Arabian deserts. To them have been added converts from lower caste Hindus.

Moplahs in Periodic Outbreaks.

For considerable periods the Moplahs accept their somewhat submerged conditions and live in peace beside the Hindus. But their lust for turbulence and blood is only slumbering, and suddenly it breaks out with the assassination of a Hindu landowner, the defiling of a Hindu temple or the looting of a house. The little group engaged in these episodes runs riot over the region, their numbers growing until a fanatical mob is formed. A band usually is formed whose members definitely decide to make martyrs of themselves, are consecrated, refuse to surrender and sell their lives as dearly as possible when opposed. In the past battles with bands of Moplahs have smacked of fights of the Paris police with the notorious "apaches." In some instances it has been necessary to dynamite buildings in which the Moplahs had made their stand and from which they shot down all who approached them.

One of the peculiarities of the Malabar region is its system of inheritance through the mother. A man's property does not go to his children, but his sister's children are his nearest heirs. The Malabar district is under direct British control, but in Travancore, to the south, which is a native state, the succession to the throne is through the sister, and a ruler's sons are of no political or family consequence. Women, especially those of the upper classes, have a marked degree of independence, and may divorce their husbands at will—a privilege, however, which is usually exercised with discretion.

When the Portuguese first arrived at Calicut the natives were weaving cloth of excellent quality and it became an article of commerce with the west. The town, in fact, gave its name to calico. But the weaving of that fabric has almost died out and this original home of calico now actually imports the cloth.

"Tall" Fish Story.

A gamekeeper shot a large pike near the surface of the canal at Gorstang, Lancs., Eng. He found in its mouth a 12-ounce roach (or white fish), which again had just caught a small gudgeon.

Arrangements have been made with the Des Moines Electric Meter Company—one of the largest and most reliable concerns of its kind in the country—specializing in all the various of electrical measurements, for the inspection and testing of all electric meters in Klemme. The work will be conducted by Messrs. Paulsen and Scoonover, both men being experts in their line of work and carry cards of identification signed by Mr. E. A. Steelsmith, Consulting Engineer of the Company and under whose supervision all work is conducted. adv M 9-16c.

Plan Your Tiling Now

The next few weeks would be a good time to put in the few needed tile so as to get the use of that little patch of low land which is unfit for cultivation.

Don't take a chance on a dry year—there are sure to be times before the crop matures that these tile will be needed to save the crop.

We can't tell what the weatheman has in store for us.

We have a complete stock of tile from—

4 inch ..... at $33.00
5 inch ..... at $43.00
6 inch ..... at $54.00
7 inch ..... at $64.00
8 inch ..... at $85.00
10 inch ..... at $150.00
12 inch ..... at $190.00

Car load lots considerable cheaper.

NORTHERN Lumber Company

Local Items

The demand for Tanlac has broken all world's records. Over Twnety Million bottles have been sold since it was placced on the market six years ago. E. S. D. Kahrs.

A Woman Hung

her arms about her husband's neck as she passed Wellemeyer's Store and asked him to buy her a Brunswick Phonograph. adv

Mildred Johnson, who was sick for about four weeks, returned to her school duties at Garner last week Wednesday. She was certainly glad to get back to her studies.

NOTICE—Big Tax Payers Meeting at Garner Court House Saturday. April 1, at 10:00 A. M. and 1:00 P. M. Farmers and their wives especially invited. ad 2wc

Cards were reveived from Chas. Stiehl stating that they were at Kansas City, Mo. on Sunday and that if roads permitted the party would arrive in Klemme the middle of the week.

The Times may appear a little slim this week but we were rushed for time as we were away from business for over a week on account of the illness and death of ous sister.

A number of friends gathered at the home of Mr. and Mrs. Henry Lemke last week Tuesday evening to help them celebrate their "tin wedding anniversary." All report a fine time.

Young Man!

The snappy stple of the International all wool samples together with low prices makes Wellemeyer's the place to buy your Easter Suit, April 16th is the day.

Mr. and Mrs. C. G. Waterman gave a St. Patrick's Party at their home last Friday evening. The evening was spent playing Whist after which a delightful lunch was served. All report a most pleasant time.

Cheer Up!

If your pants bag at the knee and your coat is rumpled, bring them to Wellemeyer's. For $1.50 we will dry clean and press your suit and make it look like new. We do everything in the cleaning and pressing line.

The Wellemeyer Store was surely a "bee-hive" last week Wednesday; the attraction was a sample line of 240 of the newest aprons and dresses for women, no two alike. We understand that the store sold nearly a 100 garments in this one day.

Elmer Fuller was over from Clear Lake Saturday on business here. He is assistant manager of the Wagner Motor Company of that place. They still live at Garner but intend to go to the lake as soon as a suitable location can be found.

Laundry basket leaves Wellemeyer's Store every Wednesday and gets back every Saturday.

WANTED—A hand power washing machine. Inquire at the Times Office.

Mrs. A. A. Depping and son are at Baxter, Iowa, visiting Mrs. Depping's parents. Her father has not been well of late; he is a gentleman of about eighty years of age. Reverend is "batching it" these days but so far we cannot see that he has lost any in weight so he is evidently a good cook.

Everett Amey left for Mason City Tuesday afternoon. His wife has been in the hospital at Mason City for several weeks and will undergo another operation today we beleive. It is thought that she will regain her health after this operation and her many friends hope for her speedy recovery.

Mr. and Mrs. J. W. Waterman left Friday for Keystone, Iowa, being called there by the death of Mr. Waterman's sister's husband. They returned to Klemme Tuesday afternoon. During postmaster Waterman's absence Miss Minnie Lau assisted Minnie Lenz with the duties of the office.

AUG. BARZ, Director.

NOTICE TO BRIDGE CONTRACTORS.

Sealed bids will be received at the office of the County Auditor, Garner, Iowa, until 1 o'clock P. M. March 30, 1922 and opened at that time for the construction of the concrete bridges and culverts listed below. Plans and specifications may be seen at the Auditor's or Engineer's office.

A certified check for five (5) per cent of bid made payable to the County Auditor shall be filed with each bid which in the case of the bidder (or bidders) receiving the award should be fail to execute a contract and file a bond within fifteen (15) days after the acceptance of his bid shall be forfeited to the county as liquidated damages.

The successful bidder will be required to furnish a bond for seventy five (75) percent of the contract price executed by a responsible surety, drawn to protect the county and any subcontractor, and such as will be approved by the clerk of the district and the Board of Supervisors.

The county reserves the right to waive defects and reject any or all bids.

Tenders will be received on the following items:

Fred Arnold (Junior) who has been very sick for about a month, is now improving quite noticeably. His numerous friends rejoice with him and hope he will soon be released from his unpleasant confinement. However, at the time of writing, a trained nurse is still taking care of him.

A meeting of directors of the Independent and Consolidated School districts of the Countp was held at the Court House Wednesday, March 16th. The question of teachers salaries for the coming year was informally discussed. It seemed to be the general opinion of those present that the school standards should not be sacrificed by hiring inferior teachers for the sake of economy. However, the present salaries were fixed a year ago or nearly so. Since that time there has been a marked decline in business and industrial situations. In view of these facts there was quite a sentiment in favor of a slight reduction in salaries for the ensuing year.

JACK'S HIND FOOT

YOUNG JACK RABBIT had been told by his mother not to venture out. "There is going to be a storm," said Mrs. Rabbit, "and the snow will be deep and the wind anything but gentle, so snuggle down in your bed and go to sleep.

But Jack Rabbit was hungry, very hungry, indeed, for he had seen some turnips being carried into Mr. Man's barn, and though he did not dare go in then, he did look about and find a nice convenient hole where he could go in later and have a feast.

And that was just what he had planned to do that night after all the family were asleep. He intended to run up to the farm again and creep out softly and have all the turnips he could eat for once in his life.

Mr. Dog would be sound asleep, and he would not be nosing about looking for poor little hungry rabbits at that hour, and Mr. Horse never bothered anyone, and now his mother was spoiling it all by saying it was going to snow and the wind would blow. It was too bad; that was all there was about it.

He intended to creep.

Jack Rabbit thought all this and more, too, and the first thing he knew, instead of being sleepy he was wide awake and hungrier than ever.

He got out of his nice warm bed and peeked out of the door. It wasn't snowing and even if the wind was blowing there was the moon. "Mother does not know everything, and this time she surely is mistaken," thought Jack.

He did not notice the clouds scudding across the face of the moon, for his mind was on those turnips up in Mr. Man's barn.

He took long leaps and jumps and soon Jack was crossing the field, running toward the barn.

"Oh, dear," cried Jack as he stopped in the snow a minute, for there was snow on the ground that had been there a long time, but the thing that made him cry out was a heavy gust of wind that blew his long ears about and lifted a handful of dry snow which struck Jack right in his eyes.

The moon was nowhere to be seen now and as Jack Rabbit hopped along he saw that snow was coming down very fast. It was no use turning back now, so he kept right on hopping toward the barn.

He was pretty cold and tired when he got to the convenient hole in the side of the barn, and when he was in where it was nice and warm once more, Jack waited a minute before running over to the turnips which he saw on the floor in one corner of the barn.

"There is Mrs. Hen and her chicks," thought Jack. "She was sensible to come in here instead of staying in the poultry house this cold night, and then she is safer here from Mr. Fox than with the other poultry."

Jack's ears went up straight for he heard a sound outside, although it was faint. "What's that?" he thought, sitting very still and his whiskers trembling as he listened.

"I guess I better run right home," said Jack Rabbit, hurrying toward the convenient hole through which he had entered, but when he reached it he changed his mind quickly, for Mr. Fox's nose was poked through and Jack Rabbit turned to run.

Then he remembered his hind feet, and with a mighty hard kick Jack struck Mr. Fox right in the face, which made him see stars and sent him running home sure some terrible creature was hidden in Mr. Man's barn.

But Mrs. Hen was wide awake, for she was aware Mr. Fox was about before Jack had seen him, and now she was clucking her thanks at Jack as he sat trembling behind a barrel.

Jack Rabbit was a hero and did not know it, for Mrs. Hen told him he had saved her and her children also from that bad Mr. Fox.

By and by when it was all quiet again in the barn Jack crept to the turnips and ate his fill and then he ran off home again, for it had stopped snowing and the moon was out.

HARRIETT

HARRIETT, by all right of significance, should belong to Ireland since it means "home rule." But in reality, it has its origin in old Norse mythology where there was a porter of Valhall called Heimdall, who watched the further end of the rainbow bridge Bifrost to guard the Assir from the giants. His name is explained by translating the "heim" as home. It was through this Heimdall that all the Henrys and Harrys came to be.

The feminine of the name was invented in the Fifteenth century. It is thought to have originated in France since Henriet Stuart appears in the House of Stuart d'Aubigne in 1586, and there were a number of Henriettes to match the Henris of the court of Catherine de Medici. England received the name from the daughter of Henry IV, Henriette Marie, whom the prayerbook calls Queen Mary, though her godchildren were all called Henrietta. The queen's name was given the French pronunciation, which is Hawyot, and that became a separate proper name. Harriett is also pronounced in that manner by those who are excessively given to propriety.

In England Henrietta is as great a favorite as Harriet. Another spelling of the latter is Harriot. Hattie, Hetty, and Etta are diminutives. Henriette is purely French and Henrietta and Jette are Teutonic. Italy has an Enrighetta which is the equivalent of Harriett. Spain has evolved the musical Enriqueta.

The moonstone is Harriett's talismanic gem. Through some mystic connection with India and her sacred colors, it is said that Harriett's color is yellow. If she wears this and a moonstone, she will have good fortune and attract the love of men. Monday is her lucky day and 4 her lucky number.

A LINE O' CHEER

By John Kendrick Bangs.

THE LIGHT-BEARER

YOU cannot be the sun,
But you can carry light
To those whose paths must run
Through ways of night.

You cannot be a star
That lights the heavenly way,
But where dark shadows are
At close of day.

E'en as the star anon
Leads to the morning clear,
So too may you lead on
To realms of cheer.

Kathleen Myers

One of the new faces in the "movies"—Miss Kathleen Myers—promises to prove of much interest to the patrons of the moving picture theaters. Miss Myers is the daughter of a very successful steel manufacturer. She is said to possess marked ability.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

BEVERAGES

"Men really know not what good water's worth."—Byron.

IT HAS been said that the real test of good table manners depends on one's ability to manage a knife and fork in the right way. Quite as good a test might be shown in one's mode and manner of drinking any of the ordinary everyday beverages. The really fine points in manners are revealed in these everyday things. Don't worry your head over the proper way of dispensing tea from a Russian samovar. It is much more important to drink the everyday brew from an everyday tea pot.

It seems unnecessary to say that we should drink noiselessly. However, most people don't. Keep tab on yourself sometime and see whether you yourself do not have to exert quite an effort in order to make your drinking absolutely noiseless. In drinking tea, coffee, or other beverages served in cup and saucer, you should use the spoon only in order to mix the sugar and then to take a few spoonfuls by way of testing the temperature. To sip the entire cupful in spoonfuls is decidedly bad form. If you have been advised to "sip" tea or water in this way for your health, then out of kindness to your associates take this in your own room as you would any other sort of remedy.

Needless to say we never leave the spoon in our cups. After the sugar is added it should be mixed by one or two motions of the spoon in the cup and then it should be laid on the saucer beside the cup. If your venerable grandmother or grandfather drinks with the spoon in the cup, just recall that in the days that are long gone by this was regarded as a perfectly correct mode of drinking; but that is no excuse for anyone else.

The same rule applies to spoons in any glass or cup. And remember when you are partaking of a soda fountain concoction that you should not drink with the straws in the glass. As a matter of fact very good manners make no allowances whatever for straws. At all events they and the long spoon that is served with the fountain drink should be removed and laid aside before attempting to drink from the glass.

An exception to this rule against straws must be made in favor of certain warm-weather drinks that really contain so much chopped ice that to drink them in any way save through a straw would be quite impossible.

Suit and Dress Modes of Today

Quite fascinating are the latest showings at the dress shops. Everything, notes a fashion writer in the New York Times, is new and fresh and charged with vibrations of a promised springtime. And, in spite of the usual line, which is always confronting us where fashions are concerned, about there being no change to speak of, still there is every subtle difference to the lines of the silhouette and the character of all-important details.

The immediate concern of every woman is—what will be the first spring dresses and suits? What will the colors be? What materials are most fashionable and most wearable all in one combination? At how many inches from the floor will the skirts stop their downward trend? Will sleeves be much the same or changed in any way? And myriads more of questions along this general line.

Unusual Frock of Poiret Twill Trimmed With Bands of Brocaded Ribbon in Bright Colors.

The only thing to do, for one who attempts to give adequate answers to these questions, is to watch each new creation and its effect upon the public. So that just now there are a few fine points which have been registered with that force which indicates that they will be prominent. Further than that we cannot go just now.

There is a general feeling that the suit has gone out, or that it is not so much in fashionable favor as was the case sometimes in the past. That may or may not be so, but nevertheless there are any number of new and lovely-looking suits upon the market. Most of them (with the exception of the sport suits) are characterized by the fact that, instead of being made with skirt and blouse and coat, they are made with a dress in one piece and a coat to go with it.

Blouse Harmonizes With Skirt.

Sometimes there is a clever amalgamation of these two ideas, and the blouse is made to harmonize so perfectly with the skirt that the two together look, for all the world, like a one-piece frock. This latter combination has one big advantage over the old-fashioned idea of shirtwaist and skirt in that, when the waist wears out, there can be another one. And, since this is the portion of the dress which always shows the first signs of wear, there is more in the idea than might be at first visible.

But there are so many pitfalls in the direction of combining blouse and skirt that if one attempts that character of dressing one must be more than usually clever in constructing or choosing the design and in the manner in which one amalgamates the two. Not any blouse will do with any skirt, but the two of them have to be thought out together and arranged so that, when worn in unison, they will look as though they belonged together.

An interesting blouse shows a peculiar type of waist which does well when combined with a separate skirt and worn with a coat to match. In spite of the fact that the blouse is a unit in itself, it none the less has the quality of being able to blend with a skirt of some other material in a purely artistic manner. This blouse is made of yellow crepe chiffon, with many bunches of fullness about it and an underlying layer of a warmer yellow, to make it take on a richer tone.

Doubles Life of the Costume.

It is designed to be worn with a full brown skirt of kasha cloth and a cape made of that material, and then the cape should be lined with the same colors of chiffon, posed one over the other, in order to carry out successfully the color scheme. The embroidered bands arranged on the blouse carry out those shadings of tones, running from brown to yellow, and, as the stitches are done in silk threads, there is a lustre which is charming against the thin chiffon and which does a great deal toward drawing together the color of the skirt and the colors in the blouse.

For a woman who has to give her spring suit, or any suit for that matter, a great deal of wear, this manner of combining waist and skirt is a veritable boon, for it just about doubles the life of her costume and, when there is so much expense involved, that consideration becomes an important item.

The girdle for this blouse is made of a soft crepe in a shade of brown, midway between the yellow of the blouse and the brown of the skirt. Then it has a long fringe of all of the varicolored threads used in the embroidery on the trimming of the blouse, which also serves to tie the two separate parts of the costume into one single unit.

This type of blouse for the costume suit is far more beautiful and fashionable than the old and accepted variety of white shirtwaist. In fact, the latter seems to have disappeared entirely off the face of the earth, except in its tailored state for sport suits and as a handmade French thing to go with the regulation tailored suit.

A suit is the thing which, in the spring, makes a woman look so well groomed and compact in style and so ready for any outdoor or street occasion. Women are loath to let it go as a type of dressing and, even though its character has been somewhat changed and twisted around, it is still the suit that has meant so much to the general well-dressed appearance of the American woman.

There is a new type of suit, with the very much abbreviated jacket, and a little vest that adds a touch of color in a new and original way. It is a relief to see suits getting away from that collar and cuff trimming which, after all, is so obvious. And this little waistcoat creates a freshness of feeling which will be a relief to many women who long to wear this sort of suit and still insist upon having their clothes in the fore ranks of fashion.

Loosest Sort of Homespun Weave.

Wool etamine is the material used for this suit. It is the loosest sort of homespun weave, and it also has about it a wiriness of character that makes it take very interesting lines, when developed either in the little spring suit or in a coat dress meant to be worn on the street. It is a fabric which is a little more dressy than the woolen homespun which is going into the sport suits, and yet its weave is so much like that of homespun that it keeps the fabric in the class of popularly accepted materials.

Following the craze for the long waistline that is bloused, many of the spring suits, especially those that are sent from Paris, show that long, bloused, Russian line with a very short, flaring peplum and a high, standing collar. It is an informal sort of suit, but one that is extremely youthful in its appearance and which, for that reason, is bound to exert a strong influence upon spring styles. With it the high, close-fitting Russian turban is the thing, and the whole makes an interesting silhouette which is new in every way.

Black has been so predominant among the winter street fashions, and we have become so accustomed to seeing it used in combination with gray and cream and tan, that it is hard to realize that it will ever go out as a universal fashion. However, there are strong rumors that midnight blue for street wear this spring will take the lead against this established supremacy of black. There will be many to welcome the advent of this old, tried and true color. Most women have the dark blue habit so strongly established in their systems that they cannot face the possibility of wearing any other color. In fact they cannot seem to feel at home in black, smart as it may be. Blue, when it is becoming, carries with it much charm and character, though when it is not exactly the right tone for the personality in question, there can be no other color more insignificant looking and more ineffectual as a fashionable thing.

Wool Etamine in Cool Gray With the New Short Coat and a Waistcoat of Striped Silk.

Home Town Helps

WELL CALLED "MODEL TOWN"

Industrial Community in Massachusetts Approaches the Ideal as a Place of Residence.

Of the town of North Billerica, Mass., a correspondent of the Boston Transcript writes:

As one walks about town he is pleasantly surprised by the appearance of cottages and gardens. They represent various types and periods of construction and evidence of individuality in taste, but their charm lies mainly in their gardens. Here one discovers the feminine touch in delicate vines trained over roof, porch, fence and wall, or in a charming porch box filled with color, harmony and grace.

The more ambitious maculine effort is detected in spacious gardens, showing evidence of muscle and determination. Everything, however, reveals the hand of the landscape designer who, by his advice and supervision, has helped to create and maintain the desired effect, being careful not to destroy the individuality that is so important a part in any garden, and thus the yearly competition feeds the very natural element of ambition.

"Do you feel that you secure a material advantage by employing a landscape designer to beautify the grounds about your plant and help your tenants in making and maintaining their gardens?" I asked Frederic S. Clark, president of the Talbot mills.

"It is impossible to state from a dollars and cents standpoint the effect of the landscape work, or of any of the other features which we have introduced outside our purely business relations with our employees," he replied. "I am glad, however, to say that our relations in every way are of a very friendly character. We have had but one strike of any moment, and that was about 25 years ago. Our labor turnover is comparatively small, which is an indication of satisfactory employment conditions."

SHOULD BE WELL LAID OUT

Importance of Proper Planning a Town's Future Is a Matter Too Apt to Be Overlooked.

Speaking at the session of the conference, the Rev. Howard S. Childley of Winchester pointed out that town planning is an ancient art, applied by the Romans in England and excellently instanced by the planning of the town common at Oxford, England. In its application, he said, European cities and towns are far ahead of the United States and American cities and towns show today of what value planning would have been at their inception. To obtain this development now Doctor Childley urged, education of the community to the economic value of the work, and then the enlistment of individual interest in co-operation must be attained.

As the representative of the Commonwealth, Mr. Young declared that despite eight years of encouragement by law, the need of town and city planning is not widely enough realized. He asserted that the time has come for the state to provide more appropriation for this work and to aid in creating public interest. Pointing to the development of municipal forests abroad, he urged the importance of such reservations to a community with the lapse of a half century.

When a City Is Disfigured.

When any part of the city is disfigured by billboards or when any residence neighborhood is ruined by the unnecessary intrusion of business the whole city suffers. People don't enjoy passing ugly or ill-kept property in going to their homes. It weakens the incentive for a family to own its home and there is danger that the property may be hurt at any time by the erection of a business house next door.

A city cannot permit itself to be disfigured in spots. It cannot acquiesce in a policy of ugly neighborhoods here and there. If it does, it subjects itself to unnecessary handicaps. It retards its growth.

A city is a unit. Damage to any part is damage to the city.—Kansas City Star.

A Railroad Monopolist.

"Pa," said Johnny on the afternoon of Christmas.

"Well, my son?"

"Why didn't you ask Santa Claus to bring you one of those electric trains if you like to play with it so much?"—Boston Transcript.

Rural Community Best.

Civilization, culture and development of rural people are to be found in conjunction with town and small city, and not apart.—Galpin.

Companionship.

"Don't you feel sorry for the poor animal that was skinned for the fur you bought for your wife?"

"Why should I feel sorry for my quadruped? It's true he was skinned for those furs. But so was I."

Among the Tired Business Men.

"You no longer embellish your speeches with humorous anecdotes."

"I had to quit it," replied Senator Sorghum. "Audiences got to call for funny stories instead of paying attention to my serious arguments."

DAIRY FACTS

REEDING HELPS PRODUCERS

tter Sires Increase Average as Well as Total Production and Increase Profits.

(Prepared by the United States Department of Agriculture.)

There are several ways of improving dairy herd. Elimination of low oducers increases average produc- n. It may decrease total produc- n, but usually increases net profit. e experience of successful dairy- n and of the Department of Agri- lture has shown this. Better feed- g of the cows already on the farm creases average and total produc- n, and may increase net profit. Use better sires increases average as ll as total production, and always creases net profit, it has been found. All dairy-herd improvement due to tter breeding tends to increase profit the producer and decrease cost to e consumer. It is one of the ways which the world may become richer thout decreasing the prosperity of y individual in it.

Well-formed, registered bulls from oved sires and advanced-registry ms are usually fit to head even high- oducing dairy herds. When such lls have proved sons and advanced-

rebred Bulls Transmit High-Produc- ng Qualities of Their Ancestors.

istry daughters, their value be- mes exceedingly great because of certainty that they will transmit large measure to their offspring the h-producing qualities of their an- tors. So far as possible only such lls should be chosen to head herds selected, high-producing, registered ry cattle. In ordinary dairy prac- e, however, the bull goes to the k before the production records of daughters are available. In that y many excellent bulls every year lost to the dairy business.

NGESTION OF COW'S UDDER

mparatively Simple Trouble Brought on by Improper Feeding—Not Hard to Cure.

ongestion of the udder is in itself comparatively simple trouble ught on by a combination of heavy ding, consequent high condition, a sluggish, lymphatic system. The mer is to be desired, but the latter not. Congestion will usually yield dily to a preparatory dose of salts laxative feed, together with an asional ounce dose of saltpetre in drinking water. Exercise, par- larly previous to calving, but after ing as well, is also beneficial.

o prevent congestion of the udder eloping into inflammation and gar- avoid standing cow in draughts milk often, rubbing the udder tly with camphorated ointment aft- each milking. If there is any in- tion of more serious trouble de- ping, give the cow a strong laxa- (Epsom salts 1½ pounds, molas- 1 cup, and ginger 1 ounce), fol- ed after purging ceases by daily ce dose of saltpetre, at the same bathing the udder with hot water 15 to 20-minute periods, finally ing it and rubbing with camphorat- ointment and petrolatum.

VE CALVES GOOD EXERCISE

essary to Keep Young Animals in Best of Health—Have Yard Protected.

o keep calves in the best of health to permit of a proper development he lungs and chest they should be mitted to have outdoor exercise n in cold weather. It is well to e a yard which is protected from h the north and west winds if pos- e so that calves may be turned out winter, but on cold days it is not isable to leave calves out long ugh to become chilled.

Imperative Needs of Cow.

regnant cows need succulent or tive feed and exercise to keep r bowels active, if they are to ape milk fever and caked or con- ed udders, have strong calves and ty of milk at calving time.

Cows Need Full Ration.

is a mistake to feed just enough eep the cow nourished; she needs ll ration so her body requirements not use all the nourishment, leav- nothing for promoting the milk

LIVE STOCK

SEVERAL USES FOR ALFALFA

Experts Term It Nearly Perfect Forage—As Hay It Is Unsurpassed for Feeding.

(Prepared by the United States Department of Agriculture.)

"A nearly perfect forage"—that is the height of praise heaped upon alfalfa by R. A. Oakley and H. L. Westover of the United States Department of Agriculture in a new Farmers' Bulletin, Utilization of Alfalfa, just issued. And when the good qualities of this crop are enumerated it is evident that some such description is warranted. As a hay it is unsurpassed for general feeding; as a pasture it has a high carrying capacity and produces large gains; as a soiling crop it is valuable with proper handling; it

Cattle Grazing on Alfalfa.

makes excellent silage; and when ground into meal it is a good and easily handled feed. In addition to those good qualities it is of great value as a soil improver. Attempts have even been made to introduce it as a human food and as a medicine, but it cannot compete with other staples as a food and it has no special medicinal properties.

Although not detailed enough to make laborious reading, each subject from haymaking on through to alfalfa meal manufacture, and a consideration of fake and fad alfalfa products, is treated so fully as to give the reader a thorough understanding of the possibilities of this great crop. Those who are inclined to be too enthusiastic over certain uses will find reason in the collected experience of many growers and feeders to modify their views, for alfalfa is not a panacea for all the troubles of the farm and feedlot. Consideration is given to the needs of dairy cattle, beef cattle, hogs, sheep, horses and poultry, and to the crop in various forms, including hay, pasture, silage, straw, soiling feed, tea and meal.

Those who are interested should write to the United States Department of Agriculture, Washington, for Farmers' Bulletin 1229, which will be sent free of charge.

HOW MANY SHEEP TO A FARM?

Plan of Live Stock Production Recommended by the Department of Agriculture.

For 160-acre farms of all-arable land a plan of live-stock production has been recommended by the United States Department of Agriculture which includes 80 ewes (one ewe to two acres) along with 22 breeding cows and 12 brood sows. Arable land of the best class when used exclusively for sheep, can be made to support from five to eight ewes (with their lambs until marketed) per acre. On pastures suitable for either cattle or sheep five ewes may be considered the equivalent of one cow or steer, and the winter feed required for one breeding cow not in milk would be equivalent to that needed for about eight ewes.

GOOD FEEDS FOR FATTENING

Cane and Beet Molasses Tested at Iowa Experiment Station in Feeding Steers.

Cane and beet molasses are good feeds for fattening steers. The only question, in some cases, is whether it is economical to feed it in competition with cheap corn. Tests at Iowa experiment station, with two-year-old steers, showed a loss on every ration tried, but there was a smaller loss when cane and beet molasses were omitted from the ration in one set of feeding tests. Tests a year ago last winter brought this bit of advice: "Go slowly in purchasing either cane or beet molasses if the price is higher than corn, pounds for pound." If a feeder wants to use a pound or so a day per steer for an appetizer he can afford to pay more for it.

Watch the Ewes Closely.

Pregnant ewes should be closely watched and means devised that each member of the flock receive proper care.

Making Money With Hogs.

By making small fields and keeping each cropped, hogs may be raised with a minimum of expense.

Excellent Hog Pasture.

Dwarf Essex rape makes excellent pasture for hogs. A deep, rich soil is suitable

MOSAIC DISEASE HARMS POTATOES

Adequate Measures for Elimination of Ailment Must Be Taken Immediately.

TROUBLE SPREAD BY INSECTS

Situation May Be Somewhat Improved by Partial Weeding Out of Worst Cases—Yield Is Reduced About 30 Per Cent.

(Prepared by the United States Department of Agriculture.)

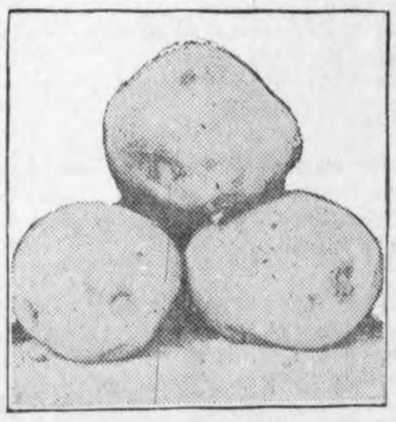
A survey of the Western states conducted during the past summer by pathologists of the United States Department of Agriculture shows that unless adequate measures for the elimination of the mosaic disease of potatoes are taken immediately the work of potato seed improvement in the West will soon become extremely difficult, if at all possible. Being of an infectious nature, the disease is spread in the field throughout the summer by means of insects which carry it from diseased to healthy plants, and it is also transmitted with the seed tubers from one generation to another.

There is no evidence that a plant once infected can recover and produce a healthy progeny at any time. On the contrary, the infected plants ordinarily under certain environmental conditions practically cease to produce tubers in the third or fourth generation. If only a partial weeding out of the worst cases is practiced, the situation may be somewhat improved, though not in all cases and by no means permanently. The mild and the medium stages of the disease left in the stock serve as perpetual sources of infection, and eventually the entire strain becomes diseased and is apt to "run out" completely.

Reduces Yield 30 Per Cent.

It has been repeatedly demonstrated in the East that the average reduction of yield due to mosaic is about 30 per cent. Precisely the same effect of this disease was noted in the case of all the varieties grown in different Western states. Some remarkable instances were observed during the last two years of field observations carried on by the department in which the reduction of yield in individual hills was in direct proportion to the severity of the infection.

The potato acreage in certain irrigated sections of the West has been increased this year by one-third as compared with that of the last year, yet the yield in these districts is only two-thirds of normal. Many growers complain that where 300 sacks or more were raised to the acre in former years, only 100 to 150 sacks are obtainable now. This is in fields under good cultural conditions, showing good stands and a high freedom from fungus and bacterial diseases. The low yielding quality of the strains in question no doubt is principally a manifestation of mosaic. The need of good seed in the West is well recog-



Healthy Irish Cobbler Potatoes.

nized and is growing every year, yet only a meager quantity of even relatively good seed is obtainable.

There is very little, if any, hope of improving badly infected strains of potatoes, the department specialists think, therefore, prompt efforts should be made to locate the most healthy strains of the various important commercial varieties. Since there is no means at present of detecting mosaic on the tuber the search should be confined exclusively to the fields during the growing season. When the best strains are found they should further be improved by the annual elimination of all the diseased individuals.

Specialists Must Be Sought.

It is necessary to place this work in charge of highly trained specialists, since the identification of certain minute and peculiar characters of the disease requires a considerable experience and a great deal of pathological knowledge. Furthermore, manifestations of mosaic under the varied cultural and climatic conditions of the West are often very obscure and not yet fully understood.

BIG NEED OF BETTER ROADS

Engineers at Sea Regarding Highways Which Will Stand Up Under Modern Traffic.

A. R. Hirst, Wisconsin highway engineer, has declared that the best engineers today are at sea regarding the kind of roads which will stand up under modern traffic, or the traffic which will develop in a few years. Travel by air to any considerable extent is still a long way off, and for a good many years to come there will be urgent need for better and better highways.

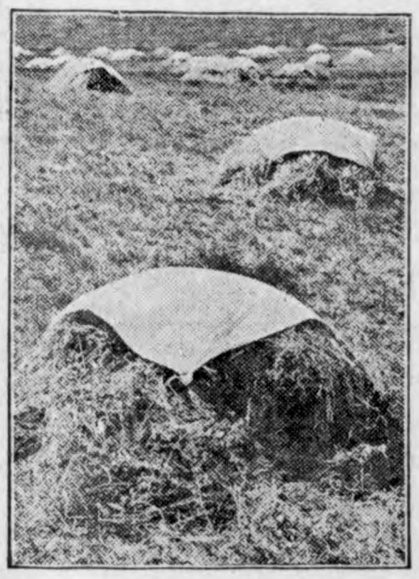
ALFALFA SURPASSES FOR STOCK FEEDING

Good Qualities of Crop Enumerated in Bulletin.

In Addition to Advantages as Pasture and for Silage It Is of Great Value as Soil Improver—Other Possibilities.

(Prepared by the United States Department of Agriculture.)

"A nearly perfect forage"—that is the highest of praise heaped upon alfalfa by R. A. Oakley and H. L. Westover of the United States Department of Agriculture in a new farmers' bulletin, Utilization of Alfalfa, just issued. And when the good qualities of this crop are enumerated it is evident that some such description is warranted. As a hay it is unsurpassed for general feeding; as a pasture it has a high carrying capacity and produces large gains; as a soiling crop it is valuable with proper handling; it makes excellent silage; and when ground into meal it is a good and easily handled feed. In addition to these good qualities it



Alfalfa Is Praised as "A Nearly Perfect Forage."

is of great value as a soil improver. Attempts have even been made to introduce it as a human food and as a medicine, but it cannot compete with other staples as a food and it has no special medicinal properties.

Although not detailed enough to make laborious reading, each subject from haymaking on through to alfalfa meal manufacture, and a consideration of fake and fad alfalfa products, is treated so fully as to give the reader a thorough understanding of the possibilities of this great crop. Those who are inclined to be too enthusiastic over certain uses will find reason in the collected experience of many growers and feeders to modify their views, for alfalfa is not a panacea for all the troubles of the farm and feedlot. Consideration is given to the needs of dairy cattle, beef cattle, hogs, sheep, horses and poultry, and to the crop in various forms, including hay, pasture, silage, straw, soiling feed, tea and meal.

Those who are interested should write to the United States Department of Agriculture, Washington, for Farmers' Bulletin 1229 which will be sent free of charge.

HIGHWAYS ARE FLEECE LINED

Because Cotton Is So Cheap, Ranchmen of California and Arizona Use It on Roads.

Fleece-lined roads for getting motorists over desert sands have recently made their appearance and have surprised a great many motor tourists traveling through certain sections of California and Arizona, says the Illustrated World. There is such a low market value upon cotton in certain sections that it scarcely pays to haul it to the railroad stations. Much that is raised, therefore, goes into the making of roads.

Ranchmen of the Salt River valley of Arizona are doing with cotton just what farmers in other sandy sections do with straw or brush. Cotton is simply thrown down upon the road over stretches where the sand is annoying. Traffic over the road then packs the cotton down into the sand until it forms a firm, smooth and resilient surface, over which motor-vehicles may progress with almost as much ease as over a paved street in a city.

WAY TO PLANT IRISH POTATO

Crop Not Particularly Adapted to Small Gardens and Requires Well-Prepared Soil.

While Irish potatoes are not adapted to growing in the extremely small garden, most gardeners prefer to include them in their list. One peck of seed Irish potatoes will plant about 300 feet of row. It seldom pays to plant home-grown seed and it is much better to use the home-grown potatoes on the table and purchase seed that has been produced in some locality especially adapted for seed growing. Potatoes require a well-prepared, rich soil, and it pays to use commercial fertilizer, well mixed with the soil of the hills or the rows. The seed should be cut two eyes to each piece, with plenty of potato attached. One piece should be planted in each hill and covered to a depth of about 3½ or 4 inches. The rows should be at least 30 inches apart and the hills 12 to 15 inches apart in the row.

POULTRY

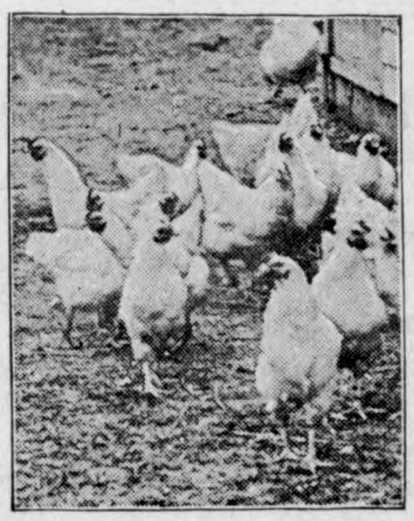
STIMULANT AIDS SOME HENS

When Fowls Are Off Their Feed and Act Dumpish a Little Pepper Will Brace Them Up.

(Prepared by the United States Department of Agriculture.)

A flock of laying hens in good health has no need for condiments, say poultrymen of the United States Department of Agriculture. A hen whose digestive apparatus is in good working order needs no more stimulation for egg production than is provided by a good, well-balanced ration, proper care and housing. But when hens are off their feed and look dumpish a little jigger of pepper or something of the sort in the ration may cause her to pick up and run on all cylinders again."

Various snappy and pungent condiments are used for the purpose, but the following mixture has been found as good as any and may be made up by the flock owner at low cost: Mix equal parts of ground red pepper, ground allspice, ground ginger and ground cloves, and one-half part of ground fenugreek seed. Many of the condiments sold to flock owners are largely filler and sell for a high price. In the mixture given there is nothing but the essentials. A tablespoonful of the mixture in 2 quarts of moist mash 2 or 3 times a week or a teaspoonful in 1 quart daily should be



Don't Keep a Rooster—Hens Lay Better Without the Presence of a Male Bird.

fed until the birds are back in good order.

It is not good practice for poultrymen to feed these things when the flock is in good appetite. When feed attracts hens little more can be done to stimulate the egg organs.

TURKEYS LAY EARLY IN DAY

Broodiness Can Be Discouraged by Confining Hens in Coop With Slat Bottom.

(Prepared by the United States Department of Agriculture.)

Turkey hens can easily be broken of their broodiness by confining them for two or three days to a coop with a slot bottom. They will mate soon after being let out of the coop and begin laying in about a week. The first two or three eggs of a litter are usually laid at the rate of one every other day, after which the hens ordinarily lay every day until they are broody, although sometimes they skip one day before laying the last egg of a litter.

There is no particular time of day when a turkey hen lays, but most of the eggs are laid in the morning, say poultry specialists in the United States Department of Agriculture. The following dates of laying and lengths of time remaining on the nest were obtained by watching a turkey hen during the laying season, and are typical:

Date	Time of laying	Time of leaving nest
March 27	3:00 p. m.	4:00 p. m.
March 29	11:00 a. m.	1:00 p. m.
March 31	8:30 a. m.	10:00 a. m.
April 1	11:00 a. m.	1:00 p. m.
April 2	4:00 p. m.	5:00 p. m.
April 3	11:00 a. m.	12:30 p. m.
April 4	8:30 a. m.	9:30 a. m.
April 5	9:00 a. m.	3:00 p. m.
April 6	9:00 a. m.	2:00 p. m.
April 7	9:00 a. m.	3:00 p. m.
April 8	10:00 a. m.	4:00 p. m.
April 9	10:30 a. m.	4:00 p. m.
April 10	10:00 a. m.	6:00 p. m.
April 11	10:00 a. m.	6:00 p. m.
April 12	7:30 a. m.	
April 14		

WATCH FOR INFERTILE EGGS

In Hatching Poultryman Has No Set Rule to Follow in Operating His Incubator.

Poultrymen should test their eggs before putting them under a hen or in an incubator and take out all eggs which are unlikely to produce good chicks. It is not inferred, however, that infertile eggs may be selected out for incubation. There is no known method except by incubation of determining whether an egg is fertile or infertile.

LITTER FOR POULTRY HOUSE

Chaff and Refuse From Hayloft Is Preferred as Seeds Are Most Invigorating.

The best litter for the floor of poultry houses and coops is the chaff and refuse from the hayloft. Hayseeds themselves are small, but invigorating, and much of the benefit derived from them is due to the work induced by the seeds.

Horticultural Points

CONTROL MICE IN ORCHARDS

Activities of Pests Being Checked by Means of Poison in Two Western States.

(Prepared by the United States Department of Agriculture.)

Depredations of meadow mice in the orchards of central Washington and Idaho are reported to the bureau of biological survey, United States Department of Agriculture, to be much more severe this year than usual. Agents of the department are at work in that section co-operating with state agencies in checking the activities of

Eight-Year-Old Apple Tree Completely Girdled by Field Mice.

the pests by means of poison, which is discriminately placed over large areas of orchard land.

"In sections where poison has been used," reads a report to the department from its field representative in Washington, "no mice were found on second inspection. Where no poison was used, meadow mice were actually found in the act of girdling (stripping the bark from the tree) fruit trees on the south slope where the snow had melted. In one 20-acre orchard mice had damaged fruit trees to the extent of $500."

In Idaho, field mice have in some instances destroyed 25 per cent of the orchard trees, according to another report to the department. In one orchard alone the damage is reported by the owner to have reached $7,000. In Idaho, as in Washington, poison, prepared and spread by persons properly instructed through co-operation of the department, is doing effective work in checking the damage.

DIG OUT PEACH TREE BORERS

In Most Cases Pests Can Be Removed With Sharp Knife by Following Their Tunnels.

"You may think that, because your peach tree looks vigorous, there are no borers in the trunk near or just below the surface of the soil," warns D. C. Mooring, extension horticulturist at Oklahoma A. and M. college.

"Now is a good time to examine your trees and if borers are present, as most likely they are, remove them. Dig the soil away, thus leaving a cavity around the base of the tree, for as a rule there will be an exudation of gum (jelly) from the trunk which will indicate the presence of borers. In most cases you can cut them out with a heavy sharp knife by following their tunnels. Because you do not find them at first, do not give up and conclude that they are not there. Where they have bored deeply into the wood a flexible wire may be used to gouge and kill them as indicated by bug juice on the end of the wire. Leave the cavity around the trees during the winter."

CURRANTS AND GOOSEBERRIES

Region in Which Bush Fruits Grow Successfully Is Limited by Four Big Factors.

Before undertaking the planting of currants or gooseberries it is advisable to ascertain from the United States Department of Agriculture whether they should or may be planted in any given locality. The region in which currants and gooseberries may be grown successfully is limited by four factors: The white pine blister rust, the currant maggot, lack of moisture and the heat of summer. In order to protect white pine trees from the destructive blister rust, which passes one stage of its growth on currants and gooseberries, it is necessary to destroy the bushes in areas where there is valuable pine lumber and to prohibit further planting of them. Many states have quarantine regulations forbidding the introduction of currant or gooseberry stock from designated regions.

Medium-Sized Orchard.

A medium-sized orchard, well tilled and pruned, with fruit well thinned and graded, means more than the large orchard not so well kept up.

Odd Job for Winter.

Pruning is one of the odd jobs that may be done at any time during the winter when weather permits.

Value of Grape Crop.

The estimated value of the grape crop of California this year is $75,000,000.

Spring Is Here!

Spring is close at hand and it is time to do your Spring Sewing--- Our shelves are fairly groaning with their of new goods such as Tissue Gingham in the newest patterns, Imported Organdies in all the lovely shades, Toile de Nords, Silks and Percales.

The Workers meetings last Thurs-y though not largely attended were source of inspiration to those who ere there. The devotional address ven by Dr. Bushnell were full of spiration and helpfullness. These ings are worth while and should be tended by many more.
A spirit of hopefulness and loyalty s the key note of our Quarterly nference in the evening.
The choir augmented by Mr. and rs. Trafford rendered a delighfull hem which was much enjoyed last nday evening.
The Sunday School quarterlies not ing on hand last Sunday the Senior d Adult classes will find the lesson the II Chronicles 14, 1-12. The urce of Personal and National Pow (Asa relies on God.)
The Sunday School showed an im-oved attendance last week. Let r slogan be. "Every member in ir place."
A series of Passion week services e being planned, conducted by the stor. It is hoped that our people ll make an effort to attend. Servic- will be hled Tuesday, Thursday d Friday evenings., commencing at 30 o'clock.
Palm Sunday, April 9th is looked on as Descention Day. Have you ided to give your life to God and come a deciple off Jesus Christ? e invite you to do so and unite th the Church in Christian Fellow-p.

Arthur B. Gedye, Pastor.

FIRST METHODIST CHURCH

Services as follows:
Morning sermon at 10 o'clock.
Evening sermon at 8 o'clock.
Sunday school at 11:00 A. M.
Epworth League at 7:30 P. M.
Choir Practice at 7:30 Friday eve-g.
Prayer service at the home of Mr. nry Medaus on hursday evening.
dies Missionary meeting April 6 the home of Mrs. Clarence Arnold.
King's Heralds and Little Light arers meeting next Sunday after-on at the church at 2:00 P. M.
The program rendered by the Ep-rth League last Sunday evening s very interesting. The violin mus- with piano accompaniment was atly enjoyed. The debate was al-interesting and each speaker brot points worth remembering. The t of the program was well balanc- with music and song. We are ch pleased with the large attend-ce on Sunday nights and the real erest shown in the work. The Sun-y school is doing fine work in every partment and we wish to thank the chers for the interest they are ing in their class work.
The Loyal Workers Class put on ery interesting schedule last Sun-y by having different members of class take through a lesson in the iew of the past quarter. This ss is growing rapidly and doing od work. Every member should present at the class social on Fri-y evening at the home of Mr. ank Gruetzmacher.
Next Sunday is the beginning of a w quarter and we should like eacch mber of the Sunday school to start s quarter with a determination to ve 100% attendance for the next ee months. Let every class en-vor to do its best.
Some weeks ago Mrs. George Gru-macher. Mrs. John Spittler, Mrs. C. Bergman and Mr John Josten icited funds for the Christian me Orphanage at Council Bluffs, wa. The following is taken from letter received from Mr. H. R. Le-n, Business Manager of the Home: "Yours of the 7th is at hand, en-sing the exceedingly generous of-fering collection of $66.40, for which please accept our sincere thanks. Please also extend our thanks to all who contributed or assisted in any manner toward this most acceptable gift. We will credit same in the "Home Paper" for March, a package of which issue will be mailed to you for distribution among the donors. We trust that you may find some public way, possibly through the columns of your local newspaper, off extending our sincere gratitude to all friends who contributed to this generous and most acceptable donation, or who assisted in any manner, and may this effort be the means of greatly strengthening all our old friends and making many ew ones in your community. With kindest regards and wishing you much happiness and prosperity, and again thanking you, I am,

Sincerely yours,
H. S. Lemen."

Let the good work go on, and "In His time, we shall reap without ceasing, if we faint not."

W. C. Bergmann, Pastor.

PIE SOCIAL

Dist. No. 8, Ell Twp., two miles east of Klemme will give a program and pie supper Friday night, April 7. Ladies bring pie for two (a small size pie, or ½ of a large one will do.) Also bring your own forks Your pie will be sold at auction. Paste or write your name underneath. Gentlemen bring your money and the ladies. Mrs. C. W. Suckow, teacher. M30-A6c

Ditty of the Dear Due Dollar.—An editor has been inspired, after looking over his list of delinquent subscribers, to compose thefollowing: "How dear to our heart is the old silver dollar, when some kind subscriber presents it to view; the Liberty head without necktie or collar, and all the strange things which to us seem so new; the wide spreading eagle, the arrows below it, the stars and the words with the strange things they tell; the coin of our fathers, we're glad that we knew it. for some time or other 'twill come in right well; the spread eagle dollar, thethe star-spangled dollar, the old silver dollar we all love so well."—The Troy Times.

BEETS NET 06.55 AT PRESENT SUGAR PRICE

—From Belmond Herald-Press.

President yrrell of the Sugar Company imformed The Herald-Press that the contract which the Belmond company is making with farmers who will raise beets this year, written on a share basis, is so planned that it will net the farmer $6.55 per ton for his beets at the present price of sugar, $5.50 F. O. B. New York. Such a contract it can readily be seen will give the farmer a handsome return should he secure even a moderate crop. Acreage contracts are being written for the Belmond factory every dap and as the seed time approaches it is apparent that an increasing number of cres are being planned for beets by the farmers. Work on the organization of the operating company as well as on the acreage contracts is proceeding rapidly and within the next few week matters will doubtless assume a definite status and the preliminarp grow ing campaign will be on in full blast.

BREAKS LEG

Belmond Independent— Charles Luick. farmer, residing on the Mary Callan Carroll farm eight miles south west of town, was taken to a Mason City hospital Friday morning for examination and treatment. He has been in bed sinc Tuesday when he suffered a broke leg.

At the time his leg was broken, Mr. Luick was returning from town to his home astride a horse. As he passed the T. E. Sondrol home on south Second street dog jumped out, frightening the horse. It reared and fell and Mr. Luick was pinned with one foot underneath. He was taken to a local hospital.

The End of a Perfect Day

Big Drive to Aid Starving Russia Will Begin Easter Sunday

"FAMINE WEEK" HELD IN IOWA NEXT MONTH

Big Drive Planned For This Place Week of March 16th

"Famine week" in Iowa was tentatively set for the week of April 16 by executives of the American Committee for Russian Famine Releif. During "famine week," citizens of the state will be urged to respond to the needs of millions who are starving in the Volga valley of Russia.

A committee will be organized for Klemme and vicinity and when they call on you open your pocket books and make a generous donation for this most worthy cause.

All releif supplies and funds collected by the American committee in Iowa will be distributed by the Ameri cacn Friends Service committee (Quakers), who have a large field in Russia.

In preparation for the state-wide appeal, local organizations of the American Committee for Russian Famine Releif will be strengthened to insure effective results. The committee now has organizations in every county, James H. McGill, secretary said.

State headquarters will be established in Des Moines in a few days.

Reports from Russia say the death toll, constantly increasing, now approximates 40,000 a day. Fifteen million people face certain death from starvation and disease. uhless all available aid is vastly increased, ccording to Wilbur Thomas, executive secretary of the American Friends Service committee.

Now then, Klemme people, do all in your power to try to save these human lives who need your every penny now.

SOCK FILLERS

Legs to the right of us,
Legs to the left of us,
Legs to the front of us
How they display them!
On they go, tippingly,
Dainty and skippingly,
Frost that bites nippingly
Does not dismay them.
Straight legs and bandy ones,
Bum legs and dandy ones,
Awkward and handy ones
Flirt with the breezes.
Round legs and flatter ones,
Thin legs and fatter ones.
Especially the latter ones
Showing their kneeses!!
Knock kneeded and bony ones,
Real legs and phoney oes,
Silk covered toy ones
Second to none.
Straight and distorted ones,
Mates and ill sorted ones,
Home and imported ones
Aint we got fun!!!

Home is a place in which modern sons and daughters sleep when everything else is closed.

Girls paint their faces and some of the young dudes of the village are varnishing their hair.

AGED COUPLE NEAR DEATH BY ELECTRIC STORM OF SATURDAY

CHARLES CITY, March 29.—J. N. Richards, aged eightyone years and aveteran of the Civil war, and his wife had a very narrow escape from death during the efectrical storm Saturday. A stroke of lightning entered their chimney, tearing it to pieces. went down into their house, tore out a tin shield over a stove pipe hole in the bedroom where Mr. and Mrs. Richards were sleeping and tore off a quantity of plaster which fell over the bed and bruised Mr. Richards considerably. They would both undoubtedly have been killed instantly had not the force of the lightning bolt been dissipated by going down two other stove pipe openings from the same chimney. One led to the kitchen stove and the other to te living room stove. The plaster in both of these rooms was torn off and the lightning spent itself in the floors, splintering them ad starting fires under the linoleum which were quickly put out.

When the lightning blew out the tin shield in the bedroom stove pipe it released a quantity of soot which went all over the bed, completely covering the elderly people and their room. Mr. Richards stated that he had had a number of narrow escapes during the Civil war fighting the rebels but he thought tis was te closest e had ever had.

COMMUNITY SADDENED BY THE DEATH OF MRS. AMEY

This community received the sad news last week that Mrs. Everett Amey had passed away at a Mason City hospital Friday, March, 25th, at 7:30 in the evening.

Mrs. Amey has been failing in health for some time and had undergone the ordeal of three operations in her battle for life and it was a few days after the last operation that death came to releive her suffering. All that medical skill could do was done to save her life.

With the parting of so young a woman those who will miss her the most are her husband, two daughters one aged eleven years and the other an infant, besides her parents and other relatives.

A brief sketch of her life is given elswhere in these columns.

BISHOP STUNTZ SPOKE AT RUDD AND MASON CITY

Bishop Stuntz, of Omaha was in Mason City between trains Monday, the guest of the Rev. H. S. Wilkinson of the First Methodist Episcopal church. He also spoke at the noon luncheon in the Chamber of Commerce. He will speak at Rudd on next Sunday where the German Meth odist and the English Methodist churches will combine early this week.

"Clothes make the man;" the scarcity of them the woman.

If you want nothing, that's what you will get.

Weekly Report of the Doings Of The Klemme Schools

OBITUARY—MRS. AMEY

Ferneth Louise Shelton was born in Seneca, Illinois, May 19th, 1893, and died in a hospital at Mason City, Iowa, at 7:30 P. M. March 25, 1922.

She was united in marriage to Everett Amey at Joliet, Illinois in 1910. The family moving to Iowa in the spring of 1910, living on the farm four miles north-east of Klemme.

Mrs. Amey was taken with this last illness early in the new year and has since undergone three operations for appendicitis; the last Wednesday, March 22nd. regaining consciousness she was conscious to the end, receiving the sacrament and witnessing to a lovely faith in Jesus Christ as her Saviour.

Those who have been near her during these last months of suffering bear witness to her patience and courage and hopefulness.

There has gone form our midst one who will be missed by a large circle of friends and acquaintances.

She was a woman who beleived in the good of the church and was an earnest attendant whenever possible. She had been brought up in the Christian Faith and has been a lifelong member of the Mthodist Sunday School. She was a member of the M. E. Ladies Aid in Klemme. She was a good wife and mother and as the Good Woman of the Proverbs, "Her children shall arise up and call her blessed, her husband also and he praiseth her."

Those who this day mourn her departure are her husband and two children, Charlotte aged 11 and Mildred aged 6 months, her mother who has been with her during her illness, her father and four sisters and one brother of Illinois.

Services were held in the Methodist Episcopal Church in Klemme, conducted by the pastor Rev. A. B. Gedye, at 3:30 P. M. Monday March 27th. Her remains being shipped to Seneca, Illinois, to be interred beside those of an infant son.

Card of Thanks

Kind friends, we sincerely thank you for all your loving kindness and favors shown for our darling Fern. We also wish to extend thanks for the words of deep sympathy, the floral offerings and help.

Mrs. Shelton and Everett Amey.

EQUIPMENT

"Rastus, I's gwine get rich. I's done bought me some stock in a nut factory."

"A which kind of a factory?"

"A nut factory, which sells de already cracked an' picked out. This heah company gwine save money with a new labo' savin' device which de promotah done tole me about. De nuts am gwine be cracked by trained squirrels which don't charge no wages."

"Is dis heah company already licensed, established an' ready fo' bizness?"

"Yeah, praktikally—all 'cept train in' de squirrels."—Life.

The Sunday School Workers held two interesting meetings at the Methodist Episcopal Church last Thursday afternoon and evening. Althho the attendance was nto large the meetigs were interesting and instructive.

Mrs. LuVerne Smith and Mrs. Mille Smith went to Clear Lake last Thursday for a visit with Charlie Luick, brother of the former, who was in the hospital there as he had the misfortune of breaking his leg a few days previous. They found him getting along well.

Mr. and Mrs. Chas. W. Steihl and Art Kuck returned last Thursday from their winters stay in the westerrn states. They went out in their "house on wheels" and retured the same way ad thoroughly enjoyed the mild winter at Los Angeles and other western points. Art had plenty of huting and fishing and Mr. and Mrs. Steihl enjoyed all the sights but they say they were glad to get back to Klemme again.

Baseball practice has been retarded this week on account of the weather, but a game will be played here with Belmond Friday afternoon if the weather permits. The boys are patiently waiting for their new uniforms to come so they can begin the season right. Most of the boys have bought new baseball shoes and several new bats have been purchased so they will have good equipment this year. Everybody come out to the game Friday and help our boys win as it sure looks good to the players to see the town helping them. Next week there will be no school notes as there is going to be a week of vacation, but we expect to play a return game of ball with Belmond on Friday, April 7th.

Maybelle Johnson taught the Grammar Room Monday from 2:30 until 4:00 P. M. as Miss Smith was absent.

The Eighth grade finished their arithmetic and are now reviewing with the Seventh grade.

The pupils of the Seventh grade geographp class are getting temperatures of different days. They also are finding the wind direction and rainfall.

The Eighth Grade finished "Miles Standish" Tuesday.

Monday afternoon Pearl Johson taught Mrs. Gibb's room. as the latter is sick. The balance of the week Mrs. Lester Stille taught the class for Mrs. Gibbs.

Last Friday the affirmative, Glenn Busch and Sylvanus Walker, won the debate on the question, "Resolved: That all persons who cause destructive fires by carelessness should be punished by fine or imprisonment." The defeated oes are John Baumarter and Andrew Wellemeyer.

The Ninth Grade Community Civics class are taking the chapter on recreation this week.

F. J. WENCK, Mayor.
JOHN N. DAY, Clerk.

To Link North and Black Seas

Plan to Cut Steamship Waterway That Would Be Great Help to Commerce.

ACROSS EUROPE BY WATER

Germany Is Considering Project of Connecting Up the Rhine and the Danube for Ocean-going Vessels.

Washington, D. C.—"Instinctively one links the Mississippi and the Missouri rivers; years to come may find us regarding the Danube and the Rhine in the same way," is the comment of a National Geographic society bulletin upon the reports of a plan to cut a steamship waterway from the North sea to the Black sea.

"As for a 'waterway across Europe'—such a waterway already exists, though travelers through a small section of it might have to resort to very small craft. Information about the condition of the canalized portion of this trans-European water route is not readily available, since the linking of the Rhine and the Danube occurs in Germany.

New Conceptions of Europe.

"The very fact that we classify the legend-laden Rhine in one mental pigeonhole, and the romantic, castled Danube in another, makes the announcement of a 'waterway across Europe' come upon us with the impact of a fresh idea. Just as war brought about political changes in Europe, so peace is bringing economic changes. Hence, if Germany carries out the project she is considering, we will have to think of a Europe cut through with a water route, just as we have learned to think of a Europe with Turkey almost gone, a Poland with a boundary, and the new names of Czechoslovakia and Jugo-Slavia conspicuous upon its map.

"A present water route across Europe—and others are possible with very short portages—lies along the Rhine to Mainz, up the Rhine's tributary, Main, to Bamberg, thence through the Regnitz, into the Ludwig canal to the Altmuhl, which empties into the Danube at Kelheim.

Where Two Rivers Are Linked.

"In your mind's eye, even without a map, you can recall two focal points of this route, Frankfort, on the Main, and Ratisbon (or Regensburg) on the Danube. Vessels of more than 1,000 tons can go up the Rhine and Main to Frankfort; and vessels between 400 and 1,000 tons can go up the Danube as far as Ratisbon. Kelheim, the Danube end of the small river-canal link with the Rhine, is only 12 miles southwest of Ratisbon. The improvement of the Danube to Kelheim would offer no great difficulties. Above Frankfort, to Wurzburg, vessels between 400 and 1,000 tons can traverse the Main.

"The trouble with this route, even with channels deep enough to carry larger steamers from Wurzburg to Ratisbon, is the extremely circuitous course between the Rhine and the Danube. From Frankfort the route forms an almost perfect 'W' and then trails off like a careless flourish through Nuremberg to Ratisbon. A projected shortening of this route contemplates passing the confluence of the Rhine and the Main, continuing up the Rhine to Mannheim, thence into the Neckar and into the proposed canal from that point to connect with the Danube near Offingen.

"Completion of the project for this deep waterway across Europe would make the Rhine-Danube route one of the most important commercial highways of the world—ranking in economic importance with the Panama and Suez canals, and in extent with the Mississippi-Missouri channel and the tremendous navigable length of the Amazon. The Black-to-North-sea trip would be a journey of nearly 2,200 miles. The high water navigation head of the Missouri, in Montana, is 3,500 miles from the Gulf of Mexico, while ocean-going steamers may ascend the Amazon for 2,300 miles."

Surprised House Cat Hatches Out Chickens

North Baltimore, O.—A house cat belonging to Mrs. Fred Loomis of Perrysburg, O., is the wonder of the town. The cat has just hatched out two chickens.

The other day Mrs. Loomis heard a noise coming from the cat's nest. She investigated and found two baby chicks.

Her theory is that a hen used the cat's nest for her nest, while the cat furnished the incubation. Anyway, Mrs. Cat is puzzled over her new family.

MATRIMONY 'AD' FILLS HOUSE

Young Tenor in Rome Uses Ruse to Attract Women Hearers to Opera.

Rome.—Women's love of romance has been utilized for theatrical advertising by the agent of Sig. Umberto Rota, a tenor here. In the personal columns of several Rome newspapers the following appeared:

"Man of independent means and handsome appearance desires to marry young woman. Dowry unnecessary. He may be seen in one of the stage boxes at the Adriano theater on Saturday night.—Umberto Rota."

At the performance the theater was sold out to women of all degrees, who kept their gaze fixed not upon the stage, but on the boxes. As the latter remained empty they turned their attention to the program, where they found that Umberto Rota was a young tenor making his debut that evening.

1. President Harding and party on houseboat Nameoka at the start of a voyage down the east coast of Florida from New Smyrna; his plans then were to leave Florida for Washington Friday. 2. Senator J. T. Robinson of Arkansas, whose amendment to the four-power treaty was voted down, 55 to 30. 3. Matthew P. Tighe presenting Secretary Hughes with gold shears on behalf of the newspaper men covering the State department.

Has First Bible Printed in U. S.

Newberry Library in Chicago Also Possesses Parliament Act Ordering It.

TRANSLATED INTO RED TONGUE

Government Ordered Collection in England and Wales to Defray Cost of Propagating Gospel in New England.

Chicago.—The first Bible printed in the United States sprang directly from a national solicitation of funds in England and Wales in a manner somewhat akin to the Liberty loan drives, according to George B. Utley, librarian of the Newberry library here. The library has both the first American Bible and the act of the English parliament which led to it.

The Bible was a translation into the tongue of the Massachusetts Indians. For years John Eliot, a Puritan fleeing from persecution, who landed 11 years after the Mayflower, had been sending back to England reports about missionary success among the Indians.

Ordered by Parliament.

When the Puritans came into power he found a friendly government, and in 1649, within six months after Charles I was executed, when Cromwell was supreme, parliament passed "An act for promoting and propagating the Gospel in New England." The act created a corporation consisting of 16 Londoners, which thereafter carried on the work.

But more especially it ordered "a general collection in all the countries, cities, towns and parishes of England and Wales." It required the ministers to read the act to their congregations and instructed them, with others, to "go with all convenient speed from house to house to every one of the inhabitants of the said parishes and places respectively, and to take the subscription of every such person in a schedule to be presented to them for that purpose and accordingly at the same time to collect and gather the same."

To Educate Red Brother.

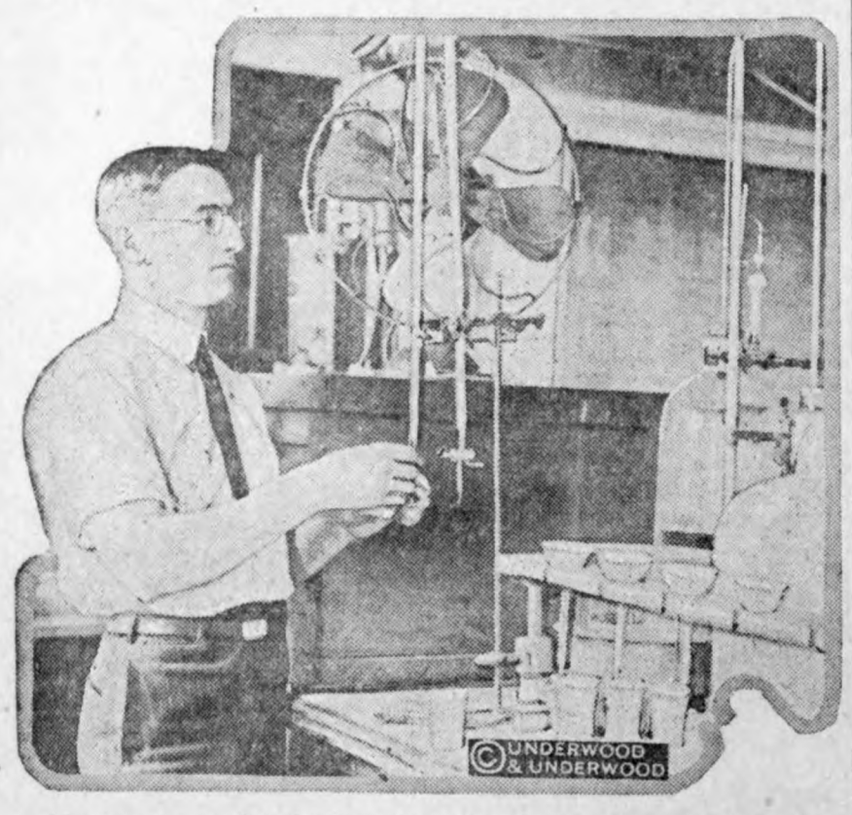
Better education of the Indians was also named among the purposes of the corporation. Twenty-five years later there were four Indian towns with schools in Massachusetts and "the praying Indians" there numbered 4,000.

This collection ordered by parliament brought in about £11,000, it is reported.

Fourteen years later, in 1663, Eliot furnished the first complete Bible printed in the western hemisphere. Its title page bears the lines: "At the charge and with the consent of the Corporation in England for the Promotion of the Gospel Amongst the Indians in New England."

The place of printing was Cambridge, Mass., where 23 years before Eliot had helped compile the Bay Psalm book, the first book to come off the press, in what is now the United States.

One of Uncle Sam's Helpful Stunts



The Department of Agriculture gives all sorts of service to people throughout the United States. One man, curious to know the cause of the death of a mule, sent the stomach to the bureau of animal industry to have it examined. The photograph shows Dr. W. N. Berg doing the work requested.

NEWS REVIEW OF CURRENT EVENTS

Four-Power Pacific Treaty to Be Ratified by Senate Unless All Signs Fail.

MARGIN AT LEAST FIVE VOTES

Allied Reparations Commission Declines to Pay Bill for American Expenses on Rhine—Fighting in South Africa—India in Ferment.

By JOHN DICKINSON SHERMAN

THE four-power Pacific treaty, it was asserted last week, would be ratified by the senate, unless all signs should fail. A margin of at least five votes was predicted. It follows that the other six pacts of the armament conference will be approved as a matter of course, if the treaty is ratified. An agreement to vote was reached Wednesday. It was farther agreed to take no more votes on amendments or reservations before the final vote, and to limit debate. It looked last week as if Senator Underwood, minority leader, would come across with at least eleven votes, instead of the eight he was expected to deliver.

Early in the assault on the treaty came the charges that the treaty had been framed by the British and Japanese; that secret negotiations had been concealed, and that the American delegates had been imposed upon. Secretary of State Hughes thereupon stated that he wrote the treaty, that there was no mystery about the treaty and that it was a good treaty. He was modest about it and he was plainspoken. His statement was made in the form of a letter to Senator Underwood of Alabama, one of the four American delegates, who as minority senate leader is charged with the onerous job of delivering enough Democratic votes to assure the ratification of the treaty. Secretary Hughes said, among other things:

"The treaty itself is very short and simple, and is perfectly clear. It requires no commentary. Its engagements are easily understood, and no ingenuity in argument or hostile criticism can add to them or make them other or greater than its unequivocal language sets forth. There are no secret notes or understandings.

"In view of this, the question of authorship is unimportant. It was signed by four powers, whose delegates, respectively, adopted it, all having made various suggestions. I may say, however, with respect to the general course of negotiations that after assent had been given by Great Britain and Japan that France should be a party to the agreement, I prepared a draft of the treaty based upon the various suggestions which had been exchanged between the delegates. . . . I should add that, in order to avoid any misunderstanding I prepared a memorandum to accompany the treaty with respect to its effect in relation to the mandated islands and reserving domestic questions.

"At this stage, while it was not strictly a conference matter, in order to insure publicity at the earliest possible moment, the treaty, as thus agreed upon, and before it had been signed, was presented by Senator Lodge to the conference in plenary session and its import and limitations stated. His statement met with the acquiescence of all.

"There is not the slightest mystery about the treaty or basis for suspicion regarding it. It is a straightforward document which attains one of the most important objects the American government has had in view, and is of the highest importance to the maintenance of friendly relations in the Far East upon a sound basis. As the President recently said, in his communication to the senate, it is an essential part of the plan to create conditions in the Far East at once favorable to the maintenance of the policies we have long advocated and to an enduring peace. In view of this, and in view of the relation of the treaty to the results of the conference, its failure would be nothing short of a national calamity."

The senate debate over ratification confirms the wisdom of the President's choice of Senator Underwood as a conference delegate. There are those who consider the senator from Alabama one of the ablest men in public life. He certainly had a large opportunity for his skill as a debater when he attempted to round up his recalcitrant followers for ratification. The first day he stood for three hours before the Democrats he has led in so many partisan battles, arguing that they should forget party lines and join with the administration forces for ratification. It was almost exclusively a Democratic show, with the Republicans sitting on the sidelines and watching the astute minority leader fight it out with his unruly followers. The anti-treaty Democrats were trying to trap him into an admission that the treaty in effect constituted an entangling alliance. But he insisted on "conference agreement." Some of them "heckled" their leader. Only the unfailing good nature of the Alabaman staved off a stormy session. It was a situation that only an experienced and able man could meet.

Next came an assault on the treaty by Senator Borah of Idaho and Senator Johnson of California, Republican irreconcilables. They questioned the authorship of the treaty, despite the letter from Secretary Hughes. Senator Lodge of Massachusetts, majority leader, made them admit they had not meant to reflect on the veracity of Secretary Hughes. In effect the two senators assailed the treaty as a "quadruple alliance." Senator Lenroot of Wisconsin answered them.

The pro-treaty forces scored a victory Tuesday when they voted down an amendment by Senator Joseph T. Robinson of Arkansas designed to wreck the treaty. The Robinson amendment would have had the effect of converting the four-power pact into a league of nations. It pledged all the signatories to respect each other's territorial integrity and to commit no act of aggression against any nation outside the pact. Furthermore, it provided, in case of disputes, that outside nations interested should be invited to participate in conferences held under the terms of the four-power pact.

The vote was 55 to 30. Eleven members were absent. Six were paired. The five unpaired absentees are all counted for ratification. Four Republicans, committed against ratification, voted for the amendment: Borah of Idaho, Johnson of California, La Follette of Wisconsin and France of Maryland. Four Democrats voted against it: Underwood of Alabama, Pomerene of Ohio, Ransdell of Louisiana and Williams of Mississippi. Later similar amendments by Senators Walsh of Montana and Pittman of Nevada, both Democrats, were voted down by substantially the same vote. Then a series of amendments and reservations was dumped into the hamper to be ready for presentation before the final roll call.

LIFE to Uncle Sam just now must seem just one treaty after another. Anyway, he presented last week to the allied reparations commission in Paris a bill for $241,000,000 for the expenses of the American army of occupation on the Rhine up to May 1, 1921. The allied commissioners registered frozen horror, but thawed sufficiently to stick the bill on a spindle. You see, they were engaged in dividing up among themselves a reparations payment of 1,000,000,000 gold marks by Germany and naturally regarded the presentation of the American claim—which to date is something like $260,000,000—as very bad form. They therefore washed their hands of the matter and referred it to the allied governments.

The French press sets forth what is presumably the allied view: The United States declined to ratify the treaty of Versailles, hence it has no legal claim to payment under its terms. The United States made its own separate treaty with Germany; therefore it should do its own collecting from Germany. The British press—some of it—thinks that, while Uncle Sam has no legal claim, he may have a moral claim, but why didn't he speak up sooner? All of which lends emphasis to the saying of the Man on the Street: "We have all the real money in the world and for that very reason not a single real friend." Evidently the new funding commission to see what can be done about the eleven billions of allied debts is in for an adventure.

DO YOU remember London Punch's famous cartoon depicting a family council of the British Lion's motherless brood during the World war? Well, the Union of South Africa is somewhat restless. Last week saw the climax and suppression of the strike of miners which has held South Africa in its grip for more than two months. It had all the hallmarks of an attempt at revolution. The strikers captured half a dozen towns and nearly got possession of Johannesburg. Gen. Jan Christian Smuts, the premier, proclaimed martial law, called out all the government troops and took command in person. Censored reports show the killing of more than 1,000 strikers, police and soldiers. Grenades, bombs, machine guns, airplanes and tanks figured in the fighting; cities were bombarded, thousands of strikers were captured. It was real war for a week. The South African Industrial federation then declared the strike off and denied complicity in the rebellion. This means Smuts is a strong man. He has risen from a Dutch general in the Boer war to one of the leading statesmen of the British commonwealth of nations, as he calls it. Many believe Smuts to be the logical successor to Lloyd George.

NEW tangles mark the complicated situation in India. The arrest of Gandhi, leader of the non-co-operationists, was followed by widespread protests from all the Moslem world. Then Britain was startled by the unauthorized publication by E. S. Montagu, British secretary of state for India, of a telegram from the India government making demands for the restoration of Turkey. This constitutes an appeal to the world by a subordinate British government over the head of the imperial government. Lloyd George assured Mr. Montagu and demanded his resignation. Mr. Montagu resigned but talked back, putting Lloyd George and Curzon on the defensive. Lord Derby was asked to take the secretaryship for India and declined. This, coming upon the failure of the unionist meeting Tuesday to give Lloyd George a vote of confidence, has raised again the possibility of the resignation of the premier. His political enemies hold it impossible for him to retain the position. Nevertheless, it has been announced that Lloyd George and Curzon will attend the Genoa conference April 10.

REVISION of the Republican soldier bonus bill was finished Tuesday by the ways and means committee, which thereupon reported the measure to the house by a vote of 19 to 5. The program calls for prompt passage of the bill by the house. Report is that the senate will not accept the bill as it comes from the house and that a long delay in the senate finance committee is inevitable. The bill provides cash bonuses only for veterans entitled to less than $50. Four options are given to others: an adjusted service certificate, farm or home aid, land settlement aid, and vocational training.

IT LOOKS as if All Fools' Day will be celebrated by a strike of the coal miners. Secretary of Labor Davis did not succeed last week in getting the operators and men for conference on a new wage agreement. Neither party appears to care particularly whether or not the strike comes. The only consolation for the public lies in the probability that some of the mining districts will keep at work.

Mary Garden, Chicago's arbiter of grand opera, says that some of the high-priced stars must fill the house or take less pay or get out.

Uncle Sam is reported to be considering the negotiation of treaties with Great Britain and Cuba to put an end to liquor smuggling into the United States.

Radio experts are predicting that the presidential campaign of the future will be conducted by wireless telephone. What's that story about the mayor who was elected because he broke his leg and the voters never saw him?

AIDING WORLD WAR VETERANS

Government Is Spending More Than $1,000,000 a Day.

Director of Veterans' Bureau Seeks Half-Billion to Divide Into Seven Composite Branches of Relief Work.

Washington.—More than $1,000,000 a day, including Sunday, is being expended by the United States government for the former service men and their dependents, say government officials.

The 1922 budget estimate of expenditures to be made directly for the benefit of the former warriors, calls for $510,000,000. This huge sum will be divided, Col. C. R. Forbes, director of the United States veterans' bureau, said, into seven composite branches of soldier relief work.

For vocational training, the sum of $167,500,000; for medical and hospital services, the sum of $64,600,000; for payments on war risk term insurance, the sum of $81,700,000; for United States government life insurance, the sum of $161,000,000; for retroactive government allowances on proved and extant claims, the sum of $2,000,000; for salaries and expenses, that is administration, the sum of $31,500,000.

These figures total $514,000,000 from which Colonel Forbes deducts the $5,700,000 to be paid in United States government life insurance claims, on the ground that it is a self-supporting branch of the bureau's activities.

COAL MINE FATALITIES DROP

Decrease of 26 Per Cent Shown in United States Bureau Report for January.

Washington, D. C.—Fatalities at coal mines during January declined about 26 per cent from January a year ago, according to an announcement issued by the bureau of mines. The total last month was 146 against 197 last year. Based on an estimated coal production of 43,955,000 tons last month, the death rate was 3.32 per million tons mined, compared with 4.13 for January 1921.

Compared with the accident record for January last year, there was a reduction last January of thirteen fatalities in West Virginia, eight in Kentucky, seven in the bituminous mines of Pennsylvania, four in Wyoming, three in Indiana and three in Iowa. Alabama showed an increase of five and Ohio two. A reduction of seven is shown in the number killed at the anthracite mines in Pennsylvania.

Golden Eagle Captured.

Anderson, Ky.—A golden eagle which measured seven feet from tip to tip of his wings was captured one day by Winfrey P. Blackburn, Van Buren, between Glensboro and Lawrenceburg. The bird is a splendid specimen of the rare species and was not injured. The big bird has attracted much attention at the home of Blackburn, where it is being exhibited.

Uncommon Sense . . .

By JOHN BLAKE

NALYZE MISTAKES

HEN you make a mistake, find out why you made it. Think it a few minutes. Fix in your mind anner in which it happened. Be ned of it, if it is a bad mistake. yourself about it, if it is a rous one.

e child never forgets the mistake akes when he puts his finger in re. That mistake he has to think for a long time afterward. One e kind is always enough for

miral Peary's Eskimo dogs made mistake of eating all that was them when they were encamped e Arctic regions waiting for one s dashes to the pole. Apparently remembered that mistake when ood ran out and some of their er had to be eaten.

en the survivors of the pack re- d to America they were very ng of the food that was given , and buried the remainder. More that they scoured the neighbor- for food to bury. They had had to think over their mistakes. st people have much the same of work to do every working day. e who do not think over their akes continue to make them and for the most part they always stay where they are.

Men who make the same mistakes twice never get the confidence of an employer.

Those who think about their mistakes, and find out ways to eliminate them, are those who get along.

It is better to discover your own mistakes than to wait for the boss to discover them. Discover them early, and you can do without them the next time.

Go over your work. If it is not up to the mark that you ought to make, you have either made important mistakes, or wasted time, which in itself is an important mistake.

Think about that. Let it sink into your soul. Think how it held your work back, and what the repetition of it will do to your life's work.

This may not contribute to your repose the night you are thinking about it, but it will make you sleep better for many a night to come. Perfection is the absence of mistakes. We cannot any of us achieve it, but we can all achieve a pretty fair substitute by cutting mistakes to the minimum.

Something to Think About

By F. A. WALKER

STRAIN YOUR SPEECH

HEN inclined to speak of a person's faults, though he or may be unfriendly towards you, rain yourself, and think of your shortcomings.

hen, if you are a charitable soul, will turn your conversation into ther channel where there are no en dangers and go sailing under r skies in joyous sunshine.

ne thoughtless, impulsive, slan- ous word spoken in the presence thers, and particularly in the hear- of those given to gossip and dis- d to magnify what they hear, ruin an innocent man or woman life.

lean your own house before you about the task of cleaning the se of your neighbor.

urge your own soul of shortcom- s and you will find yourself so y in doing it that you will not have e nor inclination to discuss the cts of others.

Let him without sin," said the ster of Men, "cast the first stone." l the accusers of a hapless woman e away, one by one.

* * *

our faults and my faults have come wn to us through the ages.

o, let us always curb our speech, erever we may be and think noble ughts instead of the kind that de- e others and ourselves as well.

Aside from the good policy of speak- no evil, there comes to the man woman who may adopt it, a divine se of serene happiness that cheers way like the stars of night.

And another thing that accompanies h a course is the ability to make ends and hold them in all sorts of ather.

In lying down to sleep, in waking and in motion, there come no regrets, no torments to torture a guilty conscience, no remorse that ages the heart and drives the soul to despair.

If it did nothing else, this charitable observance would serve at least to give you peace, make you greathearted and enable you at all times to strike the nicest balance between right and wrong, and to hold the respect and love of the community in which you live.

And after all is said and done, what is there more to be desired in life than the good will of neighbors, whose hearts and hands are always warm and friendly?

YOUR HAND

¶How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm

THE FINGER NAILS

WHEN the "moon at the root of the finger nails shows a red color of mixed shading, it is an indication of a combative nature, which delights in contests of bodily strength or mental agility. Note whether the nail of the finger of Saturn, or second finger, bears a white mark. This is held by some authorities to indicate a voyage to be undertaken by the subject. If a nail shows black marks, it is an indication of sorrow and trouble. On the thumb nail the black mark shows a faulty, passionate nature. On the nail of the finger of Mercury, the little finger, a white spot means a successful business enterprise, and a black spot means the opposite, a reverse or disaster in business.

If there is a white, star-shaped mark on the nail, it is a sign of affection that is not reciprocated, except when the mark appears on the thumb nail, when it means the opposite, or requited affection.

Nails of medium length and width, and of a bluish tint, show that the circulation of the blood is faulty, and there is a tendency toward extreme nervousness.

SCHOOL DAYS

KIDDIES SIX

By Will M. Maupin

LITTLE MAN

THE "Biggest Boy" has gone away,
But "Little Man" is here.
I miss the "Big Boy's" heavy tread,
But rising sweet and clear,
I hear the "Little Man's" request
"When "Daddy's" face he sees:
"I'm papa's ownest Little Man—
Give me a penny, please!"

The "Biggest Boy" is not at home,
And though his absence hurts
At least there's comfort—I can find
Clean collars, socks and shirts.
And when I look about and see
The "Little Man" at play,
That lonesome feeling in my heart
Just somehow fades away.

The "Biggest Boy" has "hit the trail,"
But "Little Man" still stands
Beside his "Daddy's" easy chair
And stretches out his hands;
He smiles and says with coaxing voice
While climbing on my knees:
"I'm papa's little man today;
Give me some candy, please!"

One boy has gone to fight his fight;
One boy remains with me—
The "Biggest Boy" with bearded lip,
The "Little Man" aged three.
And may the one who's far away
'Midst life's hard toil and care
Remain as fond of "Dad" as he
Who stands beside my chair.

CANDIES FOR THE CHILDREN

T ALL times of the year the children clamor for candy, but during e cold weather it is more frequently ade in the home.

Opera Fondant.

Put two cupfuls of sugar and one pful of heavy cream into a saucepan d stir until the sugar is dissolved d the boiling point is reached, then d one-eighth of a teaspoonful of eam of tartar and boil until the sirup akes a soft ball when dropped into ld water or until the candy thermomer registers 238. Pour at once with- t scraping the dish on to a marble ab or large platter lightly greased ith butter. When cold work with a ooden spoon or broad spatula until forms a ball. Cover with a damp oth and leave for half an hour. Then nead and mold with the hands until nooth, adding such flavoring and col- ing as desired and pack in a crock. over closely and leave until wanted.

Opera Bonbons.

Divide opera fondant into several rtions, flavor each and color, then add different kinds of chopped fruit. Shape into balls or press into a box lined with waxed paper and when firm cut into cubes.

Cream Mints.

Put one and one-half cupfuls of sugar, one-fourth of a cupful of water and two tablespoonfuls of corn sirup into a saucepan. Boil to the soft ball stage and pour out on a buttered platter to cool. When cool, work with a wooden spoon until creamy. Set away covered with a cloth. When ready to prepare, melt over hot water, add peppermint and drop by teaspoonfuls on waxed paper. Wintergreen patties may be prepared by adding a bit of pink coloring and wintergreen flavoring.

Copyright, 1922, Western Newspaper Union.

INTENSIVE FARMING.

The Visitor—Do you call this a dairy farm? It's no bigger than a city lot.

The Dairyman—True! But, you see, I feed my cows on compressed hay tablets and they give condensed milk.

THE DEAN

By MOLLIE MATHER

Copyright, 1922, Western Newspaper Union.

We girls had been the happiest little crowd until Celia Warren came among us. She was visiting the Livingston's when we met her, and after that, she and her snobbish old aunt came and rented the Bailie's flat, the Bailies were south for the winter. As a rule, we girls welcome a stranger, and try to make her enjoy herself. But if Celia Warren needed any one's assistance in enjoying herself, I hadn't noticed it. The trouble was, she let nothing stand in the way of her enjoyment; other people's hurt feelings or things like that did not give her the slightest concern. In fact, we learned later that hurt feelings were part of Miss Celia's enjoyment, yes, really. Else why did she walk Dora Barr's beloved Billy up and down before the Barr home, after she had unfairly taken him away from Dora?

That was why we heartily disliked Celia Warren when we knew her unfairness. Perhaps she reasoned that "all is fair in love and war." But she had not been with us a month before we were quarreling with each other—we who had been so peacefully chummy.

Dora and Billy were the first to separate. It seemed that Celia Warren told Billy things which he should have known true little Dora never said. And the last to drop each other's society were Ted and I, and I never would have believed that Ted could be such a goose.

When Ted started out in business, I wasn't a bit surprised that he asked me to marry him, while Dad agreed, cheerfully and resignedly, as a matter of course.

But like Dora and Billy, and Nell and her Jackie, Ted and I had decided not to announce our engagement until nearer the somewhat distant marriage time.

Then all at once Celia Warren blew in like a mischievous cyclone and mixed things all up.

"Sallie dear," Celia Warren said to me with her annoying, amused smile, "Why in the world do you let Ted Loring be so dead sure of your affection for him. If a man were as sure and conceited about his power over me, I'd show him, I would. Why, when he was talking to me at the party last night I said, jokingly, 'You'd better go and find Sallie or some other handsome man will take her to supper,' and Ted laughed, a queer sort of laugh it was and said, 'Oh, I will find Sallie alright, just where I left her.' That new Le Strange man has a bit of crush on you, too, Sallie," Celia added, "though it would be hard to make your Ted believe that."

So I did just what Nell and Dora had done under the same provocation—I determined to show Ted Loring that he need not be so conceitedly sure of me, after all. I talked to that Le Strange man so long at our next gathering that he insisted upon taking me into supper, while Ted walked off laughing, with Celia Warren.

So she added another conquest—and and had another man, as days passed, leaning over the piano joking with her as she played, while we three deserted girls sat, like wall flowers, back on the divan.

"If Jackie only would not take in everything that girl says," lamented Nell. "He wouldn't attach himself to her train if it wasn't in pique against me."

Gentle Dora's tone was actually spiteful, "When Celia Warren talks about the wonderful places she has been and the noted people who entertained her and the great musicians whom she accompanies, well, I just wish I could face her with her lie."

Nell sat up.

"That's it," she exclaimed wrathfully, "if we could show those inbecile unhappy boys that she is untruthful in one thing, they might guess that she's been untruthful too, concerning us."

The music ceased abruptly and Celia Warren swung around on the piano stool.

"Fine," she praised my obtuse Ted, "you sing as well as Georger." Georger was being lionized in our town just then.

"Did you every hear the Dean of Hampdon sing, Miss Warren?" I suddenly asked.

Probably not. Hampdon was our college. Dora, Nell and I went through together.

"The Dean is really celebrated as a singer. You took up music, I believe, you said, at our Hampdon one year? Of course then, you know Dean Gordon."

"Oh, yes," Celia Warren answered carelessly.

She looked up at the three boys impressively.

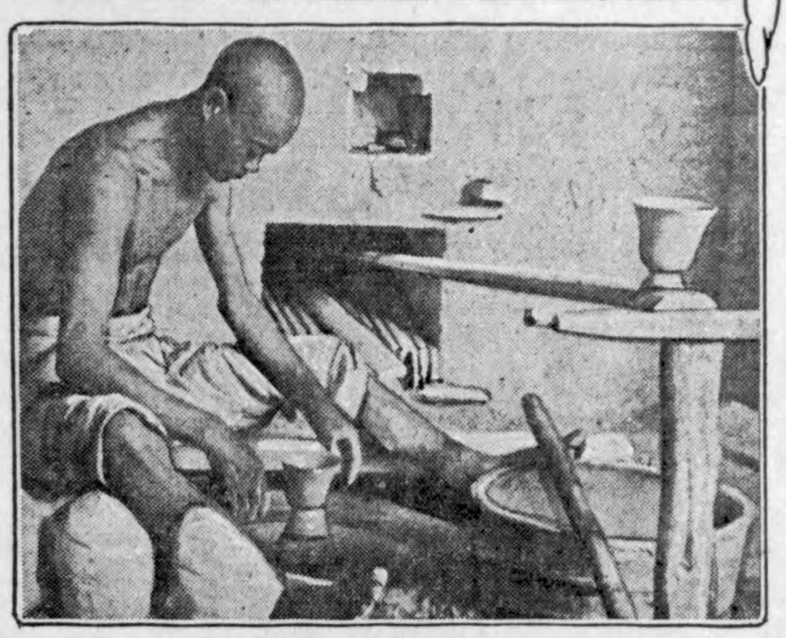
"I have often played for him," she told them. "And he was mighty good-looking. Such wonderful dark eyes. He used to take me around a lot, though it wasn't in accordance with college rules. You see, I had the happy excuse of playing his accompaniments."

It was then that I stood up dramatically.

"Which," I remarked clearly, "is all very strange, Miss Warren, inasmuch as the Dean of Hampdon college is a woman, a small blonde woman, Elizabeth Gordon."

It was mean and stooping to Celia Warren's level, too, but there are times when a lesson is necessary. And I must admit that there was no regret in our crowd when Miss Celia moved on to an adjacent town and we resumed our old happy ways.

Original Home of Porcelain



Chinese Potter at His Wheel.

(Prepared by the National Geographic Society, Washington, D. C.)

The greatest industrial city of China is Ching-teh-chen, a place which perhaps not one American in a hundred has heard of. But when it is added that this out-of-the-way place, 300 miles inland and without rail connections, is the original home of the porcelain industry of the world and still the great Chinese center of the industry, the town takes on a certain significance.

There are few cities in America or Europe that are so completely given over to a single industry as this one. Though the methods of production are primitive, the city must still be classed as an industrial center. It is a rare privilege to visit this conservative but interesting old place and see with one's own eyes the fascinating process of pottery making from beginning to end.

Chinaware! What does the word connote? Simply a ware made of clay and named for the country that first produced it. Whether it be a green tile from a temple roof, a dish, a vase, or a painted ornament from a wealthy celestial's home, it all has a traceable connection with Ching-teh-chen. With the Chinese, Ching-teh-chen and porcelain are synonymous.

In order to get a fair understanding of the situation, it will first be necessary to let the reader know the location of this place and something of the difficulties in reaching it.

After locating Shanghai on the map of China, one should trace his way up the Yangtze river to Kiukiang, south of which lies Po Yang lake. The quickest and surest way of reaching Ching-teh-chen is to proceed from Kiukiang to Nanchang, the capital of the province, by rail. This trip can be made in a day, barring accidents, though the distance is only 90 miles. In prospect it does not seem a difficult task to cover the distance between Nanchang and Ching-teh-chen, 120 miles, but in reality the trip requires more time than it takes to travel from San Francisco to New York. One must cross the east end of Po Yang lake and then push his way up the North river into the heart of the mountains, to a point not far from the Anhwei border.

"Town of Scenic Virtue."

The first view of Ching-teh-chen from an approaching boat, with the smoke issuing from the chimneys of scores of kilns, is an amazing one. The city is located between the mouths of two rivers which flow into the North river, one from the east and one from the west. The town is naturally supplied with an abundance of fresh water, the clearness of which stands out in vivid contrast to the muddy yellowness of the Yangtze and of Po Yang lake.

Beautiful hills completely surround the city, those on the east rising to a height of about two thousand feet. The river banks are dotted with pine and camphor trees, while occasional groves of bamboo in lighter green add a charm and beauty difficult to describe.

Ching-teh-chen ("Town of Scenic Virtue") is one of the four largest towns (as distinguished from cities) of China. Technically, it is a town, because it has no wall. In reality it is a busy industrial city of 300,000 people, two-thirds of whom are engaged in the manufacture and sale of porcelain. Romantically, it is a city to stir men's souls. Longfellow, in his "Keramos," speaks of it. Historically, it dates back to the Han dynasty, 220 A. D., during which period we find the first records of the production of porcelain in China, though earthenware vessels were probably produced some centuries earlier.

Two main streets, about three miles long and conforming to the contour of the river, comprise the principal thoroughfares.

The city is about a mile wide. Furnaces, warehouses, shops, and homes are crowded together in a hopeless tangle. Great mounds of chipped and defective porcelain, clay chips and broken dishes are piled high along the river bank. In fact, one first notices these pieces of porcelain in the bed of the stream several miles below the city, washed down by high water. These dumps must be 30 or 40 feet thick. They represent the accumulated offcastings of the kilns for centuries. There are now between 150 and 200 big yellow chimneys in the city. It is said that Ching-teh-chen in her most flourishing days boasted several thousand kilns.

Most Conservative of Cities.

The most unusual feature of the city of Porcelain is its conservatism. "Bu k'ait'ung" (not open to communications) is heard on every hand. Although China is the home of the printing press, there is not a single newspaper, either daily or weekly, published in this city of more than a quarter of a million inhabitants. The reason given for this unprogressive state of affairs is that the magistrates have always opposed the press, on the one hand because they are afraid of its political influence, and on the other because of the financial support that would be involved.

Ching-teh-chen is devoid of electric lights and telephones. The few rickshaws which now facilitate communications are fighting for existence. A number of workingmen's guilds have petitioned the chamber of commerce to abolish the rickshaws on the ground that they interfere with traffic.

The geographical location of Ching-teh-chen is not accidental. It became the pottery center of the country centuries ago because of the enormous quantities of excellent clays in the district around Po Yang lake. All of these clays are brought to Ching-teh-chen in the form of soft, white bricks by small, flat-bottomed boats. Thousands of Chinese boatmen are engaged in this work.

After the clays are thoroughly cleansed, sifted, and refined they are kneaded together in varying proportions, usually by a barefooted boy, until they are ready for the potter. The wet lump of clay is then placed on the knob of the potter's wheel.

The potter is perched above the wheel, with one foot on either side, in order to allow sufficient space for the movement of his hands. After revolving the wheel swiftly with a short pole, he deftly and with mechanical precision fashions a plate, bowl, or vase. After years of practice he can estimate to within a hair's breadth the proper size.

The piece is then removed and placed on a long tray in front of the potter, where it awaits the next artisan. Handles and other decorations, made in molds, are added, and then the whole is scraped smooth and allowed to dry until it is ready for the next process—the under-glaze decoration.

Several basic colors, like blue and red, can be painted on under the glaze.

The glaze is next applied in various ways—by dipping, by blowing on with a tube, or by sprinkling. After the mark has been added the piece is ready for the furnace.

Firing the Porcelain.

Porcelain placed in the kiln to be fired has to be protected in strong, cylindrical clay vessels, called saggers. These trays can be used from three to six times before they are ready for the scrap heap on the river bank. Every piece of porcelain, as it is set into the sagger, is placed on a small, round, clay chip, sprinkled with straw ashes. This prevents the fusing together of the two pieces.

The fuel for the furnaces at Ching-teh-chen is of two kinds—straw and wood. Coal has been tried, but it was found that its fumes discolored the porcelain, and accordingly its use was discontinued. Straw is used to burn only the coarser ware.

The kilns are large, egg-shaped ovens of brownish brick, fifty feet long and twelve feet high at the highest point. Because of the intense heat, both the kilns and the chimneys must be rebuilt annually.

There is no unemployment in Ching-teh-chen. Work is plentiful, but industrial conditions are bad. Long hours, poor food, no rest days, and unsanitary living conditions cause a great deal of dissatisfaction among the laborers.

Wages range from ten cents to one dollar per day, varying not according to the number of hours, but according to the number and quality of the pieces produced. But no artisan must work too long. If a man is found doing too much and working beyond the time limit, he is set upon by his fellow workers and severely beaten.

GOODELL NEWS ITEMS

Mrs. Fred Gross and little daughter Wanetta, who spent last week visiting at the Jay Griggs home and the Thos. Cashman home, has returned to her home at Brack, Canada.

A large crowd assembled at the opera house to see "Rebecca of Sunny Brook Farm" Tuesday evening. Between the first and second shows vaudeville was given which consisted of five chorus girls; namely, Dorothy Lackore, Dorothy Allaben, Mae Griggs. Adelaide Engeseth and Viola Finn, who were dressed in black and white costumes which were very clever. Several little dances were given by the girls while they sang "Rebecca of Sunny Brook Farm," and "Honey Rose." Don Estelle, dressed in soldier costume decorated with many medals sang "Everybody calls me honey." which was very good. They are all given credit for the good performance which was given, considering the very shor ttime which they had practiced.

Mrs. Frank Quigley, Sr., received word last Sunday of the death of her sister at Harlan, Iowa.

A few of the young folks from here attended the dance at Belmond Saturday night.

Mae Griggs was the guest of Adelaide Engeseth Monday night.

Mrs. Letch who has been on the sick list is improving at this writing.

Jay Griggs was a Garner caller Thursday.

Martin Kearney returned from Williams.

Lloyd Carpenter was a Sunday caller at the Johnson home.

Goodell High School News

The pupils are working very hard on the play, "It pays to advertise," which will be given the latter part of April.

Thomas Quigley, "Mac" McNulty and "Art" Lowenberg were absent Monday.

The English Literature Class having finished the classic age took an examination over that period.

Leona Sandry was absent Friday.

Lucille Miller was absent Monday forenoon.

The pictures taken of the High School several weeks ago were received last week and are very good. Nearly every pupil in the school purchased one.

Criminals usually are not polite but they often beg a pardon.

The reason vaudeville performers make so many jokes about prohibition is because prohibition isn't any joke to them.

A woman's intuition tells her a lot of things but never that she is getting old or fat.

Oil Cans Used as Stoves.

The divers use to which empty kerosene cans are put are well known, and even in the most remote parts of the world these tin containers are in great demand because of the many different forms into which they may be made for further service, says the Kansas City Star. The five-gallon size, it appears, is the most favorable, because it can be worked by the average handy man with the crudest of tools.

Along the great waterways of interior Alaska drums are often found doing duty as stoves, but it is seldom it is found utilized like this elsewhere. Travelers who have toasted their shins in front of this stove in the "Golden North" hotel at Skagway, southeastern Alaska, pronounce it a marvelous generator of heat and a noteworthy example of recreative work.

Custom Many Centuries Old.

The ancient ceremony of collecting wroth silver at daybreak on Martinmas eve due to the duke of Buccleuth as Lord of the Hundred was observed at Knightlow Hill, near Coventry, England. The custom has endured for more than 1,000 years, and 24 parishes pay the nominal tax which originated in certain privileges granted to the ancient residents. Before sunrise people went to the spot to pay their toll, and afterward they were entertained at breakfast.

SIFTS CAUSES OF UNEMPLOYMENT

National Industrial Conference Report Says Problem Warrants Deep Study.

MANY WHO WILL NOT WORK

Factors Entering Into Relations Between Employers and Workers Emphasized—Average Worker Loses 42 Days a Year.

New York.—Unemployment is a continuous industrial problem, sufficient in importance to warrant concerted effort by economists and business men to remove certain of its causes, is the stand taken by the national industrial conference board, in a report on "The Unemployment Problem." The report gives a comprehensive survey of the extent of unemployment during normal periods and during the present business depression, discusses the causes and analyzes remedies suggested.

The object of this study is to set forth fundamental principles to be taken into account in considering the problem, derived from analysis of data and experience, and from basic economic considerations, in order to provide a guide by which employers or organizations may approach their unemployment problems more intelligently.

"The report," says a statement from the board, "makes a careful distinction between idleness and unemployment, which refer to very different causes. Idleness proceeds from three principal sources: Unwillingness to work on the part of those who are capable of performing work; disability, physical or mental, of otherwise willing workers, and lastly, unemployment of those who are capable and willing to work, but cannot find work because of industrial maladjustments within the plant or industry, or because of general economic conditions at home or abroad.

Causes of Unemployment.

The statement then takes up the causes of unemployment. They fall into two classes, described in the report as follows:

1. Internal causes arising from conditions within individual manufacturing plants. These embrace:

(a) Personal factors such as strikes and lockouts, and disability; (b) impersonal factors relating either to failures of management, resulting in faulty factory organization, to high production costs within the control of management, ineffective sales methods, lack of materials and equipment, high labor turnover, or to failure of employees because of inefficiency, or to the displacement of hand labor by machinery.

In the aggregate these causes produce a more or less continuous percentage of unemployment from month to month and from year to year.

2. External causes due to influences operating outside of the plant. These are:

(a) Of economic origin, resulting from seasonal variations, business depressions, wasteful systems of commodity distribution, deficient labor-placement facilities; (b) of political origin, due to immigration and tariff policies and international relationships.

"It is estimated," the statement says, "that in 1920 the total number of persons engaged in gainful occupations in the United States was about 41,000,000. Most of the available employment statistics pertain to wage-earners in the groups of manufacturing and mechanical industries, which numbered, in 1920, about 12,800,000. During normal times, it is estimated that about 1,800,000 of these are out of work, since, on the average, about 42 days per year, or about 14 per cent of his total working time, is lost by each industrial wage-earner. About seven days of this lost time is due to sickness. Deducting this, the total loss caused by unemployment of the average wage-earner in the United States is about 35 days a year. This does not include loss from part-time employment, for which no reliable figures are to be had.

Days of Unemployment.

"The average of 35 days does not apply to every industry, for the workers in many industries are subject to longer periods of unemployment, while in others the average is low.

The report estimates that more than one-quarter of the industrial wage-earners were out of work on June 1, 1921, representing an estimated total of 3,500,000 persons.

Many concerns, the report says, are inventing means to better arrangements within their plants affecting the cause of unemployment attributed to personal and impersonal factors within the establishment. Better methods and more thorough organization to reduce friction and to develop industrial cooperation between employers and employees are being tested in many industries. The report points out that in attempting to remedy the causes of unemployment attributed to influences operating outside the plant, there is need for more adequate system of collecting and disseminating information showing the trend of prices, the actual cost of operation and revenues from industry. "Such a system," it is said, "will afford a reliable basis of comparison within plants at different times and between individual plants in the industry as a whole."

Linoleum

We have just received a large shipment of Linoleums in different grades
Felt backs, Burlap backs
Printed and Inlaid
Six ond Twelve foot lengths

The quality is much better than last year and we are lucky to be entirely out of "war goods" Prices range from 65c to $2.25 per square yard.

We call your special attention to two numbers in heavy weight Printed Linoleum 12 foot wide
Exceptional values at
$1.25 per sq. yd.

We also have in stock a long wearing 12 foot Inlaid Linoleum speclaly priced at $2.25 per square yard

Let us measure your room and give you an estimate on the job, we will bring it out and lay it too.

The Rock Island is your railroad

It was the *first* railroad in the State of Iowa.

It constructed the *first* railroad bridge across the Mississippi River and made possible the early settlement and development of the State.

It now has 2284 miles of track in the State—the greatest mileage of any railroad.

It has grown to a system of 8,122 miles serving practically every commercial center of importance in fourteen midwestern states.

It paid the State of Iowa $1,317,372 in taxes during 1921.

It employed 8091 men in this State.

It paid these men $13,195,837 during the year.

Its pensioned employes in the State of Iowa number nearly one-half of its entire pension roll.

It endeavors to serve efficiently.

Its employes have a reputation for courtesy.

It earnestly solicits your patronage.

It is a "home" institution interwoven with every local activity.

Its problems are your problems, and it needs your cooperation in solving them.

Your future prosperity is largely dependent on the maintenance and development of a successful transportation system.

Now you can get yeast the way you want it

For the first time you can get a pure whole yeast in agreeable and convenient tablet form

Of surpassing interest to you thousands of men and women who understand the remarkable health-building properties of yeast is the knowledge that you can now get yeast the way you want it.

Ever since the therapeutic value of yeast was definitely determined by leading scientists, there has been an insistent demand for a pure whole yeast of high vitamin potency—that would keep; that would be easy and agreeable to take; that could be conveniently carried about in the pocket, and, finally, that would not form gas nor cause flatulency or belching.

In Yeast Foam Tablets these demands have been met.

A food—not a medicine

Yeast has within itself the amazing therapeutic element, *vitamin*, the corrective properties of which are more astounding than any known drug or medicine.

If you wish to take drugs or medicine, do so on the advice of your physician. If you wish to take a supplementary food, for its tonic action on the whole body, take pure, whole, concentrated yeast—Yeast Foam Tablets.

What this new yeast does

"Foods which lack vitamin will not maintain health," says a noted medical authority, "and many foods which originally contained this element reach our table with all vitamin eliminated, due to various heating and preparing processes."

The vitamin thus eliminated is restored through the addition to your regular food of Yeast Foam Tablets. They stimulate the appetite, aid digestion and enable the body to convert food into firm, healthy tissue.

What to take Yeast Foam Tablets for

For that ill health, commonly known as a run-down condition, and all its distressing symptoms such as sluggishness, anaemia, failing strength and endurance, lost appetite and malnutrition,

you will find nothing more efficacious than a prompt treatment of Yeast Foam Tablets. They are sold by all druggists.

Northwestern Yeast Co., Chicago
Makers of the famous baking yeasts, Yeast Foam and Magic Yeast

Extraordinary advantages of Yeast Foam Tablets

The only pure whole yeast in easy-to-take tablet form.

They contain no drugs or other ingredients.

They do not form gas nor cause belching.

They are the only pure whole yeast suitable for children; they do not cause fermentation.

Each lot is tested to insure high and uniform vitamin potency.

Yeast Foam Tablets
the only pure whole yeast in convenient tablet form

The SANDMAN STORY

RED FOX'S WHITE COAT

THE ground was covered with snow. Little Reddy Fox peeked from the doorway of his home, wishing he could run over to the farm.

"If you go out," said Old Grandpa Fox, who was sitting by the fireplace, "Mr. Dog or Mr. Man will surely see you. You need a white coat like your cousin, the Arctic Fox, to go out in weather like this."

"Oh, Grandpa, do tell me about my cousin. I did not know that any little foxes had white coats. Where do they live?"

"Oh, they live miles and miles away from around here," answered Grandpa Fox, "up in the Arctic regions of the cold north land.

"They are called the Blue Foxes or White Foxes, and they are about the same size that we are when they are grown."

"But, Grandpa, how can they have two names?" asked Reddy. "Are they blue and white?"

"Only in the winter time does your Arctic cousin put on his white coat," said Grandpa. All the rest of the year he is sort of a bluish gray. Some of the family wear nearly all of this color and others have upper parts of their body brown, with whitish fur on their stomachs, but in the winter every one puts on all-white coats so

they can hunt for food with perfect safety."

"If I had a coat like that I could go out and Mr. Dog would not see me running across the white fields," said Reddy.

But Grandpa Fox was nodding. He did not hear what little Reddy said and as there was no one about to stop him, Reddy Fox thought he would try an idea he had for making a white coat, for he very much wanted a nice chicken for his dinner.

At noontime he knew the hens and chickens would be let out of their house up at the farm for dinner, and he made up his mind to try to get one before the farmer or Mr. Dog saw him.

"Flour is white," thought Reddy. "I could jump into the flour barrel and get my coat thickly covered with white and then off I can run and be back before father or mother finds it out, and I guess they will be pleased when I bring home a chicken or a fat hen for dinner.

Grandpa Fox dozed and Reddy ran to the pantry to carry out his plan and in a little while out he came so white his own mother would not have known him. Out of the house and across the fields he went, arriving at the farm just as the poultry came out of their house for dinner.

Reddy took care to keep close to the snowdrifts near the stone wall, but he did not know that a good part of the flour had been shaken from his fur coat by running so far.

There was enough of it left, however, so that when he grabbed at a plump hen her wings flapped so that the flour flew out of his coat and got into Reddy's nose and he had to drop his dinner and run.

Mr. Dog had heard the commotion and out he came barking loudly. He leaped over the wall and after Reddy he ran.

But just as Mr. Dog was upon him, Reddy passed a bush and as his tail struck it, out flew the flour straight into the face of Mr. Dog.

He choked and he barked and by the time he could breathe Reddy Fox was nowhere in sight.

When Reddy reached home his mother was at the door, and though he tried to explain why he jumped into the flour barrel, she would not listen but beat his coat until there was no flour left in it.

"Mother was very rough cleaning my coat," said Reddy, rubbing his back as he sat by the fire beside his grandpa later. "I wonder if I had a coat like my Arctic cousins if she would try to beat the white out of that?"

"She might," said grandpa, with a twinkle in his eye. "You better not try any scheme for changing the color of your coat, for it will soon be spring and you want to feel real spry for the hunting season."

Lillian (Billie) Dove

Charming Lillian (Billie) Dove, the popular "movie" star has permanently left the chorus for the screen. "I thought I could never forsake musical comedy," she once said. "But the lure of the stage isn't half so strong to me now and can't be compared to the thrill that one gets when sitting back in the rear of a theater and watching one's self on the screen." This is one of her latest pictures.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

LATE HOURS

The wee small hours ayant the twall.—Burns.

WHY is it that the dances you dance—or once danced—after one o'clock always seem so much more stimulating and joyous than the dances that you dance while the night is still young?

It may be that it is only after we have been dancing for some time that we get really into the swing of it, or perhaps we can find the explanation in the old truism that stolen sweets are best, and that it is only because we have a feeling that we are robbing ourselves of our sleep that we enjoy these early morning dances.

The fact is that while the war lasted our dances were shorter. And some people went so far as to predict that we could never go back to the old-time custom of dancing or allowing our daughters and sons to dance until "all hours" of the morning. But the armistice had not been signed many days before dances were lasting longer and now all the old-time enthusiasm for dancing till dawn seems to have been revived. At least such seems to be the case in many parts of the country and in Washington and New York more than one hostess has served breakfast to her late dance guests at about five in the morning after a dance. And this breakfast, be it known, consists of nothing less hearty than coffee, rolls and sausages.

During war days the dances began earlier, but now the hour has been set on to ten o'clock in a good many cases. This means a supper at midnight or somewhat later. Of course many people feel that they have tarried long enough if they linger until after supper, but the dance enthusiasts—the young folk—linger on in the good old-fashioned way.

Whatever your own taste for late hours may be, however, you should always make sure that you are not outstaying your welcome and just because a company of young persons become more interested in their dancing as the hours advance is no reason why they should impose on the good nature of a hostess who has not planned for such a late breaking up of her party. In general, it is safe to assume that if your hostess is expecting her guests to dance till a very late hour, she will set the hour for the beginning of her dance as late as nine or ten. If the hour is earlier, then the guests should make a point of going home earlier.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel.

GERALDINE

NORSE mythology is filled with valiant names which are the forerunners of many of our feminine proper names in current use today. Geraldine is one such and her history dates back to the days when Valkyries drove their splendid chariots over the fields of conflict in the land of the midnight sun. It means "spear power," thus making its fortunate possessor one of the company of battle maids so honored by those of Scandinavian blood.

From Norway and Sweden, the forerunner of Geraldine made its appearance among the Anglo-Saxons as St. Gerhold, which was straightway changed to Gerald and because of the saintly reputation of its first bearer the masculine name became enormously popular in England, where it is still a favorite in the aristocratic class. "Morte d'Arthur" added to the vogue of Gerald, since Gareth, or Garret, Knight of the Round Table, was said to be the equivalent for Gerald. Some etymologists disagree with this contention.

The first Geraldine was Lady Elizabeth Fitzgerald, daughter of the famous Maurice Fitzgerald, whom Surrey made the heroine of his poetry under the title of Fair Geraldine.

Geraldine's talismanic gem is the emerald which is said to give the wearer such intuitive powers that she may be able to foretell events. It quickens the intelligence and sharpens the wits, but is an enemy to passion. Wednesday is Geraldine's lucky day and 3 her lucky number. The hawthorne is her flower.

A LINE O' CHEER

By John Kendrick Bangs.

A VALUABLE VISITOR

TROUBLE came to me one day
Bag and baggage. Came to stay.
Followed me where'er I went
On more trouble surely bent.
I, despite his mien of gloom,
Took him to an upper room,
And with purpose deadly grim
Made a punching-bag of him.

Knocked him squarely through the door.
Stretched him flat upon the floor,
And at last when past a doubt
I'd completely laid him out
Strange to say I found my muscle
Stronger for our little tussle,
Whence I think 'tis rather plain
Even Trouble holdeth gain.

The average output of the world's gold mines is now more than $350,000,000 a year.

HOME TOWN HELPS

PUT TREES ALONG HIGHWAYS

Cogent Reasons Why There Should Be a Termination of the Present-Day Neglectful Attitude.

If you are short of sentiment, and think more about money than you do about the service that your soldiers gave you, even that is no excuse for being a tree slacker. Your help is wanted in planting trees along the nation's highways in memory of the services of all soldiers of the World war. It will pay you in dollars, if that is any argument. Property with shade trees brings a higher price than property without it. Roads with trees give comfort to you and your children and your children's children.

Shelter and shade are two of the blessings the trees give us. In these days of the scarcity and high price of fuel for our homes and schools, trees are an asset as windbreaks. A group of trees on the windward side of your building keeps it warm against the cold blasts.

The heat of summer is bearable with scattered trees and their shade along your paths. The attractiveness of any place is enhanced by trees.

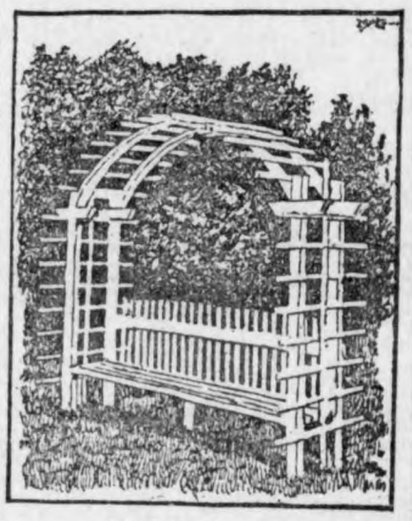
With a little care you can plant memory trees on home grounds, street, school lawns, or parks.

Trees cool and purify the air. Public forests have been used for health resorts because of the trees. If you plant a few trees together, happy groups here and there, they will reward you without fail.

FOR THAT 'GOOD OLD SUMMER'

Winter the Time to Prepare Furnishings That Will Make the Porch an Attractive Place.

"Winter's the time to enjoy summer," is an old adage which may be paraphrased into winter's the time to get ready for summer. Simple designs in garden seats and chairs may be



Ideal Garden Seat.

made by the home carpenter during the winter months. The designs are simple in line and within the skill of the man who is accustomed to the use of saw and hammer. The flower boxes on the garden seat may be omitted or placed lower if desired for flowers rather than vines.

Fighting Fire.

For rural fires, when there is a decided headway before the fire apparatus can reach them, there is nothing so good as water thrown by a powerful pump. All fire-extinguishing substances act by virtue of their property of excluding air from the fire. This is the only thing that makes water put out a fire, and the gas blanket formed by the chemical extinguishers is effective for the same reason where the fire is in a confined location.

Community Problems.

The fundamental problems of any community are based upon four things—production, labor, transportation, morale. Its prosperity, of course, is dependent upon production. Production in turn is dependent largely upon labor and is made possible by facilities for transportation. By morale is meant the spirit that permeates the people and gives them the will to succeed.

Beautifying Highways.

The Michigan legislature, in order to encourage roadside beautifying, passed an act which makes it the duty of the highway commission to look after the setting out of shade and nut-bearing trees. While thus beautifying the highways and at the same time starting a new growth of valuable timber, why not also urge the railroads to utilize their rights of way in similar fashion?

Approximately.

Hokus—Who wrote "Ten Nights in a Barroom?"

Pokus—Aren't you thinking of "Twelfth Night?"

Pokus—What difference did a couple of nights, more or less, make in those days?

Not Then.

"I hate to hear a man talking to himself, don't you?"

"No. If he's talking about his troubles I'd sooner have him talk to himself than to me."

Longer Skirt Is Making Headway

Harbingers of the spring season crowd upon us from all directions. From Paris come the cables of the openings there, while right here in New York, observes a fashion writer in the New York Times, we are being treated to fashion exhibits that are truly American in character. Only the best of America's fashion creators paraded their gowns for the fashion people to revel in and to take shining examples from the clothes of American women this spring.

While the dresses designed for the street have a tendency to remain at a very moderate length—not to say short—those for afternoon and evening are creeping floorward at no uncertain pace. And it is interesting to see how variously the different designers achieve their purposes by drapings and transparent flouncings and panels and ruffings and underskirts and things.

For those women who will not accept the frankly long skirt (either because their figures are too short or because they want to remain youthful in appearance), there are gowns with trailing trains to make them look long, while at other portions of their skirts the legs are allowed to show almost to the knees. This style will continue to please those husbands, too, who vowed they would not be parties to the reappearance of the longer skirts. It took them a long while to come around to a whole-hearted acceptance of the shorter skort; but having reached that point, they seem—many of them—determined to remain there.

One evening gown at the National Garment Retailers' fashion show was made of a black beaded robe just draped about the figure in classic lines, with straps of cut jet to hold it in place over the shoulders. On the left side of the skirt the draping was opened and made a short skirt line, almost to the knees, while on the opposite side the lines of its draping curved downward until it barely escaped the floor.

Made of Metal Cloth.

Another of these very brilliant gowns was made of some soft and illusive shade of metal cloth—that is, one which had a color woven in with the silver threads. Its skirt was draped in one of those irregular ways that brought it very low on one side, where it spread out into a graceful train, and from the other side the fabric came from a higher point, to fasten under the drapery of the train. The interesting part about this gown was that when its lovely wearer stood still in one spot, it had every appearance of being quite amply full. Then when she stepped along the path the movement of her body transformed the lines of the skirt so that they followed her figure exactly.

All the evening frocks had simple straps for the shoulders, with as much neck showing as possible. One was of red velvet, and the shoulder straps

Embroidered Gown of Violet Panne Velvet.

were composed of twisted velvet, making a cord of about half an inch in diameter. But the lines of the neck were mostly square across the front, with some divergence in the back, according to the design of the gown in question. What trimming there was appeared at the waistline in the form of a girdle or, sometimes, a more elaborate sort of trimming, that spread beaded medallions on the waist or skirt.

The materials were soft velvets, plain metal cloths and heavy satins and, according to the inspiration received by each individual designer, the lines of draped evening gowns followed the characters of the fabrics used. Most of the colors were brilliant in the extreme, showing a marked tendency to get away from black, which has been so astonishingly popular during the last season. Yellow in the brighter shades appeared repeatedly, establishing a precedent for its use during the coming spring and summer.

Models for Different Types.

When the draped evening gowns are considered, then there is a distinct different type for the young and slim woman. It is draped, to be sure, but it is extended in some way at the hip line, so that the gown assumes a distinctly bouffant appearance. It is made, more usually, of the thinner materials and of taffeta which, of its own accord, puffs out into distended lines.

One dress of this type was made from heavy flowered taffeta, the little colorful bouquets of flowers being scattered over a background of stiff cream-colored silk. The skirt was invested with full panniers over each hip and, falling from that point, reached the ankles. There was

Late Creation in Pure White.

short-waisted bodice and little, old-fashioned puffed sleeves, giving the effect of lovely maidenliness combined with a real old-time charm.

Some of the evening dresses were short, as far as the foundation material was concerned, and then had extra lace of gold tissue flounces below that line, which made the skirt long, and yet not long. It was a compromise that many women will like because it forms an easy transition between the long and the short and allows them to gradually become used to the longer lines.

From Paris we gather the first news of the spring openings there. Of course it is, as yet, only snatched information transported by cable, but it serves to give an idea of what the Parisian couturiers will sanction for forthcoming styles.

Two frocks, which are the latest creations of Martial et Armand and Cheruit, are not, of course, included in the spring showings of those two houses, but they are the sort of thing that led up to those openings, and for that reason they hold a real significance.

Simplicity Is Noticeable.

The simplicity of the drapings of these gowns is their most noticeable characteristic. There seems to be only a suggestion of a gathering of the fullness at a certain point, or at various points, as the case may be. But the manner of that draping lies the center of interest in the frock, and around it the trimming and all of the lines of the gown are grouped in harmony.

Cheruit's gown illustrates that regularity of beaded trimming which has proved itself so acceptable, and in this case the cross lines of bead tubes and circles follow the line established by the draping about the lowered waist line.

The gown from Martial et Armand has a somewhat higher waistline. There is, a second tier of velvet ribbon which establishes a more normal line, while the lowered one remains there, though to demonstrate its willingness to be pushed from the center of interest, which it has held uninterruptedly. This frock is made with an underdress of silver that shows charmingly on the bodice under the arms.

Then the overdress is made of a beautifully soft piece of panne velvet embroidered by hand over its entire surface with designs in silver thread. The velvet is a light violet in tint, and the velvet stripes of ribbon about the waist, along with the velvet and silver bowers grouped at one side, are in a deep tone of purple. Incorporated in the making of the blossoms are petals of silver cloth, and the straps over the shoulders are made of this same material.

Cheruit's gown is all white—white satin which forms its foundation and the various sizes of beads from which the embroidery is made. White, that is to say, will be one of the popular tones for spring, and, it seems to be the rule that when a frock is white it shall be kept entirely white, without touches of color to relieve it in any way.

As for sleeves for evening gowns, well, there weren't any sleeves. They just don't seem to enter the calculations of the designers.

RCHARD LEANINGS

TING TREES IN ORCHARD

Must Be Exercised That Plants Set Out at Earliest Possible Date in Spring.

n planting of fruit trees must be ed until spring care must be that the trees are set out at the t possible date. In rare in- s it happens that the trees have d into growth slightly at the time nting. Such condition is not seri- rovided the trees have not been d to make a growth of a few before being planted.

ny event it is always necessary une the tree back somewhat at me it is set. This is done in or- equalize the balance between the and the top. In digging the from the nursery the greater on of the root system is removed, f the trees are planted without qual reduction of the top the will not be able to supply the top with crude sap, and the trees ot make as strong a growth.

e amount of cutting back of the that is necessary at the time a is set depends largely on the age e tree, the kind, whether apple, , etc. Two-year-old apples are ly shortened back not more than hird, and where one-year-old s are used, the cutting back ld as a rule be about one-third of length of the tree.

here it is necessary to transport mber of trees from the heeling-in nds to the orchard, it is best to the trees in tight wagon box, mix- the roots with a plentiful supply of straw. Small quantities of trees be placed in a barrel containing ttle water. In the Western states a common practice to load the s into a barrel filled with water then, as a tree is planted, to pour ttle of the water around the roots he tree before hole is filled with

he hole that is dug for the tree ld be large enough so that the s may be spread out naturally, hout any crowding. These holes d not be very wide, but need to be p enough to allow the tree to be a little deeper than it stood in the

The Proper Way to Plant a Tree.

rsery. All of the longest roots need be shortened in to about six inches d cut with a smooth clean cut. Any ots that are broken or bruised need be removed, and all cut surfaces ed to be made smooth so they will al quickly.

Filling in the soil about the trees a very important step in tree plant- g. To get the best results the soil ust be packed closely about the ots, so that there are no air holes or revices. The best way to do this is ith the hand. When the tree is in lace spread the roots out and throw shovelful of soil over them, shake he tree up and down several times nd then work it into the crevices be- ween the roots with the fingers.

Throw in a little more soil and ork into the remaining crevices, and hen with the feet tramp the soil solid. Throw in more soil and tramp, repeat- g until the hole is full and the dirt bout the tree is packed down solid nd tight. Moving the tree up and own while the earth is being thrown n will assist materially in avoiding air oles and in bringing the soil in close ontact with the roots.

There is little danger of packing the oil too tightly about the roots. The reatest danger is in not getting it acked tightly enough and leaving air oles that will let the roots dry out nd the trees die.

The trees should be set just a little deeper than they stood when in nurs- ery, although not over an inch deeper. Setting too deep is as dangerous as not setting deep enough. The best guide is the line marking the change in color of the bark at the crown where the tree enters the ground. The orchard plat should be well drained.

SMALL PATCHES OF BERRIES

Where Plowing Between Rows Is Impossible Straw or Old Hay Will Surpress Weeds.

Often small patches of berries are so located that plowing between the rows is impossible. By placing straw or old hay in the spaces the same result of suppressing weeds will be secured. If the straw is placed on the snow the ground will stay frozen somewhat in the spring.

LIVE STOCK FACTS

INTEREST IN BETTER SIRES

Records Show Campaign for Purebreds Has Extended to All States and Island Possessions.

(Prepared by the United States Department of Agriculture.)

With exactly 5,900 persons enrolled in the "Better Sires—Better Stock" campaign at the close of the calendar year 1921, records of the United States Department of Agriculture show a continued interest in this work which has extended to all states and several island possessions. During the year the number of live stock owned by the persons enrolled increased from about 400,000 to 750,000. The figures include both male and female stock. All of the males are purebred, and the females, which may be of varied breeding, are bred in all cases to purebred sires.

It is noteworthy that 56 per cent of all female stock listed in the better sires campaign are purebred. This figure is 1 per cent higher than a year ago. The effect of the use of purebred sires in reducing the number of scrub animals on farms is shown by the small proportion of scrubs in herds and flocks headed by purebred males. The figure at the end of the calendar year 1920 was 2.1 per cent and for 1921, 1.9 per cent scrubs in such herds.

At the request of several state extension workers a special report has been made for the last three months of 1921 with respect to progress by states. Enrollments of persons agreeing to put their live stock on a purebred-sire basis totaled 716. The greatest activity during the quarter was in Ohio, Nebraska coming next, followed in turn by Washington, Virginia, Kentucky, and North Dakota, in the order named.

The leading counties during the quarter were Hardin County, Ohio, with 100 persons signing enrollment blanks. Kittitas County, Wash., was second, with 56 enrollments; Belmont County, Ohio, 49; Grand Forks County, N. D., 47. Other active counties

Castor, 800-Pound Registered Morgan Horse.

were Ellis, Okla.; Gallia, Ohio; and Lewis, Wash. These results make Hardin County, Ohio, with a total of 166 enrollments, the third highest county in the United States, the first and second being Pulaski County, Va., 446, and Greenville, S. C., 176.

The widespread interest in the use of purebred sires as a means of improving live stock is evident from the number of counties where the work has already gone forward. Live-stock owners in 548 counties, and, in addition, in the islands of Guam and Porto Rico, were participating in the work at the end of the calendar year.

Summary of Results in "Better Sires—Better Stock" Campaign, October 1, 1919, to December 31, 1921, by States Having More Than 1,000 Animals Listed.

State—	Persons Enrolled	Animals Listed	Poultry Listed
Virginia	1,561	44,601	94,904
Nebraska	1,000	57,420	115,332
Ohio	901	37,404	87,263
South Carolina	302	5,504	4,744
Washington	262	8,151	46,891
Kentucky	250	7,915	18,010
Massachusetts	160	5,149	10,978
Texas	152	12,506	6,797
Vermont	96	4,753	4,065
Connecticut	96	3,692	10,626
Indiana	87	3,347	9,077
North Carolina	85	1,489	3,179
Oklahoma	73	3,736	7,672
Florida	72	7,231	6,415
Colorado	71	2,647	3,280
Wisconsin	62	2,862	4,972
West Virginia	62	1,734	5,860
North Dakota	54	3,340	4,942
Minnesota	53	1,223	2,135
South Dakota	50	3,303	4,917
Utah	45	4,023	2,114
Montana	42	18,846	2,002
New Mexico	40	9,483	1,275
Nevada	27	4,456	995
New York	21	1,259	1,204
Idaho	17	1,059	461

Diseases Decreasing.

Diseases of live stock are said to be decreasing and a general improvement in quality is reported by the Department of Agriculture.

Feed for Wintering Sheep.

Fed liberally on straw and one ear of corn each per day, sheep will winter as well and more cheaply than on hay and on grain.

Better Animals Result.

Better sires in all cases mean bet r animals.

PLANT CORN FOR LARGEST YIELDS

Nothing Gained by Seeding Before Conditions of Soil and Atmosphere Are Right.

NEITHER EXTREME DESIRABLE

Greatest Total Growth of Stalk Made From Planting in May or June—Experiments of State Stations Corroborated.

(Prepared by the United States Department of Agriculture.)

No gain is made in yield or maturity by planting corn before conditions of soil and atmosphere are right, in the opinion of the United States Department of Agriculture. Corn growers in localities with a long season have observed that early and late plantings of the same variety usually show wide differences in growth and number of days required to reach maturity. In general, corn which is seeded early requires a longer time to come up than that which is planted later. The plants also grow more slowly, are shorter, and bear their ears lower. These are commonly observed effects of the date of planting.

Best Yields From Early Seeding.

Studies recently have been made by the United States Department of Agriculture at the Arlington experimental farm near Washington, D. C., in order to obtain data which would supplement that obtained earlier at the various state experiment stations. Numerous experiments have been conducted by the state agricultural experiment stations to determine the influence of the different dates of planting on corn yields. The state experiments reviewed indicate that the best yields of grain may be expected from the early seedings and the most rapid development and greatest growth from the later seedings. Neither the extremely early nor the very late plantings are desirable.

The department investigations were directed more to a study of the effects upon growth and development than to determining the most desirable date of planting from the standpoint of yield. The results of these studies, which extended over a five-year period, are presented in Department Bulletin No. 1014, Effect of Date of Seeding on Germination, Growth, and Development of Corn, by E. B. Brown and H. S. Garrison, which may be had upon application to the department.

The varieties of corn used in the experiments cover a wide range in the length of the growing season required. The data tabulated are limited to the characters that seem to have been consistently affected, although the points studied included the rapidity of germination, the number of days from emergence to ripening, the height of stalks, the number of ears per plant, the average weight of ears, the average yield per plant, and the number of suckers.

In all the experiments the germination of corn increased in rapidity as the date of seeding occurred later. When sown early the short-season northern varieties came up sooner than the varieties from the central and southern states. When sown later the differences in this respect were not usually apparent.

May or June Favored.

The total growth of stalk was greatest from the seedings in June and

Plant Corn in May or June for Best Growth and Yield.

May. The total growth was least and rate of growth slowest from the April seedings. Development was more rapid in the later than in the earlier seedings.

The number of ears per stalk, the size of the ear, and the amount of suckering bore no consistent relation to the date of seeding. The pollen-shedding period was longer in plants from the early seedings than in those from the later seedings. Seedings earlier than normal resulted in slight gains in the date of silking.

These experiments corroborate the conclusions of the state experiment stations, that corn may be planted in the vicinity of Washington and other localities with a similar season, any time after May 1, without danger of the seed rotting. The best conditions of soil and atmosphere usually come between May 10 and May 20.

Start Vegetables Early.

Hotbeds and cold frames give a chance to start vegetables earlier and gain on the weather and insects.

HORSE-RADISH DOES NOT REPEL ENEMIES

Pungent Qualities of Plant Do Not Discourage Bugs.

Entomologists Report New Pest In Form of European Webworm Which Also Attacks and Injures Turnips and Cabbage.

(Prepared by the United States Department of Agriculture.)

Even the pungent and tear-starting qualities of horse-radish are not sufficient to discourage insect enemies. In addition to two other specific and two incidental pests preying upon this plant, entomologists of the United States Department of Agriculture report a third specific enemy, known as the European horse-radish webworm and described in a bulletin of that title, Department Bulletin No. 966, just issued.

The caterpillar, which does the most destruction, is of medium size and is also known as the purple backed web-worm, as well as by its regular

Horse-Radish Root Showing Value of Deep Digging for Straight Roots—This Applies to All Root Vegetables.

name. While favoring horse-radish, it is also known to attack turnip and cabbage, and after feeding on the lower surface of the leaves sometimes webs them together near the ground. When abundant, it attacks the stalks even down to the roots. It was first discovered in injurious numbers in Virginia, near the District of Columbia, in 1919, and occasional attacks have been noted in Massachusetts, New York, New Jersey, and Wisconsin. The moth of the species is rather a bright ocher yellow, with a wing spread of about 1 inch, peculiarly spotted. The eggs are deposited in compact masses containing from half a dozen to a score. They are a little brighter green than the leaf, and each egg is surrounded by an irregular ring of yellow spots.

The webworm may be controlled by arsenicals and by hand-picking on horse-radish, and more readily on other crops by fall and spring plowing and frequent cultivation.

TEST SEEDS BEFORE SOWING

Of Big Advantage to Farmer to Determine Purity and Germination of Various Grains.

Whether the seed is for sale or for his own use on the farm, the farmer will find it to his advantage to test his seed, or have it tested, for purity and germination. In making a purity test, according to the United States Department of Agriculture, it is customary to determine the percentage of pure seed, inert matter such as dirt, chaff, and broken seeds, and foreign seeds, including weed and other kinds. A sample is taken varying in weight from 1 to 100 grams or more (a teaspoon for the clovers and small-seeded grasses, a tablespoon for the grasses, and a considerably larger amount for cereal grains), depending upon the size of the seed being examined. For the germination test usually two lots of 100 seeds each are placed on or between blotting paper, canton flannel, or such material, and kept in a room or chamber at a temperature of 60 degrees to 80 degrees F. for 3 to 28 days, depending upon the kind of seed being tested.

Samples for purity and germination tests may be sent to the seed laboratory of the United States Department of Agriculture at Washington, D. C., or to the nearest branch seed laboratory of the United States Department of Agriculture at Washington, D. C., or to the nearest branch seed laboratory located at Lafayette, Ind.; Columbia, Mo.; College Station, Tex.; Corvallis, Ore. and Berkeley, Calif.

PUSHING ROAD CONSTRUCTION

Marked Improvement in Economic Conditions for Highway Building in United States.

Economic conditions for highway building in all parts of the United States have shown marked improvement. Railroad facilities for handling road-building material are much improved. Labor conditions have been such as to aid road building. The increasing number of unemployed men and the depression generally causing more men to be thrown out of employment, have been favorable to contractors in pushing road construction.

POULTRY

ESSENTIALS OF INCUBATORS

Chief Point, Whether Small or Large Machine Is Used, Is to Have Air Fresh.

(Prepared by the United States Department of Agriculture.)

Incubators are operated successfully in a great variety of places. Small machines generally are set in a room or the cellar of the house. A special cellar or incubator house should be provided where the incubator equipment is extensive or where mammoth machines are used. The chief points are to have a room which is not subject to great variations in temperature and which is well ventilated, so that the air is fresh and pure, according to Farmers' Bulletin 1106, Incubation of Hens' Eggs, issued by the United States Department of Agriculture.

If built above ground the walls of the incubator house should be double and the entire building well insulated. Incubators may be operated in buildings with single walls, especially in mild climates, but a well-insulated room is preferable. Good results in hatching are secured in incubator cellars and in incubator rooms which are entirely above the ground level.

The incubator room or cellar should be large enough to allow the attendant to work around the machines conveniently. Many incubator cellars are provided with some system of ventilation in addition to the windows, while in others the ventilation is controlled entirely by the latter method. Muslin screens on the windows provide good ventilation without draft and at the same time keep the direct rays of the sun from the machines. Many incubator cellars have cement floors, which are easier than dirt floors to keep clean and neat.

CRESOL GOOD DISINFECTANT

Added to Water It Makes Excellent Solution for Spraying Houses or Premises.

(Prepared by the United States Department of Agriculture.)

The kerosene emulsion which is frequently used to destroy mites may readily be converted into a disinfectant, according to the United States Department of Agriculture. The emulsion is made by shaving one-half pound hard laundry soap into one-half gallon soft water. Boil the mixture until soap is dissolved and then, after

Poultry House That Can Easily Be Disinfected.

removing it to a safe distance from the fire, stir into it while hot 2 gallons of kerosene. This makes the stock mixture. When it is to be used as louse killer, 1 quart of the emulsion is mixed with 10 quarts of water. When it is to be used as a disinfectant, stir well and add 2 pints of crude carbolic acid or crude cresol.

The compound solution of cresol is one of the best disinfectants that can be purchased ready to use. It contains 50 per cent of cresol and a pint of it in 10 quarts of water makes the right solution to apply to houses or spray over the ground. A 5 per cent solution of carbolic acid (1 pint carbolic acid, 10 quarts water) is about equally efficacious.

EXPERIENCE MOST ESSENTIAL

No Great Difficulties Offered in Operation of Modern, Improved Incubators.

Modern, improved incubators offer no great difficulties in order to achieve success, yet like running almost any other machine, the better they are understood by the operators, the easier they can handle them. This ease and simplicity is only attained after a thorough knowledge of the principles involved and a familiarity formed from a frequent employment of them; in other words, experience.

When a woman says her husband is the light of her life, he probably does not get out very often.

We are told the modern dance is wonderful exercise. The reformers certainly are exercised about it.

Russia having butted its head against a stone wall, blames capitalism for the presence of the wall.

Brains and beauty so seldom go together because as long as a woman has beauty she doesn't need brains.

DAIRY HINTS

BEST TIME TO DROP CALVES

Question Best Decided by Farm Conditions, Considering Feed Supply, Pasturage, Etc.

The best time to have calves dropped is debatable. Some farmers prefer to have them dropped in late February, in March, or early in April, while others prefer September or October. This question is decided by the farm conditions, taking into consideration feed supply, pasturage, equipment and labor. When calves are dropped in the spring they require less close attention and labor during the first winter and less pasture during the first summer, since cows and calves run together, while the cows may be wintered more cheaply by using a greater quantity of coarse roughage.

However, if calves are born in the fall, the cows are in better condition at calving time; they give more milk for a longer period; the calves make better use of the grass during their first summer; they escape flies and heat while small, and may be weaned just before calving time. Fall calves should not be weaned until they are put on grass in the spring. No matter what system is used, all the calves should be dropped within a period of 60 days to give as much uniformity as possible to the calf crop.

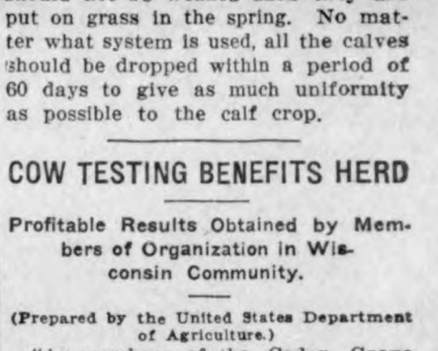
COW TESTING BENEFITS HERD

Profitable Results Obtained by Members of Organization in Wisconsin Community.

(Prepared by the United States Department of Agriculture.)

"As members of the Cedar Grove cow-testing association for the past three and one-half years we have obtained some profitable results," writes the owner of a Wisconsin farm to a field agent of the Dairy Division of the United States Department of Agriculture. "When we started, our herd averaged 11,829 pounds of milk and 410.2 pounds of butter fat, while last year our average was 13,737 pounds of milk and 502.2 pounds of butter fat. We were encouraged by our tester to mix our rations before feeding and to milk some of our cows three times a day, which in one instance brought an increase in production of over 3,000 pounds of milk in the year.

"Another problem our tester helped us solve was our calf feeding. He encouraged us to mix a good calf ration, and our calves have grown as much as two and one-half pounds a



Testing Association Helps Farmer to Increase the Milk Flow By Better Feeding.

day. Cow testing also showed the difference in the profits of the different cows. Some of the cows made two and one-half times as much as other individuals do.

"It was through the tester's suggestion that we started in with purebred cattle in earnest, and some day we are going to have a good pure-bred herd. Another thing the testing showed us is that we had sold a registered bull to be slaughtered which had five daughters that averaged over 13,300 pounds of milk and 525 pounds of butter fat. A lesson like this one will be remembered a long time.

"Putting it in few words, our association work helped us to feed, care for, and improve our cattle and study the results obtained.

TESTED COW ABOVE AVERAGE

Live Stock Improvement Campaigns Effective in Increasing Dairy Production.

The average dairy cow in this country produces annually about 4,000 pounds of milk and 160 pounds of butter fat. According to 40,000 yearly individual cow records just tabulated by the United States Department of Agriculture, the average cow-testing association cow produces 5,980 pounds of milk and 246 pounds of butter fat a year. The world's records are 37,381.4 pounds of milk and 1,252 pounds of butter fat. The average dairy cow has plenty of room for climbing, and such commendable live stock improvement campaigns as the "Better Sires—Better Stock" drive will be effective in increasing the efficiency and production of American dairy stock.

Wedge-Shaped Cow.

The good dairy cow is wedge-shaped in two directions. She is wide in the rear and narrow in front. She is narrow on the top of the shoulders and wide between the forelegs. This shape gives room for a big heart, denoting a strong arterial circulation.

Way to Spoil Good Cow.

If you want to spoil a good cow quickly, neglect to milk her at regular hours and stripping her clean at each milking. The cow wants you to like milk well enough to take all she has.

LIBERTY TOWNSHIP NEWS

A party was given on Mildred Anderson last week Monday evening, it being her birthday.

Plowing has commenced to some extent in this locality.

A party was given at the Ulrich home last Friday evening.

Elizabeth Reimer visited at the Will Suckow home a couple of days last week.

The George Ulrich family moved to town during the past week.

The roads have been bad the past week or so; in fact it was impossible for the Tin Lizzie to get through in places.

Indications point to a late spring. Horses are slow in shedding their winter coats of hair. Although there isn't much frost in the ground. The farmers are getting their discs and other machinery in good shape which means that seeding will be going on in full blast as soon as the weather permits.

Daniel Webner, Pioneer, Died On Old Homestead

WAS PIONEER OF HANCOCK COUNTY

Shipped First Carload of Grain From This Station

With the passing of Dan Webner this community looses an old time resident and pioneer who resided in this vicinity when Indians were as numerous as were the early white settlers.

Mr. Webner bought the land on which he resided for five dollars an acre for the first eighty acres. Later he bought another forty acres adjoining and for this he paid seven dollars. A few years later he purchased another forty to complete his farm and for this he paid what was considered a big price. fourteen dollars.

In telling of the early days, Mrs. Byron Haskins, his eldest daughter said that she sed to be afraiud of the Indians when she was a little girl and when she would see Indians coming through she would get the her little brother ad sister and hide in the corn field until tey ent away again; but of course the Indians were harmless but nevertheless Mrs. Haskins did not like their looks and so took no chances.

When the railroad was first built through Klemme there was no regular station and it was hard for the farmers to get cars in which to ship their grain. It so happened that Dan Webner and Morris Day both wanted a car to ship out some grain. The agent could only get one car and both Dan and Morris wanted that car. The agent was diplomatic so he told them that when the car arrived the first to put a load of grain in it could have the car. Both men were on the look-out when a train came in for that car. Dan sent his daughter (Mrs. Haskins) in on horse back one day when they heard or so the train come in and sure enough the car had been set out on a siding and she went home as fast as she could to tell her father; he had the grain all sacked and ready so e started to town and got there first and put in the first load of grain. On the way home he met Morris Day coming in with his load of grain but there was nothing for him to do but turn around and go back home. He had sent one of the boys in to see if the car had come, but Mrs. Haskis had gotten there first and Dan had beat Neighbor Day by an hour.

So Dan Webner had the honor of being the first man to ship a whole car load of grain from this station on the new railroad.

There are perhaps many other interesting stories of old pioneer days that could be related concerning Mr. Webner but space nor time does not permit publishing them at this time.

Obituary

Daniel Webner was born at Elizabethville, Pennsylvania, on August 3rd, 1849 and departed this life on Friday, March 31st, 1922.

He lived with his parents on a farm until he was fourteen years of age, his mother having died he went to live with relatives in Chicago, moving then to Forriston, Illinois, and later to Hampton, Iowa. It was at Hampton where he was united in marriage to Miss Beulah Riggins on the 3rd of July, 1872. From Hampton the family moved to the state of Ohio where Mr. Webner was engaged in coal mining and other pursuits for three years, then moving to Floyd County. Iowa, engaging in farming for several years and finally moving in 1883 onto a farm of their own in Hancock County, Iowa, near Klemme. This was the day of the early settlers and Mr. Webner saw the rise and growth of the town of Klemme. At that early date trading was carried on at Garner and Clear Lake from this community.

Those of his immediate family who mourn his loss are his wife and three children: Mrs. Myron Haskins of Garner; Mrs. Thomas Nelson, Jr., of Goodell; and Daniel Webner, Jr., of Klemme; four children having died in infancy. His twelve grandchildren and five great grandchildren also revere his memory.

The departed was a good husband, a loving father and a good neighbor. He was of a cheerful disposition, always having a good word and a friendly smile for everyone.

The services were held in the Methodist Episcopal Church of Klemme on Sunday afternoon, April 2nd at 2:00 o'clock and were conducted by the pastor, Rev. A. B. Gedye. Interment was made in the Calvary Cemetery of Klemme.

Card of Thanks

We wish to thank our many friends and neighbors for their kind assistance and expressions of sympathy in the loss of our husband and father; also extending thanks for the floral offerings.

Mrs. Dan Webner, Sr., and children.

IOWA FUTURE ROSY, U. S. BANK STATES

Increased Prices For Farm Products Gives Impetus to Buying Movement

Marked improvement in agricultural sections has brought about a distinct feeling of hopefulness which will result in a decided impetus to business declares the March business review by the federal reserve bank of Chicago.

The improvement is due to "material advances in farm products compared with the low point of a few months ago." says the report, "and applies particularly to corn, hogs and cattle. Furthermore, government statistics show a large amount of cattle and hogs still on the farm.

"The effect of this has been largely to dispel the pessimism of last year. Instead there has come a distinct feeling of hopefulness and confidence that better things are in store for the farmer.

"This is not interpreted, however, as meaning that within the next few months the farmer will be a large buyer of other than prime necessities. On the contrary, he is showing a disposition to husband his resources against further requirements.

"An encouraging feature now manifests in parts of the district is a stronger demand for farms to rent. Last fall many land owners found it difficult to secure desirable tenants. Another favorable indication is a disposition to restock the feed lots as quickly as present holdings of cattle and hogs are marketed.

"Improvement in conditions affecting the general credit situation is indicated in reports from practically all parts of the district. From manufacturing centers increasing activity of plants is reported.

"Total borrowings from the federal reserve bank by member banks in every state of the district are now below the theoretical basic line of credit for the first time since early in 1920.

"Collections are mixed, with indications of some improvement, and liquidation of old accounts is proceeding fairly well."

DID NORWEGIANS DISCOVER AMERICA?

LAKE MILLS, April 5.—H. R. Holand of Ephraim, Wis., will give a lecture on the famous Kensington Stone at Salem Lutheran church April 11. The Kensington Stone, which was found near Kensington, Minn., contanis an inscription in ancient runic characters showing that thirty Scandinavians visited what is now western Minnesota one hundred and thirty years before Columbus discovered America. Lately the place where these eary explorers were massacred by the Indians has been found. together with a number of their weapons and implements. Mr. Holand first translated these inscriptions, and made this subject a special study for a number of years.

These six women and over fifty others equally well-known nationally are making an emergency appeal to the women of the land to defeat the threat of death that hangs over the children of the Near East.

Apology Ends Row About Stories of "Still" in School

MESERVEY SCHOOL HEAD DROPS SUIT AS FARMER ADMITS TALES WERE FICTION

From Mason City G-G. Apr. 3

With aformal apology on the part of Theodore Wendel, a farmer living near Meservey, to Supt. S. A. Siefert of the Meservey schools, the trouble growing out of reports that a still was being operated in the public school for the purpose of teaching pupils how to make "hootch" has come to a close. On receipt of the apology, the superintendent dropped his plans to sue for $10,000 damages on a charge of slander, according to his attorney, J. E. Williams. The farmer will recompense the school man for the costs incurred by him.

The apology follows:

"To whom it may concern:

"Whereas, through mistaken information, I have made certain statements in Cerro Gordo county, Iowa, concerning A. A. Seifert, superintendent of the schools of Meservey, Iowa, in connection with whioh statements it has been mentioned that he was operating a still in the school house at Meservey, Iowa, and

"Whereas, said statments have been misinterpreted by the public and given the meaning that I had charged Mr. Seifert with the illicit manufacture of intoxicating liquor.

Sorry He Said It

"I desire to say to the public, that for having made the above statement, I am regretful and desire to extend my apologies to Mr. Siefert. In justice to myself, I wish to say that I had no intention of charging Mr. Siefert with the illicit manufacture of liquor, but realizing that my statements may have been so interpreted, I wish to make this written refution of them. I have every confidence in Mr. Siefert's being a law abiding citizen and especially in reference to the keeping of the laws of the state.

"Dated at Mason City, Iowa, March 25, 1922.

Theodore Wendel."

What Caused the Trouble

The direct cause of the trouble which has stirred Meservey is an innocent little retort or flask in the physics laboratory of the school, although it is said to have its roots in the facinal fight over the proposal to build a new school building. This retort sets over an eight ounce wood alcohol burner and has a capacity of only eight ounces itself. Reaching out from its top is a glass tube bent to the shape of a siphon. In the story which went the rounds about the "school still," this siphon was pictured as the coil so necessary in making the hootch.

For Scientific Purposes

This apparatus, Mr. Siefert contended and it has been proved to the satisfaction of Mr. Wendel, is used for purely scientific purposes. With it Mr. Siefert has demonstrated the principles of condensation, evaporation, vaporization, ebullition and distillation. It may have been noted in the class room that the principle involved in the distillation that occurs in the making of moonshine but it was purely incidental.

The story of the "school still" is believed to have arisen from a joking remark by one of the students. It fell on the farmer's ears and he believed it. In the Sunday school class at the German Evangelical church one Sunday this supposed school evil was the topic take nup, Mr. Wendel leading the lesson, it is said.

Butler Scouts Story

On the following day he reported his "discovery" to the town marshall, who in turn called County Attorney Butler. who informed the Meservey official that he undoubtedly was being "spoofed." He refused to order the arrest of Mr. Siefert as was asked by Mr. Wendel.

Mr. Siefert, learning of the tales that were being circulated, immediately retained the Mason City attorney and announced that uless a retraction were forthcoming from Mr. Wendel suit for $10,000 would be brought. The Meservey farmer was quick to respond to the warning. He came to Mason City with Mr. Siefert and made the apology printed here.

"The whole thing is a closed incident now," said Attorney Williams today. "While Mr. Siefert's friends looked upon the charges against him as preposterous his enemies were making capital of it. There is no juestion but what he was hurt by the absurd stories about him and doubtless he had good cause for action. Exoneration is all that he wanted, however, and Mr. Wendel's apology has furnished this."

Dist. No. 8, Ell Twp., two miles east of Klemme will give a program and pie supper Friday night, April 7. Ladies bring pie for two (a small size pie, or ½ of a large one will do.) Also bring your own forks Your pie will be sold at auction. Paste or write your name underneath. Gentlemen bring your money and the ladies. Mrs. C. W. Suckow, teacher. M30-A6c

Recall Early Days At Anniversary Celebration

EVENT RECALLS MANY OLD TIME EXPERIENCES OF PIONEER DAYS IN VICINITY

This Couple Among Klemme's First Settlers

Thirty-seven years ago on the 2nd day of April occured the marriage of Miss Henrietta Priebe to Mr. Fred Haupt in the old Ell Township Reform church; and to celebrate that memorable event of by gone days the four daughters of Mr. and Mrs. Fred Haupt planned a pleasant surprise on them last Sunday, April the 2nd. Mr. and Mrs. Haupt were entirely unaware of what was being planned for them ad they were indeed greatly surprised hen relatives and friends to the number of about fifty gathered at their home here in Klemme and announced that they had come to help the Haupt's celebrate their thirty-seventh wedding anniversary.

It was a great day for all present. the daughters had prepared a great wedding dinner which was served at noon. Rev. A. A. Depping, and family were preset and the Reverend gave a very nice talk. After the dinner. to which all done justice, the time was spent in a social way. Talking over of olden times was perhaps the chief topic but then there was also plenty of music and singing and especially enjoyable were the selections played on the piano by Miss Bertha Thorman, of Belmond. The day seemed to fly entirely too quick but it was a day that will long be remembered by Mr. and Mrs. Haupt, and will also be a pleasant remembrance to the many friends and relatives who were present.

In telling us about the big surprise anniversary Mr. Haupt also related to us many and interesting experiences he remembered from old days i this vicinity, a few of which we shall try to relate to our readers.

Many years ago when Mr. Haupt was a boy of about nine years old, heavy war clouds were hanging over Germany. Mr. Haupt's father was considered to be a well-to-da citizen of that country and conducted a shoe shop and as times went then he was enjoying a good business but he had some sons who were growing up and he didn't want them dran into the Germa army as so many other young me were being then and so he and his family came to this country when Fred was a boy of about ten years old to get away from the tyranny of European rulers and to come to a free land, and so Mr. Haupt grew to young man hood on the fertile soil of Iowa. He herded cattle in Avery township in 1876 and in 1878 he went to work for Jim Elder and worked for that gentleman for four years. He then got a job with Judge Brockway and worked for him one year. Fred then worked in the vicinity of Belmond for a short time until his marriage in 1885.

Mr. Haupt recalls that the railroad was built through here in the year 1884 and he was the first farmer to ship out wheat from this point. About the same time there was a great business of which Lew Lewis was the "boss," that is Lew conducted a hay station north of where this town now stands and the railroad run a siding out to the fields.

Fred also says he remembers the time when there were more houses right here in Klemme than there are at the present time—only they were not quite so modern and were built on a different plan—musk-rat houses they were as at that time this was a big swamp and one could easily shoot ducks from where the Times Printing office now stands. Indians? Sure, there were lots of them around in the old days.

Mr. Haupt promised that he would get Mr. Aug. Barz to help him tell us more of old pioneer days sometime and we could make a sort of historical sketch for the readers of the Times, so at some future date the editor of this paper plans to tell our readers more of those interesting old days as both Mr. Haupt and August Barz are old settlers here and they should be able to tell us some interesting tales.

Mr. Haupt says there is no place as good as the United States and the place he likes best is right here in this community and that he has always found the people to kind, true friends always.

The out of town guests who came to help Mr. and Mrs. Fred Haupt celebrate their thirty-seventh wedding anniversary were his oldest brother Alvin Haupt and family of Clarion, and Charlie Haupt and family of Belmond who reside on the old Haupt homestead; Grandma Papple f Williams, Iowa; Miss Bertha Thorman, of Belmond; besides many nearby relatives. Their four daughters all reside in this vicinity and are Edith who teaches school; (Bertha) Mrs. Elmer Schlei; (Alma) Mrs. Fred Neuhring; and (Mamie) Mrs. Herman Schuldt.

METHODIST EPISCOPAL CHURCH

Morning Worship at 10:00 A. M.
Sunday School at 11:00 A. M.
Evening Worship at 7:30 o'clock.

Chior practice on Thursday evening at 8:00 o'clock at the J. N. Day home.

Next Sunday is Palm Sunday and will be duly observed as Decision Day.

Services will be held in the church during passion week on Tuesday, Thursday and Friday evenings at 7:30 o'clock. Let us attend these meetings in a prayerful and meditative spirit.

Practice for the Easter program to be given during the Sunday school hour on Easter Day will be held on Wednesday and Saturday afternoon this week.

An improved attendance at all our services is to be noted and much appreciated by the pastor and congregation.

Let us all prepare ourselves thoughtfully and earnestly for the sacred Easter season, especially great thing from the Lord and Master of us all.

"Ask and it shall be given you, Seek and ye shall find, Knock and the door shall be opened."

"Pray without ceasing."

"Looking unto Jesus the Author and Finisher of our Faith."

Arthur B. Gedye, Pastor.

REFORMED CHURCH NOTES

Last Sunday immediately after the services the Confirmation Class was examined on the Heidelberg Catechism. Sunday the Class will have another examination on Doctrines, Bible and Churchc History. The Confirmation will take place in connection with the services on Good Friday.

Good Friday is one of the most important days that the Christian Church can observe. It is the day on which Jesus suffered and died that he might obtain glory for himself and faithful ones. We therefore expect a good attendance Friday.

A. A. Depping, Pastor.

INCREASE IN PHONE RENT AT IOWA FALLS

IOWA FALLS, April 5.—Manager W. E. Bryan, of the Northwestern Telephone Co., has just announced that effective May first, there will be an increase in the rentals of business, or commercial telephones, and for service rendered over what is known as the four-party lines. No change will be made in the charge for service of residence telephones, aside from these mentioned above. This will mean that the single party business phone will cost the user, $3.00 a month, and those on a two-party line $3 a month. The rentals for four-party residence phones will be $1.00 a month after May 1st. In his announcement, Manager Bryan stated that the revenue from the local exchange is insufficient to meet operating expense and pay a reasonable return on the money invested. Under the readjustments, the company will receive $103.75 each month additional revenue.

Irate Spouses Storm Court and Berate Judge—Governor Declares Provision Must Be Made for Separating Juries.

St. Paul, Minn.—What to do with mixed juries over night?

This question has started a furore in St. Paul following the story told by seven women and five men who were locked up for two nights while deliberating the fate of George Thoemke, accused of stealing an automobile, and finally found guilty.

Irate husbands of the women stormed the court and one of them was released from a charge of contempt of court by Judge Catlin because the court held that there were extenuating circumstances and that the objector was not in a rational frame of mind.

St. Paul citizens, including Governor Preus, sympathized with the angry husband and clubwomen clamored for better treatment of the women.

Not Even a Bit of Drapery.

The first night, according to the story told by Miss Grace Williams, the only unmarried woman on the jury, there wasn't even a curtain in the room the men and women had to use as sleeping quarters.

"We argued until late, and finally a man yawned and said something about going to bed," she said. "It was very embarrassing. We had to put out the lights and get ready for bed in the dark. It was inconvenient, but we did it.

"Every little while the bailiff would come in and say that there were five husbands outside the door who wanted to know how things were going. They were very angry.

"The second night we had a thin curtain between the men and the women. It was not much better."

After the first night one of the women told her husband how she had to undress in the same room with five strange men with the light showing in from the moon, it was stated. This husband went to Judge Catlin and, according to the judge, "used a full and unexpurgated vocabulary in describing his feelings."

The second night was described by Mrs. Josephine Brown, another member of the jury.

"The curtain was transparent and we had no protection, and the men all faced the wall, while some of us pulled sheets from the bed to protect the other women while they disrobed," she said. "We didn't sleep much, but that was mainly because one of the women talked all night. The men snored on peacefully."

Men First to Weaken.

Jailer Hart said the women were "better sports than the men," for it was one of the male members of the jury who first demanded segregation.

"It was an intolerable situation," said Governor Preus. "I certainly would not consent to my wife undergoing such an ordeal. This situation must not continue. Some provision must be made so that women jurors may have at least a little privacy."

The governor said that steps would be taken to see that men and women on juries are separated hereafter when it is necessary to lock them up overnight.

But hundreds of husbands here say this precaution will be unnecessary, for their wives are never going to serve on any jury.

HERE IS SOME BABY

Here is Miss Marguerite Struck of Milwaukee, Wis. She is only one year old, but she weighs 30 pounds and stands 32 inches in her stocking feet. Marguerite is the best ever—her mother says so.

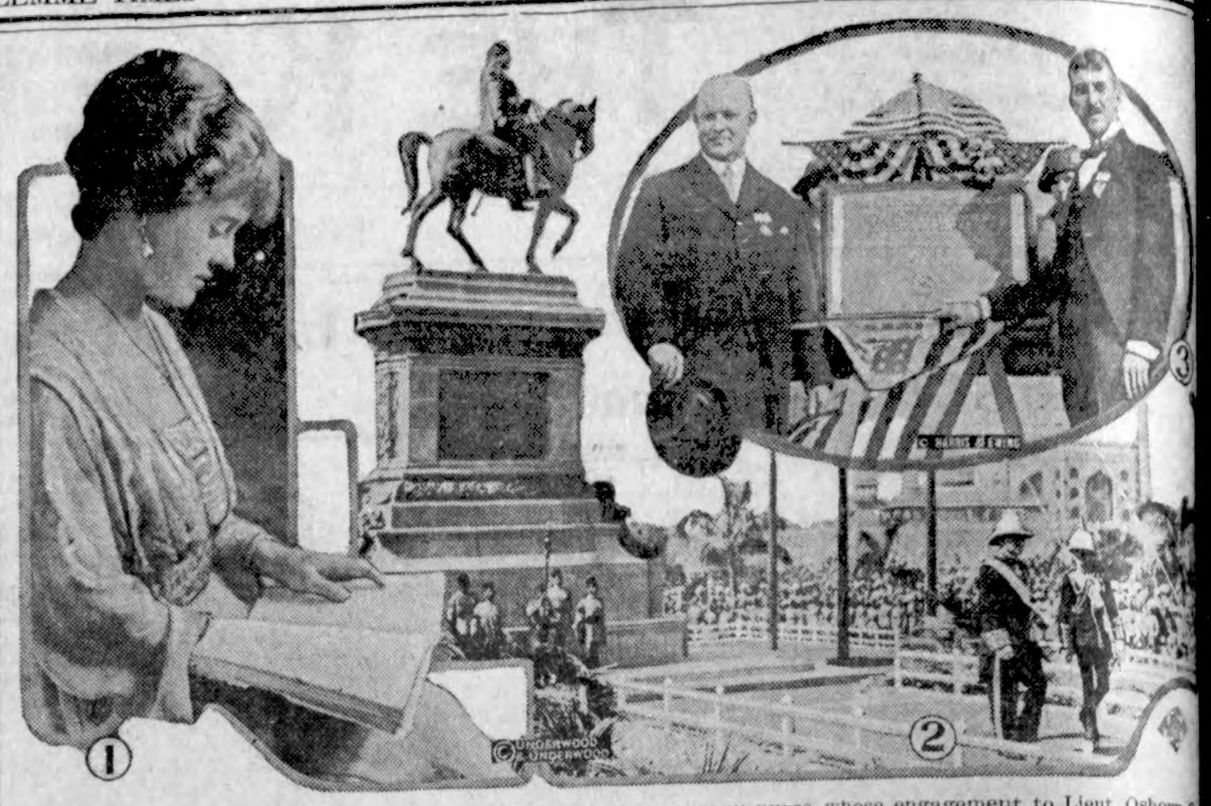
REACHES 114 DEGREES; LIVES

Girl's Return to Health After High Fever Described as First on Record.

Bristol, England.—The extraordinary figure of 114 degrees Fahrenheit was the recorded temperature of a girl here, who had the grip.

When first summoned to see the girl, the physician said he was astonished to find that his clinical thermometer recorded a temperature of 112 degrees. Thinking his thermometer was out of order, he requisitioned two others, only to find that they both recorded the same high point.

During the night the patient's temperature advanced two degrees. She has now recovered. Medical journals here do not record an instance of such temperature being followed by recovery.



1—Miss Katherine Thompson of Wilmington, Del., former army nurse, whose engagement to Lieut. Osborn C. Wood, second son of General Leonard Wood, is announced. 2—The Prince of Wales and Viceroy Lord Reading at unveiling of memorial to King Edward VII at Delhi. 3—Rotary International President C. C. McCullough and Secretary of the Navy Denby unveiling the Rotary memorial tablet at tomb of the Unknown Soldier in Arlington cemetery.

Back From Trip to Wonderland

Alice Bradley, Six Years Old, Member of Expedition Into Wilds of Belgian Congo.

HAS EXCITING ADVENTURES

Sees Lions and Other Inhabitants of Jungle Shot and Giant Gorillas Captured—Finds and Found by Pygmies.

New York.—Carl E. Akeley, big game hunter, returned on the Baltic from his fourth expedition to the Belgian Congo, bringing back five huge gorilla skins to be mounted and a wealth of new data for the American Museum of Natural History.

But this is of scientific interest in subordination to the chief figure in his party, who is six-year-old Alice Bradley, daughter of Mr. and Mrs. Herbert E. Bradley of Chicago. Mrs. Bradley is Mary Hastings Bradley, the novelist. While her parents and the others of the party gathered mere specimens and cold facts, Alice experienced a series of Alice-in-Wonderland adventures.

Finds and Found by Pygmies.

In the Congo belt, west of Nyanza Victoria, she saw the pygmy tribe of Africa, and they discovered her, the first white child they had ever seen. They considered her distinctly mature, however, for she was taller than the tallest member of the tribe.

"The chief," she could report with pride, "was very much surprised by my curls. He thought they came off."

So far as known, no white women had ever before been to the inner reaches of the Belgian Congo, where the trail of the expedition led. Alice, maintaining perfect health throughout the journeying, was reported by her nurse, Miss Priscilla Hall, to be an irrepressible source of constant apprehension.

She watched in spellbound delight while lions, known to most children only in the relative docility of the circus cage, were shot with other inhabitants of the jungle. Of the five gorilla trophies selected to be brought home, one stood 5 feet 8 inches in height. His chest measured nearly 5 feet and he weighed 360 pounds.

Soft About Gorillas.

Miss Martha Miller, Professor Akeley's secretary, also one of the party, seemed tender hearted about the gorillas, unless one caught the suspicious twinkle in her brown eyes.

"The so-called man eating gorillas," she said, "are really very tame creatures and I do not believe they would fight unless they were cornered and absolutely compelled to do so. It seemed cruel to shoot them."

Mrs. Bradley participated in the hunting and bagged two gorillas and several lions. Miss Miller likewise brought down a lion or two.

Professor Akeley, also noted as an inventor of the cement gun and the Akeley camera, set out on this latest crusade for science in August, 1921, for the American Museum of Natural History, where many of the specimens of his former trips are mounted, among them giant elephants, which he has also sculptured in clay. His specific purpose on this trip was to get gorilla specimens.

Lad Invents Tiny Wireless Outfit

Kenneth R. Hinman, who is only twelve years old, has invented a wireless receiving apparatus that fits neatly into a safety match box. With this instrument and a pair of ordinary receivers, the juvenile inventor is able to catch not only telegraph signals, but the regular broadcasting programs from stations 20 and 30 miles distant. The lad lives in Plainfield, N. J. Kenneth and his brother, both "scouts," show how the little outfit works when you are lost in the woods in the dark.

Will Seek to Reach North Pole by Plane

Christiania, Norway.—Two Norwegian aviators, Lieutenant Omdal and Sergeant Odd Dahl, will accompany Roald Amundsen when he starts north again from Seattle, next May and will make a dash for the North pole by airplane. They will carry a moving picture outfit and 30,000 feet of film.

Aged Father of Seventeen.

Star City, W. Va.—John W. Dysenberry of Star City, seventy years of age, has celebrated the birth of his seventeenth child. At the age of threescore and ten Dysenberry is in excellent physical condition and works eight hours each day as a carpenter. The seventeenth child was born the other day to his second wife, who is fifty years of age.

RADIOACTIVE RAY CURES DISEASE

Inventor Sees Wonderful Possibilities in New Discovery.

Radioactive Ray Can Cure Disease or Destroy Battleships or Cities at Will—Speediest Ray Yet Discovered.

San Francisco.—Fiction has again been made by fact if the claims of Edgar L. Hollingshead, Pasadena scientist and electrical engineer, hold good.

He announced here the discovery of a radioactive ray that can cure disease or destroy battleships or cities at will.

The new ray has far greater speed and penetrating power than any yet discovered, Hollingshead claims, and works miracles on all forms of matter.

Some of his remarkable claims are:

It increases or reduces weight of metals.

Penetrates 11½ inches of solid steel.

Makes rocks as transparent as water.

At its highest rate disintegrates the heaviest substance, so that it passes away into air.

Unlike radium, which radiates in all directions at one speed, the new ray can be controlled as to speed and direction.

The discovery, according to Hollingshead, has led to other startling scientific discoveries, including:

Force cannot have weight within itself.

The law of cohesion has a third and dominant factor—solar influence.

Gravitation is stronger in daytime than at night time because of the sun's influence.

This accounts, Hollingshead states, for clocks running faster at night than by day.

A man without a conscience is a man without principle.

NEWS REVIEW OF CURRENT EVENTS

Senate Ratifies Naval Limitation Treaty, Chief Fruit of the Conference.

OTHER PACTS ARE APPROVED

Efforts to Save Navy and Army From Dangerous Reductions—Great Coal Strike Begins—Lloyd George's Genoa Policy Before Commons for Approval.

By EDWARD W. PICKARD

HAVING made their losing fight against the Pacific four-power pact, the obstreperous minority in the senate ceased from troubling last week, and fell into line—all but Senator France of Maryland. The treaty on limitation of navies, chief work of the Washington conference, after an inconsequential debate, was ratified on Wednesday by a vote of 74 to 1. Mr. France defended his lonely negative vote by contending that the United States should continue building the largest navy in the world until all other nations had shown their willingness to abolish war totally. Of the other irreconcilables, Borah explained that he favored the treaty because it was a step toward the goal at which he had been aiming for many years, namely, complete disarmament, and that he believed this agreement was as much as the international conference was able to accomplish. Johnson of California did not disguise his dislike for the pact, especially its Pacific fortifications clause, but he voted for ratification on the assurance of the navy general board that the United States would not give up anything that is strategically vital. King of Utah, though accepting the treaty, thought it would have small effect in reducing naval expenditures, predicting that huge sums now would be spent on aircraft and submarines.

Immediately after the vote of ratification the senate took up the treaty prohibiting the use of poison gas and restricting the use of submarines in warfare and accepted it unanimously. Before casting his vote Senator Wadsworth of New York, chairman of the military affairs committee, expressed the opinion that in the next war this treaty would not be worth the paper it was written on.

"For my own part," said Senator Wadsworth, "I shall be very much discouraged if the United States army should stop trying to perfect gas masks because of this treaty. We don't dare stop. And the only way we can perfect gas masks is to test them with the kind of gases which we may have to combat. We might as well look the facts in the face."

Before the week closed, the remaining treaties, the nine-power pact relating to China and the one dealing with the Chinese tariff, were put through, and thus the senate completed its part in making the great Washington conference a success. Naturally, and with reason, the Democrats claim a share in this accomplishment, especially asserting that former President Wilson must be given much credit for arousing public opinion in favor of naval limitation. It is evident, however, that the Republicans will make large use of the conference and its results in this year's congressional campaign.

There is every reason to believe the treaties will be speedily ratified by the other powers party to them. Indeed, not one of them is in a position to afford to hold back from full agreement.

ALTHOUGH the naval treaty places our navy on a level with that of Great Britain, it will in fact be scarcely equal to that of Japan if the naval appropriations subcommittee of the house has its way. That body, under the leadership of Representative Pat Kelley of Michigan, is determined to cut the naval enlisted personnel to 65,000, which is 25,000 less than the number necessary according to the estimates of the department's experts, and which would force out of commission many craft that are positively needed. It is not likely, however, that this crippling program will succeed, because the "big navy" men of the house are prepared to combat it, the majority leaders in the senate declare they will not stand for it, and President Harding probably would veto the appropriation bill if it came up to him in that shape. When the bill is reported to the house this week, according to the plan, Rogers of Massachusetts will offer an amendment placing the minimum strength at 96,000. If this fails, as it likely will, McArthur of Oregon will propose 86,000 as the minimum.

NO LESS than the navy men, the army men are exercised over the tendency toward what they believe to be false and dangerous economy shown by many members of congress. The house passed an army appropriation bill which limits the army to 115,000 enlisted men and 11,0000 officers. General Pershing, chief of staff, and General Harbord, deputy chief, asserted such a reduction "would introduce an unwarranted element of danger in our plan of national defense" and that an army of 150,000 men and 12,000 officers is absolutely essential to the nation's needs at this time. At first the bill carried a provision limiting the President's right to determine the size of garrisons in the Hawaiian islands and the Panama Canal Zone. This was eliminated when Anthony of Kansas said he had the promise of the War department to reduce those garrisons, but Secretary Weeks indignantly declared that he not only had made no such promise but had no intention of making the reductions. General Pershing says the Hawaii and Panama garrisons cannot be cut down without violating the soundest principles of security,

AS PASSED by the house, the army bill appropriates about $288,000,000 for the expenses of the War department, but the representatives made their claim for genuine economy look decidedly foolish by the adoption of an amendment increasing by $15,000,000 the amount carried as a lump sum toward continuation of work the coming fiscal year on river and harbor projects.

The budget bureau and the appropriations committee of the house had recommended an appropriation of $27,000,000 for this purpose, but the "pork barrel" forces, under the generalship of Mann of Illinois, insisted upon the larger sum, and had their way despite the earnest efforts of Mondell of Wyoming, Burton of Ohio and others. President Harding was somewhat disturbed by this open defiance of the budget system, for he believes in the budget and intends that it shall be given a fair trial.

AT MIDNIGHT Friday operations ceased in all the unionized bituminous and anthracite coal mines of the country, 595,000 miners laying down their tools. All efforts to prevent the great strike were futile. According to some of the union leaders, the walkout is likely to last about sixty days. During that time, presumably, both sides will formulate their demands and present their cases, and it may be that these will result in the negotiation of new contracts. The operators insist that wages must come down in correspondence with the decline in the cost of living, but they have not yet revealed what percentage of reduction they will demand. The miners, in reply, say that the stagnation in the coal industry is due to wasteful methods of production, excessive profits, violation of the laws of supply and demand in control of markets and prices, and that costs of living in the mine areas have advanced while wages remained stationary.

In some regions, as Pittsburgh, southern Ohio and Kanawha, Va., the operators have posted notices of wage reductions and hope to be able to run their mines with nonunion labor. In Illinois the miners, though not in entire sympathy with the strike, stuck by the international, and the Indiana men did the same. Probably in both these states separate state agreements could have been negotiated, but this was forbidden by the international. The Illinois mines cannot be operated by pick-up labor because of state law which requires that no digger may be employed unless he show at least two years' experience under ground. What Governor Allen and the Industrial court will do in Kansas is arousing general interest.

If the promises of the union heads are kept, there will be no violence in connection with the strike. Nor will the mines suffer physically, for enough men will be permitted to stay in the mines to keep them from being flooded and otherwise damaged.

NIKOLAI LENIN, premier of soviet Russia, is again dead, according to reports, but, as on previous occasions, it is believed that the rumor is "greatly exaggerated." Probably it is true that he is quite ill, and it is quite likely that he will be able to attend the Genoa conference. However, the soviet delegates to that confab will luxuriously on their way to Italy by way of Riga and Berlin, rejoicing in the fact that at last their government is to have a measure of recognition from the capitalistic and bourgeois governments they hate so intensely. They are hopeful of obtaining financial and commercial assistance for the task of definitely establishing the communist regime in Russia, but Lenin recently declared communism there had reached the limit of yielding to capitalism and was now in a position again to advance. But he told the communists they must cease their dreaming and get to work.

PREMIER LLOYD GEORGE'S policy concerning the Genoa conference was to be submitted to the house of commons this week for approval or rejection, and on the result depended his retention of office. Moreover, it was said that the small majority that was assured him on a vote of confidence would not satisfy him. Unless he was given a majority of at least 300, asserted his friends, he would resign. The resolution prepared for the house to act upon read:

"Resolved, That this house approves the resolutions passed by the supreme council at Cannes as a basis for the Genoa conference and will support his majesty's government in endeavoring to give effect to them."

Already Mr. Lloyd George had quelled the opposition in his own party by assurance that he does not intend immediate or unconditional recognition of the soviet government of Russia.

APPRECIATING the dangerous state of angry unrest throughout the Mohammedan world, the failure of the Greeks to defeat the Kemalists in Asia Minor and other conditions, the allies' Near East conference in Paris decided that the Turkish empire should be restored, with restrictions. According to the plan adopted, the Turks obtain Constantinople, a sovereignty throughout Asia Minor, including Smyrna and Thrace with Rodosto. The Greeks retain Adrianople and a buffer corridor reaching to the Black sea, fencing off the Bulgarians from the Turks. Abandonment of the international regime of the Golden Horn and the restoration of the sultan's power is safeguarded through the British insistence that Gallipoli be left to the Greeks, Dardanelles demilitarized and the allied military inspectors oversee the razing of all fortifications.

While the Greeks are not at all satisfied with this arrangement, all the nations except the Venizelists are supporting the Gounaris cabinet in accepting it. The Turks, however, are far from pleased and have not formally agreed to the proposals. Nor has it they accepted the recommendations of the allied foreign ministers for a settlement of their differences with the Greeks. For this latter the French are blamed by British officials. They are warning the Greeks much as did Lord Byron long ago when he wrote:

"* * * Turkish force and Latin fraud,
"Would break your shield, however broad."

OPTIMISTIC folk base renewed hope for a unified Ireland on the peace agreement signed by representatives of the Free State and Ulster governments. It is not apparent how this will operate to pacify the republicans, whose latest exploit was the destruction of the plant of the Freeman's Journal in Dublin

THAT ANGEL BOY

He Sang Like an Angel, But His Trip to the Country Will Be Long Remembered.

By ELEANOR PORTER

Author of "Pollyanna," "Just David," Etc.

M SO glad you consented to stay
er until Monday, auntie, for now
can hear our famous boy choir,"
had said at the breakfast table
Sunday morning.
umph! I've heard of 'em," Ann
erby had returned crisply, "but I
r took much stock in 'em. A
—made o' boys—just as if music
come from yellin', hootin' boys!"
hour later at St. Mark's, the
y swelling music of the organ was
ing curious little thrills tingling
liss Wetherby's finger tips. Then
ly in the distance sounded the
sweet notes of the processional.
hel stirred slightly and threw a
ning glance at her aunt. The
an met the look unflinchingly.
Them ain't no boys!" she whis-
d tartly.
earer and nearer swelled the chor-
until the leaders reached the open
s. Miss Wetherby gave one look
he white-robed singers, then she
hed over and clutched Ethel's
ers.
They be!—and in their nighties,
" she added in a horrified whis-

ne of the boys had a solo in the
em that morning, and as the
r, pure soprano rose higher and
er, Miss Wetherby gazed in undis-
ed awe at the young singer. She
d the soulful eyes uplifted de-
ly, and the broad forehead
ned in clustering brown curls. To
Wetherby it was the face of an
l.
t dinner that day Miss Wetherby
ned that the soloist was "Bobby
yer." She also learned that he
one of Ethel's "fresh-air" mission
ldren, and that, as yet, there was
place for him to go for a vacation.
That angel child with the heavenly
—and no one to take him in?"
Wetherby be'thought herself of
own airy rooms and flowering
dows, and snapped her lips to-
er with sudden determination.
'll take him!" she announced
ely, and went home the next day
prepare for her expected guest.
arly in the morning of the first
day in July, Miss Wetherby added
finishing touches to the dainty
e bedroom upstairs.
Dear little soul—I hope he'll like
she murmured.
n the table in the corner were
n books, the great red-and-gold
ily Bible, and a "Baxter's Saints'
"—the only reading matter suited
Miss Wetherby's conception of the
d behind those soulful orbs up-
ed in devout adoration.

ion Tommy Green came over to
e his pet dog, Rover, for Miss
herby's "fresh-air" boy to play
.
low, Thomas Green," remonstrated
severely, "you can take that dir-
og right home. I won't have him
nd. Besides, Robert Sawyer ain't
kind of a boy you be. He don't
fur sech things—I know he
't."
alf an hour later, Ann Wetherby,
heart thumping loudly against
ribs, anxiously scanned the pas-
gers as they alighted at Slocum-
station. There were not many—
old man, two girls, three or four
men, and a small, dirty boy with a
er dog and a brown paper parcel
his arms.
e had not come!
iss Wetherby held her breath
looked furtively at the small
There was nothing familiar in
appearance, she was thankful to

ebody else. Still, perhaps he
ht know something about her own
el boy—she would ask.
nn advanced warily, with a disap-
ving eye on the dog.
Little boy, can you tell me why
ert Sawyer didn't come?" she
ed severely.
he result of her cautious question
oncerted her not a little. The boy
pped the dog and bundle to the
form, threw his hat in the air,
capered about in wild glee.
Hi, there, Bones! We're all right!
ly—but I thought we were side-
ked, fur sure!"
Miss Wetherby sank in limp dismay
a box of freight near by—the bared
d disclosed the clustering brown
ls and broad forehead, and the
s uplifted to the whirling hat com-
ted the tell-tale picture.
The urchin caught the hat deftly
the back of his head, and pranced
to Ann with his hands in his
kets.
Gee-whiz! marm—but I thought
'd flunked fur sure. I reckoned me
Bones was barkin' up the wrong
e this time. It looked as if we'd
e to a jumpin'-off place, an' you'd
en us the slip. I'm Bob, myself,
see, an' I've come all right!"
Are you Robert Sawyer?" she
ped.
Jest ye hear that, Bones!" laughed
boy shrilly, capering round and
nd the small dog again. "I's 'Ro-
'—now—do ye hear?" Then he
rled back to his position in front
Miss Wetherby, and made a low
. "Robert Sawyer, at yer service,"
announced in mock pomposity.
, I say," he added with a quick change of position, "yer'd better call me 'Bob'; I ain't uster nothin' else. I'd fly off the handle quicker'n no time, puttin' on airs like that."

Miss Wetherby's back straightened. She made a desperate attempt to regain her usual stern self-possession.

"I shall call ye 'Robert,' boy. I don't like—er—that other name."

There was a prolonged stare and a low whistle from the boy. Then he turned to pick up his bundle.

"Come on, Bones, stir yer stumps; lively, now! This 'ere lady's a-goin' ter take us ter her shebang ter stay mos' two weeks. Gee-whiz! Bones, ain't this great!" And with one bound he was off the platform and turning a series of somersaults on the soft grass followed by the skinny, mangy dog which was barking itself nearly wild with joy.

"You c'n foller me," she said sternly, without turning her head toward the culprits on the grass.

Bobby trotted alongside of Miss Wetherby, meekly followed by the

"Robert, You Ain't a'Going Home Today."

dog. Soon the boy gave his trousers an awkward hitch and glanced sideways up at the woman.

"Oh, I say, marm, I think it's bully of yer ter let me an' Bones come," he began sheepishly. "It looked 's if our case'd hang fire till the crack o' doom; there wa'n't no one ter have us. When Miss Ethel told me her aunt'd take us, it jest struck me all of a heap. I tell ye, me an' Bones made tracks fur Slocumville 'bout's soon as they'd let us."

"I hain't no doubt of it!" retorted Ann, looking back hopelessly at the dog.

"Ye see," continued the boy confidentially, "there ain't ev'ry one what likes boys, an'—hi, there!—go it, Bones!" he suddenly shrieked, and scampered wildly after the dog which had dashed into the bushes by the side of the road.

Ann did not see her young charge again until she had been home half an hour.

"Jiminy Christmas!" he exclaimed, "I begun ter think I'd lost ye, but I remembered yer last name was the same's Miss Ethel,', an' a boy—Tommy Green, around the corner—he told me where ye lived. And, oh, I say, me an' Bones are a-goin' off with him an' Rover after I've had somethin' ter eat—'t is mos' grub time, ain't it?" he added anxiously.

Ann sighed in a discouraged way.

"Yes, I s'pose 't is. I left some beans a-bakin', and dinner'll be ready pretty quick. You can come upstairs with me, Robert, an' I'll show ye where yer goin' ter sleep," she finished, with a sinking heart, as she thought of those ruffled pillow shams.

Bobby followed Miss Wetherby into the dainty chamber. He gave one look, and puckered up his lips into a long, low whistle.

"Well, I'll be flabbergasted! Oh, I say, now, ye don't expect me ter stay in all this fuss an' fixin's!" he exclaimed ruefully.

"It—it is the room I calculated fur ye," said Ann, with almost a choke in her voice.

The boy looked up quickly and something rose within him that he did not quite understand.

"Oh, well, ye know, it's slick as a whistle an' all that, but I ain't uster havin' it laid on so thick. I ain't no great shakes, ye know, but I'll walk the chalk all right this time."

Miss Wetherby did not see much of her guest that afternoon; he went away immediately after dinner and did not return until supper time.

After supper he went at once to his room; but it was not until Miss Wetherby ceased to hear the patter of his feet on the floor above that she leaned back in her chair with a sigh of relief.

When Ann went upstairs to make the bed that Tuesday morning, the sight that met her eyes struck terror to her heart. The bedclothes were scattered in wild confusion half over the room. The washbowl, with two long singing books across it, she discovered to her horror, was serving as a prison for a small green snake. The Bible and the remaining hymn books, topped by "Baxter's Saints' Rest," lay in a suspicious-looking pile on the floor. Under these Miss Wetherby did not look. After her experience with the snake and the wash bowl, her nerves were not strong enough. She recoiled in dismay, also, from the sight of two yellow, paper-covered books on the table, flaunting shamelessly the titles: "Jack the Pirate of Red Island," and "Haunted by a Headless Ghost."

Ann Wetherby never forgot that Fourth of July, nor for that matter, the days that immediately followed. She went about with both ears stuffed with cotton, and eyes that were ever on the alert for all manner of creeping, crawling things in which Bobby's soul delighted.

The boy, reinforced by the children of the entire neighborhood, held a circus in Miss Wetherby's woodshed, and instituted a Wild Indian camp in her attic. The poor woman was quite powerless, and remonstrated all in vain. The boy was so cheerfully good-tempered under her sharpest words that the victory was easily his.

But on Saturday when Miss Wetherby, returning from a neighbor's, found two cats, four dogs, and two toads tied to her parlor chairs, together with three cages containing respectively a canary, a parrot, and a squirrel (collected from obliging households), she rebelled in earnest and summoned Bobby to her side.

"Robert, I've stood all I'm a-goin' ter. You've got to go home Monday. Do you hear?"

"Oh, come off, Miss Wetherby, 'tain't only a menag'ry, an' you don't use the room none."

Miss Wetherby's mouth worked convulsively.

"Robert!" she gasped, as soon as she could find her voice, "I never, never heard of such dreadful goin's-on! You certainly can't stay here no longer," she continued sternly.

An hour later, Miss Wetherby had a caller. It was the chorister of her church choir. The man sat down gingerly on one of the slippery haircloth chairs, and proceeded at once to state his business.

"I understand, Miss Wetherby, that you have an—er—young singer with you."

Miss Wetherby choked, and stammered "Yes."

"He sings—er—very well, doesn't he?"

The woman was still more visibly embarrassed.

"I—I don't know," she murmured; then in stronger tones, "The one that looked like him did."

"Are there two?" he asked in stupid amazement.

Miss Wetherby laughed uneasily, then she sighed.

"Well, ter tell the truth, Mr. Wiggins, I s-pose there ain't; but sometimes I think there must be. I'll send Robert down ter the rehearsal tonight, and you can see what ye can do with him." And with this Mr. Wiggins was forced to be content.

Bobby sang on Sunday. The little church was full to the doors. Bobby was already famous in the village. The witchery of the glorious voice entered again into the woman's soul, and indeed, sent the entire congregation home in an awed silence that was the height of admiring homage.

At breakfast time Monday morning, Bobby came downstairs with his brown paper parcel under his arm. Ann glanced at his woeful face, then went out into the kitchen and slammed the oven door sharply.

"Well, marm, I've had a bully time—sure's a gun," said the boy wistfully, following her.

"Robert," she began with assumed sternness, trying to hide her depth of feeling, "you ain't a-goin' home ter-day—now mind what I say! Take them things upstairs. Quick—breakfast's all ready!"

A great light transfigured Bobby's face. He tossed his bundle into a corner and fell upon Miss Wetherby with a bearlike hug.

"Gee-whiz! marm—but yer a brick! An' I'll run yer errands an' split yer wood, an' I won't take no dogs an' cats in the parlor, an' I'll do ev'rythin' —ev'rythin' ye want me to! Oh, golly —golly!—I'm goin' ter stay—I'm goin' ter stay—I'm goin' ter stay!" And Bobby danced out of the house into the yard there to turn somersault after somersault in hilarious glee.

A queer choking feeling came into Ann Wetherby's throat. She seemed still to feel the loving clasp of those small young arms.

And Bobby stayed—not only Monday, but through four other long days —days which he filled to the brim with fun and frolic and joyous shouts as before—and yet with a change.

The shouts were less shrill and the yells less prolonged when Bobby was near the house.

And when the four long days were over and Saturday came, a note—and not Bobby—was sent to the city. The note was addressed to "Miss Ethel Wetherby," and this is what Ethel's amazed eyes read:

My Dear Niece—You can tell that singer man of Robert's that he is not going back any more. He is going to live with me and go to school next winter. I am going to adopt him for my very own. His father and mother are dead—he said so.

I must close now, for Robert is hungry, and wants his dinner. Love to all.

ANN WETHERBY.

IN NEW LINGERIE

Clumsy, Starchy Cambrics Only Memories of the Past.

Undergarments Have Grown More Sheer—Matching to Shade of Gown Is Latest Whim.

Lingerie of crepes de chine and georgettes has wiped the sisterhood of the red flannels off the map. For no article in feminine apparel has undergone the rapid change in recent years as has the undergarment. From clumsy, beruffed, starchy cambrics they have grown more sheer each season until now one could easily hold a week-end's supply in the palm of one's hand. In fact, one New York house which specializes in lingerie has a tiny, patent leather suitcase about eight inches long called "le petit trousseau," which holds a nightgown, undervest and a combination set for the bride. Imagine a bride of a few years back trying to crowd her nighty into it!

The rise of the crepe de chine and georgette in the making of undergarments has been interesting to watch. How shyly we put aside our white linens and nainsooks as we gently stepped into our first pink crepe de chines! Pinks have given way to more vivid colors. Rather venturesome colors of former days are now cast aside as passe.

Matching underwear to the shades of one's gown is fashion's latest whim and no shade can be too colorful for the lingerie of this season. Hose of gray fade into bloomers and petticoats of the same tone. For the navy blue costumes there are lovely shades of lavenders and purples.

The envelope chemise seeems to have been discarded for the present and the chemise with bloomers or step-in drawers is the favorite sort of lingerie for just now. This combination is extremely practical, for the chemise can be made long enough to take the place of a petticoat or short enough to be worn with the heavier gowns and suits. And as all gowns are made on straight body-fitting lines, these garments do away with all unnecessary waistbands. These chemises are all made with the short empire yokes with straps over the shoulders; the straps are made of the same material as the garment rather than of ribbon. They are made in gold and silver cloths to match the evening gowns as well as in the practical black.

Most of the American made lingerie is made of crepe de chine, georgette or radium silk. From Paris we have the triple voile which closely resembles chiffon, but has body enough to give it wearing qualities. Another imported material is printed linen in colors, the printing being placed as a border in a black silhouette design.

A REGULAR "PUSS IN BOOTS"

This winsome outfit is donned by a prominent "movie" star in her modified Russian boots. The dress, her own creation, is of tan jersey, with embroidered silk dots.

ORGANDIE HELPS MAKE HAT

Organdie makes the flowers and grapes that bloom so conspicuously on this charming picture hat. The colors used are orchid and green.

THE CAPE COAT FOR SPRING

Garment May Be Developed Effectively in One of the Soft Lightweight Velours Fabrics.

Capes of every type are sponsored for early spring. The cape coat is one of the most highly favored types. It appears in sports lines as well as in regulation wraps. It may be developed effectively in one of the soft lightweight velours fabrics, with the cape lined in crepe de chine or other silk in contracting color.

There is a very wide fabric range. The color listing is equally generous. For sports high shades such as jockey green, tomato red and dahlia are popular, while for the regulation wraps the staple shades such as browns, tan, navy and several gray tones lead.

Some of the wraps show wide sleeves, others are sleeveless, and a universally aproved feature is the low waist line. Sometimes a new slightly bloused effect is featured, and again the low waist line is indicated merely by the placing of the belt or girdle.

Small Boy's Coat.

For the small boy's spring overcoat covert cloth is to be a popular fabric. One coat recently seen was a mannish style, plain except for two bias pieces stitched down the back, one at about the shoulder on either side. The straps were about an inch wide. The coat had tailored collar and revers and buttoned double-breasted fashion in front. The regulation navy cheviots will be smart also, and, no matter what the fabric or color, a hat to match is an excellent recommendation. In addition to the many plain fabrics approved for coats for boys, some smart little plaid velours are being featured.

LININGS COME READY-MADE

Convenience Offers Encouragement to Many Women to Construct Their Dresses at Home.

That the jobber will be a more valuable outlet for wash goods than the cutter-up is the contention of a professional shopper, who bases this theory on the growing trend toward home dressmaking. The observations of this shopper are that women are giving more attention to home dressmaking than ever—and that indications for the coming spring and summer season point to an increase of this vogue.

There are several reasons given for the greater interest in home dressmaking. In the first place, the styles are simple. Secondly, many of the department stores are giving much attention to home dressmaking. Practically all the large retail stores in New York now have regular dressmaking classes for amateurs. These are taught by professionals. The present method is for a woman to go to the pattern department. Here she is measured by saleswomen, in order to get the correct size. The cost of the pattern depends upon the style of the garment, ranging from 35 cents up to about $1.50. Having the correct size pattern, it really is not necessary for a woman to have much fitting for the garment she is to make.

However, figuring extremes—a woman buys her material—and attends one of the dressmaking classes in a department store. In one lesson, she can cut the material; and, in the second lesson, she can have it all put together—and then fitted in a third lesson.

Amateurs do not like to bother with linings, hooks and eyes, etc. But this is no longer necessary today, because one can buy ready-made linings, with all of the required attachments—and it is a simple matter to sew the lining into the dress.

Based on observations in several of the large retail stores, women are paying much more attention to cottons than to silks.

Season's Top Coats.

The wing or cape sleeve is featured in a good many of the season's topcoats. One smart model, made of plaid wool material in a heavy weave, had sleeves cut to flare from shoulder to lower edge and much longer than the arm. These sleeves were seamed together on the under arm to wrist length and below this they fell away from the arm to form a decided cape. The coat was full length, belted and finished at the front with a Tuxedo revers.

To Clean White Wool Jersey.

To clean a white wool jersey the following method is splendid: Buy a small quantity of calcined magnesia from your druggist and mix it with water till it is of the thickness of cream. Apply this to the jersey with a clean rag, and let it remain on for a couple of days. Then brush out thoroughly and the jersey should be quite clean and fresh.

Footwear Styles.

Strap shoes and slippers are to continue popular for spring and summer and there is an increasing leaning to sensible, low heel models for general wear.

Home Town Helps

ALL INTERESTED IN ZONING

Matter in Which Every Citizen and Property Owner Is Concerned, for Many Reasons.

Zoning, which has proved advantageous for a number of American communities, notably, it is said, for the city of New York, has lately been proposed for other towns, large and small, of the United States. A constitutional movement, zoning seems to seek that equipoise of relations between the people and the state, between one group of citizens and another, and between one individual and another which the growth of industry has disturbed. Primarily a land question, zoning is declared to make for stability of investment value to owners, and stability of tax values to the town.

More intimately, as described in a pamphlet issued by the Cambridge (Mass.) planning board, Prof. William F. Harris, former chairman, zoning is a question of a man's right to be protected in the occupancy of the place where he lives or where he conducts his work. Particularly, it is a question of his being able to enter his premises without having to stumble over obstructions put in his way by neighboring proprietors, to breathe the air of his garden without annoyance from the fumes of mill chimneys, and to look out of the windows of his house without having unsightly objects imposed on his view.

SELECTING SITE FOR HOME

Prospective Builder Should Remember That Value of the Land Is Highly Important Point.

After it has been decided that a certain site meets the requirements reasonably as to location, the next consideration is that of cost. The cost of an article, whether it be real estate or merchandise, is relative. A piece of land, the price of which appears to be very fair for its location, may increase the cost of building to such an extent that it is in the end expensive, and had this been foreseen would have prevented its purchase. On the other hand, the reverse is often true; the natural characteristics may be such that the construction is facilitated, thus saving to a greater or lesser degree the excess on the initial cost of the land, writes Gordon Robb in the House Beautiful. It is difficult to estimate with any degree of accuracy just how much can be gained or lost, but the following rule is a good one to follow. It is a generally accepted theory that the cost of the land should be from 20 to 25 per cent of that of the house. The investment is safer when the land bears the higher proportion. It is comparatively easier to dispose of property and the banks will lend money more readily on a home-building project when the land has "value."

The City and Its Builders.

The picture once painted or the poem once sung, it stands henceforth by itself; the artist can do no more for it. It must live or die without further help from him. But the city is never thus entirely separated from us, its builders. It remains tied to us by the visible cord of nourishing passions. It grows with us or it dies with us. It is in a more real and personal sense a part of us, as we are of it. It becomes then the reflex of the lives and aspirations of the people who dwell in it. So that a city—its streets, its highways, its buildings, its public places, as well as its business and life—is an embodiment of ourselves. It is this living spirit that may hearten and inspire us; that may delight and enchant us, and that may also break and destroy us.—Temple Scott.

Select Shrubs.

Now is the time to select those shrubs that you are going to set out around the house and around the borders of the lawn in the spring. Just allow your imagination to work a little and remember how the premises looked last summer and how the appearance could be improved. Then get a nursery catalog and make your selection of plants.—Farm Life.

Fordville.

Henry Ford says he will build a city 75 miles long in the Muscle Shoals region. It will be a chain of small towns.

Ford is looking ahead 20 years, when factories will get out of the cities so that workers will not altogether lose that great joy of life—contact with the open country.

Size doesn't make a town.

The best American city is the village.—Chicago Evening Post.

Chinese Tongs.

Chinese tongs are societies of many kinds. Some are composed of the men of a province, much like state societies; others are fraternal. In the early days of Chinese on the Pacific coast Chinese who were not members of strong families, or clans, organized a tong to protect themselves against the aggressions and impositions of the four families. Later there were many tongs and Chinese tongs were organized as easily and readily as any fraternal society of white men.

Dressmaking

Three ladies are busy in this department these days, so that all the new dresses may be completed by Easter

STERLING

Mason City ***Iowa***

FIRST METHODIST CHURCH

Services as follows:

Morning sermon at 10:00 o'clock.

Evening sermon at 8:00 o'clock.

Sabbath school at 11:00 A. M.

Epworth League at 7:30 P. M.

Prayer service Thursday evening at 7:30 o'clock at the Parsonage.

Sunday school board meeting on Friday evening at the church.

Our Sunday school was well attended last Sunday and we had one class, the little girls' class that won the "Star" for full attendance. This is good work; let us keep it up and not be satisfied with anything less than 100 per cent in attendance. We have the promise of several classes to try for the 100 per cet honors on next Sunday.

Do not forget we are preparing for a splendid Easter Program.

Our records show that our attendance during this past quarter is considerable better than a year ago, but our collections have not quite kept pace with that of a year ago.

Last Friday evening the Loyal Workers Class was royally entertained at the home of Mr. and Mrs. F. Gruetzmacher. The guests were received at the door by a representative servant dressed in an April Fool garment, reminding the arriving guests that something unusual might be expected. but after seeking a safe entrance they were crowned with a cap that gave each one to understand humbleness and their proper station in life, and after this procedure were allowed to mix with their fellow guests. The ladies were certainly entitled to credit for the selection of games and other amusements.

The lunch was very appropriately served, and this also had the touch of April Fool as cake and pickles were the first thing served on the menu, followed by sandwiches and coffee and then was topped off with a finish of nuts and candy. The nuts held a surprise for all and the canyd was some joke. The writer was one who got his share of both nuts and candy and unless one forgot the April Fool part of it he might have easily thought that our social committee was somewhat unbalanced, but it was all in the evening's fun and a royal good time was enjoyed by all.

Next Sunday is Palm Sunday. May we have a full house in both morning and evening meetings. Next week beig Passion Week, we will have services on Thursday and Friday evenings, beginning at 8:00 o'clock.

All who are ot elsewhere obligated, are most heartily welcomed to worship with us.

—W. C. Bergmann, Pastor.

Epworth League News

The Epworth League Literary program two weeks ago (March 26) was enjoyed by a very large number of people. The attendance on that evening was greater than it has been at any meeting since Christmas. Those who were present certainly deserve to be commended for the interest which they are taking in the Epworth League. We also wish to take this opportunity to thank all those who took part in the program for their splendid wrk.

Mrs. R. N. Reuber was to have led the meeting on April 2nd, but owing to the fact that she no longer resides here, Mr. George Gruetzmacher kindly consented to fill the vacancy.

Miss Emma Sampson is the leader for April 9. In addition to the discussion of the topic, some special numbers are being planned. Please bear in mind that the meeting begins at 7:30 instead of seven o'clock.

It was suggested sometime ago that we close the Contest on April 9, but the majority are in favor of continuing it for the full length of time, as it was originally announced. We feel that this is the only fair way to conduct it. Accordingly, the contest will continue through the month of April. as it was planned. We believe that this is no more than fair to both sides. Now, as to the score. Including the score for April 26, the Pinks had earned 235 points and the Purples had earned 252 points. On Sunday evening, April 2, the Pinks added 47 to their former score, and the Purples added 70. As a result, the total score now looks like this:

Pink.....282 points.

Purple.....322 points.

At first sight, it appears that the Purples have a large lead; but remember that great things are sometimes accomplished in a short time.

Let's see what we can do with the score on Sunday evening. Don't forget—7:30.

Entertainment

The Odd Fellow and Rebecca Lodges of Klemme will entertain the public with a

COUNCIL PROCEEDINGS

Klemme, Iowa,
March 27, 1922.

Regular meeting of the Town Council of Klemme. Iowa, held in Mayor Wenck's office on March 27, 1922.

Members present: Wm. Smith, C. W. Wiles, Wm. Bachman, A. D. Gimer.

Meeting called to order by Mayor Wenck.

Motion made and seconded that the following bills be allowed:

George M. Bechlei & Co., interest on $6,000 Water Bond $180.25

C. G. Waterman, Treasurerer Salary $20.00

Moved and seconded to adjourn.

F. J. WENCK, Mayor.

J. N. Day, Clerk.

TO OUR PATRONS

"We are now in the midst of a coal strike which may last several months, and to protect our customers and insure service we have stored about three thousand tons of coal at Iowa Falls, which will assure service for at least 4 months.

This coal cost us about $17,000 and the extra cost of handling it twice, including the losses due to slacking of the coal on account of exposure to the weather will amount to at least $1.00 per ton or $3,000.-00. There is no reduction in the cost of coal to us. We have been buying under contract made last September, and the price has been less than the present open market prices.

We anticipate that we will get cheaper coal after the strike is over due to adjustment of the miners wages and reduction in freight rates and we are willing to anticipate these reductions and give our customers the benefit of them, and we are doing this by making a reduction in our lighting rates.

IOWA FALLS ELECTRIC CO."

Cliff Swartz went to Mason City yesterday morning for a visit with his wife who is at a Mason City hospital recovering from an operation.

Plan Your Tiling Now

The next few weeks would be a good time to put in the few needed tile so as to get the use of that little patch of low land which is unfit for cultivation.

Don't take a chance on a dry year—there are sure to be times before the crop matures that these tile will be needed to save the crop.

We can't tell what the weatheman has in store for us.

We have a complete stock of tile from—

4 inch ..... **at $33.00**

5 inch ..... **at $43.00**

6 inch ..... **at $54.00**

7 inch ..... **at $64.00**

8 inch ..... **at $85.00**

10 inch ..... **at $150.00**

12 inch ..... **at $190.00**

Car load lots considerable cheaper.

Pure yeast

now concentrated in small dose

With the introduction of Yeast Foam Tablets you don't need to eat large quantities of baking yeast to secure its great health-corrective properties

If you are one of those who have been eating large quantities of baking yeast—and perhaps finding it troublesome to get and unpleasant to take—you will be happy to know that in this new yeast, dried and highly concentrated, you can get the same tonic effects, without any inconveniences and with several extraordinary advantages.

This yeast corrects a wide-spread disease

Vitamin deficiency, that the leading medical men are all discussing, is a disease that thousands of people nowadays suffer from, but which has only recently been recognized.

Unlike other diseases, which come from germs or infections, vitamin deficiency comes from a lack in modern foods of the recently discovered element, vitamin.

Its symptoms are failing appetite; indigestion; loss of weight, strength and vigor; unhealthy skin; nervous troubles and other signs of a "run down" condition.

If you are suffering from any of these disorders, your trouble may simply be vitamin deficiency, and in all such cases Yeast Foam Tablets are recommended because they are made entirely from pure, whole yeast—the richest source of the essential vitamin.

Yeast Foam Tablets rebuild tissues

By supplying this vitamin, which many foods wholly lack, Yeast Foam Tablets stimulate the appetite, aid digestion, enable you to get strength and energy from the food you eat and thus rebuild the sick tissues and tone up the whole body

The purity and vitamin potency of Yeast Foam Tablets is guaranteed by the world's largest manufacturers of dry yeast—the makers for 45 years of the famous baking yeasts, Yeast Foam and Magic Yeast.

This guarantee is your protection, so be sure you ask for and get Yeast Foam Tablets. They are sold by all druggists.

Extraordinary advantages of Yeast Foam Tablets

The only pure whole yeast in easy-to-take tablet form.

They contain no drugs or other ingredients.

They do not form gas nor cause belching.

They are the only pure whole yeast suitable for children; they do not cause fermentation.

Each lot is tested to insure high and uniform vitamin potency.

Some Suggestions--

We have a Cream Seperator that is a real one, and the first person coming to buy a seperator is goihg to get a real bargain.

We also have some of the best seperator oil we've ever seen. We were looking for some good separotor oil and just happened to stumble uuto something still better, We furnish it in half gallon lots; if smaller quantities are wanted bring your own can or bottle and we fill it. We have a few bottles ourselves.

We are taking orders for Twine Come early and get advantage of the discount.

Don't forget those Nesco Spreaders at $125.00

This summer will be the time to stop Quack Grass; we have a few Spring Tooth Harrows that are the best we know of ior this work.

We als have a real assortmeut of single trees, neck yokes and 2-3-4-5 and 5 horse eveners. You will need somethis spring; better come in while the choice is here.

We still have have a choice of harrows and disks that aren't so very high.

We have plenty Fannihg Milis on hand.

Come in and visit with us anyway.

Something to Think About

By F. A. WALKER

DARWINIAN THEORY

WE ARE reading a great deal these days about the Darwinian theory. The newspapers tell us that Kentucky, famed for its blue grass, its blooded horses, beautiful women and chivalrous men, is deep in the study of its involved perplexities.

All the way from school houses to the Kentucky senate, the question of man's relationship with monkey is being discussed with fervor.

The world is pricking up its ears, arching its eyebrows and looking askance upon the creatures, who, according to the Scriptures, were created in God's image.

* * *

Just how will all this controversy benefit you and me?

Will it make us better men and women, elevate our minds to a higher sphere and give us greater power for usefulness?

Power gravitates to those who can use it, not to the wavering nor the weak. It belongs to those who have faith, who believe as a child and accept biblical statements without question.

Who among the sons of men knows himself? Who by gazing in his or her looking-glass can see himself or herself? The body which encases self is all that can be seen, yet who doubts that self, the image of God exists?

Who questions the truthfulness of the Bible, the origin of man, or the omnipotence of Him who created the heaven and the earth?

Is it for the atom of dust to deny: "So God created man in His own image, in the image of God created He him; male and female created He them."

* * *

Let us not go out of our way to seek the dark places, whose mysteries must forever baffle human understanding.

There is more joy in the sunshine, more happiness in useful effort, more pleasure in the acceptance of existence as it is, more delight in self-abnegation and in doing good to others, than in the painstaking avoidance of childish faith.

It is not for us to become crazed about frisky monkeys, nor for us to try to make monkeys of ourselves.

But it is for us to work, to think good thoughts, to put unbelief and doubt far behind us and make ourselves more worthy of the infinite love, the only anchor which will hold secure in this life and in the life to come.

THE ROMANCE OF WORDS

"PIN-MONEY"

DURING the Sixteenth and Seventeenth centuries pins were so extremely expensive that only the wealthy could afford them. By a curious law, the manufacturers of pins were permitted to sell them on only two days each year—January 1 and 2—and when those days came around the women whose husbands could afford the expenditure secured "pin-money" from them for their purchases.

While savages have, for ages, used thorns and splinters for the purpose of joining bits of hide or making garments of leaves, pins—as we know them today—did not come into use until the early part of the Fourteenth century. They were introduced into England in 1540 but it was not until 1824 that an American named Might invented a machine for manufacturing pins very rapidly, and now more than 1,500 tons of iron and brass are annually converted into pins in the United States alone, a condition which renders entirely obsolete the original meaning of the phrase "pin money" which, however, still persists as a synonym for "an allowance given by a husband to a wife to cover her personal expenses."

WEATHERCOCK GROWLS

ON TOP of the barn stood the Weathercock looking down at the barnyard where the hens and chickens were eating their dinner.

"It is a wonder I have a minute to myself," said Weathercock. "I am at the beck and call of every passing breeze, never have any time to myself, while those hens and chickens and the rooster who live down in the barnyard have nothing to do all day but eat.

"It isn't right for them to have all the good things while I have—yes, just as I thought, the wind is east

and we will have a storm, and here will I be getting wet while those hens and the rooster can run under the shed or under the bushes and keep dry. It isn't fair."

Weathercock had time for no more grumbling, for along came east wind and whirled him around, but he creaked his displeasure at every turn he made.

Weathercock was right, as he usually is. There was a storm on the way and such a storm as it was. The wind blew and the rain came down in long streaks and poor Weathercock did not have a minute to rest.

But after a while the wind stopped blowing and again he began to complain. "Look at me," he said, "dripping wet and creaking in all my joints. It isn't fair, I say, to expect me to work all the time.

"Now I have caught cold and I will be stiff and creak worse than ever. I have a good mind to jump right off this barn, and then I wonder what they will do without me. They will not know when it is going to rain or which way the wind is blowing.

"It is time folks began to take notice of me, and I'll make them. I am going to jump. One, two, three"—bang went Weathercock on the ground by the barn, sending all the hens scrambling away, for they were sure the sky had fallen.

All day long Weathercock lay on his side in the mud, and all night, too, and he began to wonder if, after all, there was much fun in doing nothing. "Better be up there whirling around than here, and I can't see a thing. I wonder how those barnyard fowls live shut in this place. Oh, dear, I wish I had not jumped."

Just then the farmer came along, and seeing Weathercock on the ground he picked him up and carried him into the barn, where he gave him a new coat of paint, and the next day put him back on the pole on the barn.

Weathercock went swinging merrily around, without one creak, so glad was he to get back to his home, and as he whirled he said: "It is better to wear out than rust and that is what I should have done down there in the barnyard.

"Those hens are a lazy lot, never do anything. I don't see how they stand it, but I know what will happen to them. Some day they will rust and fall to pieces. Hurrah, here comes a nice stiff breeze. I would rather wear out than rust," and away he whirled, glad he had some work to do.

Uncommon Sense

By JOHN BLAKE

TIME WASTERS

THE gentleman who comes into your office, when he knows you are busy, and sits down for a friendly little chat, must be got rid of.

If he is intelligent, you can get rid of him without hurting his feelings. If he is stupid, it will be necessary to hurt his feelings.

But get rid of him you must, whether his feelings are hurt or not.

Efficiency experts could figure, no doubt, that many thousands of working hours go to waste every year because busy people are too good natured to invite idlers to get out of their offices.

Most of the precautions taken by the "hard to get to" business men are not due to their haughtiness, but to their knowledge of the value of time.

If every small business man could surround himself with inner and outer guards, to keep pests from bothering him, he might soon cease to be a small business man, and become a big one.

In most offices the clerical force and the general employees are not to be seen during business hours. It requires a very intrusive person to get by the boys at the gate.

But the boss or the manager has always some friend he hates to offend who will drop in during business hours, and consume several dollars' worth of time without a blush.

The victim of these gentlemen would far rather they would come to his house uninvited, and consume his food uninvited, than to come uninvited to his office, and consume his most valuable commodity which is time.

It may be that you are one of those who will lean back in your chair and listen to business-hour visitors who bring no business to talk about, rather than ask them to call out of business hours. If you are, break yourself of the habit.

Don't depend on signs saying, "This Is My Busy Day," or "Five Minutes Is Long Enough for One Conversation." They never take those to themselves.

Tell them as kindly as you can that you are busy, and ask them to go. If they get offended, their friendship is not worth having.

And if you happen to be one of the time wasters—well, break yourself of the habit, before your feelings are hurt.

SCHOOL DAYS

KIDDIES SIX

By Will M. Maupin

MY PA

MY PA c'n make th' finest kite
'At any feller flied;
'Th' cross-sticks balanced up jus' right
An' tail all fixed and tied.
'At is, my pa he says he can,
But it jus' seems somehow
'At ev'ry time I ast him to
He says, "I'm busy now."

My pa can take a willer stick
An' trim it nice an' clean,
Then make a whistle jus' as slick
As any feller's seen.
'At is, my pa he says he can—
He can, too, bet a dime—
But when I ast t' make me one
He says, "I haven't time."

My pa c'n catch th' mostest fish
Of any man I know.
He's caught an awful lot, I guess;
At least he's told me so.

Subtle Suggestion.

"What is your object in refusing to be interviewed?" inquired the scribe.

"I'll be perfectly frank and confidential with you," replied Senator Sorghum. "If you will give it out that I decline to be interviewed it will create an impression among my constituents that I know a whole lot, but am in such a position of delicate responsibility that I can't tell it."

Mother's Cook Book

I want it said of me that I plucked a thistle and planted a flower where I thought a flower would grow.—Lincoln.

WHAT SHALL WE EAT

AS EGGS are more plentiful, the following good dish which is not new, but worth remembering, should be served often:

Lucanian Eggs.

Break macaroni in one-inch pieces and cook in boiling salted water until tender; drain and pour over a cupful of cold water. There should be a cupful of cooked macaroni. Grease a baking dish and put into it a layer of macaroni; cover with a layer of rich white sauce, prepared by cooking together two tablespoonfuls of butter with two of flour, and when well blended add one cupful of milk, seasoned with anchovy and onion juice. Add five hard-cooked eggs sliced, season highly with salt and cayenne, cover with buttered cracker crumbs and bake until the crumbs are brown.

Potato With Sliced Mutton.

Make a mound of mashed potatoes on a platter; surround with slices of roast mutton that have been simmered in the gravy with onion juice, butter, jelly and minced parsley. Strain the gravy over the meat after laying it around the potato.

Stuffed Baked Potatoes.

Wash and bake three good-sized long potatoes; bake until done, then cut potatoes into halves lengthwise, scoop out the potato and put through a sieve. Add to a saucepan a tablespoonful of butter and the potatoes. Mix a cupful of chopped cooked meat, one tablespoonful each of chopped onion and green pepper. Season well with salt, butter and pepper, adding a little gravy if at hand. Fill the shells with the minced meat and pipe the seasoned potato around the edges.

Cauliflower in Batter.

Cook cauliflower until nearly done; drain, divide into small bunches; dip into a fritter batter and fry in deep fat. To make the batter use one beaten egg and one cupful of flour, one-half cupful of milk, a pinch of salt, and one tablespoonful of olive oil. Beat well and let stand in a cool place for an hour. Serve garnished with parsley.

Stuffed Raisins.

Select a large bunch of raisins, wipe and remove the seeds by making an incision in each. Insert a small ball of fondant or a small salted nut. Almonds are best. Use as a garnish for the top of a box of home-made candy.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

It is better to learn late than never.—Publius Syrus.

MANNERS AND FEET

ASK any farmer's wife what is the bane of her existence and the chances are even that she will answer "muddy boots." The better the housewife the more she abominates them.

Recently the Department of Agriculture in describing a simple brushing device that could be set up outside the farmhouse back door recognized this bugaboo of the neat farmer's wife—recognized the fact that the man who tills the soil has an aggravating habit of entering his house with muddy boots and the other fact that the woman who spends hours of her time and calories of energy keeping her house clean and neat, scolds and frets when that mud is traped about the house. Perhaps the best solution is this three-way brush that the Department of Agriculture suggests.

But wouldn't it be a happy solution of the difficulty, if American men could be orientalized to the extent of learning to leave off their boots and don slippers when they come indoors! Rubbers and overshoes of various sorts are not popular with the average outdoor worker, so there seems to be little help in that direction. Perhaps the European peasant who wears heavy stockings and wooden shoes, which he removes in favor of soft carpet slippers indoors, is really doing the most sensible thing.

But farmers are not the only offenders. There are many city folk who are careless in trapsing mud indoors. The careful person, if she comes in on a muddy day, removes rubbers in the vestibule or entrance hall of the house. While this is not feasible when entering a church or theater, you should at least wipe them on the doormats that are almost always to be seen at the entrance.

There is one thing that no well-bred young man ought to be reminded not to do, and that is to place his feet for the sake of his comfort on the seat of a street or railroad train. The business man who kept his feet poised on his desk in order to gain full enjoyment of an after-luncheon cigar, is fast becoming extinct. Perhaps this is because of the present-day tendency for men to have shorter working hours and to work more and rest less during those hours.

Peanut's High Food Value.

Peanuts are high in food value, says the United States Department of Agriculture, but there is no foundation for the report that peanuts promote the growth of hair. Investigation carried on in the bureau of chemistry with regard to the chemical and nutritive properties of the proteins of the peanut have demonstrated that, aside from the oil, which is easily digested and which furnishes a large amount of fuel or energy, the shelled peanut contains about 20 per cent of protein of a high nutritive quality.

True Greatness.

He only is great who has the habits of greatness; who, after performing what none in ten thousand could accomplish, passes on like Samson, and "tells neither father nor mother of it."—Lavater.

"What's in a Name?"

By MILDRED MARSHALL

FACTS about your name; it's history; meaning; whence it was derived; significance; your lucky day and lucky jewel

MABEL

MABEL is translated to mean beloved and certainly the name has a right to its significance, since it comes from the word meadhall, meaning "joy." The fashionable miss of today who spells her good old-fashioned name "Maybelle" does not realize that she is trying to paint the lily; no name more redolent of poetry exists today than Mabel.

Mabel appears first as Meadhbh. The daughter of Eochaid Freidhleach, king of Erin, was so called and was such a beloved heroine of Irish romance that Congal Claen, according to the old story, bid the men of Cannaught, her husband's kingdom, to "Remember Meave in battle."

Meave, the diminutive of Meadhbh, became popular in Ireland and, in honor of its first possessor, was bestowed on the Queen of the Fairies. Irish settlers brought her fame to England, where she was made immortal by Shakespeare and Ben Jonson.

Mabel means "beloved," a significance probably given by the Irish who are naively fond of fairy stories. In France she is called Mabelle. The name is too Keltic to appeal to the Latin countries, so she has no equivalents in Spain and Italy. Maybelle is merely an affectation and has no raison d'etre except in the realms of fashion.

Coral is Mabel's talisman stone. It gives its wearer wisdom and bodily strength, possessing the power to fade in color as a warning of fatigue or disease. If it is broken or even chipped, this power vanishes. Monday is Mabel's lucky day and two her lucky number.

EPARING PORK TO USE OR SELL

ing Hogs and Buying Pork Is Not a Profitable Practice for Farmers.

FERENT WAYS OF CURING

g Animals From 8 to 12 Months d Are Best for Furnishing Home Meat Supply—Avoid Danger of Disease.

pared by the United States Department of Agriculture.)

very farmer can well produce the and pork products which are con- ed on his farm, for selling hogs buying pork involves profits, but to the farmer engaged in the prac- This point is brought out in mers' Bulletin 1186, published by United States Department of Ag- lture, which tells how hogs should killed and describes different meth- of curing and canning pork on the n. Highly nutritious and palatable k products for home use are easily le, says the bulletin. Pork can cured and canned in a number of s and the variety of products af- ls a supplement to the daily meals.

Young Hogs Yield Best Meat.

hog of medium condition, gain- rapidly in weight, yields the best lity of meat. A reasonable amount fat gives juiciness and flavor to the t, but large amounts of fat are ectionable. Smooth, even, and ply-fleshed hogs yield nicely-mar- meats. The meat of old hogs be improved if they are properly ened before slaughter, but young s from eight to twelve months old best for furnishing the home meat ply.

The bulletin emphasizes especially importance of selecting only lthy hogs for slaughter and of roughly cooking all pork products d for food.

Even if the hog has been properly and carries a prime finish, the

roper Equipment for Rapid and Skill- ful Work at Killing Time Is Impor- tant.

st quality of meat cannot be ob- ined if the animal is not healthy. here is always some danger that seases may be transmitted to the rson who eats the meat, particu- rly if it is not thoroughly cooked.

Hogs Before Killing.

Hogs intended for slaughter should t be kept on full feed up to the me of killing. It is better to hold em entirely without feed for 18 to hours prior to that time, but they ould have all the fresh drinking wa- r they want. It is essential to have e proper equipment for rapid and illful work at killing time. Such uipment includes a straight sticking ife, a cutting knife, a 14-inch steel keep the knives sharp, a hog hook r holding the animals, a bell-shaped ick scraper, a gambrel for holding e hog to facilitate cleaning and cut- ng the meat, and a meat saw. If e hog is not too large, a barrel is a nvenient receptacle for scalding.

Complete directions for killing and eaning a hog, properly cutting the ortions of meat, rendering lard, mak- g sausage, smoking cured meat, and me canning of pork and pork prod- cts are described in the bulletin, opies of which can be obtained free n application to the Department of griculture.

RIGHT TIME TO PLANT CORN

n Central Corn Belt Seed Planted in April Is Slow in Coming Up and Is Not Hardy.

There is a right time to plant corn, nd usually the better farmers wheth- r they figure by the calendar, by the ize of oak leaves, or by the phases f the moon, in every neighborhood know when that right time comes. t is suggested, however, that more orn is planted too early than too late. orn is a hot weather plant. In the entral corn belt the seed that is lanted in April is usually slow in oming up and less hardy than the eed planted about the middle of May. he distribution of rainfall affects the ield, and this varies from season to eason, but the corn experts say, and his theory is verified by common ex- erience, that the best yields and most apid growth may be expected from he medium planting dates.

SUCCESSFUL TOMATO GROWING DESCRIBED

Bulletin Gives Different Methods Used in Industry.

Much Depends on Good Farm Practices, Seeds, Plants, Fertilizer, Planting, Cultivation and Thorough Spraying.

(Prepared by the United States Department of Agriculture.)

About 2½ quarts of canned tomatoes is the yearly per capita consumption in the United States, according to figures of the United States Department of Agriculture. How the tomato is grown, put up, and shipped, together with practices followed in communities where its cultivation is highly specialized, are given in Farmers' Bulletin No. 1233, recently issued, copies of which may be obtained free of charge upon application to the Department of Agriculture at Washington, D. C. The bulletin also contains valuable suggestions to growers as to methods which are profitably followed where the crop is most successful.

Hardy Tomato Plant Started in Pot.

The story of the tomato is that of a delicacy which has lived down a bad name and come into its own after years of effort. Of American origin, it attracted unfavorable attention first about 1800, and for a long time was branded as poisonous and consequently avoided. Later, designated as the love apple, it found favor with a few lovers of delicacies and with growers. By 1887 the total pack of canned tomatoes in the United States was about 3,000,000 cases of 24 one-quart cans each. Now the commercial pack, exclusive of soups, purees, ketchup, and pulp exceeds 10,000,000 cases of 24 No. 3 cans. These figures do not include the millions of cans put up by housewives for home consumption or the fresh tomatoes which grace American tables during the growing season.

Chief among the states where tomatoes are raised for canning are, in order named: Maryland, Indiana, Missouri, Delaware, New Jersey, New York, Utah, Illinois, Kentucky, Ohio, Pennsylvania, Tennessee, Virginia, and West Virginia. The acreage planted in tomatoes for canning purposes only in 1920 was 244,745. The yield from that acreage was 1,003,358 tons.

The bulletin follows the methods used from the seed to the can, describes methods of planting, soils best adapted for the vegetable's growth, tells how the crop may best be harvested, and sums up the chief requirements for good results as follows:

"Successful tomato growing depends on good farm practices, good seed, good plants, proper fertilizer, careful planting, clean cultivation, and disease control through spraying and through the use of disease-resistant varieties. Growers who pay attention to these factors produce crops which give them satisfactory returns."

GOOD EMERGENCY FEED CROP

Sudan Grass Is Rapidly Replacing Millet in Many States—Useful Summer Pasture.

Sudan grass is admirably adapted for use as an emergency hay crop, and is rapidly supplanting millet in many states. It is being used successfully by thousands of farmers as a summer pasture. For this purpose there are few crops that give better returns and serve so well to supplement the permanent pastures and the feed lot.

FEED CROPS ARE CONVENIENT

May Not Bring in Much Money, But They Take Care of Animals Which Can Be Sold.

Feed crops may not bring much cash but they are very convenient to take care of the animals. The animals may be converted into cash or the products from animals such as milk, cream, etc. It is not an easy matter to produce too much feed. It is hoped that the money generally paid out for feed will be kept at home this year.

GIVE SOY BEANS ATTENTION

Crop Should Not Be Overlooked by Progressive Farmer in Adjusting Corn Acreage.

Soy beans should not be overlooked by the progressive farmer in the readjustment of his corn acreage. They require careful attention like corn, but they will make his decreased acreage of corn worth more money. It is a high protein, high oil crop in one.

DAIRY FACTS

APPLE-PECTIN AS COW FEED

Pulp Should Prove Valuable Adjunct to Fare of Animal When Compared With Silage.

(Prepared by the United States Department of Agriculture.)

That dried apple-pectin pulp should prove a valuable adjunct to the fare of the dairy cow is the conclusion drawn from analyses and feeding trials conducted by the bureau of chemistry, United States Department of Agriculture, in collaboration with the Bureau of Animal Industry. This feed made a favorable showing when compared with dried beet pulp and corn silage.

Apple-pectin pulp is the by-product remaining after pectin has been extracted from apple pomace, or, as it is sometimes called, cider-press cake. After the pectin has been extracted about three-fourths of the total weight of the pulp is water, rendering it subject to rapid spoilage. Heretofore it has been thrown away, but it has been found that when the pulp is dried it can be kept for a considerable time and, because of its reduced weight, handled and shipped economically. Some manufacturers have recently installed evaporators for drying the pulp in order to market the product for stock feed.

The feeding experiment included a preliminary test with one cow for a period of 20 days, and a later one with 6 cows. The dried pectin pulp was always mixed with three times its weight of water several hours before feeding. In the first test the cow was fed corn silage for 20 days, then, after a transition period of 5 days, she was given pectin pulp for 20 days, and, after another transition period of 5 days, she was fed corn silage for another 20 days. In all these periods grain was fed in connection with the roughage.

The average production during the corn-silage feeding-periods was 312 pounds of milk and 14.65 pounds of butterfat. During the period when

A Convenient Arrangement for Feeding Cows Which Saves Much Labor.

pectin pulp was fed the cow made 356.9 pounds of milk and 15.68 pounds of fat. Although this test showed that the pulp produced 14.7 per cent more milk and 7.1 per cent more butterfat than the corn silage, the results can not be considered conclusive.

In the second and more extended experiment the pectin pulp was compared with dried beet pulp, a feed that it resembles more closely than corn silage. The 6 cows were fed for 30 days on beet pulp soaked with three times its weight of water, then, after a transition period of 10 days, they were fed for 30 days on pectin pulp soaked with a similar quantity of water. The soaking was from one feeding time to the next, but in warm weather the pulp should not be allowed to soak for more than one or two hours. The pectin pulp contained approximately 7 per cent crude fat (not all of which is true fat), 7 per cent crude protein, and 26 per cent crude fiber, as compared with 0.5 per cent crude fat, 8 per cent crude protein, and 20 per cent crude fiber in beet pulp. The two feeds are similar in being able to absorb water readily.

The cows while on the ration containing the beet pulp produced 4976.5 pounds of milk and 171.86 pounds of butterfat; while on the pectin-pulp ration they produced 4376.7 pounds of milk and 152.93 pounds of fat. Forty pounds of the wet pulp were offered to each cow daily. The palatability of the pectin pulp did not appear to be so high as that of the beet pulp, since the cows did not eat it so readily. It seems that pound for pound of dry matter the pectin pulp is superior to corn silage and perhaps intermediate between the silage and beet pulp.

The loss of appetite for the pectin pulp by some of the cows may be attributed to the fact that it was the less familiar feed and that the second test was conducted during the summer when cows are more apt to tire of such feeds.

Poor Cows Don't Pay.

It does not pay to keep poor cows, nor does it pay to stint any cow in the way of the best feed money can secure.

Object in Milking.

Some farmers milk good cows for profit; others milk poor cows for exercise.

Scrub Deserves Medal.

The man who uses a scrub bull deserves a leather medal made out of the bull's hide.

LIVE STOCK NEWS

PREVENT BIG SHEEP LOSSES

Poisonous Plants Frequently Grow in Thick Patches and Cause Death of Animals.

(Prepared by the United States Department of Agriculture.)

Death camas causes heavy losses of sheep in the spring and early summer. It is not unusual for several hundred to die within a day or two. The camas plants frequently grows in thick patches, and because of their grasslike leaves are overlooked. If sheep are close-herded in such places many of them will be poisoned, and most of those poisoned are likely to die.

Especial care should be used when sheep are taken from the cars and released for grazing. If they have not been fed, as is frequently the case, and are turned out on a range where death camas is abundant, the resulting losses may be very heavy. There have been many cases of this kind. If death camas is present that part of the range should be avoided. If it is necessary to trail sheep where death camas is known, the animals should be well fed before coming to that place.

Sheep herders should learn to recognize the plants and avoid them. The United States Department of Agriculture has published Department Bulletin 125, Zygadenus, or Death Camas, which tells about the plants and their effects; it has also published Bulletin 575, Stock-Poisoning Plants of the Range, which gives illustrations, many colored, of the principal poisonous plants of the western United States.

There are several kinds of death camas and until recently it has been supposed that all were equally poisonous. As the result of recent experimental work, which is in course of publication, it has been found that the death camas which in the western

Sheep Grazing on a Western Range.

mountains grows at elevations of 8,000 feet and upward is only slightly poisonous and probably never injures range sheep. All the forms growing at lower altitudes are dangerous, but this mountain death camas probably never does any harm. It has thin and rather erect leaves, grows in meadows and in damp ground, sometimes among the aspens, while the other kind, which approaches the lower limit of the mountain death camas, grows in dry places, and has thick, spreading leaves. The herder need not fear the mountain death camas, but should shun all the other forms.

GREAT FEED VALUE OF PEAS

Results of Four Years' Experimental Work at Idaho Station Show Big Gains Made.

That field peas have a high value as a feed for hogs is indicated by the results of four years' experimental work at the Idaho experiment station. An average of 347 pounds of peas was required to make 100 pounds of gain in hogging-off trials. Supplemental rations of barley and tankage increased the rate of gain. Most rapid and economical gains were produced in drylots on a mixture of 3 parts of rolled barley and 1 part of cracked peas plus 5 per cent by weight of tankage. In the hogging-off trials the best results were obtained by confining the pigs to a small area until it was pastured clean.

TREATMENT FOR YOUNG LAMB

When Chilled It May Be Revived by Immersing in Warm Water, Then Give Nourishment.

A young lamb that has become chilled and is presumably ready to die may be revived by immersing it in warm water—as warm as is comfortable to the hand—and gradually increasing the heat a little at a time, by adding more warm water.

When it revives sufficiently, dry it well, wrap in a woolen cloth and lay in a warm place. It will probably rouse in a short time and can then be taken to ewe. Hold her, and see that the lamb gets nourishment.

Lambs that seem very far gone often respond to this treatment.

PREVENT HOGS FROM ROOTING

Much Harm Can Be Avoided by Feeding Regularly With Some Kind of Mineral.

Pigs are more apt to be "rooters" in spring, when ground is soft, than they are at any other time of the year. Much of this can be prevented by feeding regularly with coal, charcoal, ashes or other mineral matter. Ringing the hogs should be resorted to in extreme cases.

POULTRY CACKLES

LESSEN BROODINESS OF HENS

Every Ambitious and Enthusiastic Poultryman Tries to Restrict Its Development.

(Prepared by the United States Department of Agriculture.)

Broody hens, like wayward children, are a great discredit to their parents and a source of annoyance to all who have to do with them. That is why one of the greatest concerns of every ambitious and enthusiastic poultryman is to restrict the appearance and development of broodiness in his flock. The United States Department of Agriculture has found that broodiness can be reduced very markedly by careful, rigid and persistent selection.

At the Massachusetts experiment station, where a detailed experimental study of broodiness has been made, it

The Early Hatched Pullet Is the One That Begins to Lay Early in the Fall.

was ascertained that previous to the practice of selection the average hen in the flock was broody 3.88 times a year. After painstaking selection was practiced for five years, this tendency to broodiness was reduced so that the average egg producer in the flock developed broodiness only 0.36 times a year. A study of the correlations between broodiness and egg production shows that pullets that are very broody tend to lay relatively few eggs between their broody periods.

There is no one dominant cause of broodiness among poultry. Genetically, there occur four distinct types of nonbroodiness and one of broodiness. It is believed that birds showing only a slight tendency to broodiness belong in the same class as the nonbroody fowls, as each has about the same proportion of broody offspring. The determination of broodiness is complicated by the fact that birds that are not broody during the pullet year may become broody during their second or third laying season.

PROPER EGGS FOR HATCHING

California College Institutes New Project for Improvement of Poultry Flocks.

For the improvement of poultry by careful selection of breeding stock, the poultry department of the division of extension work of the California College of Agriculture has instituted a new project with the hatcherymen of Alameda county. Previous to this time, the assertions of the egg dealer were the only guide to those who bought eggs for hatching and dealt in baby chicks, as to the quality of the eggs they were getting. There was opportunity for frequent abuse or confidence in the business.

Under the present plan about 20,000 birds have been inspected by poultry experts, and those which have met the requirements decided upon for weight, egg production, size and shape of eggs, and other points, have been accepted as eligible for the production of eggs for hatching. Hatcherymen have agreed to use no eggs except those from tested flocks.

EXERCISE CARE IN CULLING

One Is Liable to Discard as Many Good Layers as Poor Ones Late in Winter.

Be careful about culling birds. You are liable to get rid of as many good ones as poor ones. As long as you've fed them all during the winter, it would be safer to feed them another few weeks, when any old bird will produce eggs; then do your culling in the summer, from June to September.

POULTRY NOTES

Feed a dry mash.

* * *

A fat hen is not a good layer.

* * *

Feed grain once or twice a day.

* * *

Feed table scraps and kitchen waste.

* * *

Brooder lamps should be cleaned every day.

* * *

Powder the chicks occasionally during the first eight weeks.

* * *

The flock with shelter from storms and with clean surroundings has the best protection against disease.

THE RING

By AGNES G. BROGAN

Copyright, 1922, Western Newspaper Union.

Nance and the tall young man came strolling down the hill path, to rest on a low garden wall. Nance sprang nimbly to her favorite seat, while the young man took a place beside her.

"It's a great view," he said, and as he tapped his boot, a ring slipped from its place on his finger, to roll glinting down the road. The young man jumped after his treasure and returned, breathing a sigh of relief.

"I must be careful," he told the girl, "and see that does not happen again; my finger's growing thinner; your fault, probably." He cast a side glance at her.

Nance leaned forward to examine the ring. Bruce Manners bent his uncovered head until his dark hair brushed hers.

"Yes," he explained, "unusual and significant. The sapphire is set like an eye in a band of enamel-edged gold. Inside is the motto, 'I see.' The ring was given to me by a wealthy capitalist, who happened to be a lifelong friend of my father. This man never made a deal, or serious venture, without first consulting the eye for its vision of success. The ring had been given to him by an East Indian merchant, who earnestly believed in its clairvoyant power."

"But," asked Nance, smiling, "how does the mystic eye make known its reading?"

Bruce gazed quizzically out across the meadows.

"In a strangely, unexpected manner," he replied, "and its directing is unmistakable."

"You," Nance asked amusedly, "have sought its advice?"

The young man nodded. "Many times."

She slipped down from the wall.

"I am going home," she declared laughingly: "you make me feel eerie." He led her, his strong browned hand beneath her arm, his admiring eyes on her rose-flushed cheeks.

Inside the home living room Nance's family greeted her. Aunt Phronsie's face wore a frown, and pale-faced Lillie Ray, after one quick glance at Nance's glowing cheeks, left the room. Even mother's smile was strained, fleeting.

"My dear," began Aunt Phronsie, "haven't you admirers enough of your own, that you must make a conquest of Lillie's hero, also?"

Lillie Ray," mother gently reminded, "is very frail, Nance; disappointment might go hard with her."

The brown dress she wore was not as becoming as usual, Bruce Manners thought, when Nance met him later at the door.

"You said once," Nance hurriedly began, "that you would like to prove your friendship for me, by some favor. I'm asking the favor now, Bruce. Will you let me take your ring tonight? I want it to advise me."

"Certainly," the young man agreed; "but the ring sees for its owner alone, Nance-Rose. To him only it gives a sign."

"Still I'd like to take it," she persisted. She looked back at him, an enigmatic smile curving her lips—"I suppose," she mocked, "this uncanny ring will one day direct you to the woman you are to marry?"

Bruce Manners spoke seriously. "I am sure," he said, "that the sapphire's eye, then, will not be more blue than her own."

Lillie Ray was in the living room playing the piano, the last log dying in the fireplace.

"These spring evenings," she complained, "are so chill. I can't walk outside. You and Bruce will walk, I suppose."

Nance hastily ended the frail girl's fears.

"No," she replied, "I'm going upstairs to write. Bruce will come in here. Lillie, I want you to do something for me. Put this ring of his on your finger for safe keeping, and when Bruce comes in give it to him. Here, you might sing a song. 'I Love You, Dear,' that's pretty. Then give him the ring."

"My! it is beautiful!" she exclaimed.

Nance sank down on the floor of her own room to rest her face against Don's loving head.

"Just about now," she murmured, "Lillie is looking up from her song into Bruce's face—she is giving him the ring—the clairvoyant ring. And Bruce will know it's a sign, Don. How could it be other than a sign of the woman he is to marry?"

When Nance could bear it no longer, she crept down the stairs. Lillie was not in the living room. Bruce was there poking about the dead fire with a stick. Surprised into action, Nance crossed to his side. His radiant smile greeted her; breathlessly she waited.

"Well, Nance-Rose," he said severely, "you trusted a poor messenger; the listless Lillie, tossing my ring to me, tossed it into the fire by mistake. And when I said 'damn,' she indignantly, disgustedly departed.

Weakly, remorsefully, Nance dropped into a chair. Then a sudden blue gleam shot into the air to drop flatly into her outstretched palm.

"I dislodged it that time," Bruce Manners cried excitedly; turning, he met the wondering gaze of Nance-Rose.

On her outstretched palm the sapphire eye twinkled up at him. Deliberately, triumphantly, Bruce Manners came to clasp Nance in his arms. "You can't beat that old ring, my dear," he said.

We are glad to report that Billy Baack, who is at a Mason City hospital is now improving in health and he will not have to undergo an operation as was thought would be necessary at one time. Sunday his two brothers, Gus and August and families and Martin Brinkman and family drove over for a visit with him.

Two teaspoosful of Tanlac in a little water taken three times a day just before meals will make you eat better, feel better, sleep better and work better. E. S. D. Kahrs. adv

Mrs. Fred Knoll. of Garner, came Friday for a visit at the Ben Knoll home in the country and also to see the dandy new baby which arrived a couple of weeks ago.

Contractor & Builder

LET ME FIGURE YOUR JOB NOW!

I am prepared to take your building job complete on all the work which means no delays. Carpentering, cement and brick work, painting and decorating all done.

Get my plans and estimate on any job, large or small; let me help you plan that new building or remodel the old one to make it up to date.

I do repair work or remodeling, refinishing and all interior or exterio painting.

See me at the Eina Salling residence or phone 6613.

ABOUT KLEMME PEOPLE

Fern Ulrich was visiting at Belmond between rtains last Thursday.

Art Kuck was over at Garner between trains last Friday morning.

R. A. Jorgenson was at Garner on busiess last Friday morning.

G. W. Kluckhohn was at Garner on business last Friday.

F. H. Ridder was a business caller at Mason City last Saturday.

Fern Ulrich was visiting at Mason City last Wednesday.

John Josten went to Garner on business yesterday morning.

C. W. Wiles was a business caller at Garner Monday morning.

Rev. Bergmann was at Garner on Monday.

Mrs. R. W. Elder as a Garner caller between trains Tuesday.

Mr. and Mrs. M. O. Barr were visiting friends at Garner Sunday.

Tanlac is appetizing and invigorating. Try it today. E. S. D. Kahrs.

Mrs. Tom Blank went to Goodell Monday for a visit with her daughter.

Mrs. Levi Klotzbach and Mrs. Lew Sampson went to Garner Monday for a short visit.

Mr. and Mrs. Lew Avery and Mrs. Ed. Hughes were up from Goodell last Friday.

Mr. and Mrs. Harold Leighzinger, of Garner, were over Sunday visitors at the Henry Wille home.

Next Sunday is Palm Sunday and the following Sunday is Easter Day. so we can soon see the annual parade of beautiful damsels in their bright raimants of spring colors.

Linoleum

The quality of linoleum is much better this year than last. We have a big stock to select from; suitable for every room in the house.

Do you know the difference between Linoleum and Congoleum Rugs? One kind kind wears well and the other kind does not. Ask us, we have both kinds on hand in 9x12, 9x10½, 7½x9. and 6x9.

State-wide Famine Releif Drive Begins On Easter Sunday

ELIEF ORGANIZATION SAYS OATS DONATED BY FARMERS WILL BOOST MARKET.

OW farmers in the Middle West can help feed the millions of arving fellow farmers in the Volga alley and at the same time benefit hemselves by increasing the price of arm products is explained by the merican Committee for Russian Famne Relief which has a carefully orked out plan in connection with its ppeal in this state.

Early in the year congress appropri- ted $20,000,000 for Russian famine re- ef. The Russian government at the ame time sent $12,200,000 to the nited States for the purchase of seed heat. The expenditure of this $32,- 00,000 for wheat and corn materially oosted the prices of these commodi- es and thus directly benefited not nly farmers but all lines of business ependent upon the farmer's pros- erity.

No oats was purchased, however, nd the price of this grain did not eep pace with the increased quotation or wheat and corn. Oats when ground nto oatmeal, is more suitable for food n Russia than corn. There is a huge urplus of oats in the hands of the armers in the Middle West and at resent prices it is hardly worth ship- ing to market.

Farmers Asked for Oats.

The American Committee for Rus- ian Famine Relief is asking farmers o donate as many bushels of oats as hey can spare. The oats should be hipped to the Quaker Oats company t Cedar Rapids, Ia., which has agreed o mill it into oatmeal at cost. The neal will be shipped directly to Rus- ia and distributed by the American Friends Service committee (Quakers).

Residents of cities and towns will be sked to donate money and at least alf the amount received will be spent within the state for oats. The whole- ale purchase of oats, coupled with he shipment from the state of the do- ation from farmers, is almost certain o "help" the market. The increase in rice will more than compensate the armers for their donations.

There are about 67,000,000 bushels f oats remaining in the hands of armers in Iowa. If 1,000,000 bushels ere donated its total value would be ess than $250,000. The shipment for he state of such large supplies, and he additional purchase of large quan- ities should increase the price of oats t least several cents. Every time the rice of oats rises one cent it means 670,000 to the farmers and business en of the state.

Russia Needs Many Things.

Russia needs meat, oils, milk, choco- ate, medical and surgical supplies, ractors, plows, reapers and binders, eeders, hoes, rakes, shovels and other arm machinery and tools, as well as ood. Russia also is badly in need of orses. A collection of $10,000,000 for Russian relief in the Mississippi valley t this time as expended in the above manner, would not only stimulate do- mestic business but would promote ood will in Russia and ultimately as- ist our foreign commerce by enabling Russian producers to get back on their feet.

United States Senator Joseph I. France of Maryland, who spent sev- eral months in Russia investigating conditions, declares that unemploy- ment in the United States is directly traceable to the chaos in Europe and that a return to better conditions in this country cannot be expected until Russia is restored economically.

"We cannot hope for the stabiliza- tion and the restoration of Europe un- til we have worked out a comprehen- sive plan for the rehabilitation of Rus- sia," says Senator France. "We must provide for Russia immediate relief by charity to save millions from star- vation, and permanent relief by wise policy which must provide for the re- habilitation of Russia's productive power. We must send the Russian peasant farmer food and seed or utter ruin will come to Russia and Europe will reap famine and disaster, which in turn will affect America.

Russia Aided During War.

"Let malice, hatred and prejudice be melted in the warm memories of the deeds of those Russians for the preservation of the world. Let us re- member the immemorial friendship of the Russians for the American people. Let us not forget the heroes who in the darkest hours of the World war held the enemy, against fearful odds, engaged upon the eastern front.

"Russia has endured seven years of almost constant war. She needs charity, mercy, justice that she may revive and thus make possible the re- storing of the world. Russia is the richest of the nations with two and a half times as much area as the United States and perhaps three times our natural wealth. Her government is stable, resting upon the approbation of the peasant. She has abandoned her impossible theories of communism and she needs all that we can send her in the way of agricultural products and manufactured goods. We suffer from a surplus and they perish because of desperate need."

No money is sent to Russia by the American Committee for Russian Fam- ine Relief. So far as possible funds collected will be spent within the states where the collection originates. Sending our surplus materials to feed starving people not only is worthy charity—it is sound business and will prove a positive gain to farmers, work- ers and business men in the Middle West.

PAVING OF GARNER TO BRITT ROAD IS HANGING FIRE YET

GARNER, April 12.—The decision as to whether the road between Britt and Garner will be paved this sea- son is still pending. Several peti- tions by taxpayers along the road have been circulated and filed for and against the proposition. It is perfectly legal for the board of su- pervisors to let the job and have it done as the same election which sanctioned the paving between Britt and Hutchins and between Garner and Ventura authorized paving the road between Garner and Britt and thus linking a continuous paved road between Algona and Charles City. The contract has been let in Kossuth county for a continuation from their east line of the Iowa Pike to Algona on the west.

HARDINGS AGRRE TO EGG ROLLING EVENT

WASHINGTON, Apr. 12.—Presi- dent and Mrs. Harding have given their consent for the opening of the White House grouds Easter Mondap for egg-rolling, a time onored cust- om, to which the children look for- ward annually. Each year tusands of cildren with vari-colored eggs throng the grounds and eagerly watch for the president.

HAYFIELD MAN SHOT WHILE CLEANING GUN

HAYFIELD, Apr. 12.—Julius Non- weiler who is visiting at the home of his brother, Charles Nonweiler in the north part of town met with a serious accident while cleaning a revolver. The gun was accidently discharged, the bullet striking him in the left thigh and glancing up- ward, penetrating nearly to the bone. The doctor was unable to locate the bullet, but if nothing develops soon, no permanent injury is expected to result.

NEW POSTMASTER AT BRITT

BRITT, April 10.—Postmaster A. W. Lee was checked out of office yesterday leaving behind him a good reputation for being a good and o- bliging postmaster.

C. F. Wigdon, the incoming post- master will assume full ccharge of the office Monday.

he remainder of the office force remains with the incoming admisis- tration, being under civil service rules.

LAKE CITY GETS IT'S OWN ELECTRIC PLANT

Lake City, Iowa, will have its own electric manufacturing plant, to be known as the Lake City Utilities company. Although not a municipal concern, the organization is made up entirely of local men, with H. B. Yetter as president.

This was disclosed last night when the question of granting the Iowa Light, Heat and Power Company, which has been furnishing the com- munity with electric current for the past eight years, a new franchise was defeated by a popular vote of 514 to 41, says a news dispatch.

Last May the old company was re- fused a new franchise. They asked for a special election. The new company will start building immedi- ateily.

When a town boasts these days that its jail is empty, it is merely handing a left handed compliment to its police force.

WAITING FOR DEATH IN THE VOGA VALLEY

Weekl Report of the Doings of The Klemme Schools

Baseball Schedule

April 14 Kanawha here.
April 21, Thornton there.
April 28, Kanawha there.
May 5, Open date.
May 12, Thornton here.
May 19, Open date.
May 25, Ventura Field Meet, there.
June 2, Open Date.

The baseball game with Belmond on March 31st was not played on ac- count of the weather conditions but will be played later.

The new baseball uniforms have arrived and of course the boys had to try them on and see how they fit Friday afternoon. They sure came up to all expectations as to quality and design. They are a dark green trimmed with white braid and also a large K with small H and S on the left side so you will know our boys when you see the uniform.

A game of ball was played with Belmond last Friday, April 7 which resulted in a victory for Belmond but on account of the weather conditions of that week there was little practice and the absence of two of the regular players sure put a weak spot in the team, but as they are back again we will try to make it look more inter- esting this FFriday.

Kanawha will play here Friday, April 14 and so lets everybody come out and help the boys win as we sure appreciate to see you out and after the business men have been so liber- al to buy us new uniforms. Let's go with a Hurrah! for Klemme!!

Clarice Wellemeyer is back to school after an absence of four weeks on account of sickness.

This week seems to be snap week. The 5th grade drew a map of Africa and the 7th grade drew a map of Iowa.

Clara Bergmann was absent part of this week on account of sickness.

Next week will be examination week.

Mrs. Gibbs is again back on her job of teaching the Intermediate Room. Before vacation she was absent on account of sickness.

The 8th Grade will put on a play at the next Lyceum Course Number; entitled "Which is Which."

The Freshmen had a class meet- ing Tuesday. Class color, class flow- er and class motto were chosen. This is the third meeting they have had for this purpose. It happens that the third time is a charm. Their class motto is: "Always ready." The class flower is the American Beauty Rose and the class colors are Scarlet and white.

Sure spring is here; why even the Klemme school birds have put on their summer feathers. Oh! They're wise just like old time prophets.

A "swelled" head contains only a shrunken brain.

WOMAN IS BURNED WHEN GASOLINE IS USED TO START FIRE

Pisgah, Ia., Aprill 12.—Mrs. J. O. Silsby is lyig at her home dangerous- ly injured from burns. She had plac- ed gasoline drawn from their auto in a can usually used for coal oil, intending to fill the gas lamp.

Fay Emerson, maid in the Silsby home, started the kitchen fire last night and also picked up the can of oil and was pouring what she suppos- ed was oil on the fuel.

Just as Mrs. Silsby entered the room there was a burst of flame. Mrs. Silsby, in trying to get the can out of doors, was burned about the neck and breast before the fire could be extinguished. Mr. Silsby was en route to Chicago with cattle at the time.

ADVISED GIRLS UNDER AGE TO VOTE, CHARGE

CRESTON, Apr. 11.—An indict- ment was returned yesterday by the Union county grand jury upon two different counts, agaist Supt. J. C. Parsons, of the Cromwell public schools.

It is set forth in the indictments that Mr. Parsons, "unlawfully coun- seled, assisted, aided and advised two girls, 18 years of age, to give their votes" at the recent consolidat- ed school election held at Cromwell and that "e did this knowing that te girls were under the legal age of 21, and not qualified as voters."

Injures Hand With All Day Sucker

STORM LAKE, April 12.—When she blew up and popped a candy sack, Mrs. Hescke, who lives east of Truesdale did not know an all day sucker stick was in the sack. She struck the sharp point of the stick and ran it through er and. Blood poisoning developed immediately and for a time she was in a serious con- dition, but she is now making good recovery.

NEW STYLE WELCOMED AT AMES HIGH SCHOOL

One Girl Complimented by Prof. For Wearing Knicker Suit

Ames, Ia., April 12.—What may develop into a new style at the Ames High School was inaugurated yester- day when Dorothy Thompson, a juior in high school, appeared at classes attired in natty knickerbockers.

High school authorities were in- clined to look askance at the depart- ure from established custom and an appeal was made to Prof. W. H. Meeker of the chemistry department of the college.

"The young lady is to be compli- mented on her sound judgement in the selection of such a sensible cost- ume," he said.

NOTICE FOR BIDS

Sealed bids for painting Town Hall and Band Stand two coat work and Park Seats one coat work, to be filed with Town Clerk not later than April 22nd, 1922.

Council reserves right to reject any and all bids.

JOHN N. DAY,
Clerk. 2w

Happenings of the Past Week Of Local Interest

BOY WHO RIPPED OFF KLANSMAN'S MASK IS WARNED

MARSHALL, Tex., Aprill 12.—Merritt Gibson, school boy, who tore a mask fro mthe face of one of three men, said to have been wearing the custume of the Ku Klux Klan Sat- urday night, today said he is not worrying over a message which he said he had received, stating that he had committed an unpardonable sin against the "invisible empire" and that he would "hear from the Ku Klux Klan later."

Saturday night at the Central school house, situated in the west- ern part of the county, the question was debated, "Resolved, that the Ku Klux Klan should be disbanded." Just as the boys had finished debat- ing and were awaiting the decision, three masked persons marched up the aisle of the school house.

Gibson, one of the debaters against the klan, tore the mask from one of he men. The man was not recog- nized.

Hurriedly the three men left and joined about fotry other whiterobed figures, waiting in automobiles. Members of the party asked the name of the young man who had done the unmasking and departed.

'MOTHERS' DAY' GETS HARDING APPROVAL

Indianapolis, April 11.—Indorse- ment of the observation of "Mothers' day" on May 14 by the American Legion Auxilliary was given by Presi- dent Harding today in a letter re- ceived by Mrs. Lowell F. Hobart, the national president of the auxilliary.

"Your purpose to honor all moth- ers," said the president, "and par- ticularly the mothers of the men who wore the uniform and also to give voice to the desire for the fullest recognition of their claim upon the nation is wholly worthy and com- mendable."

Commander Evangeline Booth of the Salvation Army has written Mrs. Hobart thanking her for the auxill- iary's efforts to place a broader meaning on Mothers' Day.

WOMAN REGAINED POWER OF SPEECH

Muscatine, Ia., April 12.—After four months of silence, Mrs. Frank Chayka, is again able to converse.

Power of speech was regained by her as suddenly as she lost it just four months and two days ago. While sitting in her home at 9 o'clock, she unexpectedly discovered she was able to speak. Her loss of speech follow- ed a severe bronchial cold.

About three years ago, Mrs. Chay- ka underwent a similar experience, although even more aggravated than that from which she just emerged. For nearly nine months she was un- able to utter a sound.

METHODIST EPISCOPAL CHURCH

Morning worship at 10 o'clock.
Sunday school program at 11 A. M.
Evening worship at 7:30 o'clock.

The Easter program will be held during the Sunday School hour next Sunday to begin at 11:00 o'clock.

The day will be fittingly observed at all our services; Easter sermon and special music.

Thursday evening and Friday ev- ening service in the church at 7:30. Passion Week meditation.

The Pastor will be glad to receive the names of those desiring to unite with the church by confession of Faith or church letter. Parents wish- ing to have children baptised could find no more suitable time than the Easter-day.

You are cordially invited to at- tend our services and will find a welcome at each and all.

Arthur B. Gedye, Pastor.

Lizzie

Lizzie, Lizzie, fuel eater
Was a Ford, you couldn't beat 'er
Up hill she wouldn't run so well
But down hill she ran like—
(Ask Mitchell!)

Women are great gossips but did you ever listen to a party of men in a smoking car?

Seventy Surprise Herman Priebe On His Fiftieth Birthday

Last Friday evening friends and relatives to the number of about seventy, all heavily laden with bas- kets of good things to eat, went to the home of Herman Priebe and gave him a regular surprise, the occasion being his fiftieth birthday. Herman experienced a real sensation when this flock of merry-makers filed in and extended congratulations and dusted his pants with fifty good licks, one for each year and a few more to go on.

A crowd of this kind, all merry and full of fun did not have any idle moments on hand but made the en- tire evening a round of fun ad visit- ig.

All seemed to bring along a good healthy appetite but there was still enough good things left to feed an editor, had there been one present. At a late hour all departed for home promising Herman perhaps that next year they would be back to spank him one extra lick and have another celebration.

We are going to appoint John Baumgartner our official weather profit as when anyone wants to know what the weather is going to be they hike into his shop and take a look to see whether "the old man is out in a rain coat or whether the pretty girl is picking flowers." This may all sound strange but John has a de- vice in the shape of a small cottage and if the weather promises to be fair the girl steps out of the door; f a storm is in sight the old man makes his appearance, and it is gen- erally quite accurate. We had in mind that "Baum" could supply us the weather report and we could phone it to the farmers so they would know when they could stay at home and toast their toes in the oven if a rain was in sight or whether to go in he field and work twenty hours. Of course valuable information like that would make a farmer rich so we would of course have to soak them a ten spot the same as other grafters have done in the past for less use- ful schemes.

Gus Baack's face is all speckled up like a turkey egg from burns which he received last Friday night. Gus was attending the pie social at the school east of town and was endeav- oring to fix a gasoline lamp which was to be used. A lighted lantern stood nearby. Gus as trying to find a leak in the gas lamp and was pump ing air into it and holding his finger over where he thought it leaked. He must have guessed right for when he released is finger a stream of gaso- line sot out and was ignited by the lantern. In the mix up Gus came out second best with a badly scorch- ed face and hands. We did not learn how far he threw the lamp when the fire-works were over.

PIE SOCIAL WAS BIG SUCCESS

The "pie social" and program held at Mrs. Carl Suckow's school east of Klemme last week was a great suc- cess.

Pies and candy were put up at auction and sold to the highest bid- der, and of course with the pie one had the priviledge of eating with a fair damsel. Coffee and sandwiches were also on sale and altogether the social netted the school about $28, or a little over that amount.

All report a good time at the soci- al.

We saw Al Emerson digging out in our alley the other day and we wondered what was so valuable that would induce Al to exercise with a spade but we soon saw him give a big fat worm the once over and so knew it was time to fish bullheads and carp again. Al promised us a mess of fish; e are still wai ing to sink our hind teeth into a bullhead.

Mr. and Mrs. Sam Harvey and baby Enid left Tuesday evening for Jer- sey City, New Jersey for several weeks visit with Sam's folks and old friends. Sam has not been back east since he came to Klemme about seven years ago and of course his folks are anxious to see the wife and baby.

She Is Oldest British Colony

Newfoundland's Pride in Seniority Permanent Bar to Union With Canada.

DATES BACK TO 17TH CENTURY

Was a Full-Fledged British Colony With a Governor When Canada Was New France—Position Is Important Geographically.

Washington.—Renewed discussion by the neighbors of the United States to the north of the desirability of Newfoundland's becoming a part of the Dominion of Canada raises a point upon which probably many Americans are hazy—that there are two distinct British realms, not one, in the portion of North America above the Canadian border. Newfoundland and its relations to Canada are brought out in the following bulletin from the Washington headquarters of the National Geographic society.

"Sentiment plays its part in history and historic geography," says the bulletin, "and the fact that Newfoundland has insisted on standing alone while all the other British possessions of North America have united to form the Dominion of Canada is probably partly due to the pride that Newfoundlanders have always had in being able to boast that theirs is 'the senior British colony'—the first of the children of the motherland to make its home beyond the seas.

Dates Back to 17th Century.

"Newfoundland had its settlements as early as the Seventeenth century and was a full-fledged British colony with a governor when Canada was New France, South Africa was in the hands of the Dutch, and not a single white settler had landed in Australia.

"Newfoundland has a geographical position of great importance, for it largely blocks the broad gulf into which the St. Lawrence river widens, and which forms Canada's front door, from Europe. Moreover, Newfoundland is the closest part of North America to the British isles, being only 1,640 miles from Ireland. It is natural that the first trans-Atlantic cable should have been laid to the shores of Newfoundland in 1858 and that out of the 17 cables now crossing the North Atlantic 11 first touch American soil either on Newfoundland or its neighboring islets. And when in 1919 airplanes finally conquered the Atlantic it was from Newfoundland that both the American and the British machines took off.

"Newfoundland has an area of more than 42,000 square miles and is therefore practically half the size of Great Britain. Excepting only Cuba, which barely exceeds it in size, it is the largest island of the western hemisphere outside polar waters. With its cliffs of brown stone rising 200 to 300 feet, broken here and there by deep fjords and bays, Newfoundland has a bleak and barren appearance which belies conditions in many parts of the rolling, timbered interior. Along a number of the streams are fertile valleys in which agriculture and stock-raising flourish.

400 Years of Fishing.

In late years mining, stock raising, the manufacture of wood-pulp and newsprint paper, and a number of other industries have been developed in Newfoundland, but throughout its more than 400 years of history the central story of the island might be told in one word—fish. Boston and Massachusetts have felt deeply indebted to their 'sacred cod,' but after all, that important creature came from the Newfoundland banks; and however valuable it has been to New England, it has meant much more to Newfoundland and through Newfoundland to Great Britain.

"A good case even could be made for the cod as a claimant, for a place on the British coat-of-arms, for that lowly fish in a way laid the foundation of the world-wide British empire. Before the discovery of Newfoundland Britishers were of little importance as seafarers. The great wealth of codfish which John Cabot's finding of the island disclosed immediately drew the men of the British isles out of their insularity.

"The next year after the discovery—1498—a fleet of Devon fishermen crossed the Atlantic and returned laden with fish, and from that time on for centuries the annual crossing and recrossing of the Atlantic took place. The British king looked upon the voyages of thousands of men to and from Newfoundland as the best kind of training for seamen, and deliberately discouraged the settlement of the island in order to perpetuate the fishing from a British base. Great Britain quickly became a seafaring nation; the navy grew, and with its growth the British empire spread.

New Houses Wired for Radio Service

The popularity of the radio telephone was reflected in an advertisement appearing in Philadelphia newspapers in which a builder announced that $1,000,000 worth of houses he is building "will be wired for radio telephone service."

"This will add greatly to the enjoyment of these new homes," the announcement concluded.

Newly elected village officers of Des Lacs, N. D.—all women. 2—Birthplace of Daniel Boone in Exeter township, Berks county, Pa., which probably will be made a Boone museum. 3—Mrs. Frederick Van Lennep of New York, a leading figure in the Pan American Conference of Women in Washington this month.

Is Broke at 65; Now Rich Again

"Borax" Smith's Courage Helps Him in Winning a Second Fortune.

"DON'T WEAKEN," HIS MOTTO

Now, at Age of Seventy-Three, He Is Master of Another Fortune of Several Millions—Fighting Philosophy Adopted in Youth.

San Francisco.—His life slogan had been: "Don't weaken! What is age? Courage is the thing! Refuse to be beaten!"

So when, at the age of sixty-five, Francis M. ("Borax") Smith found that his $20,000,000 fortune was gone and that he was not only "broke" but in debt to the tune of several millions, he didn't contemplate suicide. Nor did he quit.

Today, at the age of seventy-three, he is master of another fortune of several millions and fighting with both fists to regain his lost title of "Borax King." And if he runs true to form he's likely to get it.

An accident, occurring when he was twenty-eight, caused "Borax" Smith to adopt his fighting philosophy. He had purchased a small timber claim in Nevada and taken contract to supply with fuel a Nevada mine. One day he returned to find four Mexicans and an Indian, all armed, cutting down his wood. Smith had but four cartridges and a rifle. But, thought he, the intruders did not know that. Did he dare tackle five of them?

"Don't weaken!" said his courage. He fired two shots. The trespassers fled.

It was from his timber claim that he first saw upon the adjacent desert the broad white streaks that later were to make his first fortune. His borax discovery meant little if "you weakened." There was but little demand for it and the price was high. About 600 tons a year was used, he recalls.

News of his discovery caused a terrific slump in value. His associates quit.

"Don't weaken!" said his courage. Smith stuck. He accumulated a fortune of some $25,000,000, but only after he had lone-handedly packed borax out of the desert and created a big market for it.

Then, with a large income to invest, Smith became interested in a fast ferry system between San Francisco and Oakland which, it is held, practically made the city of Oakland. Huge expenditures were involved and the railroad competition came. At the age of sixty-five he had developed cities, but lost his fortune and plunged into debt.

"Don't weaken!" said his courage. He saw his borax holdings sold to pay loans. But also he recalled that many years back he had been one of the company interested in a silver claim that, to all appearances, would not produce. Smith had thought differently and put in $160,000, taking stock in payment. This he had turned over to his wife just before the crash came. And now in his extremity, the mine was coming to his rescue.

Stakes All—Wins.

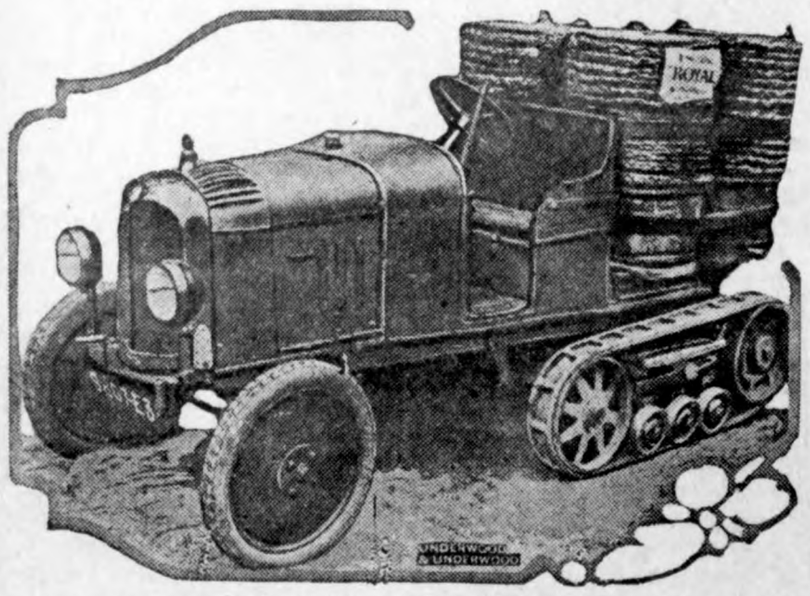
He at once went after borax deposits in the Searles lake region, secured leases after a hard fight in Washington, and made the mine pay for his initial equipment. If it failed the mine was lost—and there was some reason to believe that it might. Just then came word that three prospectors had found a borax mine in Nevada, near the Grand Canyon. He rode 80 miles on horseback into the desert to get there. He didn't have time to appraise the property, for competitors were in the field. He had to act at once and only upon his judgment.

"Don't weaken!" said his courage. He closed the deal for a quarter of a million. And he was seventy-three. If he judged wrong his last card was gone. He took the mine while astonished rivals looked on.

Today the firm announces that there is $24,000,000 worth of borax in sight there.

So he has no cause to regret his slogan: "Courage is the thing! What is age? Don't weaken."

Caterpillar Auto for Explorers



Recently constructed "caterpillar auto" with huge storage tanks for gasoline, designed in France for use on an African exploration.

NEWS REVIEW OF CURRENT EVENTS

British and French Premiers Given Votes of Confidence on Genoa Policies.

FORMER MAKES GREAT SPEECH

Russians Warned Partial Recognition Depends on Good Behavior—De Valera Trying to Upset Irish Free State—Progress of the Coal Miners' Strike.

By EDWARD W. PICKARD

HAVING triumphed over his enemies with a vote of confidence—372 to 94—in the house of commons, Premier Lloyd George, instead of resigning, has gone to Genoa to lay before the economic conference his plans for the regeneration of Europe. On the same day as the British test Premier Poincare laid his foreign policies before the French chamber of deputies, and they were approved by a vote of 484 to 78. Whereupon he also decided to attend the conference as soon as his official duties at home would permit. Both the British and the French have been growing more hopeful daily that good and definite results will come from the Genoa meeting.

Probably Lloyd George never made a more effective speech than that which preceded the vote of the commons. He spoke for an hour and a half, setting forth eloquently the conditions that his country and Europe generally face, and replying with humor and keen satire to the attacks of his opponents, who frequently joined in the applause. Defending the limitations placed on the scope of the conference, barring the discussion of revision of boundaries and of reparations, he argued that no one of his hearers would wish to go back on the clauses of the treaty of Versailles by which Alsace-Lorraine was restored to France, Poland resurrected and the independence of the Slavonic populations of Austria-Hungary recognized. Nor, said he, was there any use criticizing the reparations, since to alter these would simply transfer the burden from Germany to France, England and Belgium, but mainly to France. He asserted France should not be asked or expected to forego the right she won at such cost, or to submit to the judgment of a conference in which not only her former enemies but also neutrals are represented. Germany's ultimate capacity to pay, he added, must not be judged by her capacity at this moment. Discussing the main theme of the conference, the establishment of peace, credits, currency, exchange, transports and the machinery of international trade, the premier dealt largely with Russia and said he believed its present rulers had been brought into a new frame of mind by the famine and would now recognize the conditions imposed and accepted by civilized communities, acknowledging Russia's debts and promising to cease their attacks on the institutions of other countries. He pledged that there would be no full diplomatic recognition of the soviet government until the powers should be entirely satisfied that Russia was really endeavoring to carry out the terms of such an undertaking.

Mr. Lloyd George may have been over-optimistic about the repentance of the Russians. The soviet delegates became more and more cocky as they made their way toward Genoa, and in Berlin they arranged for close co-operation with the German delegation, reached an economic understanding with Chancellor Wirth and Foreign Minister Rathenau and made agreements with the representatives of German industry and finance.

Rathenau explains that his accord with the Russians is due to the position taken by the allies on the reparations. Among the recent demands made on Germany by the reparations commission is the payment of 60,000,000,000 marks in increased taxation. This demand, it is said, the German government has rejected, claiming it is an invasion of Germany's sovereign rights.

Great Britain last week gave a jolt to her debtor nations in Europe by notifying them that they must begin paying interest on their debts to her next October, or make some new arrangement then, so that Britain can pay the interest on what she owes the United States. The French believe this will cause the whole matter of inter-allied debts to be brought up in the Genoa conference.

MICHAEL COLLINS and his provisional government of the Irish Free State are facing a critical situation and it is a debatable question whether they will survive officially. This despite the fact that the British government is assembling large bodies of troops to go to their support in case of necessity. It is believed De Valera and the radical republicans are planning the establishment of a military dictatorship, and continuous raids and outrages by republican bands lend support to this belief. Murders, ambushes and seizures of arms are of daily occurence, and in northwest Ireland it is said large districts which had supported the Free State have gone over to the republican camp. As was intimated in these columns last week, the peace pact between the Free State and Ulster is quite ineffective in restoring peace to the island. Catholics and Protestants, Free Staters and republicans, are in never ceasing conflict, and when they cannot do better the Irish get up "private fights."

CHARLES, ex-emperor of Austria-Hungary, who died of pneumonia at Funchal, Madeira, may have left a legacy of trouble for some of his former subjects. On the receipt of the news of his death, the royalists of Hungary got busy and started a movement to declare his son Otto, nine years old, king of that country. The legitimists in the parliament planned to introduce a measure for Otto's immediate return to Hungary and his education under Hungarian teachers. There is no likelihood that a majority of the Hungarian people would favor restoration of the Hapsburg dynasty, nor that the allies would permit it.

OPPOSITION to the allied plans for reviving the Turkish empire is growing in Greece. Thrace and Smyrna, especially protest against being restored to the sultan, the former demanding the status quo and the latter autonomy. The Thracian deputies in the Greek chamber have wired to President Harding, Secretary Hughes and the chancellors of other nations that "the Greeks in Thrace would sooner die than return to Turk slavery." London hears that the Greeks of Smyrna are ready to revolt and set up an independent state rather than have the land turned over to Turkey. They have an active committee in London and are raising money among Greeks everywhere. It is believed the leaders in this movement may use Smyrna as an excuse for a coup to return Venizelos to power in Greece.

ALTHOUGH efforts to bring about agreements that will end the coal miners' strike are continuous, it cannot be said that they are meeting with any conspicuous success. The house committee on labor is taking the lead in these efforts and through its chairman, Representative Nolan, invited the miners and the bituminous operators of the central competitive field to a joint conference. The operators of western Pennsylvania and southern Ohio already had refused to take part in such a conference, but President Lewis of the mine workers said the men would accept the invitation if sufficient tonnage was represented. Then declinations were received by Mr. Nolan from practically all the other groups of operators, chiefly because they felt a conference of fragments of the central field would be unavailing. Besides, they asserted they had been and still were willing to meet the miners of their own states or districts for separate wage settlements.

In the anthracite field the conditions were more promising, for the miners' and operators' subcommittee was in continuous session in New York and both sides were submitting their cases.

In non-unionized regions a good many mines were in operation, but the union organizers were busy and claimed to have made large gains there. This the operators disputed. The great majority of the strikers are enjoying their period of leisure [illegible] making plans for extensive fishing [illegible] camping trips. In Kansas the industrial court ordered that the present wage agreement be continued for [illegible] days, and the Southwestern Coal Operators' association agreed to [illegible]

The operators declare that the ultimate goal of the union miners is the nationalization of the coal industry and of course they oppose this, though they are not able to confute the assertion that the industry is, as Secretary Hoover says, one of the worst functioning industries in the country. It is always in a chaotic condition, as regards both production and distribution. When President Lewis went before the house committee to present the case of the strikers, he said the miners could see no permanent solution of their difficulties without the nationalization of the coal mines. In questions brought out that while he would favor the establishment of a governing board to bring about stabilization of the industry, controlling the production, distribution and price of coal, he would oppose the creation of a tribunal with power to fix wages. Naturally he did not get far with such a one-sided proposition.

ONE THOUSAND AND SIXTY-FOUR bodies, last of American dead to be brought from the cemeteries of France, were landed last week at Brooklyn and the heroes were honored with a solemn parade and impressive funeral ceremonies at the army base there. Prominent army and navy officers, high representatives of the government, governors of several states and many other distinguished persons took part, and President Harding sent a message and a wreath.

IN THE presence of President and Mrs. Harding, cabinet members, high government officials and arctic explorers a handsome memorial was placed Thursday on the grave of Rear Admiral Robert E. Peary in Arlington national cemetery. Following a suggestion made by Peary during his last illness, it is in the form of a huge spherold of granite, representing the earth, with the North pole, which he discovered, marked by a gold star. The memorial was unveiled by Admiral Peary's daughter, Mrs. Edward Stafford, who has born in the Arctic regions and was long known as the "Snow Baby."

PRESIDENT HARDING has not yet yielded to the demand that he give specific reason for the sudden dismissal of Director Wilmeth and all division superintendents of the bureau of printing and engraving, merely stating that it was for the good of the service. Louis A. Hill was made director and a committee began checking up the stock of the bureau. Reports that there had been a wholesale duplication of Liberty bonds were at first denied, but later Mr. Hill admitted there might be basis for the rumor. This bureau cleanup started talk of impending wholesale dismissals in other departments.

SECRETARY OF THE NAVY DENBY has taken official notice of the activities of certain treasonable societies "having their origin in foreign countries" and has warned the officers and men of the navy to be aware of their "sinister propaganda to undermine the morale of the navy and to insinuate into its personnel elements of disloyalty and disorder."

REPRESENTATIVE TINKHAM of Massachusetts, a consistent opponent of the Anti-Saloon league, made a hot attack on that organization on the floor of the house, denouncing its political activities and charging it and its subsidiaries have frequently violated the federal statutes by making false returns. He admitted it would be useless to ask a congressional inquiry because the league controls congress completely, and therefore he made a public request that the Department of Justice investigate the facts he had submitted.

The latest display of the power of the Anti-Saloon league was the passage by the house of a bill for the deportation of aliens who violate the prohibition and narcotic laws. Several members protested that the bill merely made the United States safe for American boot-leggers, but it went through by a vote of 222 to 78

ROYALTY NOW MUST WORK

Princesses Must Obey Labor Law in Bulgaria.

King's Sisters Are Not Immune, Says the Peasant Premier Stamboulisky —All Women Up to 30 Must Work Ten Days a Year.

Sofia.—Even King Boris' two sisters, the Princesses Eudoxic and Nadejda, will be obliged to contribute their share of work to the Bulgarian state under the new compulsory labor law, which requires all women up to thirty years of age to give at least ten days of their time every year in useful work to the community.

This ruling has been made by the stern peasant premier, Alexander Stamboulisky, the most powerful man in Bulgaria and maker and breaker of kings.

Bulgarian women, said the premier, will be compelled to make garments and bed linen for hospitals, contribute useful labor to orphanages and asylums, help to care for the poor and so on. Girls under twenty years old will be obliged for a period of three months in each year to study domestic science and the useful arts so that they may become more productive to society and contribute to the common good.

Premier Stamboulisky says that one of the causes of Bulgaria's rapid recovery from the war is the work done for the state by what is called here the volunteer labor army. He estimates the value of this work at 380,000,000 levas (nominally worth about 19 cents each.)

"The volunteer army has been an entire success," said M. Stamboulisky. "It has built roads, streets, waterways, bridges, canals, warehouses, schoolhouses and sanitary systems. It has drained swamps, tilled the land and planted trees."

The premier pointed out that Bulgaria now has a law prohibiting the sale of liquor at bars, unless the voters decide they want it. "You see," he said, "we are following somewhat in the path of you Americans in regard to prohibition. Some day Bulgaria may be completely dry."

Indians Taught by Movies.

Mexico City.—The Mexican government is using motion pictures to teach various Indian peoples the art of pottery and basket-making. Most of these tribes have known the art, in an extremely crude manner, and the government wishes to teach them modern methods. In view of the great number of illiterates, the pictures are supplemented with lectures.

Man Kills Wife in Mistake for Burglar

Pittsburgh, Pa.—Alleging that he shot and killed his wife when he mistook her for a burglar in their home, J. J. Flannery surrendered to the police. Flannery called to his wife when he entered the house, he said, but she did not answer. He fired his gun at a shadowy form in a doorway and found that he had killed his wife.

AUNT CYNTHIA'S EASTER

By F. H. Sweet

A new minister had come to slow-moving, out-of-the-way Spruce Hill, and with his coming had appeared a spirit of change and improvement.

Among other innovations was the Easter sermon and church decoration. The new minister made the announcement one Thursday afternoon after prayer meeting, and added that he hoped all would be present, and that the ladies of the church would arrange for a tasteful and appropriate decoration.

After service the women stood about irresolutely, looking at each other with blank, questioning faces. "I guess ye'll have to excuse me, Mr. Kent," one of them said at last, bluntly. "I ain't got any flowers except one geranium, which doesn't bloom; and, besides, I don't know anything about no decoration, an' ain't got no time, either."

"Nor me," "Nor me," "Nor me," came in rapid succession, and with evident relief from the other women.

"Oh, come, come; this will never do!" expostulated the minister. "Surely each of you can spare a little time from work. And doubtless we can find a few callas and Easter lilies and narcissus, and perhaps some other white—"

"All the houses in the neighborhood couldn't scare up white posies enough for a button-hole bouquet," declared a woman aggressively. "As for Easter lilies, I ain't never seen one, an' narcissus I ain't even heard of. The idea o' decoratin' a whole church this time o' year!"

"I've heard Mis' Bray speak o' narcissus," said a woman, reflectively. "She that was the florist's wife, you know. An' come to think, she's likely a master hand at this decoratin' business. She has spoke o' seein' big city churches filled with flowers."

"Who is Mrs. Bray, and where is she to be found?" asked the minister quickly. "Curious, I have not heard of her before."

"Oh, I don't know," dryly; "folks sort o' die away from the world after

"Oh, Come, Come! This Will Never Do!"

they go to the poor farm. I've heard the poor farm was stronger than the grave for hidin' folks."

"Well, we will find her," eagerly. "Will you go with me, Mrs. Perry?"

"Why, yes, I don't mind if I do. Cynthia Bray was as much of a lady as anybody round. Still, while 'twa'n't her fault goin' there, it's hardly to be expected folks will keep on visitin', just the same."

The next afternoon the minister's buckboard stopped in front of the paupers' home. Several men and boys were slouching about the yard, and on a bench near the door were four or five old women. Mrs. Perry glanced there.

"Not one o' them," she said; "Cynthia wouldn't grow to look like that."

In answer to their knock a harsh-featured woman came to the door.

"Mis' Bray?" she repeated—"Oh, Aunt Cynthia, we call her. No, she ain't here, she's inside. Aunt Cynthia's a good worker, so we keep her in the kitchen. She scarcely ever gits to this side the house. I don't s'pose she's had a visitor afore in five years. I'll call her."

They were nodded into a front room. Five minutes, and a little old woman with a deprecatory manner slipped softly into the room.

"Did—did you wish to see me?" she asked, tremulously.

Mrs. Perry sprang forward in quick forgetfulness of the immeasurable distance between their social positions.

"Why, you poor soul!" she cried sympathetically. "How old you've grown! My hair ain't begun to turn yet, an' I'm a lot older."

"It's been a long time since you and I were young," answered the old woman gently. Then she colored with sudden remembrance, and stiffened.

"Is there anything you wanted me for, Mrs. Perry—anything I can do for—"

"Come, Cynthia, don't talk that way," remonstrated Mrs. Perry. "You know farmers' wives are always workin', an'—an' it's a good piece to—"

"The poor farm?" said the old woman, calmly.

"W-ell, yes, poor farm," deprecatingly. "But—but I'm callin' today, an' I've brung the minister. Do you know him?"

"No, we haven't met," said the old woman. "I generally stay in the kitchen."

"I must acknowledge this visit is a begging one, for help, Mrs. Bray," said

"Did You Wish to See Me?"

the minister. "I am planning to have the church decorated for Easter; but the ladies of my congregation, including Mrs. Perry here, assure me that such a thing is utterly impossible. I have come to you as a last resort. Can you help me?"

The old woman, who had not had a caller in five years, looked from one to the other with a sudden yearning in her tender old eyes.

"It isn't easy to decorate without anything to decorate with," she said. "In the city we used to have palms and Easter lilies, and no end of ferns and delicate things to bank with."

"But there are the woods," suggested the minister desperately.

"Yes, the woods are useful around here in spring. I notice from the kitchen windows; and sometimes, before they get up, I take short walks." Her hands were still trembling, but into her eyes was coming an expression which Mrs. Perry remembered to have belonged to her old days.

"Do you mean for me to take charge of the decorating?" she asked.

"Yes, but of course with plenty of help. I don't know much about arranging flowers myself."

He turned hastily and glanced through the window. Something in the rapturous expression on the old woman's face made him lose command of himself for a moment.

"Well, I shall need help in gathering the decorations," she was saying as he turned back. "There will be things to cut and bring home, and boxes and boards to build up for the banking. Yes, I think we can do it very nicely. There are some bushes along the creek that I can fix up to look very much like palms at a little distance, and that dark moss below the ledge will make a beautiful bank on which we can arrange the early white flowers which are beginning to bloom. Then there are the pussy willows and early ferns, and lots of other things that can be used with good effect. But there," breaking into a low, joyous laugh, which apparently frightened her, for she stopped suddenly and looked about in a scared sort of way. "I was only going to say," she went on, deprecatingly, "that I haven't seen the church yet. I ought to go there first and look around."

"I Cannot Tell You How Much You Have Helped Me."

"Of course we will take you there this afternoon," volunteered the minister.

"And you can have my horse an' wagon every afternoon," added Mrs. Perry, warmly, "an' my boy Tommy to drive and help."

"It will be beautiful," Mrs. Bray murmured—"like the world seemed when I was young." She was not thinking of the decoration now, but of the beautiful thing of not being forgotten that had come so unexpectedly to her. The minister gazed at her a moment, and then again turned to the window.

"There will be no failure in the church decoration," he remarked aside to Mrs. Perry.

Nor was there, nor in the beautiful thing that had come to the little old woman. During the decorating she was like a different creature, and her face came to be scarcely recognizable as that which had looked so deprecatingly at them that afternoon at the poor farm. When it was all over the minister went to her impulsively and grasped both her hands.

"I cannot tell you how much you have helped me," he said earnestly. "The decoration has been a perfect success, and it is all owing to you. But there is another thing I wish to speak about. My housekeeper is about to leave, and I need some one to take her place. Will you come and look after the parsonage—and me, too, for that matter?" with one of his frank, boyish smiles. "My mother always said I wasn't capable of looking after my clothes and such things. I will try not to tax you too severely."

So the beautiful thing which had come to her was not of a day, but was to last through all the remainder of her years.

CHINESE IN CELEBRATION

Lines of Chinese, clad in garments ranging from the frock coat and "tile" of western ultra-civilization to the gorgeous silks of the Orient, marched last Easter Sunday in a great religious procession through San Francisco's Chinatown. The pageant and procession were followed by union services. Baptist, Methodist, Congregational, Presbyterian and Episcopalian church missions in Chinatown organized the celebration.

A feature of the day was the choral singing by young Chinese girls.

RESURRECTION

"He is risen! Would you know him,
In the early light of morn;
As the seals of sin were broken,
And grim Death of strength was shorn?

"He is risen! Would you know him,
If you met your risen Lord?
Would his loving, gentle accents
In your heart find sweet accord?

"Then, if He to you is risen,
On this Holy Easter Day;
Over sin, and death and sorrow
You will triumph, in His way."

—Selected.

To Welcome Easter.

Let us welcome Easter with joy. It is a day of commemoration of our redemption from sin and death, and which gives assurance of our immortality. Let us bring our tributes of roses and lilies, violets and jonquils and hyacinths, perfect first-fruits of earth's rarest blossoms of the springtime, and types of the cleansed, purified perfection which we ourselves will show forth when we are "risen with Him," who is the Resurrection and the Life.

THE LITTLE FAIRY

THERE was once upon a time a little fairy who helped all children play make-believe, and I expect that same little fairy is about today if people would only give it a chance.

This particular little Fairy Make-believe, crept through the keyhole of the door to a house where there lived two poor children, named Mary and Johnny, and they were trying hard to play at make-believe, for there was no food in the pantry or fuel for the stove.

Their mother had to work all day and Mary and Johnny wanted to make her think they were happy when she came home at night, so they talked

He came with a basket of food.

about the nice dinner they were having and how warm it was in the room, and how beautiful were the pictures on the walls.

Of course there wasn't any of it really there, but as Mary said: "It makes it easier when mother comes home to look happy when you make-believe all day that everything is nice and comfortable."

So the little Fairy Make-believe crept right into their hearts and made them so interested in pretending that they forgot their troubles and then the fairy did more, for while they were asleep that night she ran to the home of her old friend Jack Frost and asked his help.

She did not ask him not to make it colder by coming down from his home up in Northland. She asked him to come that very night and paint on the windows of the house in which the children live all the lovely pictures he could before morning.

Then she ran to another home where the people had plenty and to spare, and this sly little fairy crept into their hearts and nestled so close that the man put on his fur coat and while the children slept he came with a basket of food and left it at their home.

The next morning while Mary and Johnny were just opening their eyes there came a man with a big load of wood and coal which the same nice man had ordered who brought the food, for you see it was at his house that the mother of Mary and Johnny worked every day.

"You see, Johnny, that all we played make-believe about yesterday came true," said Mary. "I am so glad we did not let mother know we were hungry."

"We did not get any beautiful pictures," said Johnny, "and we made-believe we had those just the same as the other things."

Mary thought for a moment and then her eyes fell upon the wonderful paintings Jack Frost had made in the night. "Look," she said, pointing to the windows, "there is a beautiful castle and away up in the tower I expect there lives a beautiful princess.

"See all the mountains around the castle and the flowers like daisies growing out at the top. Below is a little lake and a swan sailing about, and beyond is the forest, and through it will come the prince who is to rescue the princess from the tower."

Johnny opened his eyes wide at first when Mary began the story, but before she had come to the prince part Johnny saw, too, what she did, and again the little Fairy Make-believe came through the keyhole of the door and crept close beside them.

And so some day when you cannot go out to play, find a window where Jack Frost has been at work and see if you cannot find wonderful things just as did Mary and Johnny.

LASA week I go geeva look at da zoo weeth some frien. And I gotta plenta trouble getta home weeth da health. I was never been data place before and I no tink I go again preety queeck.

We see een dat place some eleephant so me and my friens we stoppa for geeva look. One was beega son-of-a-gun alla right and he looka lika was almosta sama ting both ends. You know I tink one end of da eleephant ees some relash to da other end, but I dunno for sure.

I was eata peanuts when we looka at heem. And before I know wot can do he gota whole works. I buy dat peanuts and I getta preety sore when he taka way. I smasha dat beega ting wot he reacha out weeth and righta queeck he ees broka my hat and taka my watch, too. He trow me outside and I looka lika been een da wreck.

One guy run up and aska me wot's matter I try fighta hees eleephant. I say I no try fighta weeth heem—jusa getta back wot belonga weeth me.

And dat guy laugh righta my face and maka me sore, too. He tella me I am mad because da eleephant gotta my goat. I tella dat guy he was meestake. Dat elephant gotta my peanut and my hat and my watch, but I no losa da goat. I never owna da goat, but I tink eef I gotta one dat beega son-of-a-gun steala heem, too, I dunno.

Wot you tink?

A LINE O' CHEER

By John Kendrick Bangs.

THE OLD DAYS

I WONDER if the Old Days came again,
As oftentimes we mortals pray they may,
We'd live them as we lived before, for pain
Or joy, according to the special day?

For me the good that lay in olden days,
Lost in the hurry of the onward flight,
I still may find, I'm sure, in coming ways
That lie beyond the curtains of Tonight.

And for their ills, the lessons that they taught
Will shield my path from many a lurking sorrow—
And if of Old Days my New Days be wrought
I'll find them born again in my Tomorrow.

"What's in a Name?"

By MILDRED MARSHALL

FACTS about your name; it's history; meaning; whence it was derived; significance; your lucky day and lucky jewel

PATTY

THE charming name of Patty is not a diminutive of Patricia as is popularly supposed, but comes, curiously enough, from Martha. For that reason it means 'becoming bitter,' despite the fact that it has always been bestowed on the sweetest heroines of classic fiction.

Patty has a certain sacred significance since it is derived from the Martha who was one of the sisters of Bethany. It was she who is said to have destroyed by the sheer power of her faith a fire-breathing dragon which attacked her family while they were on a pilgrimage. Although she is popularly supposed to have been the sister of Mary Magdalen, there is some doubt among historians on this score.

But however it may be, Martha was the forerunner of Patty and gives to the latter name, not only a religious flavor, but a good old-fashioned name, which has become almost synonymous with domesticity. A curious fact in her evolution is that she was derived through Russia where Martha became Marfa under Slavic influence. The name was so much used by the daughters of the imperial family, that it was necessary for England, and later America, to evolve Patty as an endearment.

Ireland set the seal of approval upon Patty, preferring it to Martha, whose only survival is in "Mab," queen of the Fairies. France rejects Patty, but uses Marthe and Marthon. Marta is the Italian version.

Patty's talismanic gem is coral. It will give her strength, wisdom, and bodily health, according to old superstition. But if she breaks a bit of her coral, it's power vanishes as if the spirit imprisoned within had fled. Tuesday is Patty's lucky day and 7 her lucky number.

Pope Didn't Always Take New Name.

It is well known that the pope after his election assumes a new name. But it is not equally of general knowledge that such was not always the custom, although historians do not agree as to the time when this change of names was introduced.

Abbe Fleury, in his Ecclesiastical History, says that Sergius the Fifth was the first to change his name, while the historian Onuphre says that the first instance occurred in 956, when Cardinal Vitourien assumed the name of John the Twelfth, because he thought that his original name had a pagan ring. This motive evidently appealed to all his successors, for since the election of Pope Benedict the Ninth, in 1033, only one pope, Adrian the Sixth, elected in 1522, retained his former name.

Dorothy Phillips

Baltimore, Maryland, Dorothy Phillips claims as her birthplace. After receiving her education there and at Shaftesbury college she commenced her histrionic career with a stock company. Soon after she was attracted to the "movies," and although still in her twenties, she is a veteran of the screen.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

CAN YOU——?

THERE are certain things that every one who wishes to be well bred should learn how to do—certain things that one should master in order to establish smooth sailing on the sea of social intercourse.

Can you, for instance, glibly and without embarrassment introduce two strangers? Do you know how to introduce a business friend to your wife, your wife to the wife of a business friend, your son to your employer, your mother to the mother of a friend? None of these introductions should be worded the same, each calls for slight modification.

Can you, for instance, offer your seat to a woman in a crowded car in the proper way? Do you know the rules for good form when walking with a woman acquaintance in the crowded street of a city?

Can you word a letter asking a young woman to go with you to a dance, or, if you are a young woman, can you word a letter politely accepting or declining an invitation from a young man to a dance?

Now, all these seem like simple things to do, but they are things that sometimes baffle even persons who have had an opportunity to observe social usages. Stop and ask yourself if you can do them. They are the sort of thing that failure to understand sometimes causes no end of embarrassment when the time comes.

FIRST METHODIST CHURCH

Please do not forget, as this being Passion Week, the Thursday and Friday evening meetings.

The Easter Sunday services are as follows:—

Easter Sermon at 10:00 o'clock.

Sabbath school at 11:00 o'clock.

Easter program by the S. S. will be given in the evening. A splendid Easter program is being prepared for Easter Sunday evening beginning at 7:30 o'clock promptly, with orchestra music followed by recitations and songs from the primary departments of the Sunday school. The Juniors and Seniors will also carry out an Easter Feature through Tableaus and Pantomines with proper custuming and lighting effects. Appropriate scenery will also be used.

We extend a cordial invitation to all.

At the Liberty church the Sabbath school begins at 10:15 o'clock and the Easter program at 11:30 o'clock. Please remember that it is greatly desired to have every member of both Sabbath schools and churches present at the Easter services. Come and bring a friend. Rev. L. J. Brenner will conduct our Communion services at the Liberty church on Sunday the 23rd of April.

W. C. Bergmann, Pastor.

Latest Epworth League News

The Purple and Pink Contest contiunes to be a topic of interest. The attendance at the weekly meetings shows that both sides are working hard to win. Let's keep up the good work. As reported last week, the Purples were still in the lead, having 322 points to their opponents' 282. For last Sunday night the score was 81 to 68. This changes the total score to

Pinks 350
Purples 403

On account of the Easter program which is to be given next Sunday evening, we have thought it best to omit the usual League Meeting. For that reason, Easter Sunday will not be included in the contest. However, there will still be two nights left, the 23rd and the 30th of April. These two nights will tell the tale as to who furnishes the eats.

Miss McKahan is the leader of the meeting for April 23, and the topic is: "The Vision From the Mountain Side." If there is sufficient time, we may also have the Easter lesson discussed briefly at this time, so that we will not have to skip it entirely.

During a recent program, a number of questions dealing with Biblical characters and events were asked. But it seems that no one was able to give the answer to this one: "What king had his thumbs and great toes cut off by the leaders of Israel?" The king's name was Adonibezek, as you will find if you refer to the first chapter of Judges, verses 5 and 6.

Milvern Ell returned to Klemme last Friday after visiting about a week with his folks at Mankato, Minn. Milvern reports that his father is now in the used car exchange business.

Clifford Swartz went to Mason City Monday for a visit with his wife who is at a hospital there recovering from an operation for appendicitis. He reports that she is getting along fine.

Miss McKahan returned to her duties as high school instructor Monday after spending her vacation out of town. The Misses Smith and Everest returned from their spring vacation last Saturday.

J. P. Larsen & Sons are beautifying the appearance of thier meat market by giving the back room a new coat of paint. Other late improvements at that establishment is a new scale of the latest type.

Fred Arnold (Junior) does not seem to be improving as rapidly as could be desired, at the time of this writing, but prospects are a little better for a speedy recovery. He has been in the care of a trained nurse for nearly five weeks.

Mr. and Mrs. C. W. Wiles and Mr. and Mrs. Wm. Keraus entertained at a bid whist party at the former's home last Friday evening. Lunch was served after cards were played and all departed at a late hour declaring they had an excellent time.

Emery Schaefer and Earl Josten assisted in the Cantata entitled "The Good Shepherd," which was given at the First Methodist churc at Garner on Palm Sunday evening. It was a twenty-four voice cantata and was enjoyed by a very large audience, in fact te church was packed.

Einar Salling is putting up a real garage at his place in the southeast part of town. The building will be an object of beauty as well as useful. It is large enough for his cream truck and storage place for cream cans as well as plenty of room to spare for a n extra car or two.

Harold Gruetzmacher and wife of Belmond spent Sunday with his folks here, Mr and Mrs. Frank Gruetzmacher. Harold and wife are both teaching in the Belmond schools this year. Harold informs us that he has accepted the job of leading the band at Belmond for the summer.

Mrs. F. H. Ridder and Mrs. Wes Schuldt got up a married peoples' invitation dance last Thursday evening which was well attended, considering the stormy weather. All report a very good time; the crowd was a jolly one and the eats great. Many more would have attended if the weather had permitted.

C. W. Wiles is now a "Knight of the Grip." He began the job of salesman for the Walrehd Supply Co., of Des Moines on April 1st but on account of the bad weather has not gotten out on the territory to a very great extent, however, he has done a lot of business for the firm selling accessories and machihnery to elevators. He has sixteen counties in northern Iowa and four in routhern Minesota.

Abundant vitamin now contained in small yeast tablet

Yeast Foam Tablets are from 4 to 5 times as concentrated as the ordinary baking yeast. The necessary vitamin potency, therefore, is contained in a much smaller dose.

"I CONGRATULATE YOU," writes a well-known physician, "on your new therapeutic yeast. I am sure it will be welcomed by the medical profession and by thousands of people who dislike eating such large quantities of fermentative baking yeast—as well as by countless others who sought in vain for any appreciable tonic benefits in many drug-laden and untested 'vitamin' preparation."

This yeast supplies what modern foods lack

Yeast Foam Tablets correct a serious deficiency in present day diet by supplying the essential vitamin which is found in many raw foods but which is completely eliminated, in many cases, by the time these same foods reach our table.

This vitamin is necessary to digestion and the conversion of foods into healthy tissue and bodily vigor.

Without sufficient quantity of vitamin your body goes sick and you are only too aware of it in such signs as loss of appetite, failing strength and endurance, nervousness, sallow skin and other definite signals of vitamin starvation.

Yeast richest source of vitamin

In the yeast plant is an abundant store of this indispensable vitamin and in Yeast Foam Tablets there is nothing but **pure** whole yeast—millions of these tiny plants being concentrated in each tablet.

The vitamin potency of this new yeast is therefore high and, consequently, its tonic and reconstructive properties are most unusual.

Yeast Foam Tablets are made by the world's largest manufacturers of dry yeast, the makers for 45 years of the famous baking yeasts, Yeast Foam and Magic Yeast.

They are the result of two years of experiment conducted under the guidance of some of the country's leading medical scientists. Recommended by physicians and sold by druggists everywhere.

Extraordinary advantages of Yeast Foam Tablets

The only pure, whole yeast in easy-to-take tablet form.

They contain no drugs or other ingredients.

They do not form gas nor cause belching.

They are the only pure, whole yeast suitable for children; they do not cause fermentation.

Each lot is tested to insure high and uniform vitamin potency.

Northwestern Yeast Co., Chicago
Makers of the famous baking yeasts, Yeast Foam and Magic Yeast

90 Bushel to the Acre

Did you ever stop to think what you lost if you needed a new corn planter and didn't buy it? Three good ears of corn to the hill will make 90 bushels of corn to the acre. Every time your planter only drops two kernals it is cutting down your yield a third on that hill, and every time your planter misses it is cutting your down to naught an that hill. So if your planter is in bad shape it can easily lower your yield 20 to 25 bushels an acre.

If you need a planter and a don't buy it, you'll more than pay for it thru the loss in yield and still have the old planter.

We stlll have a few planters of the best makes. Ask the people that use he planter that we sell.

Our planter customers are satisfied

Paul Stille

Something to Think About

By F. A. WALKER

EXERCISING THE WILL

NOTHING is more fatal to growth of will than that form of indolence which shrinks from trial and experiment.

The person who is confronted by a new perplexity, loses his or her self-reliance and in despair cries, "what shall I do," is not destined to go very far afield in the creation of song or story or in the crafts.

He must, like boats, keep near the shore and be ever ready to scud into the harbor.

All the achievements in the arts and sciences result from exercising an individual will and strengthening it in difficult situations.

* * * *

The practice of doing things habitually, as a bookkeeper adds a column of figures or a typist rattles off a routine letter, increases speed and contributes a certain quality of efficiency, but it does not by any manner of means improve the volitional power.

No new or original force is brought into play.

The mind functions from habit without any strain, unconscious of exertion. Mere habit is the impelling power which if persisted in for a long time weakens the will and eventually retards progress and originality.

* * * *

The men and women who rise to the heights are those who every day exercise their will-power in new spheres. In their self-appointed occupations they call up their reserve strength, whip their brains to a faster gait and discipline their resolution.

They think and act for themselves, master their own problems by perseverance and mount step by step to places where rewards are largest and honors are unblemished.

They early learned how to depend on themselves by reasoning and using their judgment. They dug down to basic principles and discovered the "whys and wherefores."

* * * *

Then followed a robustness and an ability of mind which developed will-power of the highest order.

And this high-powered will is available to all who will drill themselves to hard work and avoid slothful habits.

This special exercise of the intellect which is necessary to expand the will may be irksome at first, but if persisted in it becomes in a little while exhilarating and carries us forward at a wonderful pace without wearying in the least.

If you would test this to your own satisfaction and advantage, try it for a month and note at the end of that time how you have improved in mentality and self-reliance.

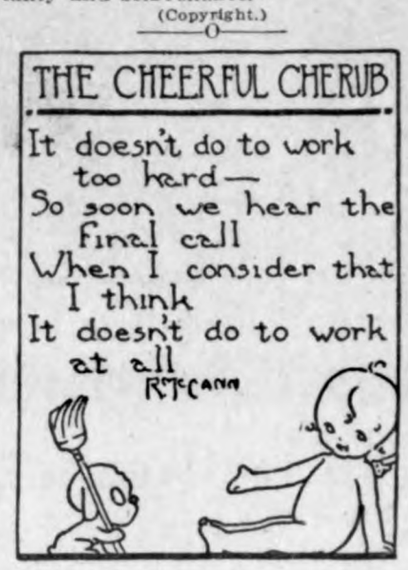
THE CHEERFUL CHERUB



KIDDIES SIX

By Will M. Maupin

THE FLAT OWNER'S FATE

A RICH man built a row of flats,
All modern and complete;
A velvet lawn stretched out in front
Along the noisy street.
And then he tacked a sign up high
Above the passing crowd:
"These handsome, modern flats for rent—
No children are allowed."

He garnered rents in golden store
And riches high he piled,
The while the echoes never rang
With laughter of a child.
No childish feet went pitty-pat
Adown the marble halls;
The gloomy corridors ne'er rang
With children's happy calls.

The rich man died, as all men must,
And neared St. Peter's gate,
And o'er the golden arch he saw
The words that sealed his fate.
The words he saw were writ in flame,
And seared his hard heart well:
"This place is full of little ones—
You'll have to go below."

Stopping the Discussion.

Her Husband—Roughly speaking, you spend about——

Mrs. Junebride—B-r-roo-hoo! I don't want you to speak roughly to me. I won't have it.

Uncommon Sense . . .

By JOHN BLAKE

DON'T MEDDLE

THERE may be somewhere in the world a man who can run his neighbor's business as well as his own, but we doubt if you ever met him.

There may be a woman who can successfully raise her own children and keep her own house, and at the same time be profoundly interested in the way her next-door neighbor raises her children and keeps her house, but if there is such a woman she has managed to keep herself pretty well hidden.

Your neighbor's affairs are interesting, of course. Their mistakes, which are very many, are deplorable. The way they treat their children, the way they let their dog bark all night, the reckless manner in which they drive their car are all things which ought to be bettered.

You could better them, of course. But the moment you begin to better them, your affairs will be neglected.

You will find, as you go through this world, many men and many women and many methods that you do not approve of.

You probably won't like the girl your neighbor's son is going to marry and will feel that you ought to talk to him about her.

Don't do it. He will misunderstand you, and may thrash you for it.

You doubtless think your neighbor is to blame because all the servants leave her as fast as they are hired. Probably she is to blame. But you won't get any gratitude for showing her why she is to blame. People are "unreasonable" about things like that.

Your neighbor may get down to work too late in the morning and get home too early at night. You may feel that he is neglecting his work, and is in a fair way to get fired because of it.

But it would be a mistake to tell him so. Perhaps he can afford to keep easy hours. Perhaps he makes them up by working at night. You don't always have all the facts on which to base your opinion of him.

Your neighbors, you will find, will get along about as they have been doing whether you help them or not. And they won't be at all pleased at your assistance.

Furthermore, you will be so busy giving this assistance that your own affairs will get in a mess. And when they do, you will be insulted if your neighbors tell you you ought to have spent more time attending to them.

THE WILD FLOWERS

SAVE the wild flowers.

Slowly, but surely, many of the most beautiful species of blooms are disappearing. Constantly those who love them carelessly pull them up by the roots, or the uncaring destroy them with little less than criminal intent. Virtually nothing is being done to give them lengthened lives.

Yet there are thousands who find some of the greatest pleasure in tramping through the woods and fields and viewing the fragrant beauties in their native haunts. God was kind in giving us so many varieties to enhance the landscape and make the world more beautiful. And those who love the wildflowers would be remiss in their duty to themselves and their fellows if they did not use every possible influence to have the floral species preserved.

Some may contend that nothing of material value is to be gained by exertions designed to prevent the flowers from being wiped out. They are wrong. Aside from the purely esthetic side of such work, it is of great importance to the education of the children who come after us. But of still greater importance is the influence the flowers will have on the lives of the people.

No one can look upon things which are beautiful without feeling more happy, or without a higher appreciation of God's greatness and recognizing that man is small. No one can spend part of his time admiring the flowers and breathing their fragrance without experiencing a thrill of enjoyment or without thinking better thoughts and feeling a desire to make his own work more nearly perfect. We, therefore, should be more thankful for the millions of blossoms so frequently trampled underfoot, and there should be greater effort to keep them blooming along all pathways.

A movement to preserve the species of wildflowers is taking practical form in one of the big cities of the United States. Through the influence of nature lovers, park officials have set aside a part of one of the public parks for a wildflower preserve.

Every community would assure greater happiness for its people by protecting these beautiful works of God.

Mother's Cook Book

With our sharp weapons we shall the fray,
And take the castill that thou lyest in;
We shall thee flay out of thy foule skin,
And a dish, with onyons and pepper,
We shall thee dress with strong vynegare.
—Spenser.

WHAT TO EAT

A VERY nourishing dish is onion chowder. Cook two cupfuls of minced onion in three-eighths of a cup of butter for thirty minutes or until the onion is soft. Add eight potatoes, pared and sliced, one teaspoonful of pepper, one tablespoonful of mixed herbs (such as sage, marjoram, sweet basil, and one quart of water. Cook until the potatoes are tender, then add three cupfuls of milk and one cupful of cream. Let come to the boiling point and serve with pilot crackers.

Corn Flake Macaroons.

Take the whites of two eggs, beat until stiff, adding a pinch of salt and one cupful of sugar very gradually, then fold in one cupful of corn flakes and one cupful of ground nutmeats, or a mixture of coconut and ground nutmeats, two tablespoonfuls of flour and a teaspoonful of vanilla.

CHECKS IN FAVOR

Many Kinds of Weaves Ready for the New Season.

Outfit Requires Belt, and Paris Often Advocates the Use of Three, Writer Says.

Surely it's a checkered spring. There are checks in woven block patterns, and checks made by single barred lines. There are tiny checks, big checks, in-between checks. Some checks show two colors, others three, and then again there are the more subdued one-color fabrics where the weave makes the check. You may use the checks on the bias or on the straight; but use them you must, for something checked you should have if you want to look smart this spring.

Besides the French voiles checked in eponge, there are others in woven block checks in color combinations so attractive—copper and beige, or strawberry and cream. Then there are the smaller, daintier checks of rose and white, Harding blue and tan, lemon yellow and gray. They all make the prettiest of frocks and require but little trimming. Sometimes a belt is all that is necessary; but to get the smart effect the belt must be dropped low, often as low as the hips. And Paris is advocating not only one belt, but often three, warns a writer in the Woman's Home Companion.

Simple slip-on dresses of checked Japanese crepe are too smart for anything, worn with hats of the crepe in

Black and White Check.

the same checked pattern. Or if not an all-checked hat, then perhaps one of the new, cute little poke shapes. It may be of white pineapple straw with the checked note introduced in two or three cotton tissue or gingham flowers.

THE TAILORED STREET FROCK

Interesting Fabric Combination Is Featured in Winsome Frock for Spring Wear.

An interesting fabric combination is featured in a tailored street frock for spring. The dress is of navy canton crepe, with waistline a trifle lower than the normal waist, a straight, slightly gathered skirt and full-length flaring sleeves. It is trimmed with a lighter blue duvetyn which forms narrow side panels, each panel approximately three inches wide. The lighter blue duvetyn also binds the wide bateau neck and the sleeves. These sleeves are slashed from wrist to shoulder, and the duvetyn binding extends around every edge. A line embroidery in red appears just inside of the duvetyn binding, and the panels are embroidered in red.

This dress is sufficiently different to be noticeable, but it is conservative, and the type of frock that a well-dressed woman who is not interested in freak styles or bizarre effects would wear.

Incidentally, the use of duvetyn or other heavy fabric as a trimming for a sheer material may come as an acceptable suggestion to the woman who is making over a last season gown.

The duvetyn panels on the dress are two or three inches longer than the skirt proper, and the ends are folded under as a finish.

The continued vogue of crepe weaves of all sorts is one of the present season fashion points, with unusual fabic and color combinations also noticeable. A wool fabric frock may be trimmed with organdie, a heavy silk, such as faille, with handkerchief linen, and a sheer silk may find a fabric such as duvetyn a desirable selection as a trimming touch.

SPRING FASHIONS

A gown of white crepe de chine has panels of fan-plaiting and bands of tiny black roses.

A chiffon frock of rose and lilac has crystal and pearl embroidery on the front and girdle.

A wrap of white ermine is lined with black velvet and collared and girdled with silver fox.

Latticework in chenille rope or rolled bias folds of the material is used as a blouse trimming.

A blouse of white crepe is trimmed with oblong panels worked in cross-stitch and a frilled jabot.

A frock of red velvet has an overskirt of brown net caught in a chou on one side at the waistline.

A frock of navy blue piquetine has a collar and sleeve puffs of organdie and is trimmed with narrow metallic braid.

The informal dinner gown is generally long and straight, girdled about the hips, and with long, flowing sleeves.

A vest of beige pique, edgings of tan silk braid, and rows of bone buttons lend interest to a dress of navy blue jersey.

Panels of blue are used on the skirt of a dress of silver cloth. The low-placed girdle drops a garland of silver flowers.

A seamless frock of leather-colored kasha cloth is embroidered in chenille and worn with a peasant blouse of cream voile.

A black crepe frock has its side panels embroidered with a silver bead vine, green chenille leaves and red velvet flowers.

An excellent hat for the black crepe frock is a huge black satin one drooping under a bunch of violets placed almost in front.

A gown of blue crepe romaine has Grecian draperies embroidered in crystal bugles and silver beads, and a matching girdle.

A street frock of black crepe romaine has a waistcoat effect and cuffs of white crepe romaine embroidered in blue soutache braid.

PAINT OR STAIN THE WALLS

Guardians of Health Assert That Paper Retains Vermin and Disease Germs.

Many physicians and sanitarians contend that it is susceptible of proof that certain wall conditions are detrimental to health. They claim that materials pasted on the wall with the vegetable pastes, used for the purpose, may harbor not only vermin, but disease germs. They contend that many of the ills, particularly of children, come from unsanitary wall conditions.

They set forth instances where contagious diseases have been communicated a long time after the rooms were occupied by the diseased party and when the paper was being removed from the wall.

If these things are true, and we have it on good authority that they are, the painting or coloring of walls would seem to be a matter of good judgment on the part of the property owner.

One of the Smart Things.

Heavy ecru lace combined with black silk crepe is one of the smart things in the new French clothes. One charming evening frock shows a bodice of the ecru lace with a skirt of black.

GRAY FOX FURS FOR SUMMER

The summer fur is the most important feature of milady's wardrobe, and this gray fox bids fair to lead the race in popularity.

AN EASY WAY TO COLOR LACE

Yellow Ochre Serves Satisfactorily in the Dry Cleaning of Various Articles.

White lace, net, tulle, or anything of similar texture, can quickly be transformed into a cream-white or the fashionable yellow shade in a very simple way. It being a dry-method the lace loses none of its newness, and the most delicate lace may be subjected to this treatment without harm.

Put a quantity of ochre (yellow) in a box or paper bag, drop the material inside, and shake the box until the powder has sufficiently tinted the lace. After removing the material, shake out any superfluous powder. If a pale tint is wanted, mix rice powder with the ochre. Dingy lace waists may take on a new appearance if treated to an ochre bath.

Chintz.

Not only for little girls are there lovely frocks in chintz, but for grown-ups, too. Many of them are in the real English patterns on a light ground dotted with black.

A PATRON OF THE ARTS

And a Loyal Patron She Was, Only the Art She Supported Was but Deception

By ELEANOR PORTER
Author of "Pollyanna," "Just David," Etc.

Copyright by Eleanor H. Porter.

RS. LIVINGSTONE adored art—Art with a capital A, not the whose sign-manual is the milk-ool or a beribboned picture . The family had lived for some in a shabby-genteel house on n Hill, ever since, indeed, Mrs. gstone had insisted on her hus-s leaving the town of his birth noving to Boston—the center of (according to Mrs. Livingstone). re she attended the Symphony rts (on twenty-five cent tickets), rattled knowingly of Mozart and oven; and here she listened to or Bernhardt from the third bal-of the Boston theatre.

be sure, she occasionally read a or a book of poems a trifle less t in character, but never unless orld had rung with the author's s for at least a score of years. stamp of Time's approval was utely necessary to the aspirant Mrs. Livingstone's approbation. d, there was only one of the t-day celebrities who interested od lady at all, but that one at-d with a power that compen-for any lack in the others.

course he was famous—he had or thirty years. She called him nimitable One," and set him up

t man!" she exclaimed breath-"That famous creature with rld at his feet!"

stout gentleman opposite smiled, s little eyes narrowed to mere light. He had counted on this. employer was indeed famous—amous, though perhaps not in y this good lady supposed. It was not the first time he had traded on this convenient similarity of names.

"I thought, madam, we had made no mistake. I was sure you would deem it a privilege. And as for us, your keen appreciative sense of the fitness of things will—er—will make it a favor to us if you comply with our request," said he, floundering in helpless confusion for a moment.

But Mrs. Livingstone did not notice. She went through the rest of that interview in a dazed, ecstatic wonder. She only knew at its conclusion that she was to go up to Vermont to care for His house, to live in the rooms that He had lived in, to rest where He had rested, to walk where He had walked, to see what He had seen. And she was to receive pay—money for this blissful privilege. Incredible!

It did not take Mrs. Livingstone long to make all necessary arrangements.

As they stepped from the train to the platform at the little country station, Mrs. Livingstone looked about her with awed interest. He had been here! The jouncing yellow stage coach became a hallowed golden chariot, and the ride to the house a sacred pilgrimage.

"Only think, Mabel, He walked here, and sat here," said the woman adoringly, suiting the action to the word and sinking into a great Morris chair.

Mabel sniffed her disdain.

"I presume so; but I should like to know where he ate—maybe he left something!"

Mrs. Livingstone rose in despairing resignation.

The next few days were a dream of bliss to Mrs. Livingstone. The house was a handsome mansion set well back from the street, and surrounded by beautiful grounds which were kept in order by a man who came two or three times a week to attend to them. Mrs. Livingstone had but herself and Mabel to care for, and she performed the work of the house as a high-priestess might have attended upon the altars of her gods. It was on the fifth day that a growing wonder in the mind of Mrs. Livingstone found voice.

"Mabel, there isn't one of His works in the house—not one. I've been everywhere!" said the woman plaintively.

"Well, mother," laughed the girl saucily, "that's the most sensible thing I ever knew of the man. I don't wonder he didn't want them round—I shouldn't!"

"Mabel!"

"Well, I shouldn't!" And Mabel laughed wickedly while her mother sighed at the outspoken heresy. It was plain that Mabel had no soul.

Mrs. Livingstone was furthermore surprised at her idol's taste in art; some of the pictures on the wall were a distinct shock to her.

The house was to be sold completely furnished, with the exception of the books and pictures. The price was high, and there were but few prospective purchasers. Occasionally people came to see the property; such Mrs. Livingstone conducted about the house with reverent impressiveness.

"It is something to buy a house owned by so famous a man," she insinuated gently one day, after vainly trying to awaken a proper enthusiasm in a prim little woman who was talking of purchasing.

"Indeed!" replied the other, frigidly. "Do you think so? I must confess it is somewhat of a drawback to me." And from that time Mrs. Livingstone wore an injured air—the young mother's baby had been snubbed—grievously snubbed.

Toward the last of the summer a wild plan entered Mrs. Livingstone's brain; and after some days of trembling consideration, she determined to carry it out. The morning mail bore a letter from her to the Inimitable One through his publishers. She had learned that he was to be in Boston, and she had written to beg him to come up to his old home and see if it was being cared for to his satisfaction. The moments dragged as though weighted with lead until the answer came. When at last it was in her hands, she twisted a hairpin under the flap of the envelope and tore out the letter with shaking fingers.

It was from the Inimitable One's private secretary. The Inimitable One did not understand her letter—he was the owner of no house in Vermont; there was doubtless some mistake. That was all. The communication was wholly enigmatic.

The letter fluttered to the floor, and Mrs. Livingstone's dazed eyes rested on the gardener in the lawn below. In a moment she was at his side.

"Peter, isn't this house owned by a very famous man?"

"Indade it is, ma'am."

"Who is he?" she demanded shortly, holding her breath until that familiar name borne by the Inimitable One passed the other's lips.

"Well, Peter, isn't he the writer? What does he do for a living?" she faltered, still mystified.

"Do? He fights, ma'am. He's the big prizefighter that won——" He was talking to empty air. The woman had fled.

LIVE STOCK

SERUM WILL PROTECT SWINE

Erroneous Impression Prevails That Hog Cholera Will Be Eradicated in Few Years.

(Prepared by the United States Department of Agriculture.)

The impression that hog cholera is a disease that will be eliminated before many years through the use of anti-hog-cholera serum has been spread throughout the country, but there is little ground for such a belief, says the United States Department of Agriculture. The serum treatment, when properly given, will protect hogs against the disease, but it does not go to the source and eliminate the germs from the country, which would be necessary if hog cholera is to become a thing of the past. It might be possible to eliminate the disease if every hog in the United States could be kept immunized all of the time, but such a measure would be impractical, if not impossible.

Hog cholera is of varying prevalence, both as to the time of the year and as to periods of several years. In the fall—October and November—there is more of this disease than in the other months. The number of hogs per thousand affected by it changes greatly from year to year, also. There have been years, such as 1887, 1897 and 1913, when cholera raged throughout the corn belt, causing great losses to farmers. In the years intervening between these high points the losses were relatively low.

Since 1913 hog cholera has been but slightly prevalent as compared with the worst years, but there is no assurance that other great waves of the disease will not occur as they did before serum was used. It has been but eight years since the last high point in losses from cholera, and the records of the Department of Agriculture show that the period between the high points of prevalence is usually 10 years or longer.

This fall there are reports of increased losses from cholera, but some increase is to be expected every fall.

Farmer Should Immunize Every Hog on First Suspicion of Cholera.

The fact that farm products have brought smaller returns in recent months has no doubt caused less serum to be bought, and many farmers have lost their herds when they might have saved them. Perhaps they could not have prevented the occurrence of the disease, but they could have prevented the hogs from dying of it.

Getting rid of hog cholera is not a simple matter, which may be appreciated when it is remembered that the infection has been carried to all parts of the United States and that the ways in which it spreads are probably not all thoroughly known. It may be many a long year before this plague of the swine industry is eliminated. The best thing to be done now is for each farmer to keep close watch over his herd, and on the first suspicion of the disease immunize every hog.

Some men now consider immunization against hog cholera as one of the regular expenses of pork production and have it done every year. They realize that it is not a cure, but only a prevention against loss. Even when serum is used there is sometimes a loss, but in nearly all cases the method is very successful. It is the only dependable means available for preventing losses from hog cholera.

Easy to Make Runts.

It is easy to make runts out of well-bred pigs by not feeding the sow well. A brood sow should receive, therefore, all the concentrates she will clean up as soon as the pigs are large enough to take the milk.

Balanced Feed for Cattle.

Corn alone is excellent for fattening cattle. Add to it, say, 10 to 20 per cent of its weight in linseed meal, cottonseed meal or tankage, and you get a ration that is still better balanced. Or feed the corn with oats and alfalfa, instead of all corn stalks and other roughage.

Time to Buy Sheep.

The present price of wool and mutton is so far out of proportion to the present price of sheep that it looks like now is the time to buy sheep.

TIME TO MARKET BERMUDA ONIONS

Much Activity in Texas Fields in Making Preparation as Season Approaches.

INCREASE SHOWN IN ACREAGE

Growers and Shippers Enthusiastic in Stating That Department of Agriculture's Service Is of Great Value.

(Prepared by the United States Department of Agriculture.)

There is great activity in the Texas onion fields these days in preparation for the rapidly approaching marketing season. The commercial acreage planted to Bermuda onions is estimated by the United States Department of Agriculture at 12,117 acres, and it is forecast that 11,522 acres will be harvested. This compares with 10,503 acres harvested in 1921.

As heretofore the Department of Agriculture will maintain a field station at Laredo to keep the growers and shippers informed of market conditions generally throughout the country. Carlot shipments, available supplies, prices, weather conditions, and the many factors that affect the marketing of onions will be reported to the growers daily.

Financial success in producing and marketing Bermuda onions is possible only when the economic relation between the northern-grown winter storage crop and the perishable Bermuda crop is taken into consideration, say federal marketing experts. The Texas crop is marketed in a period of two months, and the highest type of marketing efficiency is required. There may be a large carry-over of northern-grown storage onions; the markets for the Bermuda crop are a long distance from producing points with consequent high costs for transportation; bad weather may quickly impair the quality of the stock; the crop may be larger than the country can consume; and toward the end of the season there is competition from other early producing states.

Service of Great Value.

The results of years of study of the scientific production and marketing of onions is available to the growers, and producers and shippers are unanimous in stating that the department's service has been of great value to them. Federal market reporters located in large consuming markets, such as St. Louis, Cincinnati, Kansas City, Chicago, Pittsburgh, Philadelphia, New York, and Boston, report daily to the Laredo office local market conditions, such as supply, demand, and prices.

Cleaning and Grading Onions.

The department also has co-operative arrangements with the various railroads whereby the shippers are informed of daily carlot shipments of onions everywhere in the United States.

For marketing purposes the Texas onion-producing section is divided into three districts: The Laredo district, consisting of Webb county, the upper counties, comprising Dimmit, Frio, La Salle, and Zavalla counties; and the Gulf Coast district, embracing the territory contiguous to the St. Louis, Brownsville & Mexico and the San Antonio & Arkansas Pass railroads.

Shipments are made to every state in the Union east of the Rocky mountains, the principal markets being New York, Pennsylvania, Illinois, Missouri, Ohio, and Massachusetts. New York alone has taken in the past as much as 20 per cent of the entire carlot movement. Laredo is the shipping center for approximately one-third of the onions from the entire section, and headquarters of practically all buyers and operators are there located.

Seed From Canary Islands.

The majority of the growers obtain their seed from the Canary Islands; large quantities of seed are also obtained from California. The seed is planted by drill between August 15 and September 20, and the plants remain in the seed bed 60 to 70 days before transplanting to the field. Great care is exercised in transplanting. The ground is plowed, thoroughly disked and harrowed, the roots and tops of the plants are carefully trimmed, and only well-rooted plants are selected. In caring for the crop it is essential to keep the soil moist, and to avoid, by frequent shallow cultivations, cracking or baking. Harvesting begins around April 1 in Webb county and continues to about May 15. The harvest season in the upper counties is five to ten days later.

SELECTING TOMATOES TO PREVENT DISEASE

Norduke Is Highly Resistant to Wilt Ailments.

Four Other Varieties, Marvel, Norton, Columbia and Arlington, Are Also Recommended—Big Annual Loss Is Avoided.

(Prepared by the United States Department of Agriculture.)

In the course of work on the selection of tomatoes that will resist the wilt disease, which causes a large annual loss in the tomato-canning states, the United States Department of Agriculture has developed a variety called Norduke, similar to Stone, but highly resistant to wilt. Four other wilt-resistant varieties have already been produced, known as the Marvel, which is a medium early tomato selected from Merveille des Marches, bearing a heavy crop of smooth red fruit; the Norton, selected from Stone, producing a heavy yield of large, smooth, solid red fruit, which ripens slowly, and therefore ships well; and Columbia and Arlington, medium late varieties, selected from Greater Baltimore.

The Marvel is an excellent variety for forcing, for medium early trucking, and for home gardening. The Columbia, like the Arlington, which has been temporarily withdrawn for purification, because of mixtures found in the seed in 1920, is better for canning than for the table, because of its somewhat flat shape, which does not permit slicing as successfully as some of the rounded tomatoes. The Norton and the newer variety, the Norduke, are late tomatoes, excellent for canning, for home gardening, and late trucking. The Norduke shows the highest resistance to wilt of any tomato, and also some resistance to the leaf-spot disease.

Field of Staked Tomatoes.

Wilt-resistance strains of tomatoes are developed by selecting from a variety which possesses moderate resistance, individuals which show higher resistance. This resistance can be combined with other desirable qualities in other varieties by crossing. Seeds from resistant strains have been distributed through state experiment stations to canners and others for testing, and some of the varieties are now being carried in the catalogue lists of seed houses.

TOMATO-SEED CAKE AS FEED

Value as Source of Protein for Live Stock Has Been Demonstrated By Experiments.

The value of tomato-seed press cake as a source of protein feed for live stock has been demonstrated by a series of experiments recently conducted in the protein investigation laboratory of the bureau of chemistry, United States Department of Agriculture. It has been previously estimated by the department that over 2,000 tons of tomato seeds are largely wasted annually as a by-product in the manufacture of catsup and other products by the tomato pulping plants in the United States. Tomato seeds contain approximately 22 per cent of a valuable oil. The press cake which remains after expelling the oil contains about 37 per cent of protein, which chemical and nutritional experiments have shown to be of high food value. Young albino rats were fed on a diet in which tomato-seed press cake furnished the only source of protein, the diet having been made adequate in other respects by the addition of the other essential dietary factors. On this diet the rats were enabled to grow at the normal rate, showing that the proteins of the tomato seed contain all of the amino acids essential to the growth of animals. It was also found that the press cake contains sufficient amount of the water soluble, or anti-beri-beri vitamine.

RAPE GOOD SUMMER PASTURE

Takes High Rank for Furnishing Succulent Feed for Hogs or Sheep —Easily Grown.

Among the crops which can be grown for succulent pasture for hogs or sheep during the summer and fall months, rape takes high rank. It furnishes abundant food which is greatly relished by those animals; it is easily grown and can be sown most any time in the spring or early summer after there is no further danger of severe frost. It will endure severe frost in the fall and can be pastured late provided stock is kept off when it is frozen.

POULTRY

PIGMIES OF POULTRY WORLD

Bantam Breeds Have Distinct Utility Value for Egg Production for Family Use.

(Prepared by the United States Department of Agriculture.)

The Bantam breeds gained their popularity as ornamental fowl and as playthings for children and grown-ups, but, says the United States Department of Agriculture, they have also a distinct utility value for egg production for family use. There is also a good demand for eggs for hatching and for breeding stock of good quality. Because of their small size these pigmy breeds often have the advantage over larger fowls where only a very small space is available for the flock. They are easy for children to handle, and the ownership of a few Bantams often is the beginning of a real interest in poultry raising.

The various breeds of Bantams, their characteristics, and methods of management are discussed in Farmers' Bulletin 1251, The Bantam Breeds and Varieties, the fifth of a series on Standard Varieties of Chickens. The various breeds, says the bulletin, have not been raised with the idea of egg production and, as a result, the average is not very high, probably around 175 eggs in a year. The eggs vary in size, as do the different Bantam breeds, ranging from 12 ounces a dozen to 18 or 20 ounces. The color of the eggs runs from white to dark brown. Some of the breeds have a tendency to lay for a fairly long period, but the Brahmas, Cochins and Silkies are apt to be broody. Since many of these kinds have been developed from the larger standard breeds they have many of the same characteristics.

White Cochin Bantam.

Reports collected from Bantam breeders show that the average hen will eat from 25 to 35 pounds of feed in a year, which is about one-half as much as a hen of the Mediterranean breeds or one-third as much as a hen of the larger breeds would eat.

A copy of the bulletin may be obtained free by addressing the Department of Agriculture at Washington, D. C.

FIND HIDDEN TURKEY NESTS

When Confined in Pen Until Late in Day, Laying Hen Will Go Straight to Her Eggs.

A quick and easy way to find stolen nests of turkeys is to confine the birds from early morning to late afternoon. The laying hens will then go straight to their nests to lay the eggs which they are holding, say poultry specialists of the United States Department of Agriculture. When turkey hens have free range they nest usually in obscure places and often wander a half mile or more from home before they find a nesting place that suits them.

If attractive nesting places are prepared about the barnyard, the turkeys sometimes lay in them. Such nests are easily made from boxes or barrels, or by scooping out a little earth in the shape of a shallow bowl, piling brush round it to satisfy the hen's desire for seclusion. The nest most preferred by turkeys consists of a barrel laid on its side, in which straw or hay is placed. When confined in a breeding pen several turkey hens may lay in the same nest, but on free range each bird usually makes her own nest. Turkeys do not range far during cold weather. In the north, where the laying season often begins when there is still snow on the ground, the hens are more likely to select their nests near home.

LEAKY POULTRY HOUSE ROOF

More Annoyance From Damp Quarters in Spring Than in Winter on Account of Rain.

There is usually more annoyance from leaky poultry house roofs in the spring than in the winter, because more rain occurs. Also, in winter, ice and snow may remain for weeks on a roof without melting, and really assist to protect against the winds; but in spring any leaky places will be openings for beating rains. Roofs should be repaired at once, if there are any cracks or leaks at all or the result will be damp quarters and the flock will probably be ravaged by colds and roup.

Mrs. Clara Kirkwood came up from Goodell Saturday for a visit with Mrs. A. Kirkwood. Clara is recuperating from the effects of a recent operation.

William Baack returned from the Mason City hospital last Thursday. "Bill" looks a little peeked yet but he is gradually improving in health and will be able to step around real lively in a short time.

Mrs. Henry Lewis and Mrs. Lew Lewis returned Monday evening of this week from several days visit at St. Paul, Minn., with relatives and friends.

Mrs. L. H. Yost, of Donnelly, Minn. who has been visiting her mother at Woden came to Klemme Tuesday for a visit at the J. N. Day and Wm. Smith homes. The Yosts formerly lived near Klemme.

Easter Headquarters

EASTER CANDIES——
You will find a dandy assortment of Easter Candy here—the kind of easter candy the kids all like such as easter eggs, etc. Also a nice line of Fancy Boxed and Bulk Chocolates.

CIGARS, CIGARETTES——
We carry all of the popular lines of Cigars and Cigarettes. You will find that our "smokes" are always nice and fresh as we turn our stock fast and keep a fresh supply. Also nice fresh smoking and chewing tobacco.

T DON'T PAY TO BAKE——
When you can get nice fresh Bread every day here. Always some specials each Saturday.

FORD SALES SHOW RAPID INCREASE

Rush of Orders Boosts April Output 101,164

Ford retail sales showed a rapid increase in volume during March, says a report from the Ford Motor Company, Detroit, and have necessitated the building of 101,164 Ford cars and trucks in April in order to meet the requirements.

Thi iss the largest output of Ford cars ever scheduled for April, being 10,000 above the same month a year ago. It also marks an early opening of the spring and summer buying and seems to indicate that even more Ford cars and trucks will be sold in 1922 than in 1921, which was a banner year.

Orders for Ford cars and trucks have already exceeded the supply in many parts of the country and purchasers are finding it necessary to accept deferred delivery. The Ford factory at Detroit is getting into capacity production as fast as possible, with the hope of preventing a similar shortage when the spring-summer rush begins.

Ford dealers throughout the United States are urging Ford customers to place their orders early and thus prevent the possibility of having to wait for delivery.

Epworth League Items

The only thing we have to announce this week is a cange of leaders for April 23. George Bergmann will lead this meeting instead of Miss McKahan, and the topic will be: "The Vision From the Mountain Top," as announced some time ago. As this will be "Institute Sunday," it is desirable to have as many in attendance as possible, because it is an important date in the League year.

Earl E. Josten, League Pres.

For Recorder

I hereby announce myself a candidate for the office of County Recorder, subject to the decision of the voters at the June 5th, 1922, Primaries. Oscar H. Wenck. tf.

FOR AUDITOR

I am a candidate for re-election subject to the decision of the voters at the Republican primary election held in June 1922.

Chris Jacobs

CHUCRH NOTES

FIRST METHODIST CHURCH

The audiences that filled both the Liberty and Klemme churches on Easter Day were the largest we had thus far for the year. What an inspiration it is to the pastor and the Sunday school workers to see the pews filled with eager listeners ready to receive the message. Both the Liberty and the Klemme Easter programs were well prepared and almost perfectly carried through. It was amusing to see how much the little ones enjoyed to step out before the audience and speak their little pieces and sing their little songs. Can we estimate the value that comes to their young lives through such programs? The truths that fix themselves upon their minds to bless them in later life? Sunday school superintendent, teachers and workers, keep this in mind when the work seems hard and your patience is put to the test in preparing and training for such programs. Much credit and a special vote of thanks is due you from every parent and the whole congregation for your efforts and patience which were not in vain. The Sunday evening audience in Klemme church that not only occupied every seat and standing room available but many standing outside greatly appreciated the beautiful scenery which decorated the platform, as also the pantamines and the inspiring music given by the orchestra.

The success of this very inspiring Easter Program is greatly due to the untiring efforts of Mr. and Mrs. P. M. Griesemer and their committee of helpers who spent much time and work for our benefit and enjoyment.

Next Sunday morning there will be neither preaching service nor Sunday school here in Klemme, but instead we will hold a union Communion service at the Liberty church. Sunday school there at 10:00 o'clock and Communion sermon at 11:15 A. M. The district superintendent, Rev L. J. Brenner will have charge of the service. In the evening Rev. Brenner will preach in Klemme. Epworth League at 7:30. Sermon at 8:00 o'clock. The program which was mentioned last Sunday evening will be postponed two weeks.

The Quarterly Conference will be held on Saturday evening at the Liberty Church at 8:00 o'clock sharp. All members should be present.

W. C. Bergmann, Pastor.

METHODIST EPISCOPAL CHURCH

Morning worship at 10:00 A. M.
Sunday school at 11:00 A. M.
Evening worship at 7:30 o'clock.

The Easter services were well attended and enjoyed by all.

The Pastor and Superintendent of the Sunday school desire to thank the teachers, scholars and all those who in any way helped to make the Easter Day services and program a success. Thank you!

The W. F. M. S. are planning to celebrate their thanksgiving day very soon. The ladies will have control of the services on that Sunday, to be announced later. Special music and addresses will be rendered. At the evening services the pastor has been asked to deliver his lecture, "Reminiscences of my life in the West Indies." with negro stories, sayings and proverbs. The offerings of the day will be on behalf of the Womens work in foreign countries.

The Sacrament of Baptism was observed at the home of Mr. and Mrs. Clarence Kluckhohn on the afternoon of Easter Day when their infant son, Eugene Conrad, was baptised.

The Church extends to the people of this community an invitation to participate in all services.

A welcome for you in our Sunday School each Sunday.

For some months the State Traveling Library, located in the Post Office has not been available to the public. This service will be resumed at an early date, and the public are invited to avail themselves of the reading matter obtainable from the State Library. The books will be issued as previously and will be under the control, and by the courtesy of the staff at the Post Office.

The Annual Convention of the W. F. M. S. of the Algona District, will be held at Britt on Thursday and Friday, April 20th and 21st. Good speakers and interesting information will be available at the meeting to which all are invited.

Arthur B. Gedye. Pastor.

STATE NEWS

BRUNSON WOULD MAKE LIQUOR VIOLATORS PAY ALL STATE DIVIDENDS

DES MOINES—During the past six months, G. A. Brunson, federal director of prohibition enforcement for Iowa, has recommended to the government that $683,844 in taxes and penalties be assessed against violators of the Volstead liquor law, according to his semi-annual report which went forward to the treasury department this week.

In addition to the recomendation for assessment, Mr. Brunson shows in his report that automobiles having an appraised value of $22,985 were ordered confiscated by his department after seizure when found to be the vehicles for liquor transportation.

More than 330 stills were seized during the period covered by the eport, Mr. Brunson states. At the ame time 1,700 gallons of distilled liquor were seized, together with 181 gallons of wine and 21,284 gallons of mash.

Arrests made during the period numbered 331. These with pending liquor cases bring a total of 409 offenders recommended for prosecution.

MAKE ANAESTHETIC FROM THE CORN COB

Ames, Ia., April 19.—Iowa chemistsof the land "where the tall corn grows," told the leading chemists of the United States, in a recent meeting of the American Chemical society at Birmingham, Ala., of their discovery of a new chemical use of the lowly corn cob. Dr. Henry Gilman of the chemistry department of Iowa State college, presented the results of his work in the production from corn cobs of a new synthetic anaesthetic which can be used as a substitue for cocaine.

WIFE BEATER GETS SIXTY DAYS IN JAIL

Waterloo, Ia., April 19.— Sixty days in the county jail is the penalty William Farmer, modern cave man must pay for an attack upon his wife and a neighbor with a club. Walter R. French, county attorney, gave Farmer a double barreled charge by filing state information accusing him of assault on his wife and assault and battery on Gus Meier a neighbor. Judge O. B. Courtright imposed a thirty-day jail sentence in each case.

DRANK HOOTCH AND DIED FROM EFFECT

Iowa City, Ia., April 19.—Edward Pressler, 27, of Nichols, is dead as a result of moonshine poison. He was about to come to Iowa City for treatment provided by the Red Cross, but died before making the trip. He is survived by his widow and son, 8, and baby daughter, 2. The liquor was drunk two weeks ago and as Pressler grew worse pneumonia developed.

ONIONS FROM SAME SOIL FOR 63 YEARS

Sac City, Ia., April 20.—F. F. Shutler of Pleasant Valley and his father have grown onions continuously on the same ground for more than sixty-three years.

Onions, they say, are unlike other garden vegetableh in that they can be grown on the same ground year after year without affecting the soil.

Onion soil should be rich and free from weed seed. The ground should be free and loose, they claim.

NATHAN CAREY OF WALNUT DIES AT THE AGE OF 102

Council Bluffs, Ia.,—April 19—Nathan Carey, father of Lee and August Carey of Walnut, Iowa, and Edward Carey of Tipton, Iowa, died at Upland, Nebraska, at the home of another son yesterday. He was 102 years, 1 month and 10 days old. He lived for years in Cedar county, Ia., but was a native of New York state

COUNTY SUPERVISOR

I hereby announce my candidacy for re-election to the office off Supervisor of Hancock County, Iowa, subject to the decision of the voters at the Republican Primary to be held June 5, 1922. G. B. Lawhorn.

Klemme High School Wins Ball Game From Kanawha

ARBOR DAY IN THE SCHOOLS

Will Be Held Friday, April 28

The Department of Public Instruction, in co-operation with the American Legion, hope to have a memorial tree planted on every school ground in Iowa, both in the City and the Rural schools. Each American Legion Post will be assigned definite schools where they will assist in the carrying out of this joint program.

The memorial tree idea was met with instant approval in every section of the country. No more fitting memorial can be dedicated to the memory of those who made the supreme sacrifice on the field of battle in the defense of their country.

The following program is suggested for the exercises after the regular school program has been given:

Memorial tree planting program by the American Legion and the Department of Public Instruction.

Arbor Day, Friday, April 28, 1922.

1. Plant a memorial tree somewhere on the school grounds.
2. Name it for some war veteran.
3. Dedicate it if possible to some American Hero who gave his life for his country.
4. Have some veteran of the local Legion Post take charge of the program in co-operation with the school board, the teacher, and the citizens of the community.
5. A five minute address, emphasizing the deeds of the hero for whom the tree was named.
6. Give the children brief instructions on the care of the tree.
7. Song, America.
8. The following trees are suggested as suitable memorial trees: American White Elm, White Oak, Red Oak, Black Walnut, Hard Maple.

(Signed)
James F. Barton, Ad. Ia. Dept. American Legion.
P. E. McClenahan, Supt. Public Instruction.

NOTICE OF PROBATE OF WILL

STATE OF IOWA
Hancock County, ss.
TO ALL WHOM IT MAY CONCERN:

YOU ARE HEREBY NOTIFIED, That an instrument of writing purporting to be the last Will and Testament of Daniel Webner, Sr. deceased, dated May 30, 1910, having been this day filed, opened and read, Monday, the 22nd day of May, 1922, is fixed for hearing proof of same at the Court House in Garner, Iowa, before the District Court of said County or the Clerk of said Court; and at 3:00 o'clock P. M. of the day above mentioned, all persons interested are hereby notified and required to appear, and show cause, if any they have, why said instrument should not be probated and allowed as and for the last Will and Testament of said deceased.

Dated at Garner, Iowa, April 17th, 1922.

B. E. ERWIN,
Clerk of District Court A-20-27-M-4

For Clerk District Court

I hereby announce my candidacy for clerk of the district Court of Hancock County, Iowa subject to decision of the voters at the republican primary election to be held June 5th, 1922. J-5tf

B. C. Erwin

For Sheriff

I hereby announce myself a candidate for renomination and re-election to the office of sheriff of Hancock county, Iowa, subject to the decision of the republican voters at the primary election to be held June 5, 1922. E. P. HANSON. tf

The Freshman Biology Class had a field trip Tuesday for the purpose of learning about trees.

The Eighth Grade is reviewing Civics and Arithmetic for the County examinations which will be held sometime in May.

Those in the Grammar Room play will practice every day from three until four o'clock. Those not in the play study in the high school room during this time.

Lois Church from Garner was a welcome visitor to the 3rd, 4th and 5th grades last Friday.

Klemme 9, Kanawha 6

On Monday, April 17, Klemme H. S. won from Kanawha H. S. by a score of 9 to 6. The game was interesting from start to finish and only seven innings were played on account of the cold weather. It look ed bad for Klemme the first few innings but they soon turned the tables. The following is the box score of Klemme High:

Players	AB	R	H	A	E
Ell, SS.	4	1	1	0	0
Lauritzen, C.	4	1	2	5	1
Koerner, 1stB	4	2	0	0	1
Gimer, 3rdB.	4	1	1	0	1
Wellemeyer, LF.	4	1	0	0	0
Busch, CF.	4	0	1	0	0
Stille, RF.	1	0	0	0	0
Bergmann, 2ndB.	3	1	2	2	1
Wiles, P.	3	2	2	4	0
Lemke, RF.	3	0	0	0	0
Total—	34	9	9	11	4

Summary—Base on balls by Wiles two. By Yepson and Hanson four. Hit by pitched ball Gimer and Johnson. Struck out by Wiles ten; by Yepson and Hanson six.

Score by innings—							
Klemme	0	0	0	1	3	5	—9
Kanawha	2	0	1	3	0	0	0—6

A practice game was played last Friday with some of the town men which resulted in a victory for the High School by a score of 6 to 3.

Former Students Entertain Us

Friday morning te High School tudents and the Grammar Room tudents were entertained by the last ear graduates and Rev. Gedye.

We all enjoyed the very interesting talk given by Rev. Gedye, who recently returned from England. He almost made us feel proud of our Klemme school, yes, he did. He old us how much better the American system is than that of England, because here both rich and poor have an equal opportunity to secure an education. He also gave us a few good pointers on the school's red letter days. He defined "pep" for us and told us it consisted of P-reparation, E-xperience and P-reservation.

Charles Gibbs and Arthur Johnson each gave us a few new thots and ideas. They haven't changed a great deal since they have gone to the Garner High School, they are still "few of words," but "much in mind."

Earl Josten sang "Mona" by Steven Adams and was accompanied by Mildred Johnson. The encore was he popular piece "Sunshine of Your Smile," by Libian Ray. Also Mildred Johnson gave a violin solo entitled, "Enchantment," by Liberti, and was accompanied by Earl Josten.

We all wish that our school contained a Senior grade so we could always be so entertained. We were glad to see the visitors, Mrs. Joe Johnson and Mrs. Bailey.

We certainly do appreciate an entertainment and if anyone feels like talking, singing or playing, we invite them to appear before the High school and Grammar Room grades at any time. Visitors are always welcome, so come, even if the school house may not look so very inviting; the system is good.

Other School Notes

Resolved: "That in every four sections a ten acre tract should be set aside for parks and play-grounds." This was the question under debate in the Community Civics class last week. The affirmative was upheld by Adala Schroeder and Leona Lau, and the negative by Neota Ridder and Faith Ax. The decision of the judges proclaimed the affirmative the best debaters. The judges were 3 8th graders; Blanche, Elvira Stille and Florence Behringer.

From now on a new plan for debating will be followed in the ninth grade. Two sides were chosen. On one side are Neota Ridder, Leona Lau, Faith Ax, Harvey Barz, Ewald Josten and John Baumgartner. The other side are Gearald Koerner, Adala Schroeder, Glenn Busch, Sylvanus Walker, Albert Priebebbb and Andrew Wellemeyer. Debates will be held every other week and papers will be written alternately with debates.

America Leads in Bachelors

United States Has 13,000,000 Single Male Adults, Says Census Figures.

MORE THAN ANY OTHER NATION

Matrimony Claiming Less Persons Now Than at Any Time in Decade—Housing Shortage Important Factor in Situation.

Washington. — About 13,000,000 adult males in the United States are unmarried, reports of the census bureau show. America, it is indicated, has more bachelors than any nation in the world.

Reports that a new record for the number of marriages was established during the last 12 months are not credited by government officials. Matrimony has and still is claiming less persons now than at any time in a decade, it is believed.

Young men and women seemingly are becoming reluctant to tread the path to the altar. Government officials are studying the situation to learn the cause of the apparent unpopularity of romantic love.

The cost of living was examined first, but it is not believed that high prices tended to discourage matrimony until after the armistice, when they began to act as a brake upon the establishment of new families.

Million Marriages a Year.

Approximately 1,000,000 marriages occur each year in the United States. This is not a large number in proportion to the adult population. In Japan, England, and especially in Germany, the proportion is much higher, officials say.

The nationwide housing shortage is believed to be an important factor in the situation. Widespread unemployment is another. Both men and women hesitate to assume responsibilities when pay envelopes are an unknown quantity.

The so-called "new independence" of women is being studied to determine whether it throws any light on the problem. According to many sociologists, many women hesitate to marry because generally they must give up their jobs. Approximately 8,500,000 women are regularly employed in the United States, according to the census returns. The number is constantly increasing. A propaganda is being carried on in many sections intended to keep married women out of industry while unemployment is widespread among the male of the species.

Age Being Lowered.

Other reports to the census bureau seem to make the problem more complex. These reports show that the age of marriage is gradually being lowered in many sections of the country. Women especially are assuming the responsibilities of matrimony at ages very much under twenty. Formerly most women married between the ages of twenty and twenty-five. Earlier marriages would seem to point to more marriages, but in this respect the returns do not coincide.

The majority of men marry between twenty-five and thirty, the reports show.

There are some government officials who scoff at the study of the census returns in their relation to the marriage problem. Figures, these officials say, can be made to prove anything. They put no faith whatever in the old theory that "figures never lie."

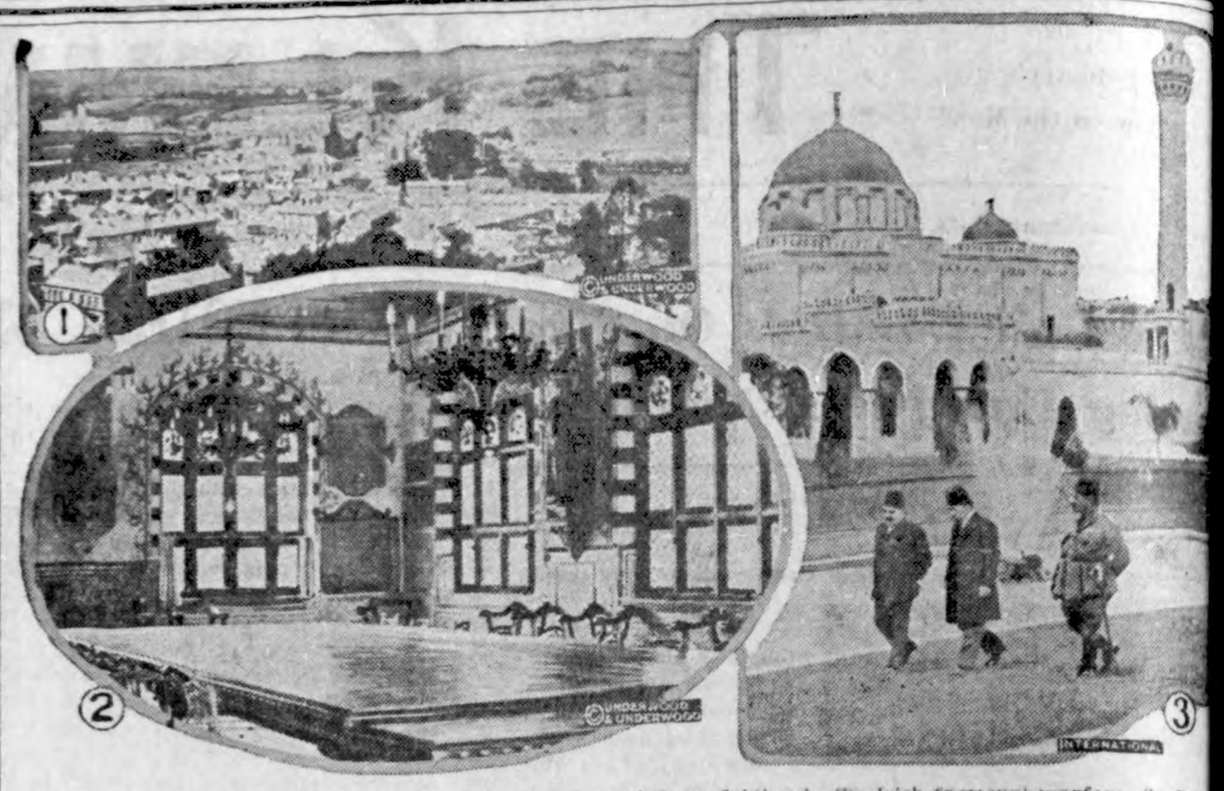
Ministers and sociologists interested in the divorce problem are showing keen interest in the returns of the census bureau with respect to matrimony.

IS IT IN YOUR WINDOW?

Miss Frances Thieleman of the W. C. T. U. headquarters in New York showing the blue and white placard with which the W. C. T. U. hopes every "100 per cent dry" home in the country will mark its window.

Elected Constable 52d Time.

Whitinsville, Mass.—Frank A. Cross of Northbridge claims a record as a long distance officeholder. At the annual town meeting he was elected constable for the fifty-second time. He is seventy-seven years old.



1.—View of Enniskillen, on the Ulster border, scene of fierce fighting in the Irish factional warfare. 2.—Room in the palace in Genoa where the economic conference opened. 3.—Fuad, first king of Egypt in two thousand years, walking in his palace garden.

Cost of Collecting Income Taxes

By Congressman Guy U. Hardy

Washington.—What does it cost to collect the federal income and internal revenue taxes?

What proportion of your tax dollar paid in goes out for cost of collection?

These are interesting questions often discussed. Guesses are freely made and usually run high. In Colorado, on the trains, and in Washington I have heard many people make guesses.

I can now tell you nearly exactly what it costs to collect a dollar of taxes because I have looked the matter up.

But most people who think they know much about it, know nothing at all.

I have amused myself often by pinning folks, who make wild assertions about the cost, down to actual figures. Out home many guessed that it costs from 15 to 35 per cent to collect the taxes. The other day at luncheon with a half dozen congressmen in the House restaurant the subject came up. When pinned down for a definite estimate the guesses ran from 10 to 25 per cent. One gentleman said the cost would be about 2 per cent and he was laughed at heartily.

So much to indicate the general impression and popular fancy.

Facts in the Case.

Well, here are the facts in the case: In 1921 it cost 87 cents to collect each $100 and in 1920 it cost only 55 cents for each $100 collected. In 1920 only about one half of one per cent and in 1921 less than one per cent.

As a matter of fact it did not cost that much because much of the expense charged as collection expense was really for enforcing the child labor, narcotic and prohibition laws. These items are included in the appropriation for running the internal revenue department and cannot be easily separated without going into a greater amount of mathematical calculation than I care to tackle at this time. Any way, the figures show that the cost of collecting the tax is not anywhere nearly as great as most folks think it is—and when you remember that we dump the whole cost of enforcing national prohibition into the expense it makes it sound quite inconsequential indeed.

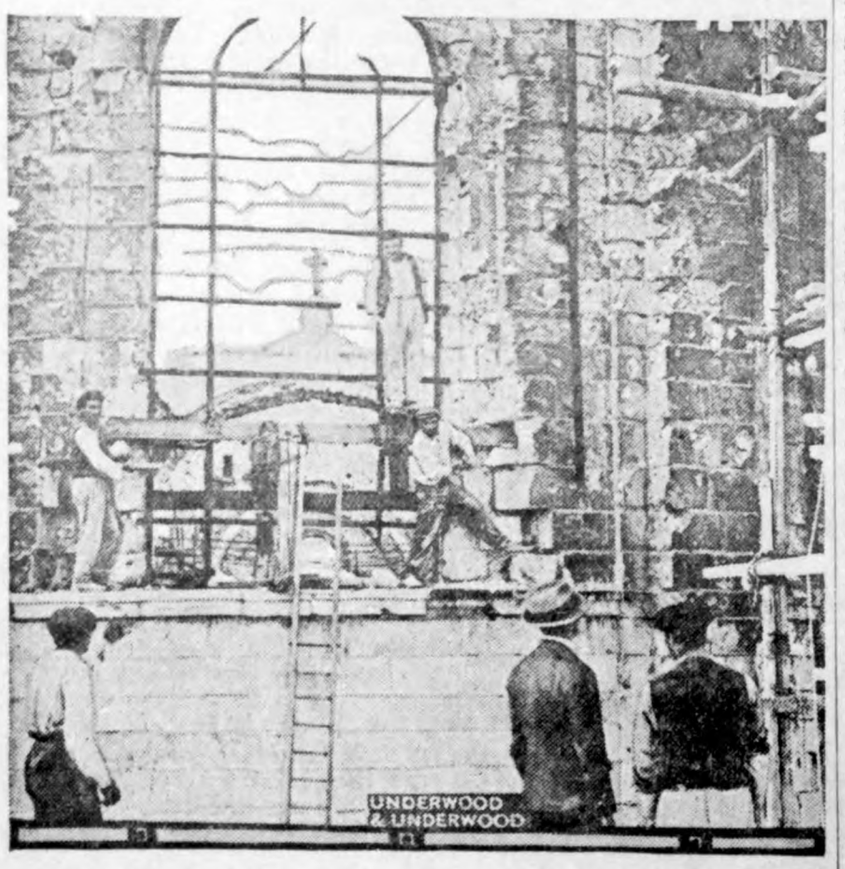
Here is the way we arrive at the figures. The internal revenue department collected for the fiscal year 1920 a total of $5,407,580,251.81. The total cost of the internal revenue department, including the enforcement of the laws named for that year, was $29,647,439.71. You can work out a little problem in percentage and you will find that 55 hundredths of one per cent is about right—or 55 cents for each $100 collected.

Eighty-seven Cents for Each $100.

For the fiscal year 1921 the total collections through this department was $4,595,000,765.74 and the expenditures for all purposes mentioned $40,203,716.74, which is 87 hundredths of one per cent or 87 cents for each $100 collected.

It would be practically impossible to figure out exactly what the collections process alone costs. The men who work at the job have a variety of duties to perform and it all goes in on the day's work. But considering the vast amount of work and the variety of duties performed by these men which have nothing to do with collecting of the taxes yet is included in the expenditures quoted above it can be seen that the estimate of from 55 cents to 87 cents per $100 is very liberal indeed.

Restoring the Cathedral of Arras



The Cathedral of Arras, shell-torn and battered by four years of war, is being restored to its original grandeur through funds raised by popular subscription. The tedious task of resetting columns and cornices and otherwise strengthening the walls is being done by 15 men. The work is expected to take about fifteen years.

Opossum Plays Dead.

Pottsville, Pa.—An opossum that, true to its nature, simulated death in order to avoid capture, was killed on the Eastern Pennsylvania railroad at Middleport the other day, despite efforts to prevent the killing. The trolley car was almost stopped in order to give the animal a chance to escape, but it persisted in lying across the track, pretending it was dead, and the wheels cut it in two. It proved to be an unusually large and fat specimen.

NEWS REVIEW OF CURRENT EVENTS

Russian Delegates Start Rows in the Economic Conference in Genoa.

INSISTING ON DISARMAMENT

Lloyd George's Plan for Ten-Year Peace Pact—Germans Expect Discussion of Reparations—Senate's Tariff Bill Reported—Progress of Fight to Save Navy.

By EDWARD W. PICKARD

LACKING the spirit that animated the Washington conference, that of reaching an agreement, the European economic conference which opened last week in Genoa may, nevertheless, manage to evolve some comprehensive project that will meet the needs of the old world. Premier Lloyd George, who is dominating the meeting, believes it will. Many other eminent men and a great many European newspapers are skeptical. Already it is evident that if any definite agreement of wide scope is reached, it must be through the yielding of France and the smaller nations that are members of the French "bloc."

Soviet Russia, through its spokesman, Tchitcherin, though accepting the "civilized nation test" of the Cannes agreement in order to obtain a seat in the conference, is still insistent and almost obstreperous, being bolstered by the support of the Germans and certain of the neutral nations and by the universally admitted fact that Europe cannot be restored economically until Russia is again one of the family of nations. At the very outset Tchitcherin, after accepting the Cannes conditions, precipitated an angry debate with the French by insisting that it was necessary to discuss disarmament. Lloyd George soon quieted the uproar by saying:

"Gentlemen, we have agreed not to discuss disarmament, and therefore our French colleague is right, but we must not waste our time in argument. We must get on. Nevertheless, in my opinion, the conference will naturally result in disarmament."

Next day the Russians protested the presence of the Japanese and the Rumanians, because Japan and Rumania are "unlawfully occupying Russian territories in Siberia and Bessarabia. Viscount Ishii replied that Japan would take part in the conference in spite of the Russian objections, and Bratiano, premier of Rumania, asserted that Bessarabia, which is mainly populated by his countrymen, had been awarded to Rumania by the allies. Premier Facta of Italy, who had been elected permanent president of the conference, ruled that in any case the invitations were irrevocable, and the Bolshevik delegates hugged themselves with glee because the ruling means that they cannot be ousted even if they later repudiate the Cannes conditions.

Organization of the committees brought more trouble. The first and chief one, to deal with Russian affairs, is made up of Great Britain, France, Italy, Germany, Russia, Belgium and Japan, and of Poland, Rumania, Sweden and Switzerland, elected by the little powers. Tchitcherin demanded that Russia be given two members on this committee because of her special position, but there was such strenuous objection that he subsided. Barthou for France and Theunys for Belgium wanted Russia and Germany excluded from this committee, to which Lloyd George replied that in that case the conference might as well be abandoned immediately.

Russia, it was stated in Genoa, was ready to give all the financial guarantees demanded in the program which the experts of the allies prepared last month in London, but would not accept the clause providing for mixed tribunals to fix responsibility, considering the latter an infringement of Russian sovereignty. The soviet delegation had an alternate plan prepared.

LLOYD GEORGE has ready for presentation to the conference a mutual guaranty pact, a variation of Article X of the League of Nations covenant, by which wars in Europe would be prohibited for ten years. He thinks that if this were adopted, with a penalty clause that all other nations should unite against any power invading or wantonly attacking another, the soviet Red army could be disbanded, and the little entente and eventually France could reduce the size of their land forces. France and Poland claim they must maintain large armies to meet the threat of Russia against the Poles, though it is generally understood the French really have in mind action against Germany in case the reparations are not paid. The delegates from the little entente, though not entirely satisfied with the form of this plan, it is said will support it on two conditions: That their right under existing treaties to invade Hungary in case of an attempted Hapsburg restoration be integrally maintained, and that the signatory nations agree to help one another by force of arms against any one who breaks the pact. It was expected that both France and Great Britain would support them in the first condition but that the latter would oppose the second, because she wished to model the pact on the Washington treaty in order to please America and because the British are not willing to engage to send troops to the continent.

Up to this time the Germans haven't had much to say in the conference, but in the first meeting of the committee on finance Herr Hermas, German minister of finance, started something of a row by alluding to the reparations. Picard of France angrily objected to even the mention of the word. Of course, however, the Germans expect the subject will have to be handled by the conference ultimately, and in this they are supported by Premier Branting of Sweden, who really is spokesman for the neutral nations. He declares flatly that the treaties of the entente with its former enemies must be revised; and he also approves of Tchitcherin's disarmament proposals, asserting that this is the biggest thing before the conference. Russia says her budget is covered by the revenues and that her army will soon be reduced from 5,000,000 to 1,000,000. Her representative on the finance committee insisted on talking disarmament.

SENATOR FRANCE of Maryland has informed the statesmen in Genoa that he is pressing in the senate a resolution for representation of the United States in the conference, and asks them to renew their invitation to Washington. It is stated in the capital that the attitude of the administration on his matter has not changed. Among the unofficial American observers in Genoa is Frank Vanderlip, and it is likely his advice will be sought by the committee on finance. He said in an interview:

"The question of the revision of the German reparations is extremely vital to European reconstruction and therefore it is regrettable that the conference refuses to discuss it. In fact, it is doubtful whether the conference will result in much unless the reparations are discussed. It is necessary to reconstruct Germany as well as the other nations on an economic basis, and surely Germany will remain in a bad state unless her reparations matters are definitely settled here."

JAPAN, while negotiating an agreement with the Chita government of the Far East—an agreement which is reported to have been already signed—is ruthlessly supporting the Vladivostok government, to the extent of fighting the Chita forces continually. The latter have been driven out of the neutral zone between them and the Vladivostok territory and the Japanese and Vladivostok troops have moved far to the north. The Japanese press is insistent on evacuation of Siberia, but the military party refuses.

As for Shantung, the chances that China will ever recover that province from Japan are fading. The Chinese are distracted with their civil war, and those who know conditions can see no way in which China can raise the price which Japan exacts for the return of the Shantung developments and the Kiau-Chau leased territory. This will amount to about $300,000,000. General Yui, the Japanese military commander there, says Japan will remain until China fulfills every pledge made in Washington.

LEADERS of the Free State and republican factions of the Irish together with several neutral but influential personages, began a conference in Dublin Thursday which it was hoped would result in the cessation of the hostilities and an agreement on the date of the elections. Arthur Griffith had planned the election for June, but De Valera objects to its being held on the existing register because it is out of date. In the British parliament the opposition bitterly attacked the government because of the Irish situation and the danger of a coup d'etat by De Valera during the Easter recess. Winston Churchill in a brilliant speech defended the government.

THE senate finance committee's version of the revised tariff was reported on Tuesday, bearing the signatures of all of the ten Republican members except Senator La Follette of Wisconsin. In this measure, as compared with the house bill, rates of duty have been shifted and the basis of ad valorem duties has been changed from that of the American value, as proposed by the house, back to the present foreign valuation basis. This makes the ad valorem rates higher, but the specific duties in many cases have been lowered. Agricultural products and some classes of manufactured goods are given increased rates. Senator McCumber, chairman of the committee, says the bill has been written on the basis of both protection and revenue, no rate being so high as to cut off reasonable foreign competition or so low that American manufacturers cannot have their full share of the American market. He gives assurance that there will be final enactment of tariff legislation before congress adjourns.

THERE is not much to be said concerning the coal miners' strike. President Lewis of the mine workers estimates that during the week 25,000 nonunion men joined the strike, making a total of 75,000 recruits in that class. In some Ohio fields strikers in large bodies made demonstrations at mines still operating, and the owners appealed for protection.

Congressman Huddleston of Alabama introduced a bill giving authority to judges of federal courts on application of the attorney general to appoint receivers to operate closed mines.

GROWING fiercer daily, the fight between the "little navy" men in the house and those who support the administration's ideas on this matter developed some fireworks last week. Party lines are broken, and Representative Padgett of Tennessee, former chairman of the naval committee, and many of his fellow Democrats took the support of the administration. The most effective arguments of the latter were in a letter from Secretary Hughes, read by Representative Rogers. He urged that the standard of the naval treaty of Washington be maintained unless the prestige of the United States was to be impaired and its security put in jeopardy. "Jimmy" Gallivan of Massachusetts suggested that the navy be turned over to the prohibition commissioners.

TWO Republican ex-service men, Woodruff of Michigan and Johnson of South Dakota, united in threatening Attorney General Daugherty with impeachment and in demanding wholesale courts-martial in the War department. They asked that a select committee of the house investigate the liquidation of war-time contracts, charging fraud and corruption in the sale of property at ridiculously low prices to favored individuals. Secretary of War Weeks issued a general denial and invited investigation.

GENERAL SEMENOFF, who called himself ataman of all the Cossacks, is having his troubles in the United States. Coming to raise funds to renew warfare on soviets, he was arrested in a civil suit resulting from a theft of goods by his forces; and then the government was asked to deport him, and American officers to the senate committee of the outrages committed by his men in Siberia.

ARE HUNTING FOR SUNKEN GOLD

Seek to Salvage Treasure Lost at Sea In Great War.

War and Navy Departments Get Many Requests for Aid From Would-Be Salvagers—Trying to Perfect Diving Bells.

Washington.—Gold and other valuable metals estimated to be worth $5,000,000 lost by the sinking of steamships during the great war are to be sought by treasure hunting companies now being organized in this and other countries, according to dispatches received in Washington.

Treasure hunting is spreading over the United States, England and other European countries just as it has swept the world after every great conflict.

Officials of the War and Navy departments are being deluged with requests for information as to the location of vessels sunk by submarines. The public records of the customs service of the United States, England and France are being scrutinized to determine which of the submarines and vessels carried gold and other valuables worth salvage expenses.

In France one treasure hunting corporation is soliciting the public to subscribe to stock on the grounds that the venture may bring in a profit that will reach into thousands of per cent of gain. In Washington government officials generally are not optimistic concerning the chances of success of the treasure hunting companies.

Probably the biggest treasure was lost with the Lusitania which was reported to have had nearly $1,000,000 in gold aboard when she was torpedoed. The Lusitania lies too deep to permit divers to work on her at the present stage of development of most salvage apparatus, officials say.

Engineers and inventors are working to perfect new and unusual diving apparatus, the records of the patent office show. Super diving bells are planned to cover the treasure which lies too deep for the ordinary methods of salvage. One inventor recently experimented with a steel diving suit to protect the diver from the terrific pressure of the water at the Lusitania's level.

An English salvaging company is at work with suction pumps on the wreck of a Spanish vessel that sank off the coast of Scotland during the invasion of the Armada.

Hires Cripples to Beg for Him at $3 a Day and Rum

New York.—Two crippled women, a little cripple boy and an armless man appeared in a Brooklyn court as witnesses against John Stefan, who admitted that he employed the four to beg for him. Their wages, he said, were $3 a day, board and liquor, "when they wanted it."

A QUARANTINED QUARREL

Showing That Love, Not Unlike Other Diseases of a Catching Nature, May Profit by Quarantine.

By ELEANOR PORTER
Author of "Pollyanna," "Just David," Etc.

Copyright by Eleanor H. Porter.

HE airy indifference of the girl's manner and the stilted pomposity the man's words made the quarrel omedy; the ache in the girl's heart the choke in the man's throat it a tragedy.

Rainsford, his head high, thrust the arded diamond into his pocket and de into the hall. It was at that ent that the fussy little doctor the village came down the stair-

There is no doubt, madam," he was ing to Mrs. Kenton, who was close nd him. "It is a well-developed of diphtheria and the very great- caution is necessary."

he man in the hall below caught his hat and stalked to the outer r.

Here, here, Mr. Rainsford," called doctor, agitatedly, "you mustn't that!"

Mustn't do what?" he demanded, owing wide the door.

You mustn't go out, you are quar- ined."

Quarantined!"

Yes, sir—quarantined," reiterated doctor. "There is a case of diph- ria upstairs and not a soul can ve this house until—until I give mission."

At Rainsford's dismayed ejaculation . Kenton came quickly forward.

My dear boy," she soothed, "don't fret you for a moment. We ll be delighted to have you with Just think, you will be a regular send to us through all these lone- days ahead; and Dorothy—it will so nice for Dorothy.

But, Mrs. Kenton, I can't—there are sons why I—"

Rainsford paused irresolutely.

Nonsense—not a word! Come— into the other room to Dorothy," Hardly conscious of voluntary ement, Rainsford found himself a ment later facing Miss Dorothy nton, who sat limp and silent, upon living room sofa.

You heard?" he asked.

She nodded her head.

Pleasant prospect—for you," he ob- ved.

But what—what are we going to " she faltered.

His hands executed an expressive icircle.

But it—it's ridiculous," she contin- d, with some heat. "The idea of being shut up in the same house this absurd fashion now; if it had en before, why—" she stopped, her eeks crimsoning.

For some unaccountable reason his irits rose.

Can't help it—it's a case of quar- tine," he rejoined.

At that moment Mrs. Kenton came to the room.

Well, well, children, this is an ex- rience, isn't it?" she exclaimed. "I n't suppose it will trouble you much, ough," she went on with a faint ile.

What did the doctor say of fa- er?" interposed Dorothy, with fever- eagerness.

Mrs. Kenton's face lengthened. Well, it's diphtheria—and that's bad; ll, he says it's a light case. We are rtunate in having Miss Merriman— 's a fine nurse. But I do wish Doc- Kane was here. We've sent for m, however, and if he's in the city ll surely come. This is the first ne anything like this has ever hap- ed when we've taken a cottage at e of these summer places."

And my being thrust upon you in is absurd fashion is anything but easant for you," asserted Rainsford.

My dear boy," remonstrated Mrs. enton, "we're delighted! Of course shall have to be with Mark more or s, and I fear you two will be left tty much to your own devices, but presume—"

Er—mother," Dorothy broke in tily, "I can help, you know."

There's not a thing for you to do, ar, except to make it as pleasant as ssible for our captive here.

The house was very quiet when insford came downstairs the next orning. He fingered the books on e center table, picked up a maga- ne, dropped it, then wandered out to e veranda, which extended around ree sides of the house.

Well, by Jove," he muttered wrath- lly, marching to and fro, "I'll stand is thing just one hour longer until see Mrs. Kenton, then—I'll run for "

His feet were brought to an abrupt p at the extreme end of the veranda here an open door led apparently to the kitchen. Kneeling before the ove was Miss Kenton.

Since when have you been a fire- orshiper?" he asked.

Miss Kenton laughed merrily.

Jack, what's the matter with this ove? I've opened all the slides and oors I can find, but—" she stopped ddenly her cheeks scarlet. "It is oing very nicely now, Mr. Rainsford; ou needn't trouble," she said frig- ly.

Again Rainsford's spirits unaccount- bly rose. He stepped into the room nd peered into the grate where three arred sticks smoked with occasional ints of fire. "This might make a ight difference," he observed gravely reaching up and turning the damper in the stovepipe. A minute later, with the aid of some small sticks he had the fire burning briskly. After being assured that the sick man was no worse, Rainsford said:

"Might I inquire—without exceeding the limits of our prescribed fellowship—if this is your usual morning pastime?"

Miss Kenton's eyes flashed and her chin rose perceptibly. "The cook has gone," she replied with some dignity.

"Gone!"

"Yes—ran away in the night—afraid."

"And Nora?"

"Gone!"

Rainsford gave a sharp ejaculation. "The miserable cowards—to leave you like this! What are you going to do?"

"Do? I'm going to get breakfast—perhaps you'll run now," she finished, something like a twinkle in her eyes.

"You couldn't hire me to," he returned, with a promptness that gave no hint of his recent determination quite to the contrary; then he added: "I can make fine coffee, Dorothy, and—"

"I can get along very nicely by myself, Mr. Rainsford," interposed Miss Kenton, with sudden hauteur.

"Oh—transgressed, that time, didn't I?" murmured Rainsford, cheerfully,

"Mustn't—Go—Out!" Returned Rainsford Stupidly.

with uplifted eyebrows, as he picked up the basket and went out into the shed for more wood. Dorothy looked after him for a helpless moment, turned, and went into the pantry. She was standing irresolutely before the empty bread jar when he came back and peeped in at the door.

"Might made a corn cake," he suggested.

"Why, I've forgotten—I did know how once—but there's a rule—it must be somewhere," she replied disconnectedly, poking inquiring fingers into the drawer at her left.

"I know how," announced Rainsford, airily; "still, I'd have to have mother's old dish with the two cracks and a nick in it to tell me how to measure the things," he added with a mischievous glance.

Miss Kenton's back stiffened.

"I learned at cooking school, of course," she began, with some dignity; "but I have not practiced any of the things lately, only rabbits, and creamed things, and a cake now and then— Oh, here's the book!" she finished.

When Miss Kenton came into the kitchen a minute later she found an array of raw beefsteak, cold potatoes, and a cantaloupe on the table.

"Found 'em in the refrigerator," chuckled Rainsford. "I'll broil the meat when the time comes—done it lots of times in camp; I know how to fix the potatoes in great shape, too," he added.

"Oh, that's fine!" cried Dorothy softly, almost clapping her hands; but the tips of her fingers had scarcely come together before the smile left her lips and eyes. "I fear you are giving yourself too much trouble, Mr. Rainsford," she said, in quite another voice.

"Trouble? Not at all—not at all!" disclaimed Rainsford, cutting the melon into nicely calculated portions. Miss Kenton was silent for a moment, then she said shortly:

"The cornmeal is out—I can't make a corn cake."

"Hm-m—what's the matter with doughnuts? I'll fry 'em."

Miss Kenton looked at him doubtingly. "Well, I might try," she acquiesced finally, turning back into the pantry.

When the round, doughy things were ready, Rainsford, armed with a huge fork, presented himself at the stove.

"I'm here," he announced.

"Very well, you may fry them while I fix another plateful," she said, somewhat ungraciously. She found him a few minutes later dubiously eying a half-dozen hard brown rings which were draining on a plate.

"Why, what ails them?" she cried.

He shook his head.

"They—they're hard as rocks and flat as pancakes!" she gasped, picking one up and dropping it on the table.

"Perhaps you didn't mix them right."

"I made them straight according to rule," she returned with dignity. "It must have been your frying."

"Oh, but it couldn't have been," he demurred. "I never left them alone a minute. I flopped them over and over all the time."

A peal of laughter interrupted him.

"Oh—oh—you don't mean to say that you stood there and turned those poor things over every second!" she cried, as soon as she could speak. "No wonder their spirits couldn't rise—and just look at your fat! It's so hot it burned up what little life there was left!"

"Dear me, children, what a good time you are having!" called Mrs. Kenton from the doorway. "When one is young and in love one can find enjoyment anywhere."

Dorothy choked into instant gravity, while Rainsford made a low bow.

"I am in disgrace, madam," he said, meekly. "I am guilty of too devoted an attendance upon doughnuts and—er—"

"Yes, you are," interrupted Dorothy severely, vanishing into the pantry.

At two o'clock a man from the hotel, in response to Rainford's telephone message, brought a suitcase filled with the various articles he had sent for. The man laid the bag somewhat gingerly down on the extreme end of the walk and hurried away; then Rainsford went down and picked it up.

"How perfectly funny!" exclaimed Dorothy nervously, as he came back to the steps.

"It does seem queer," acknowledged Rainsford.

"Don't you two look contented!" called a merry voice, as three girls stopped at the end of the walk. "How is Mr. Kenton, Dorothy, dear?"

"He is very comfortable," replied Miss Kenton with studied politeness.

"How absurdly idiotic some people can be," observed Dorothy, after a time.

"Very," agreed the man.

Dorothy looked at him sharply; then she sighed and fidgeted in her chair.

"I don't like this deception," she protested.

"No? Then why not tell?"

She gave him a scornful glance.

"As if I could call out across the lawn to those girls: 'We aren't engaged any longer!'"

"Hm-m; well, there's your mother."

Miss Kenton frowned. "She has enough to trouble her now. As things are she'd be dreadfully distressed. I shall have to wait until father is better and you are gone."

"Oh!" murmured Rainsford.

There was a long silence; then Dorothy sprang to her feet. She was almost hysterical with the tension of the last few hours. Things had scarcely improved since the morning. Rainsford had grown quite grave, and scrupulously polite.

"As hostess, I feel it my duty to entertain you," she announced sweetly. "If you'll look under the table on that shelf there you'll find some games. Make your selection and we'll play."

Dr. Kane arrived on the five o'clock train and went directly to the sick room. Fifteen minutes later Mrs. Kenton appeared on the veranda.

"Well, Jack, you are free," she said smilingly.

"Eh — what — how—" stammered Rainsford, growing white and red by turns; there was but one kind of freedom in his mind, and that he had already most unwillingly received at the hands of Dorothy. He glanced at the girl now, but her face expressed only unalloyed joy.

"You mean the quarantine? It's over?" she asked eagerly.

Mrs. Kenton nodded. "Yes; that fussy little doctor was all wrong. It's not diphtheria at all, and your father will be all right in a few days."

"How perfectly glorious!" cried Dorothy. "I never believed father was very sick. Now we'll go off—let's see, what shall we do—ride?"

Rainsford caught his breath. "Yes; or we might go on the lake," he said, in a voice that he tried to make diplomatically unconcerned.

"Or we could play golf!"

"Hm-m; or we've got just time to see the sunset from Peak's hill," he further suggested, with a swift sidelong glance at her face.

"Just the thing after being cramped up all day! I'll get into my walking skirt in no time." And she hurried through the hall door after her mother. The next minute she was back again with a dismayed face.

"Why, I—I forgot!" she faltered.

"Forgot? Forgot what?" he asked smoothly.

"Why, our—our—that things weren't the same any longer."

"Oh, never mind a little thing like that," he enjoined.

"But I—I was going to tell mother, and now—" she paused helplessly.

"Now—I really wouldn't do it," supplemented Rainsford. "You see, it will be hard to make her understand after what you said just now," he continued, taking a shining golden circlet from his pocket and fingering it nervously. "Hadn't you better put this on, too, Dorothy?—she might notice it."

For a minute Dorothy hesitated. The vines were thick and the veranda very secluded, and Rainsford drew her very gently toward him.

"Well—perhaps," she murmured, holding out a slim, sunburned finger upon which he eagerly slipped the ring.

MR. FOX'S STORY

MR. FOX knew he was in a tight place, for he had seen Mr. Coon running for a tree ahead of him, though he was well aware that Mr. Dog was after him and had not seen Mr. Coon at all.

He was in a tight place because he knew perfectly well that Mr. Coon had watched the chase from the tree, and saw him tumbled over by Mr. Dog, roll down the smooth, steep hill and land at the bottom in a muddy pond.

"I must think up some sort of story to tell tonight at the Four Paws club," said Mr. Fox as he sat by his kitchen stove drying himself.

"Of course, I should have kept away from that hill," said Mr. Fox, "but I

When Mr. Coon Came in

was thinking of the fun I could have with Mr. Dog, for it was such a good morning for a race."

Mr. Fox sighed as he thought how his plan had failed, and how he had run down the smooth hill, and Mr. Dog, being an exceptionally good runner, had caught up to him, but was running so fast he could not stop, and bump he went against Mr. Fox, tumbling him over.

But Mr. Dog did not tumble; he kept on his feet, and went right on running; he couldn't stop then, but when Mr. Fox rolled into the muddy pond Mr. Dog was running toward him from the other side of the pond.

Of course, Mr. Fox did not wait for him. Oh, no; he picked himself up and off he bounded, and where Mr. Dog went he did not know, but he hoped he had found Mr. Coon in the tree.

He was pretty sure he didn't and so he was trying now as he sat by the fire to think up a story to tell before Mr. Coon could tell what he saw, and have the laugh on him with all the other members of the Four Paws club.

As soon as his coat was dry Mr. Fox started off for the club to be there ahead of Mr. Coon, for he had thought of a story to tell, explaining just how it all happened.

As each member arrived Mr. Fox would say, "Let me tell you of the fun I had this morning with Mr. Dog."

He was just telling Mr. Possum about it when Mr. Coon came into the club, and this is what he heard:

"It was one of the finest mornings you ever saw for a chase," began Mr. Fox, "so I let Mr. Dog catch sight of me just as I was leaving the barnyard. He came after me, of course.

"I led him a chase for a while, and then I wanted to go home so I happened to think of a smooth, steep hill, and I made for it. When I had Mr. Dog running good and fast I just crouched close to the ground and over me leaped Mr. Dog going at such a rate of speed he could not stop.

"My, it was funny, and I laughed so hard I just rolled over and down that hill"—

"Why did you roll into the muddy pond if you did it all on purpose?" interrupted Mr. Coon.

"Oh, you saw the fun?" asked Mr. Fox with a very innocent expression on his face. "Wasn't it the funniest thing you ever saw or heard of?"

"Y-e-s," replied Mr. Coon, who knew it was no use telling it as he saw it, "but the funniest thing to me is the way you tell it."

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

ABUSING HOSPITALITY

IT IS the height of bad manners to try to drag business into your social activities. But some young men realize this only after they find that they have queered themselves with friends and acquaintances by not having learned this in time.

This does not mean that a man's friends and his social position may not and do not very often stand him in good stead when it comes to building up business or profession. The young lawyer, for instance, may so impress his friends and their friends whom he meets at their houses with his honesty and shrewdness that when they happen to need the services of a lawyer they naturally turn to him. Or more often they become personally fond of him and turn any professional business his way that they can, simply through a desire to see him succeed. So often a doctor builds up a practice through the influence of friends and acquaintances.

But it would be quite another matter for a young lawyer when at the house of a friend in any way to attempt to gain the patronage of any other of the guests.

One young man I know, who is having an uphill time gaining his professional education, was persuaded by the promoters of a stock-selling enterprise that he could sell enough stock in the evening among his friends to pay all his educational expenses. Convinced of the merits of the various sorts of stock that this enterprise is promoting, this young man never misses a chance when he is invited to the house of a friend to sell stock either to his host or to one of the other guests. He even tried to persuade a young woman with whom he had just been dancing that it would be to her advantage to invest some of her savings in one of these ventures in which he was interested.

Needless to say this young man is not asked to so many houses as he used to be and if he does not mend his manners he will find himself really taboo in the little circles where he once enjoyed an enviable popularity.

"What's in a Name?"

By MILDRED MARSHALL

FACTS about your name; it's history; meaning; whence it was derived; significance; your lucky day and lucky jewel

FLORA

FLORA is as springtime a name as any maid could wish. It means flowers, of course, and commemorates the goddess of flowers, who was so called from the Latin name for spring blooms, "flos."

Flora came into use through her masculine counterpart, curious to relate. From the goddess was evolved Florus, chiefly memorable as the name of the procurator whose merciless rule drove the Jews to their last rebellion, and Flora was subsequently derived as the feminine of the former name.

The first Flora was found in Spain. She was the daughter of Count Julian who was much disliked and is recorded in Spanish ballads as "la Cava," the wicked.

The martyrdom of a Spanish maiden called Flora by the Moors in 851 redeemed the reputation of Flora as a feminine name and its use became widespread in Spain; whence it penetrated France as Florie. Scotland, which has an extraordinary fondness for flower names, adopted it, and soon it was brought to England where it still enjoys the greatest and most widespread vogue.

The emerald, symbol of springtime, is Flora's talismanic gem. It promises its wearer keen intelligence, gentle charm and prophetic vision. With an emerald in her hand, she is said to have such perfect psychic power as to be able to foreshadow future events. Wednesday is her lucky day and 3 her lucky number. The hawthorne, England's loveliest spring symbol, is her flower.

Why tonic value is greater in this yeast

Yeast Foam Tablets are made entirely of pure whole yeast —the richest source of the tissue-building vitamin

The amazing tonic properties of yeast, and its consequent popularity everywhere, have offered opportunities which patent medicine makers and others have been quick to capitalize.

The resulting flood of so-called vitamin preparations reveals many products which contain precious little yeast and insignificant quantities of vitamin.

Remember these facts

It is of utmost importance to you to remember that Yeast Foam Tablets are made entirely of pure whole yeast—that their vitamin content is proved by actual test to be both high and uniform—that they are endorsed by leading medical scientists—and that they are made by yeast experts, the world's largest manufacturers of dry yeast.

By virtue of these facts you are definitely assured that Yeast Foam Tablets have an exceedingly high tonic value—and that is what you really want.

You may take them with the positive knowledge that they will aid assimilation, promote growth and the formation of firm, healthy tissue, and that through these processes you will experience an energizing and generally upbuilding effect.

Take Yeast Foam Tablets for these conditions

Yeast Foam Tablets, which are so rich in the tonic and tissue-forming vitamin, are recommended for loss of appetite; indigestion; lack of physical strength and energy; anaemia; skin disorders; nervous troubles and many forms of vitamin deficiency and general ill health known as "run down" conditions.

The name, Yeast Foam Tablets, is your protection. It is your guarantee of purity and *known* vitamin potency. Ask for this yeast by its full name. There is nothing just the same or "just as good." Get a bottle from your druggist today.

Something to Think About

By F. A. WALKER

KEEP ON HIGH ROAD

IN A recent newspaper interview, Charles M. Schwab, one of the notable leaders in the steel industry in which he began as a boy of seventeen, forty-one years ago, said, "I would rather lose money month after month in my plant than make it by any but the highest methods in the world."

Mr. Schwab went to work to learn the business and he learned it thoroughly by mastering every detail as he proceeded, scorning a tired back and soiled hands.

He credits his rise to loyalty to his employer and states that success came from constant application to the subject in view.

* * *

Here in a few simple words, for those who will take time to read, will be found the formula for the attainment of success.

And here too is embodied the rule which every person must accept as his own,—a hard and fast law as that of the Medes and Persians, unfailing in results and bounteous in reward.

Let the indifferent young man and woman, inclined to grumble and shirk duty, ponder the wonderful meaning of "highest methods," and "loyalty to employer."

The five words may be likened to hinges upon which the great door of success swings wide open at the unrelenting push of the hand and brain that refuse to be denied entrance.

Whenever you go to work in sombre days, remember that there is within you a force, which, if properly applied, will enable you to open this same door and take your place among the leaders.

And this force must be called up by you alone.

Nobody else can do it for you.

Have faith in yourself. Have no fear, for fear is the rock on which humans fall and go tumbling into the valley of despair.

No man or woman with fear in the heart is capable of clear discernment, sure judgment or superior accomplishment.

* * *

Keep your mind on the great and splendid achievements of others, and those you want to do yourself. Be loyal and hold steadfastly to highest methods.

Preserve an attitude of courage, courteousness and good cheer.

Avoid the malcontents, the grumblers, the sulkers and shirkers, the makers of wry faces and the provokers of quarrels.

Keep on the high road and in the sunshine.

Move straight in the right direction and some morning you will find that success and honor are speeding towards you with open arms.

Kiddies Six

By Will M. Maupin

THE OPEN SEASON

APRIL now, and I must take
Rod and reel and hunt a lake;
Tramp the shore light-hearted, glad;
Cast out 'neath some lilypad.
Fill my lungs with clean ozone,
Lift my voice in lusty tone;
Watch the white clouds sailing high
'Cross the blue of April's sky.

April now, my desk is clean;
Trees and grass are showing green;
Tang of springtime in the air—
Good-by, now, old office chair!
Off I lay life's weary load
And go tramping down the road—
Down the road between the trees,
Drinking deep the April breeze.

April now, and field and stream
Bathed in April's golden gleam
Bid me up and haste away
Where the sunbeams dance and play,
Out from dusty, dreary mart,
Close to Mother Nature's heart,
Out where springtime wakes anew
'Neath the April sky of blue.

April now, and songbirds wake
Echoes from each bough and brake.
Green the grass beneath my feet,
Flowers spread their odors sweet;
Out across the field and fen,
Onward through the woodland glen
Where the long, black furrows lie
'Neath the sheen of April's sky.

(Copyright.)

IN RUSSIAN MODES

Demand Prevails in Paris for Blouses and Sweaters.

Garments Fit Well Into the Present Fashion Picture and the Shops Are Busy.

The present influence of Russian styles in all types of dress in France is due to Russian refugees, according to a Paris fashion writer in the New York Tribune. Princesses and grand duchesses, driven from their own country, their lands confiscated, their money and jewels gone, have turned to the occupation which deals with the subject nearest a woman's heart and the one which she naturally knows most about—the designing, making and selling of clothes.

Both sympathetically and artistically these Russian wares have made a great impression in Paris, and a decided Russian vogue prevails, particularly in blouses and in sweaters. These garments fit very well into the present fashion picture because even as far back as August there was this tendency toward both the Russian and Polish types in coats and blouses. Jenny, Renee and Patou all showed models distinctly Slavic in feeling. Within the last month the inspiration has been definitely named Russian.

The various ouvroirs, or workshops, operated in Paris for the benefit of Russian workers, are very busily engaged in executing private orders on blouses of Russian style. Paris manufacturers, catering in a large way to the fashion markets of the world, have taken up the idea, and beautiful new models for export trade are being prepared in the Russian modes.

Beige Silk Crepe Frock, Embroidered in Brown, Showing New Girdle Arrangement.

One of the charming things about the Russian blouse is that it is youthful in style and yet full of dignity. It is becoming to almost every type of figure. With its low waistline belt, its big sleeves and its effective embroideries the Russian blouse fits exactly into the fashion picture of today.

THE "KIKI" SCARF AND CAP

One of the latest novelties in feminine toggery is the "Kiki" scarf and cap outfit. Tomato red duvetyn is employed, embroidered attractively. The sets are made in the most briliant colors.

HANDWORK IS IN HIGH FAVOR

Woman Skillful With Needle May Have Beautiful Clothes at Very Moderate Outlay.

Any sort of handwork is in high favor this season, and this should mean a lot to the woman who makes her own clothes. Ready-to-wear garments that are largely handmade are decidedly expensive, but when a woman is sufficiently skillful with her needle to do her own embroidering, hemstitching, etc., she may have really beautiful clothes at a very moderate outlay.

There is nothing radically different in spring styles from those of the season just ending. The straight silhouette holds good, the low waistline is very much approved, and the uneven hem continues to be a feature. There are many novel and interesting sleeves and some new neck treatments, but on the whole there is comparatively little change. Certainly, however, emphasis is laid on increased skirt length.

DRESS TO MATCH THE COAT

Suit Houses Have Concentrated on Producing Attractive Styles in Three-Piece Garments.

Taking a leaf out of the book of the dress manufacturers, the suit houses have concentrated their efforts on producing attractive styles in three-piece garments. They substitute, however, the coat or jacket for the cape. Underneath this outside garment there is provided a dress of the same material, which follows a tailored design.

According to the manufacturers, this style is just getting into its swing and will see its best season next fall, though quite a few numbers have already appeared and there will be plenty for the late spring.

Colored Collar Ideas.

Organdies in lovely shades of color are made into charming collars. Try your hand at them. Try violet collars with a white edge. Wear them on a gray dress. Try some of watermelon pink with a white edge. Wear them on a dark blue dress. Try pink collars with a violet edging. Wear them on a tan dress. Try gray collars with a gray edge. Wear them on a henna dress. Try some of your own combinations.

Sets of Cretonne.

Cretonne collar and cuff sets are the latest thing in New York shops. They come in shades that blend especially well with the new tweeds and are a delightful feminine touch on a man-tailored suit.

FOR YOUR NEW TUNIC BLOUSE

Put Hand Embroidery Only Around Center of the Sleeve and on the Sash.

If you want to make a stunning new tunic blouse, put your hand embroidery now in two places only: Around the center of the kimono sleeve, and on the sash. Leave the neckline and the body of the blouse absolutely plain, and let the embroidery on sleeve and sash be as splendid as you can make it. The kimono sleeve should extend below the embroidery almost to the wrist, so that it drapes and flops about the arm, lifted or lowered—this is fashion's fancy just now.

A stunning tunic blouse is of black satin meteor with broad bands of embroidery—perhaps nine inches wide—around the center of the sleeve and on the ends of the wide sash which is looped over once and falls with heavily fringed ends at one hip. The embroidery is done with darning stitch lines of pale gray and white silk floss and silver threads. Here and there are triangular appliques of gray duvetyn, surrounded with lines of black and white silk floss and silver thread. Another blouse, of black satin, has embroidery of gold thread, gray, magenta and olive green floss.

Make a bateau neckline—if you can stand the severe style—and open the blouse at the shoulder, with an arrangement of invisible snap-fasteners. Or have a rounded neckline with a six-inch slash down the front. Run a very tiny casing around the neckline and draw it up with a cord or velvet ribbon, tying the ribbon at the top of the slash, which is piped to match the narrow casing of the neckline.

Hat and Dress in Crepe de Chine.

The soft, gracefully falling dresses of silk which are so much the vogue are prettiest when they are made of crepe de chine. Sometimes it is a good plan to weight portions of the dress where it droops and where the drooping falls into points. This special weave of silk naturally takes beautiful and artistic folds. It is meant to be draped. For linings this is an excellent material, as its softness adapts itself to the outer garment so well. Now crepe de chine is being used for hats. Many crepe dresses have the hat to match. In New York some shops sell dress and hat to match all ready-made.

To Make a Ribbon Rose.

To make a medium-sized rose requires two yards of satin ribbon two inches wide. Taffeta or satin may be used. There are several different methods of making the center of these roses. A simple center may be made from a piece of the ribbon, four inches long. Fold this in half. Sew the selvages together along one side. Turn and fill with cotton around which has been wound the end of a 6-inch piece of frame wire. A little rose-scented sachet powder may be sprinkled on this cotton to add perfume to the blossom.

Sewing Hint.

When making several pairs of pillow-slips with lace edging measure off the entire amount of lace required and stitch it onto the material in one piece, then cut off the pillow-slips and sew up on the machine.

Home Town Helps

MUCH FUN IN HOME BUILDING

Satisfaction Begins With First Consideration of Plans—Too Hasty Action Is Common Fault.

Building a home is the greatest fun in the world. Anyone who has tried it will bear witness. There is a unique satisfaction in making the plans and then in watching them take shape in wood or stucco or brick. Finally, it is something to be able to say: "We have built ourselves a real monument. The city has an added attractiveness because of what we have done. We are city builders." For the most satisfaction home building ought to begin years before the actual work of construction. As a family lives in rented houses its members begin to realize what features they like and what they dislike. Do they want a center hall arrangement? Or are they pleased with the dining room off the living room? What height of ceiling particularly appeals? Would they be unhappy without a sun-room. What is the verdict as to a sleeping porch? There ought to be a large store of clippings accumulated in anticipation of the time of planning; clippings from newspapers, magazines, notes jotted down from observation of other houses, or from books. All sorts of tentative plans should be sketched out, or perhaps built out of blocks. If possible, as the building time approaches and the architect is found, the preliminary study he submits should be allowed to rest for weeks—though this is a counsel of perfection and rarely observed; the thrill of getting to work is too great—and mulled over. Ideas are bound to occur which may be embodied in the scheme. Too hasty action often brings regrets later.—Kansas City Star.

RECOGNIZE VALUE OF TREES

People of Canadian Provinces Said to Be Setting Out Some Five Million a Year.

Twenty-five million trees have been distributed in the last five years from the Canadian government's forest nursery station at Indian Head, Sask., and planted throughout the prairie provinces of Manitoba, Saskatchewan and Alberta.

The nursery has been distributing trees since 1901. In the first few years only a few hundred thousand trees were sent out a year, but in the last few years the average has reached 5,000,000 a year and is expected to exceed this number in the future.

The trees are planted by towns and villages along their streets and by farmers about their homes for shade and beauty and along the edges of their fields to furnish shelter for live stock and windbreaks for growing crops.

Such wholesale tree planting already has made a change in the landscape in many parts of the provinces. In time it will result in the dotting of the prairie generally with groves of forest trees.

The women of western Canada have taken perhaps more interest in this tree planting than the men.

Small Town Best Place to Live.

Certain sections of large cities are centers of continuous human misery, declares a writer in the Pittsburgh Dispatch. I refer to the congested districts where, among the crowded tenements there is scarcely room for the inhabitants to move about, to say nothing of the absence of sunshine and fresh air. The dweller in the country town may be as poorly off from a financial standpoint, but he is rich beyond comparison in his possession of the free gifts of nature which alone tend to relieve the human mind of the bitterness and discomfort of overcrowded environment.

Benefits of Painting.

Painting adds charm to the environment of the farm home. As the leaves unfold and the blossoms burst forth the buildings need to conform to the surroundings. But this is not all. A paint preserves wood, keep out moisture, and arrests the burning rays of summer heat. A good covering of paint will prolong the life and utility of a building to a considerable extent. It will also add much to the attractiveness of the farmstead and show neighbors that the farm buildings are not being run down.

Building Homes.

"No architect ought to be allowed to plan a family house unless he is married and has three children, and he should submit the plans to his wife." This was the opinion expressed by Lady Astor, M. P., when she opened an Exhibition of American Architecture at the Royal Institute of British Architects in London, recently.

Purpose Absolutely Necessary.

Intense effort comes through intense desire which allows nothing to interfere with its purpose. Life is not much without ambition of some kind and unless one is living with a purpose of some sort he is merely whiling away the time, waiting for the call of the grim reaper. Try to make your ambitions worthy ones, and then concentrate on fulfilling them. Figure out not only what you must do to realize them, but also what you must give up. If you desire strongly enough you will accomplish.—Exchange.

The Friendly Path

By Walter I. Robinson

TOO MUCH PROFANITY

TOO often cussing is taken as a matter of course. Men in high positions are frequently expert in the use of profane words, and the influence of bad language has a bad effect on both the old and the young.

Much effort is being made to increase the use of better English, and along with this propaganda it would be well to preach considerable against the use of bad language.

Directly cussing, unless the name of the Master is taken in vain, may cause no great damage. But indirectly it does much harm. When the little folk hear their parents swearing, their respect for their elders is either lessened or else the youngsters begin using it themselves as a matter of course. Not infrequently we hear little shavers, hardly able to speak plainly, using language which would put many men and women to shame.

Pike county, Kentucky, recently honored the memory of its oldest citizen, Jesse B. Osborne. Much was said in praise of this departed citizen, who crossed the bar at the age of ninety-two years, and no louder praise was heard than of his reputation for never having permitted a profane word to pass from his lips.

Judging from this event, one might assume that profanity is the rule rather than the exception. If this is the case, isn't it about time to call a halt? The old remedy, considered quite effective for curing profane habits, was to wash the boy's mouth with soap. But, from our observation, we are inclined to believe that it would be unfair to use such a remedy to stop youths from cussing. The cause too frequently rests with the parents who worry and complain because their offspring are devilish and almost beyond their control. A general mouth-washing of the elders probably would have greater effect.

Profane language is not beautiful. It does no good. It may be the stepping-stone to lives of crime which end in prison cells. For once the bars are lowered against small wrongs, the bigger wrongs are certain to be lurking near and crawl into one's life.

Less profanity would add to the joy of the world.

SCHOOL DAYS

Mother's Cook Book

"Our broad fields we plowed, we harrowed and sowed;
We toiled on together in fair and foul weather;
Our labor was blessed; now sweet is our rest."

GOOD RECIPES WORTH KEEPING

A GOOD sunshine cake is one which even the lovers of angel food will like.

Sunshine Cake.

Take one cupful of butter, two cupfuls of sugar; cream the butter, adding the sugar a spoonful at a time until all is used. Beat the yolks of eleven eggs until very light and creamy. Beat with them the sugar and butter, adding the egg a spoonful at a time. Sift two and one-half cupfuls of flour with two and one-half teaspoonfuls of baking powder, and the flour a little at a time, alternating it with one cupful of milk, flavor with one teaspoonful of vanilla. Bake in a loaf.

Apple Snow.

Steam three large tart apples and rub them through a sieve. Beat the whites of three eggs until stiff, add one-half cupful of sugar and beat again. To this meringue add the apple pulp and beat lightly. Dot with jelly and serve.

Uncommon Sense . . .

By JOHN BLAKE

BY-PRODUCTS

THE Standard Oil company has found a way to utilize all the residue from the distillation of petroleum. Gasoline, now one of the chief products of the concern was once a by-product. All the coal tar derivatives, from which many drugs and medicines are made, are by-products. So are paraffin, candles, and hundreds of other articles in every day use.

The Standard Oil company is a big concern. It has thousands of technically trained experts at work for it. It has plants all over the world—the biggest plants of the kind in existence.

Such an institution can well afford to go into the business of making by-products, and to expend a part of its almost limitless energies in getting all that is possible out of the crude oil which flows from its wells.

But the business of developing by-products is for a corporation, and a big one—not for an individual.

You may fancy that you can throw off by-products easily as you do your daily work. You may believe, if you are a bookkeeper that by spending a few nights writing moving picture scenarios you will be able to utilize all your brains, instead of part of them.

If you are a young professional man, with little to do, you may imagine that you can take up novel writing, or acting, or bridge playing as a side line, and thus get rich while you are waiting for success in your profession.

It is possible that you will get rich at one or the other of these things. But if you do, it will be because you have dropped your profession and devoted yourself to the by-product.

Anthony Hope, who wrote "The Prisoner of Zenda" was trained as a barrister, but he had no briefs, and wrote stories to while away the hours he was waiting for clients. He succeeded as a novelist, because he was born to write, but he stopped being a lawyer as soon as his first book was published.

In this world a man can learn to do one thing fairly well. The time he has is better spent on that one thing. Begin to scout around for by-products of your brain, and you will soon so scatter your energies that you do nothing well.

If you want to write "movie" scenarios, write 'em, but don't try to keep a set of books at the same time. It can't be done. The expert accountants who are making big wages today were all satisfied to spend all their spare time learning how to keep books better.

... mounted to the porch and pound...gorously on the door, which was ...ed by a woman of perhaps thirty. ...was plump and her hair was done up plainly yet attractively. It was nice brown hair, with beautiful touches of red. She was not such a vampirish looking person, but you never can tell.

"My name is—" John began, more civilly than he had intended.

"Yes, I know," she interrupted sweetly. "You're my next door neighbor. How do you do? Really I didn't expect a call so soon. But come right in."

John Ransom wanted to remonstrate, but he felt himself carried into the house by a force more irresistible than physical strength.

While he ranted at himself under his breath for being a weak old fool, John was ushered through the hall into the living room. Soft words had cooled his fire, and he had no weapons of attack. He had forgotten how to deal with women, he guessed. But he would have his say, when opportunity offered.

He found himself deposited in a most comfortable chair, while the woman settled herself on the divan. He cleared his throat to give utterance to his message, but he found no way to begin. Confound it! Why had he thrust himself into such a helpless situation? "What's a fellow going to do?" he asked himself helplessly.

Slender fingers smoothed out the velour of a divan cushion.

"I'm giving little Sue a birthday party," the woman announced, "and of course your son is coming. Sue likes him so much. Wouldn't you like to help decorate? And about the ice cream—do you think we ought to have plain vanilla or strawberry?"

Before John could get a grip on himself he blurted out:

"Well, I must confess a preference for strawberry; and I'm sure the children—"

Some time later, when John Ransom returned home, it might have been noticed that he wore an ornament unusual for him. It was a smile.

But the smile vanished when he discovered a free-for-all fight taking place in his yard. As he entered, Wilbur sent Bill Reed sprawling on the lawn and then proceeded to lay out Skinny Garrison and find a seat for himself on the latter's neck. Wilbur grinned triumphantly at his father, but the father was not enthusiastic.

"Wilbur Ransom!" he called. "You get up immediately, and you, Skinny and Bill, you make tracks about as fast as you can travel. Wilbur, I'm ashamed! What would Sue Jefferson think? A common fighter!"

"But pa—" the common fighter protested, standing up and staring wide-eyed, while Skinny and Bill decamped, both crestfallen.

In the library John had recourse to his pipe, which he pulled on with avidity. Wilbur scowled. This father of his was beyond all understanding.

"Don't scowl, son," cautioned John. "It mars your rather—er—handsome face. And straighten your tie. I've been to see Sue's mother, and there's a big birthday party coming off over there. You're invited, because Sue likes you, and so am I, because they need somebody to decorate the house. Son, you need new clothes. How'd you like a nice sailor suit? And I wonder how a brown plaid suit would look on me—something with a sort of youngish cut?"

SIT ERECT AND LIVE LONG

Writer Asserts That Correct Position Has Much to Do With the Preservation of Health.

Man is built to sit. We used to think the horse was not mechanically equipped for that posture, but an observing correspondent corrected us. The cat and dog sit, and they seem to enjoy doing so.

Many contrivances for easy and comfortable sitting are in use—rocking chairs and easy chairs in a variety of shapes. Some doubt exists as to the wisdom of the habitual use of these conveniences built for lazy comfort. It is said that when one relaxes and leans back while at work, if he has a sitting job, that his back muscles become weak and the vital organs in the lower part of his body are thrown out of place. Long-continued easy sitting of this kind is likely to develop functional weakness, we are told.

We knew a man who learned to sit right—erect, with no back support. For many years his professional duties required him to sit, and very comfortable swivel chairs were provided for him. But he acquired the habit of sitting in the correct position with no back support, and could do so for five hours at a stretch without fatigue in the muscles of his back. He lived to a great age entirely free of all abdominal disorders—stomach, bowel, liver or kidney—and attributed the fact largely to his habit of sitting erect.—Chicago Journal of Commerce.

How Adder Controls Its Fangs.

The way that poisonous snakes use their fangs to inject poison is one of the most wonderful things in Nature, and in the case of some of them—for instance, the common adder or viper, which lives all over Europe—this poison fang and its venom are only used as a means of self-defense, or for getting food.

But the adder, as a rule, does not use its poison fang when it bites the animals on which it feeds, and so it has a very curious arrangement by means of which these fangs are laid back in the roof of the mouth and out of the way of the ordinary teeth, which are used for feeding. Thus the adder can use one or other sets of teeth just as it likes, when it kills its foe, and it can tuck its fangs securely out of the way and use its ordinary teeth when it wishes to swallow a mouse. In some other poisonous snakes the fangs are fixed and can not be used in this way.

POULTRY

INTEREST IN LAMONA BREED

White-Egg-Laying General Purpose Fowl Developed by Department of Agriculture.

(Prepared by the United States Department of Agriculture.)

The Lamona, the new white-egg-laying general-purpose fowl originated and being developed by the United States Department of Agriculture, made its first public appearance at the Madison Square Garden poultry show, held in New York from January 25 to 30, where 15 of the birds were shown in the open classes. In addition to the Lamonas, and other government-bred fowls of standard breeds, the department put on an extensive exhibit consisting of models of poultry houses, a display of feathers of the standard breeds, appliances such as feed hoppers, brood coops, and a fattening battery. A series of panels, made up of photographs, charts, and placards, showed the more important standard breeds, the feeding of hens for egg production, the preparation of birds for exhibition, the advantages of early hatching, the improvement resulting from the use of a high quality sire, capons and caponizing, culling the farm flock, and the pedigree breeding of poultry.

Typical Lamona Hen.

A number of department representatives took part in the program of the show and gave information to the visitors concerning the educational exhibit. They reported an extraordinary interest on the part of the public and various poultry breeders in the Lamona breed, many persons desiring to obtain breeding birds. The department believes it necessary to perfect them still more as regards certain characteristics, and it is not likely that any will be for sale during the coming year.

GRADING EGGS IS ESSENTIAL

Ungraded, Unstandardized Product Is More or Less of an Uncertain Quantity.

When pullets begin laying, their eggs are not up to standard weight. Therefore, grading eggs is essential, not only from the producers' standpoint but from the buyers', for an ungraded, unstandardized egg is more or less of an uncertain quantity. The marketing of such a product is never advised since it puts an unnecessary handicap on the buyer who never knows what quality he will receive. The buyer in order to protect himself against loss must pay a correspondingly low price. Fresh eggs should be graded by size to meet the requirements of the market. The first grade of eggs ordinarily consists of clean, fresh, reasonably full, strong, sweet eggs with an average weight of 46 pounds net per standard 30 dozen case or over 24 ounces to the dozen. The second grade must weigh 44 pounds or more net, per 30 dozen case. The third grade must weigh 41 pounds or more net per 30 dozen case. They also make a grade of pullets' eggs which weigh 34 pounds or more net for 30 dozen or 16 ounces per dozen.

POULTRY NOTES

Apoplexy and egg-bound are almost always the result of excessive fatness among the hens.

* * *

The young chick drinks a great deal of water and plenty of it is necessary for its health and development.

* * *

The first food the chick should receive after being removed from the nest or incubator is clean, fresh water with the chill removed.

* * *

Don't feed any more mash at one time than the fowls will eat up perfectly clean. To allow more is not only wasteful but promotes unsanitary conditions.

* * *

Variety in rations is one of the most important things connected with good feeding. Sometimes even a faulty ration will give fair results because of the variety that enters into it.

* * *

Don't expect the fowls to find grit for themselves. No matter how much range they may have it is best to keep grit, charcoal, oyster shells, etc., constantly before them.

* * *

Accumulated moisture in the poultry house and an overcrowded condition are directly responsible for the colds and roup which weaken the vitality of the birds, causing them to easily succumb to other diseases.

WHITE OR BROWN EGGS PREFERRED

People in Different Cities Have Decided Preferences for One or the Other.

NO INDICATION OF QUALITY

Color of Shell Is Almost Entirely Dependent on Breed of Fowl That Laid It—New Breed Has Been Developed.

(Prepared by the United States Department of Agriculture.)

Although the color of an egg shell is no indication of the chemical composition of its content, people in different cities and in different parts of the country have rather decided preferences for either white or brown eggs. The wise producer considers the likes and dislikes of his prospective customers, even though they may be based on a mistaken notion. A brown egg is just as nutritious as a white egg and a white one is just as full of meat as a brown one, says the United States Department of Agriculture. If a person's color idiosyncrasy is satisfied, however, he may get a little more good out of the egg he eats.

Color Depends on Breed.

The color of an egg is largely, or almost entirely, dependent upon the breed of the bird that laid it. In general the American breeds—Plymouth Rocks, Rhode Island Reds and Wyandottes—lay brown eggs. As all these breeds have red ear lobes, it may be said that red lobes mean brown eggs. The brown egg is popular in New England and brings a premium on the Boston and Providence markets. Although the content of this egg is the same as that of a white one, there is a difference in the covering. The shells of brown eggs are harder and the skin just underneath the shell is tougher. In hatching, the chicks have a little harder work getting out than those that happened to develop in shells of lighter hue.

In New York the white egg brings a premium of 7 to 10 cents a dozen at some seasons, but it is probable that the New Yorker gets no more nourishment nor enjoyment out of his breakfast than the Bostonian, who pays a similar premium for brown eggs. Owners of poultry farms are well aware of this preference in the metropolis and, as a result, the commercial poultry farms in New York, New Jersey, Delaware and Pennsylvania keep fowls, mostly Leghorns, that produce white eggs. The white-egg breeds, in addition to the Leghorns, are the Black Spanish, the Minorca and all the Mediterranean breeds. All of these breeds have white ear lobes.

Typical Lamona Hen.

White Eggs Preferred.

In Philadelphia the preference is largely for white eggs and this market draws largely from the same territory as New York for its highest grade eggs. Chicago gets farm eggs from all parts of the Middle West that are sorted and graded by those who pack them. There is no pronounced preference in that city. The Pacific coast prefers white eggs, and all of the large poultry plants, for which California is famous, keep Leghorns.

The Asiatic fowls, meat breeds that are kept only in small numbers, have red lobes and lay good-sized, brown eggs. The red-lobe-brown-egg and the white-lobe-white-egg rule held good in all cases until the Department of Agriculture developed a new breed. This new breed, the Lamona, is large enough to satisfy the farmer, the back-yard poultryman and the packer, and still is attractive to the egg producer. One of its most striking peculiarities is that it has a red ear lobe and lays a white egg. With so many big markets preferring the white egg this breed, with the additional advantages of size, good quality of meat, yellow skin and legs, ought to be popular.

BREEDING FOWLS FOR COLOR

Excellent Plan Outlined for Securing Rhode Island Reds for Exhibition Purposes.

In breeding Rhode Island Reds for color in order to secure exhibition pullets, use a sire with a rich, red breast, free from shafting or lacing, and free from black ticking on wing bows and a rich red in fluff; mate him to females with dark rich red hackles with little or no black ticking and red in undercolor of back, to produce exhibition cockerels.

RATION NEEDED FOR GROWING BEST PIGS

Sow During Milking Period Should Be Fed Liberally.

Strong, Growthy Youngsters Must Have Supply of Bone and Muscle-Building Materials—Self-Feeder Recommended.

Liberal feeding of the sow during her milking period will pay for itself many times over in strong, growing pigs. The milking sow, as well as the milking cow, needs a ration rich in muscle and bone-building materials, the proteins and minerals because she must supply these materials to the sucking pigs.

"Compared with cow's milk, sow's milk contains about 82 per cent more protein (muscle and bone builder), 2 per cent more fat and 43 per cent more of lime and phosphorus (bone minerals)," says the animal husbandry department at Ames. "Is it any wonder that sows get thin, even though they are well fed, when they must produce such rich milk as this? If the sow is properly fed, she will not only give the pigs the right start, but she herself will lose less weight."

Sow Must Furnish Rich Milk to Give Pigs Right Start.

One good ration recommended by the Iowa experiment station is: All the corn the sow and pigs clean up, and a slop mixture of three parts of wheat middlings to one part of 60 per cent tankage. Some lime, charcoal and salt may be allowed in addition. Self-feeding is recommended. When sows can be put on pasture, that is of course desirable, and then one-half of the slop mixture will be enough. Sudden changes in ration must be avoided. There is little danger of overfeeding during the milking period.

MILK IS QUITE NOURISHING

Usually Plentiful on Average Farm and Chickens Should Receive Full Allowance.

Milk is usually plentiful, on the farm, and the chickens should receive the benefit of this. Give the growing stock a feast of milk every day or two—no matter whether it be sweet, skimmed or sour. It is also good for the old fowls, especially those in molt. But with all kinds of fowls, and especially the growing stock, care should be taken to place no more before them at a time than they will consume in just a few minutes, for otherwise it soon becomes contaminated and unfit for the fowls.

FEEDING AT FARROWING TIME

Sow Should Receive Nothing But Warm Water for Twenty-four Hours After Pigs Come.

For twenty-four hours after farrowing, the sow should receive no feed, but plenty of good warm water. She should then be started on a thin slop of bran or ground oats, ground barley and a little tankage, the amount to be gradually increased, taking about ten days to get her on full feed. After ten days or two weeks, give the sow all the grain she will clean up twice or three times a day.

FEEDING SKIMMILK TO PIGS

Difficult to Put Exact Valuation on It as Supplemental Feed—One Excellent Rule.

It is difficult to put an exact valuation on skim milk as a supplemental feed with pigs. The rule which has often been laid down is as follows: To find the value of 100 pounds of skim milk when fed alone, multiply the market price of live hogs in cents a pound by five. If fed in combination with corn or barley, multiply by six.

COWS FRESHENING IN FALL

Records Show Animals Produce More Milk and Butterfat and Make Best Returns.

The time of the year that a cow freshens seems to have considerable to do with the profit she returns, says the United States Department of Agriculture. An analysis of the figures obtained from many cow-testing associations shows that in most sections the cows that freshen in the fall and early winter produce the most milk and butterfat and bring in the greatest income over cost of feed.

Make Good Greens.

Turnip tops make almost as good greens as mustard. Sow the early turnips thickly and then thin out for greens.

Plan to Save Money.

Manure saved is money saved. Spreading it as made is the best practice.

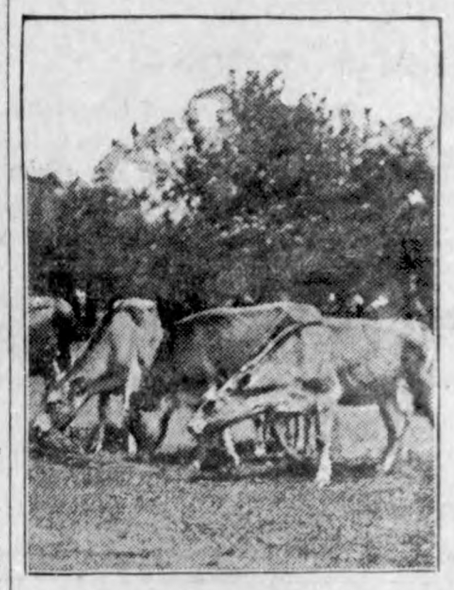
LIVE STOCK FACTS

OAK LEAF POISONING DANGER

Most Fatal Cases Occur in Spring When There Is a Scarcity of Green Forage.

(Prepared by the United States Department of Agriculture.)

Oak leaves, if eaten continuously by cattle, produce a sickness which frequently proves fatal, investigations conducted by specialists of the United States Department of Agriculture show. Most oak-leaf poisoning, the specialists say, occurs in the spring, for at that time there is a scarcity of green forage on many ranges and the craving which stock have for green food leads them to eat the leaves in excessive amounts. In order to cause sickness, however, oak leaves must be eaten almost exclusively. If eaten with other feed, the animals are not injured. It has been found experimentally that as small a quantity as 3 pounds daily of alfalfa hay feed in connection with oak leaves prevented poisoning.



Where a Small Quantity of Alfalfa Is Fed in Connection With Oak Leaves the Animals Are Not Injured.

Observations on the range and experimental feeding both show that some cattle may eat oak leaves for a long time with no definite bad effects, and some will even eat them exclusively, with no harm. Generally speaking, those that are injured show the results only after eating a considerable quantity through a rather prolonged period, usually from 16 to 35 days. The specialists point out that the oaks on many ranges furnish a most important element in summer feed when additional sources of forage are available, but they urge that care be exercised during the spring that cattle be not admitted to summer range at too early a date, for oak leaves are well advanced before the appearance of the grasses.

GOAT MEAT QUITE SUPERIOR

Most of Product Reaches Market as Mutton and Is Distinguished by Sweetness.

Goat meat is seldom found on the market as such, yet the average number of goats slaughtered each year from 1916 to 1920, inclusive, was 141,487. It is probable that most of this meat reaches the consumer as mutton, which it resembles closely, as there are few cities that require it to be marketed under its own name. In cities and towns adjacent to the range country, however, Angora wethers are freely marketed as such and the meat is consumed without discrimination by the buyer. When received in large numbers these wethers usually sell at about 60 per cent of the price paid for sheep wethers.

The reduced price of goat meat is doubtless attractive to the consumer, whether he knows what he is getting or thinks he is buying mutton. According to Farmers' Bulletin 1203, The Angora Goat, recently issued by the United States Department of Agriculture, goat meat is usually superior to mutton that can be bought at the same price. Some consumers say that they are able to distinguish it from lamb and mutton by a characteristic sweetness.

GIVE RAM RIGHT ATTENTION

During Breeding Season He Should Have Supply of Grain and Access to Good Pasture.

The ram needs grain for several weeks before and during the breeding season. At least a pound a day of equal parts of oats and bran should be fed, together with good quality alfalfa or clover hay. Do not keep him closely confined, but allow him access to pasture. Avoid heavy feeding of silage or roots during the breeding season.

Small Digestive Tract.

The digestive tract of the calf is comparatively small, therefore frequent feedings of small amounts during the first month is imperative.

Cattle and Sheep on Clover.

Cattle and sheep do well on clover pasture, but should not be turned in when hungry or while a dew is on.

Healthy Pigs on Clover.

Pigs on clover are healthy, and have good bone and constitution—points of special importance in breeding stock.

Now is your chance to buy Ivory Goods at 50 per cent discount, at E. S. D. Kahrs. 2-wc

Mrs. Dick Bamman, of Garner will live here with her mother, Mrs. H. Schuldt during the summer months as Dick will work with the paving crew this year.

Mrs. C. V. McCullough, of Garner and her mother Mrs. Marshall were visiting at the G. P. McCullough home here the latter part of last week.

Mr. H. G. Brunes, of Goodell, was a Klemme business caller Monday and while here called at the Times to order some advertising and also to renew his subscription.

Ivory Toilet Goods at 50 per cent discount for 15 days only. E. S. D. Kahrs. 2-wc

D. D. Ross came down from Garner Wednesday to help out on the farm as one of the Bell boys is sick. Dave will exercise a little of that winter fat off during the spring work.

J. P. Larsen & Sons, of the City Meat Market are doing a lot of painting the last week. They are painting and remodeling the interior of their store.

Ray White went to Forest City on Monday on business. We are informed that "Pat" will canvass that territory for the Fountain Mop Co., selling their floor mops and oil.

Rev. Bergmann and Rev. Gedye went to Britt Monday to attend the meeting of the Hancock County Ministerial Association which was in session there that day. The next meeting will be held at Kanawha about the middle of May.

Chris Blumer and Walt Schultz left Monday in Chris' car for Minnesota and Wisconsin. Walt has business matters to look after in Minnesota and Chris is going into Wisconsin to canvass for the Fountain Mop Company.

We wish to correct an error which appeared in last week's Times which stated that the married peoples invitation dance was given by Mesdames F. H. Ridder and Wes Schuldt. The names were reported wrong and other parties should have been given credit. We beg pardon.

A real estate transaction occured last week when M. O. Hocum disposed of his residence property on Main Street to Henry Lewis. Mr. Hocum will go into business at Des Moines and the family will move there in a short time. Henry has acquired a fine residence proerty and one of the most desirable in the town.

For 15 days only all Ivory Toilet Articles at 50 per cent discount at E. S. D. Kahrs. 2wc

While delivering a piano on the truck from Wellemeyer's, Dad Yahnke and Billie Kraus got stuck in the mud over near Ventura the other day. A fellow who drove by them in a fliver said Billie was sitting at the piano playing, "Home Sweet Home" and "It's a Long, Long Way to Tipperary."

A large assortment of Ivory Mirrors, Brushes, Photo Frames, Jewel Boxes, Hair Receivers, Powder Boxes, Trays, Combs, Manicuring Sets, etc., etc., at 50 per cent discount, for 15 days only at E. S. D. Kahrs. 2wc

A business transaction occured in this city last Friday when Walter Schultz sold out his interest in the Gram & Schultz Auto Co., to Ben Coobs, who has been working there for some time. We have not learned what Walt intends to do but hope that he sees fit to remain in Klemme. Ben is well known and well liked, a good mechanic and electrician and the new fim of Gram & Coobs should do well.

Fred Haupt is about the only one in Klemme who has done any great amount of building this spring. So far Fred has put up three new houses, all built high and dry so the cellars will not get full of water. The houses all face the south and a good view is obtained from the porch of any of them. The houses are perhaps all tenanted by this time as they are the nicest looking bird houses we have seen this spring.

The entertainment given by the Odd Fellow and Rebeka lodges of this city last Thursday evening was very successful. A packed house greeted the appearance of the Magner children who came over from the Odd Fellows Orphan home at Mason City to give readings, songs and music. A banquet was served after the entertainment to the lodges and invited guests. The Odd Fellow organization are doing wonderful work at the Home at Mason City as is evident by the fine appearance and education shown by the Magner children.

Sealed bids for painting Town Hall and Band Stand two coat work and Park Seats one coat work, to be filed with Town Clerk not later than April 22nd, 1922.

Council reserves right to reject any and all bids.

JOHN N. DAY,
Clerk. 2w

Every two minutes a divorce suit is filed in the country. Thereby proving that one is born every minute.
